PROCEEDINGS AND DEBATES OF THE SIXTY-EIGHTH CONGRESS
FIRST SESSION

## SENATE

THURSDAY, *June 5, 1924*

*(Legislative day of Tuesday, June 3, 1924)*

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had concurred in Senate Concurrent Resolution No. 18, providing for the printing of additional copies of the revenue act of 1924.

The message also announced that the House had passed the following bills and joint resolutions of the Senate:

S. 113. An act changing the name of Keokuk Street in the County of Washington, D. C., to Military Road;

S. 699. An act authorizing the addition of certain lands to the Medicine Bow National Forest, Wyo., and for other purposes;

S. 1203. An act to amend an act entitled "An act authorizing an appropriation to meet proportionate expenses of providing a drainage system for Piute Indian lands in the State of Nevada within the Newlands reclamation project of the Reclamation Service," approved February 14, 1923;

S. 1308. An act authorizing an appropriation to enable the Secretary of the Interior to purchase a tract of land, with sufficient water right attached, for the use and occupancy of the Temoak Band of homeless Indians, located at Ruby Valley, Nev.;

S. 1785. An act to amend an act entitled "An act for the regulation of the practice of dentistry in the District of Columbia, and for the protection of the people from empiricism in relation thereto," approved June 6, 1892, and acts amendatory thereof;

S. 2236. An act to designate the time and place of holding terms of the United States district court in the first division of the district at Kansas City;

S. 2699. An act to amend an act creating the Custer State Park Game Sanctuary in the State of South Dakota;

S. 3111. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes;

S. 3116. An act to authorize the Choctaw, Oklahoma & Gulf Railway Co. and the Chicago, Rock Island & Pacific Railway Co. to construct a bridge across the White River, near the city of De Valls Bluff, Ark.;

S. 3263. An act to provide for the inspection of the battle fields in and around Fredericksburg and Spotsylvania Court House, Va.;

S. 3355. An act granting the consent of Congress to the Counties of Marion and Florence, in the State of South Carolina, to construction a bridge across the Peedee River at or near Savage Landing, S. C.;

S. J. Res. 90. Joint resolution providing an extension of time for payment by entrymen of lands on the Fort Assinniboine abandoned military reservation in the State of Montana;

S. J. Res. 103. Joint resolution authorizing expenditure of the Fort Peck 4 per cent fund now standing to the credit of the Fort Peck Indians of Montana in the Treasury of the United States;

S. J. Res. 106. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of an equestrian statue of General San Martin which the people of Argentina have presented to the United States; and

S. J. Res. 115. Joint resolution to provide for the free transmission through the mails of certain publications for the blind.

The message further announced that the House had passed a bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, in which it requested the concurrence of the Senate.

DIRECTOR OF THE COLUMBIA HOSPITAL FOR WOMEN

The PRESIDENT pro tempore. In accordance with the provisions of the act of Congress of June 10, 1872, touching the appointment of directors of the Columbia Hospital for Women and Lying-in Asylum, the Chair appoints the Senator from Delaware [Mr. BALL] to fill the vacancy caused by the death of the late Senator Dillingham.

REPORTS OF COMMITTEES

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (S. 3281) for the relief of Ralph Ole Wright and Varina Belle Wright, reported it with an amendment and submitted a report (No. 747) thereon.

Mr. HARRELD, from the Committee on Claims, to which was referred the bill (S. 708) for the relief of various owners of vessels and cargoes damaged by the U. S. S. *Lamberton*, reported it with an amendment and submitted a report (No. 766) thereon.

He also, from the same committee, to which was referred the bill (S. 1221) for the relief of J. W. Neil, reported it with amendments and submitted a report (No. 748) thereon.

He also, from the Committee on Indian Affairs, to which was referred the bill (S. 1392) authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims, reported it with amendments and submitted a report (No. 750) thereon.

He also, from the same committee, to which was referred the bill (S. 3247) providing for the payment of any unappropriated moneys belonging to the Apache, Kiowa, and Comanche Indians to Jacob Crew, reported it without amendment and submitted a report (No. 751) thereon.

He also, from the same committee, to which was referred the bill (S. 3080) for the relief of the Uintah and White River Tribes of Ute Indians of Utah, reported it with an amendment and submitted a report (No. 752) thereon.

Mr. HALE, from the Committee on Naval Affairs, to which was referred the bill (S. 1569) to compensate Lieut. L. D. Webb, United States Navy, for damages to household effects while being transported by Government conveyance, reported it without amendment and submitted a report (No. 753) thereon.

Mr. CAPPER, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 2976) to authorize the Comptroller General of the United States to relieve Fred A. Gosnell, former disbursing clerk, Bureau of the Census, and the estate of Richard C. Lappin, former supervisor of the Fourteenth Decennial Census for the Territory of Hawaii, and special disbursing agent, in the settlement of certain accounts (Rept. No. 754);

A bill (H. R. 914) granting six months' gratuity pay to Stansfield A. and Elizabeth G. Fuller (Rept. No. 755); and

A bill (H. R. 1326) for the relief of Clara T. Black (Rept. No. 756).

Mr. MAYFIELD, from the Committee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 6506) for the relief of John Baumen (Rept. No. 757); and

A bill (H. R. 7052) for the relief of Geston P. Hunt (Rept. No. 758).

Mr. McNARY, from the Committee on Commerce, to which was referred the bill (S. 3352) to provide for the appointment of an appraiser of merchandise at Portland, Oreg., reported it without amendment and submitted a report (No. 764) thereon.

He also, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 4830) to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor, reported it without amendment.

Mr. ODDIE, from the Committee on Naval Affairs, to which was referred the bill (S. 1807) to provide for the creation, organization, administration, and maintenance of a Naval Reserve and a Marine Corps Reserve, reported it with amendments and submitted a report (No. 749) thereon.

Mr. BAYARD, from the Committee on Claims, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 4760) for the relief of the estate of C. M. Cole (Rept. No. 759);

A bill (H. R. 5819) for the relief of the estate of the late Capt. D. H. Tribou, chaplain United States Navy (Rept. No. 760);

A bill (H. R. 7420) for the relief of Albert E. Laxton (Rept. No. 761); and

A bill (H. R. 8258) for the relief of Capt. Frank Geere (Rept. No. 762).

Mr. SWANSON, from the Committee on Naval Affairs, to which was referred the bill (S. 3433) for the relief of Lieut. Richard Evelyn Byrd, jr., United States Navy, reported it without amendment and submitted a report (No. 763) thereon.

Mr. TRAMMELL, from the Committee on Claims, to which was referred the bill (S. 615) for the relief of Grover Ashley, reported it with amendments and submitted a report (No. 767) thereon.

He also, from the same committee, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (H. R. 1682) for the relief of the Stone Towing Line (Rept. No. 768); and

A bill (H. R. 6241) for the relief of Lieut. E. J. McAllister (Rept. No. 769).

ENROLLED BILLS PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on June 4, 1924, that committee presented to the President of the United States enrolled bills of the following titles:

S. 112. An act providing for a comprehensive development of the park and playground system of the National Capital;

S. 709. An act for the relief of the Commercial Pacific Cable Co.; and

S. 799. An act for the relief of F. A. Maron.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of California:

A bill (S. 3465) granting a pension to Sophronia O'Neill; to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 3466) granting an increase of pension to Sarah E. Richards; and

A bill (S. 3467) granting an increase of pension to Maria A. Martindale; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3468) for the relief of the estate of Jesus Maria Vigil; to the Committee on Claims.

A bill (S. 3469) granting increase of pension to certain maimed soldiers, and for other purposes; to the Committee on Pensions.

By Mr. DILL:

A bill (S. 3470) conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Okanogan and Colville Indians may have against the United States, and for other purposes; to the Committee on Indian Affairs.

By Mr. McNARY:

A bill (S. 3471) granting an increase of pension to Henry C. King; to the Committee on Pensions.

By Mr. KEYES:

A bill (S. 3472) granting an increase of pension to Mary A. Whitcher; to the Committee on Pensions.

By Mr. COPELAND:

A bill (S. 3473) granting a pension to Charles D. Stearns; to the Committee on Pensions.

By Mr. WADSWORTH:

A bill (S. 3474) for the relief of the R. S. Howard Co.; to the Committee on Claims.

By Mr. LODGE:

A joint resolution (S. J. Res. 145) extending the sovereignty of the United States over Swains Island and making the island a part of American Samoa; to the Committee on Foreign Relations.

NATIONAL CEMETERY ROAD AT VICKSBURG

Mr. STEPHENS. Mr. President, I ask unanimous consent for the present consideration of House bill 4816. It will take just a moment.

The PRESIDENT pro tempore. The Senator from Mississippi asks unanimous consent for the present consideration of House bill 4816. It will be read for information.

The bill (H. R. 4816) authorizing the Secretary of War to permit the city of Vicksburg, Miss., to construct and maintain water mains on and under the National Cemetery Road at Vicksburg, Miss., was read as follows:

*Be it enacted, etc.*, That the Secretary of War be, and he is hereby, authorized and empowered, under such terms and conditions as are deemed advisable by him, to permit the city of Vicksburg, Miss., to construct, operate, and maintain water mains in connection with the waterworks of said city, on and under the National Cemetery Road at Vicksburg, Miss.

Mr. SMOOT. Is it a unanimous report?

Mr. STEPHENS. It is a unanimous report and is favorably reported upon by the Secretary of War.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 6426) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, which had been reported from the Committee on Pensions with amendments.

The PRESIDENT pro tempore. The Secretary will state the first committee amendment.

The first amendment of the Committee on Pensions was, on page 1, after line 5, to strike out:

The name of Clarence L. Wimer, late of Company A, Signal Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 42, after line 8, to strike out:

The name of James A. Childers, late of Company I, Eighteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 43, after line 2, to strike out:

The name of Joseph Houser, late of Company K, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

Mr. BROOKHART obtained the floor.

Mr. BURSUM. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Adams | Ernst | Kendrick | Sheppard |
| Ashurst | Ferris | King | Shields |
| Borah | Fess | Ladd | Shipstead |
| Brandegee | Frazier | La Follette | Simmons |
| Brookhart | George | Lodge | Smith |
| Broussard | Gerry | McKellar | Smoot |
| Bruce | Glass | McLean | Stanfield |
| Bursum | Gooding | McNary | Stephens |
| Cameron | Hale | Moses | Sterling |
| Capper | Harreld | Neely | Swanson |

Mr. CURTIS. I wish to announce that the Senator from Wyoming [Mr. WARREN], the Senator from Wisconsin [Mr. LENROOT], the Senator from Colorado [Mr. PHIPPS], the Senator from New Hampshire [Mr. KEYES], and the Senator from Delaware [Mr. BAYARD] are engaged in a meeting of the Committee on Appropriations.

Mr. NEELY. I was requested to announce that the Senator from Missouri [Mr. SPENCER] and the Senator from Indiana [Mr. WATSON] are engaged in a hearing of the Mayfield case before the Committee on Privileges and Elections.

The PRESIDENT pro tempore. Seventy Senators have answered the roll call. A quorum is present.

Mr. EDGE. Mr. President, will the Senator from Iowa yield to me?

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. BROOKHART. I yield.

### POSTMASTERS AND POSTAL EMPLOYEES (S. DOC. NO. 131)

Mr. EDGE. It is my desire to call up the conference report on the bill (S. 1898) reclassifying the salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes. It being a privileged matter, and it being necessary to have the report acted on by the House, I would like to have it disposed of at this time.

Mr. BROOKHART. I yield that the report may be presented.

The PRESIDENT pro tempore. The Chair lays before the Senate the conference report on Senate bill 1898.

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses to the bill (S. 1898) reclassifying the salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes, having met, after a full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recedes from its disagreement to the amendment of the House and agrees to the same with an amendment as follows: In lieu of the matter proposed by the House amendment insert the following:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:*

"TITLE I.—RECLASSIFICATION OF SALARIES OF POSTAL EMPLOYEES

"SECTION 1. That on and after July 1, 1924, postmasters and employees of the Postal Service shall be reclassified and their salaries and compensation readjusted, except as otherwise provided as follows:

"CLASSIFICATION OF POSTMASTERS

"That postmasters shall be divided into four classes, as follows:

"The first class shall embrace all those whose annual salaries are $3,200 or more.

"The second class shall embrace all those whose annual salaries are less than $3,200, but not less than $2,400.

"The third class shall embrace all those whose annual salaries are less than $2,400, but not less than $1,100.

"The fourth class shall embrace all postmasters whose annual compensation amounts to less than $1,100, exclusive of commissions on money orders issued.

"The respective compensation of postmasters of the first, second, and third classes shall be annual salaries, graded in even hundreds of dollars, and payable in semimonthly payments to be ascertained and fixed by the Postmaster General from their respective quarterly returns to the General Accounting Office, or copies or duplicates thereof to the First Assistant Postmaster General, for the calendar year immediately preceding the adjustment, based on gross postal receipts at the following rates, namely:

"First class—$40,000, but less than $50,000, $3,200; $50,000, but less than $60,000, $3,300; $60,000, but less than $75,000, $3,400; $75,000, but less than $90,000, $3,500; $90,000, but less than $120,000, $3,600; $120,000, but less than $150,000, $3,700; $150,000, but less than $200,000, $3,800; $200,000, but less than $250,000, $3,900; $250,000, but less than $300,000, $4,000; $300,000, but less than $400,000, $4,200; $400,000, but less than $500,000, $4,500; $500,000, but less than $600,000, $5,000; $600,000, but less than $7,000,000, $6,000; $7,000,000 and upward, $8,000.

"Second class—$8,000, but less than $12,000, $2,400; $12,000, but less than $15,000, $2,500; $15,000, but less than $18,000, $2,600; $18,000, but less than $22,000, $2,700; $22,000, but less than $27,000, $2,800; $27,000, but less than $33,000, $2,900; $33,000, but less than $40,000, $3,000.

"Third class—$1,500, but less than $1,600, $1,100; $1,600, but less than $1,700, $1,200; $1,700, but less than $1,900, $1,300; $1,900, but less than $2,100, $1,400; $2,100, but less than $2,400, $1,500; $2,400, but less than $2,700, $1,600; $2,700, but less than $3,000, $1,700; $3,000, but less than $3,500, $1,800; $3,500, but less than $4,200, $1,900; $4,200, but less than $5,000, $2,000; $5,000, but less than $6,000, $2,100; $6,000, but less than $7,000, $2,200; $7,000, but less than $8,000, $2,300: *Provided*, That when the gross postal receipts of a post office of the third class for each of two consecutive calendar years are less than $1,500, or when in any calendar year the gross postal receipts are less

than $1,400, it shall be relegated to the fourth class: *Provided*, That postmasters at offices of the third class shall be granted for clerk hire an allowance of $240 per annum where the salary of the postmaster is $1,100 per annum; an allowance of $330 per annum where the salary of the postmaster is $1,200 per annum; an allowance of $420 per annum where the salary of the postmaster is $1,300 per annum; an allowance of $510 per annum where the salary of the postmaster is $1,400 per annum; an allowance of $600 per annum where the salary of the postmaster is $1,500 per annum; an allowance of $690 per annum where the salary of the postmaster is $1,600 per annum; an allowance of $780 per annum where the salary of the postmaster is $1,700 per annum; an allowance of $870 per annum where the salary of the postmaster is $1,800 per annum; an allowance of $960 per annum where the salary of the postmaster is $1,900 per annum; an allowance of $1,050 per annum where the salary of the postmaster is $2,000 per annum; an allowance of $1,140 per annum where the salary of the postmaster is $2,100 per annum; an allowance of $1,400 per annum where the salary of the postmaster is $2,200 per annum; an allowance of $1,600 per annum where the salary of the postmaster is $2,300 per annum: *Provided further*, That the Postmaster General may modify these allowances for clerk hire to meet varying needs, but in no case shall they be reduced by such modification more than 25 per cent: *Provided, however*, That the aggregate of such allowances, as modified, shall not exceed in any fiscal year the aggregate of allowances herein prescribed for postmasters of the third class;

"That section 4 of the act of March 3, 1883 (22 Stats., p. 528), entitled "An act to modify the postal money-order system, and for other purposes," as amended by the act approved June 29, 1886 (24 Stats., p. 87), entitled "An act to make the allowances for clerk hire to postmasters of the first and second class post offices cover the cost of clerical labor in money-order business, and for other purposes," as amended by section 3 of the act approved January 27, 1894 (28 Stats. p. 31), entitled "An act to improve the methods of accounting in the Post Office Department, and for other purposes," be amended so that the third paragraph of the last-mentioned section shall read as follows:

"The allowances for clerk hire made to postmasters of the first, second, and third class post offices by the Postmaster General out of the annual appropriations therefor shall cover the cost of clerical service of all kinds in such post offices, including the cost of clerical labor in the money-order business, and excepting allowances for separating mails at third-class post offices, as provided by law.

"Fourth class: The compensation of postmasters of the fourth class shall be fixed upon the basis of the whole of the box rents collected at their offices and commissions upon the amount of canceled postage-due stamps and on postage stamps, stamped envelopes, and postal cards canceled, on matter actually mailed at their offices, and on the amount of newspaper and periodical postage collected in money, and on the postage collected in money on identical pieces of third and fourth class matter mailed under the provisions of the act of April 28, 1904, without postage stamps affixed, and on postage collected in money on matter of the first class mailed under provisions of the act of April 24, 1920, without postage stamps affixed, and on amounts received from waste paper, dead newspapers, printed matter, and twine sold, at the following rates, namely:

"On the first $75 or less per quarter the postmaster shall be allowed 160 per cent on the amount; on the next $100 or less per quarter, 85 per cent; and on all the balance, 75 per cent, the same to be ascertained and allowed by the General Accounting Office in the settlement of the accounts of such postmasters upon their sworn quarterly returns: *Provided*, That when the total compensation of any postmaster at a post office of the fourth class for the calendar year shall amount to $1,100, exclusive of commissions on money orders issued, and the receipts of such post office for the same period shall aggregate as much as $1,500, the office shall be assigned to its proper class on July 1, following, and the salary of the postmaster fixed according to the receipts: *Provided further*, That in no case shall there be allowed any postmaster of this class a compensation greater than $300 in any one of the first three quarters of the fiscal year, exclusive of money-order commissions, and in the last quarter of each fiscal year there shall be allowed such further sums as he may be entitled to under the provisions of this act, not exceeding for the whole fiscal year the sum of $1,100, exclusive of money-order commissions: *And provided further*, That whenever unusual conditions prevail the Postmaster General, in his discretion, may advance any post office from the fourth class to the appropriate class indicated by the receipts of the preceding quarter, notwithstanding the proviso which requires the compensation of fourth-class postmasters to reach $1,100 for the calendar year, exclusive of commissions on money-order business, and that the receipts of such post office for the same period shall aggregate as much as $1,500 before such advancement is made: *And provided further*, That when the Postmaster General has exercised the authority herein granted he shall, whenever the receipts are no longer sufficient to justify retaining such post office in the class to which it has been advanced, reduce the grade of such office to the appropriate class indicated by its receipts for the last preceding quarter.

"SEC. 2. That post-office inspectors shall be divided into six grades, as follows: Grade 1—salary, $2,800; grade 2—salary, $3,000; grade 3—salary, $3,200; grade 4—salary, $3,500; grade 5—salary, $3,800; grade 6—salary, $4,000, and there shall be 15 inspectors in charge at $4,500: *Provided*, That in the readjustment of grades for inspectors to conform to the grades herein provided, inspectors who are now in present grades 1 and 2 shall be included in grade 1; inspectors who are now in present grade 3 shall be included in grade 2; inspectors who are now in present grade 4 shall be included in grade 3; inspectors who are now in present grade 5 shall be included in grade 4; inspectors who are now in present grade 6 shall be included in grade 5; and inspectors who are now in present grade 7 included in grade 6: *Provided further*, That inspectors shall be promoted successively to grade 5 at the beginning of the quarter following a year's satisfactory service in the next lower grade, and not to exceed 35 per cent of the force to grade 6 for meritorious service after not less than one year's service in grade 5; and the time served by inspectors in their present grade shall be included in the year's service required for promotion in the grades provided herein, except as to inspectors in present grade 1.

"Inspectors and supervisory employees of the Railway Mail Service and post offices shall be paid their actual expenses as fixed by law.

"That clerks at division headquarters of post-office inspectors shall be divided into six grades, as follows:

"Grade 1—salary, $1,900; grade 2—salary, $2,000; grade 3—salary $2,150; grade 4—salary, $2,300; grade 5—salary, $2,450; grade 6—salary, $2,600; and there shall be one chief clerk at each division headquarters at a salary of $3,000: *Provided*, That in the readjustment of grades for clerks at division headquarters to conform to the grades herein provided, clerks who are now in present grade 1 shall be included in grade 1; clerks who are now in present grade 2 shall be included in grade 2; clerks who are now in present grade 3 shall be included in grade 3; clerks who are now in present grade 4 shall be included in grade 4; clerks who are now in present grade 5 shall be included in grade 5; and clerks who are now in present grade 6 shall be included in grade 6: *Provided further*, That clerks at division headquarters shall be promoted successively to grade 5 at the beginning of the quarter following a year's satisfactory service in the next lower grade and not to exceed 35 per cent of the force to grade 6 for meritorious service after not less than one year's service in grade 5, and the time served by clerks in their present grades shall be included in the year's service required for promotion in the grades provided herein: *And provided further*, That whenever in the discretion of the Postmaster General the needs of the service require such action, he is authorized to transfer clerks or carriers in the city City Delivery Service from post offices at which division headquarters of post-office inspectors are located to the position of clerk at such division headquarters after passing a noncompetitive examination at a salary not to exceed $2,300. After such transfer is made effective clerks so transferred shall be eligible for promotion to the grades of salary provided for clerks at division headquarters of post-office inspectors. Hereafter when any clerk in the office of division headquarters in the post-office inspection service is absent from duty for any cause other than leave with pay allowed by law, the Postmaster General, under such regulations as he may prescribe, may authorize the employment of a substitute for such work, and payment therefor from the lapsed salary of such absent clerk at a rate not to exceed the grade of pay of the clerk absent without pay.

"SEC. 3. That at offices of the second class the annual salaries of assistant postmasters shall be in even hundreds of dollars, based on the gross postal receipt for the preceding calendar year, as follows: $8,000, but less than $10,000, $2,200; $10,000, but less than $12,000, $2,200; $12,000, but less than $15,000, $2,200; $15,000, but less than $18,000, $2,300; $18,000, but less than $22,000, $2,300; $22,000, but less than $27,000, $2,400; $27,000, but less than $33,000, $2,400; $33,000, but less than $40,000, $2,500.

"That at offices of the first class the annual salaries of the employees, other than those in the automatic grades, shall

be in even hundreds of dollars, based on the gross postal receipts for the preceding calendar year, as follows:

"Receipts $40,000, but less than $50,000—assistant postmaster, $2,600; superintendent of mails, $2,400. Receipts $50,000, but less than $60,000—assistant postmaster, $2,600; superintendent of mails, $2,400. Receipts $60,000, but less than $75,000—assistant postmaster, $2,600; superintendent of mails, $2,400. Receipts $75,000, but less than $90,000—assistant postmaster, $2,700; superintendent of mails, $2,500. Receipts $90,000, but less than $120,000—assistant postmaster, $2,700; superintendent of mails, $2,600; foremen, $2,500. Receipts $120,000, but less than $150,000—assistant postmaster, $2,800; superintendent of mails, $2,700; foremen, $2,500. Receipts $150,000, but less than $200,000—assistant postmaster, $2,900; superintendent of mails, $2,800; foremen, $2,500. Receipts $200,000, but less than $250,000—assistant postmaster, $3,000; superintendent of mails, $2,900; foremen, $2,500. Receipts $250,000, but less than $300,000—assistant postmaster, $3,100; superintendent of mails, $3,000; assistant superintendent of mails, $2,600; foremen, $2,500. Receipts $300,000, but less than $400,000—assistant postmaster, $3,200; superintendent of mails, $3,100; assistant superintendent of mails, $2,600; foremen, $2,500. Receipts $400,000, but less than $500,000—assistant postmaster, $3,300; superintendent of mails, $3,200; assistant superintendent of mails, $2,600; foremen, $2,500. Receipts $500,000, but less than $600,000—assistant postmaster, $3,500; superintendent of mails, $3,300; assistant superintendent of mails, $2,600; foremen, $2,500; postal cashier, $2,900; money-order cashier, $2,600. Receipts $600,000, but less than $1,000,000—assistant postmaster, $3,700; superintendent of mails, $3,500; assistant superintendent of mails, $2,800; foremen, $2,500; postal cashier, $3,100; money-order cashier, $2,800. Receipts, $1,000,000, but less than $2,000,000—assistant postmaster, $3,900; superintendent of mails, $3,700; assistant superintendents of mails, $2,700, $2,800, and $3,100; foremen, $2,500 and $2,600; postal cashier, $3,300; assistant cashiers, $2,600; money-order cashier, $3,000; bookkeepers, $2,400; station examiners, $2,400. Receipts $2,000,000, but less than $3,000,000—assistant postmaster, $4,000; superintendent of mails, $3,800; assistant superintendents of mails, $2,700, $2,800, $3,000, and $3,300; foremen, $2,500 and $2,600; postal cashier, $3,400; assistant cashiers, $2,600 and $2,900; money-order cashier, $3,100; bookkeepers, $2,400 and $2,500; station examiners, $2,600. Receipts $3,000,000, but less than $5,000,000—assistant postmaster, $4,100; superintendent of mails, $3,900; assistant superintendents of mails, $2,700, $2,800, $3,100, and $3,500; foremen, $2,500 and $2,600; postal cashier, $3,600; assistant cashiers, $2,600, $2,800, and $3,100; money-order cashier, $3,300; bookkeepers, $2,400 and $2,500; station examiners, $2,600 and $2,800. Receipts $5,000,000, but less than $7,000,000—assistant postmaster, $4,300; superintendent of mails, $4,100; assistant superintendents of mails, $2,700, $2,800, $3,100, $3,300, and $3,700; foremen, $2,500 and $2,600; postal cashier, $3,800; assistant cashiers, $2,600, $2,900, and $3,100; money-order cashier, $3,500; bookkeepers, $2,400, $2,500, and $2,600; station examiners, $2,600 and $2,800. Receipts $7,000,000, but less than $9,000,000—assistant postmaster, $4,600; superintendent of mails, $4,300; assistant superintendents of mails, $2,700, $2,800, $3,100, $3,500, and $3,900; foremen, $2,500 and $2,600; postal cashier, $4,000; assistant cashiers, $2,600, $2,800, $3,100, and $3,400; money-order cashier, $3,600; bookkeepers, $2,400, $2,500, and $2,600; station examiners, $2,600 and $2,800. Receipts $9,000,000, but less than $20,000,000—assistant postmasters, $4,700 and $4,800; superintendent of mails, $4,500; assistant superintendents of mails, $2,800, $2,900, $3,100, $3,500, $3,700, and $4,100; foremen, $2,500, $2,600, and $2,700; postal cashier, $4,100; assistant cashiers, $2,600, $2,800, $3,200, and $3,600; money-order cashier, $3,700; bookkeepers, $2,400, $2,500, $2,600, and $2,800; station examiners, $2,600 and $2,800. Receipts $20,000,000 and upward—assistant postmasters, $4,800 and $4,900; superintendent of mails, $4,700; assistant superintendents of mails, $2,800, $2,900, $3,100, $3,500, $3,900, and $4,100; superintendent of delivery, $4,700; assistant superintendents of delivery, $2,800, $2,900, $3,100, $3,500, $3,900, and $4,100; foremen, $2,500, $2,600, and $2,700; superintendent of registry, $4,300; assistant superintendents of registry, $2,800, $2,900, $3,100, $3,500, and $4,100; superintendent of money order, $4,300; assistant superintendent of money order, $4,100; auditor, $4,000; postal cashier, $4,300; assistant cashiers, $2,600, $2,800, $3,100, $3,300, and $3,800; money-order cashier, $3,900; bookkeepers, $2,400, $2,600, $2,800, and $3,300; station examiners, $2,600, $2,800, and $3,000.

"The salary of superintendents of classified stations shall be based on the number of employees assigned thereto and the annual postal receipts. No allowance shall be made for sales of stamps to patrons residing outside of the territory of the stations. At classified stations each $25,000 of postal receipts shall be considered equal to one additional employee.

"At classified stations the salary of the superintendent shall be as follows: One and not exceeding 5 employees, $2,400; 6 and not exceeding 18 employees, $2,500; 19 and not exceeding 32 employees, $2,600; 33 and not exceeding 44 employees, $2,700; 45 and not exceeding 64 employees, $2,800; 65 and not exceeding 90 employees, $2,900; 91 and not exceeding 120 employees, $3,000; 121 and not exceeding 150 employees, $3,100; 151 and not exceeding 350 employees, $3,300; 351 and not exceeding 500 employees, $3,500; 501 or more employees, $3,800.

"At classified stations having 45 or more employees there shall be assistant superintendents of stations with salaries as follows: Forty-five and not exceeding 64 employees, $2,400; 65 and not exceeding 90 employees, $2,500; 91 and not exceeding 120 employees, $2,600; 121 and not exceeding 150 employees, $2,700; 151 and not exceeding 350 employees, $2,900; 351 and not exceeding 500 employees, $3,100; 501 employees and upward, $3,400: *Provided*, That not more than 2 assistant postmasters shall be employed at offices where the receipts are $9,000,000 and upward: *Provided further*, That at post offices where the receipts are $14,000,000 but less than $20,000,000, there shall be a superintendent of delivery whose salary shall be the same as that provided for the superintendent of mails, and assistant superintendents of delivery at the salaries provided for assistant superintendents of mails: *Provided further*, That in fixing the salaries of the postmaster and supervisory employees in the post office at Washington, D. C., the Postmaster General may, in his discretion, add not to exceed 75 per cent to the gross receipts of that office: *Provided further*, That not more than 1 assistant superintendent of mails, 1 assistant superintendent of delivery, 1 assistant superintendent of registry, and 1 assistant cashier shall be paid the maximum salary provided for these positions, except where receipts are $9,000,000 and less than $14,000,000, to which offices 2 assistant superintendents of mails shall be assigned at the maximum salary, 1 to be in charge of city delivery: *And provided further*, That State depositories for surplus postal funds and central accounting offices, where the gross receipts are less than $500,000, and no postal cashier is provided, the employee in charge of such records and adjustments of the accounts shall be allowed an increase of $200 per annum; if receipts are $500,000 and less than $5,000,000, the postal cashier shall be allowed an increase of $200 per annum: *And provided further*, That at all central accounting offices where the bookkeeper in charge performs the duties of auditor, he shall be designated chief bookkeeper, at a salary equal to that of the assistant cashier of the highest grade at that office: *And provided further*, That when an office advances to a higher grade because of increased gross postal receipts for a calendar year, promotion of all supervisory employees shall be made to the corresponding grade at the higher salary provided for the same titles or designations under the higher classification of the office based on its postal receipts: *And provided further*, That no employee in the supervisory grades shall receive a salary less than $100 more than that paid to the highest grade of clerk or special clerk: *Provided further*, That in the readjustment of salaries of all employees above the highest grade for special clerks, those at present designated by titles for which more than one grade of salary is provided shall be placed in the same relative grade and designation and receive the increased salary provided in this title.

"SEC. 4. That clerks in first and second class post offices and letter carriers in the City Delivery Service shall be divided into five grades, as follows: First grade—salary, $1,700; second grade—salary, $1,800; third grade—salary, $1,900; fourth grade—salary, $2,000; fifth grade—salary, $2,100: *Provided*, That in the readjustment of grades for clerks at first and second class post offices and letter carriers in the City Delivery Service to conform to the grades herein provided, grade 1 shall include present grade 1, grade 2 shall include present grade 2, grade 3 shall include present grade 3, grade 4 shall include present grade 4, and grade 5 shall include present grade 5: *Provided further*, That hereafter substitute clerks in first and second class post offices and substitute letter carriers in the City Delivery Service when appointed regular clerks or carriers shall have credit for actual time served on a basis of one year for each 306 days of 8 hours served as substitute, and appointed to the grade to which such clerk or carrier would have progressed had his original appointment as substitute been to grade 1: *And provided further*, That clerks in first and second class post offices and letter carriers in the City Delivery Service shall be promoted succes-

sively after one year's satisfactory service in each grade to the next higher grade until they reach the fifth grade. All promotions shall be made at the beginning of the quarter following one year's satisfactory service in the grade: *And provided further*, That there shall be two grades of special clerks, as follows: First grade—salary, $2,200; second grade—salary, $2,300: *Provided*, That in the adjustment of grades for special clerks to conform to the grades herein provided special clerk grade 1 shall include present grade 1, and special grade 2 shall include present grade 2: *Provided further*, That in all special-clerk promotions the senior competent employee shall have preference: *Provided further*, That printers, mechanics, and skilled laborers, employees of the United States Stamped Envelope Agency at Dayton, Ohio, shall for the purpose of promotion and compensation be deemed a part of the clerical force.

"That the pay of substitute, temporary, or auxiliary clerks at first and second class post offices and substitute letter carriers in the City Delivery Service shall be at the rate of 65 cents per hour: *Provided*, That marine carriers assigned to the Detroit River Marine Service shall be paid annual salary of $300 in excess of the highest salary paid carriers in the City Delivery Service: *Provided further*, That hereafter special clerks, clerks, and laborers, in first and second class post offices and carriers in the City Delivery Service shall be required to work not more than 8 hours a day: *Provided further*, That the 8 hours of service shall not extend over a longer period than 10 consecutive hours, and the schedules of duty of the employees shall be regulated accordingly: *Provided further*, That in cases of emergency, or if the needs of the service require, and it is not practicable to employ substitutes, special clerks, clerks, and laborers in first and second class post offices and carriers in the City Delivery Service can be required to work in excess of 8 hours per day, and for such overtime service they shall be paid on the basis of the annual pay received by such employees: *And provided further*, That in computing the compensation for such overtime the annual salary or compensation for such employees shall be divided by 306, the number of working days in the year less all Sundays and legal holidays enumerated in the act of July 28, 1916; the quotient thus obtained will be the daily compensation which divided by 8 will give the hourly compensation for such overtime service: *And provided further*, That when the needs of the service require the employment on Sundays and holidays of foremen, special clerks, clerks, carriers, watchmen, messengers, or laborers at first and second class post offices, they shall be allowed compensatory time on one day within six days next succeeding the Sunday, except the last three Sundays in the calendar year, and on one day within 30 days next succeeding the holiday and the last three Sundays in the year on which service is performed: *Provided, however*, That the Postmaster General may, if the exigencies of the service require it, authorize the payment of overtime for service on the last three Sundays in the calendar year or on Christmas Day in lieu of compensatory time.

"SEC. 5. That messengers, watchmen, and laborers in first and second class post offices shall be divided into two grades, as follows: First grade, salary $1,500; second grade, salary $1,600: *Provided*, That watchmen, messengers, and laborers shall be promoted to the second grade after one year's satisfactory service in grade 1: *Provided further*, That the pay of substitute watchmen, messengers, and laborers shall be at the rate of 55 cents per hour.

"SEC. 6. That employees in the motor-vehicle service shall be classified as follows: Superintendents, $2,400, $2,600, $2,800, $3,000, $3,400, $3,600, $3,800, $4,000, and $5,000 per annum; assistant superintendents, $2,500, $2,600, and $2,800 per annum; chiefs of records, $2,200, $2,300, $2,400, $2,500, $2,600, $2,800, and $3,000; chiefs of supplies, $2,200, $2,300, and $2,400; chief dispatchers, $2,300 and $2,500; route supervisors, $2,400, $2,500, and $2,600; dispatchers, $2,100, $2,200, and $2,300; chief mechanics, $2,400, $2,500, $2,600, $2,800, and $3,000; mechanics in charge, $2,200, $2,300, and $2,400; and special mechanics, $2,100, $2,200, and $2,300: *Provided*, That assistant superintendents shall not be authorized at offices where the salary of the superintendent is less than $3,000 per annum.

"That general mechanics employed in the motor-vehicle service shall be divided into three grades: First grade, salary $1,900; second grade, salary $2,000; third grade, salary $2,100; and clerks employed in the motor-vehicle service shall be divided into five grades, as follows: First grade, salary $1,700; second grade, salary $1,800; third grade, salary $1,900; fourth grade, salary $2,000; fifth grade, salary $2,100: *Provided*, That in the readjustment of grades for clerks in the motor-vehicle service to conform to the grades above provided, grade 1 shall include present grade 1, grade 2 shall include present grade 2, grade 3 shall include present grade 3, grade 4 shall include present grade 4, and grade 5 shall include present grade 5: *Provided*, That general mechanics employed in the motor-vehicle service shall be promoted successively after one year's satisfactory service in each grade to the next higher grade until they reach the third grade, and clerks employed in the motor-vehicle service shall be promoted successively after one year's satisfactory service in each grade to the next higher grade until they reach the fifth grade, at the respective offices where employed, and promotion shall be made at the beginning of the quarter following one year's satisfactory service in the grade: *Provided further*, That at first-class post offices there shall be two grades of special clerks in the motor-vehicle service—grade 1, salary $2,200; grade 2, salary $2,300: *Provided further*, That in the readjustment of grades for special clerks to conform to the grades herein provided, special clerk, grade 1, shall include present special clerk grade 1, and special clerk, grade 2, shall include present special clerk grade 2.

"Mechanics' helpers employed in the motor-vehicle service shall receive a salary of $1,600 per annum: *Provided*, That on satisfactory evidence of their qualifications after one year's service mechanics' helpers shall be promoted to the first grade of general mechanics as vacancies may occur.

"That driver-mechanics employed in the motor-vehicle service shall be divided into five grades: First grade, salary $1,600; second grade, salary $1,700; third grade, salary $1,800; fourth grade, salary $1,900; fifth grade, salary $2,000; and garagemen-drivers employed in the motor-vehicle service shall be divided into two grades: First grade, salary $1,550; second grade, salary $1,650: *Provided*, That in the readjustment of salaries provided for in this act all driver-mechanics shall be classified in the respective grades as follows: Those with less than one year's service shall be placed in grade 1; those with more than one year's service and less than two years' service shall be placed in grade 2; those with more than two years' service and less than three years' service shall be placed in grade 3; those with more than three years' service and less than four years' service shall be placed in grade 4; those with more than four years' service shall be placed in grade 5: *Provided further*, That driver-mechanics employed in the motor-vehicle service shall be promoted successively after one year's satisfactory service in each grade to the next higher grade until they reach the fifth grade at the respective offices where employed: *Provided further*, That garagemen-drivers in the motor-vehicle service shall be promoted after one year's satisfactory service in the first grade to the second grade at the respective offices where employed, and promotions of driver-mechanics and garagemen-drivers shall be made at the beginning of the quarter following one year's satisfactory service in the grade.

"That the pay of substitute, temporary, or auxiliary employees in the motor-vehicle service shall be as follows: Special mechanics at the rate of 75 cents per hour; general mechanics at the rate of 70 cents per hour; clerks and driver-mechanics at the rate of 65 cents per hour; and garagemen-drivers at the rate of 55 cents per hour.

"That special mechanics, general mechanics, mechanics' helpers, driver-mechanics, and garagemen-drivers in the motor-vehicle service shall be required to work not more than 8 hours a day: *Provided*, That the 8 hours of service shall not extend over a longer period than 10 consecutive hours, and the schedules of duties of the employees shall be regulated accordingly: *Provided further*, That in cases of emergency, or if the needs of the service require, special clerks, clerks, special mechanics, general mechanics, mechanics' helpers, driver-mechanics, and garagemen-drivers in the motor-vehicle service can be required to work in excess of 8 hours per day, and for such overtime service they shall be paid on the basis of the annual pay received by such employees: *Provided further*, That in computing the compensation for such overtime the annual salary or compensation for such employees shall be divided by 306, the number of working days in the year less all Sundays and legal holidays enumerated in the act of July 28, 1916; the quotient thus obtained will be the daily compensation which divided by 8 will give the hourly compensation for such overtime service: *Provided further*, That when the needs of the service require the employment on Sundays and holidays of route supervisors, special clerks, clerks, dispatchers, mechanics in charge, special mechanics, general mechanics, mechanics' helpers, driver-mechanics, and garagemen-drivers in the motor-vehicle service, they shall be allowed compensatory time on one day within six days next succeeding the Sunday, except the last three Sundays in the calendar year, and on one day within 30 days next succeeding the holiday and the last three Sundays in the year on which service is performed: *Provided, however*, That the Post-

master General may, if the exigencies of the service require it, authorize the payment of overtime in lieu of compensatory time for service on Sundays and holidays.

"SEC. 7. That the annual salaries of employees of the Railway Mail Service shall be as follows: Division superintendents, $4,500; assistant division superintendents and assistant superintendents at large, $3,600; assistant superintendent in charge of car construction, $3,300; chief clerks, $3,300; assistant chief clerks, $2,800: *Provided*, That the clerks in charge of sections in the offices of the division superintendents shall be rated as assistant chief clerks at $2,800 salary.

"That railway postal clerks shall be divided into two classes, class A and class B, and into seven grades with annual salaries as follows: Grade 1, salary $1,900; grade 2, salary $2,000; grade 3, salary $2,150; grade 4, salary $2,300; grade 5, salary, $2,450; grade 6, salary $2,600; grade 7, salary $2,700.

"Laborers in the Railway Mail Service shall be divided into two grades with annual salaries as follows: Grade 1, salary $1,500; grade 2, $1,600.

"Laborers shall be promoted to grade 2 after one year's satisfactory service in grade 1: *Provided*, That in the readjustment of the service to conform to the grades herein provided for laborers, grade 1 shall include laborers in present grade 1, and grade 2 shall include laborers in present grade 2.

"Substitute railway postal clerks shall be paid for services actually performed at the rate of $1,850 per annum, the first year of service to constitute a probationary period, and when appointed regular clerks shall receive credit on the basis of one year of actual service performed as a substitute and be appointed to the grade to which such clerk would have progressed had his original appointment as a substitute been to grade 1. Any fractional part of a year's substitute service will be included with his service as a regular clerk in determining eligibility for promotion to the next higher grade following appointment to a regular position.

"All original appointments shall be made to the rank of substitute railway postal clerk, and promotions shall be made successively at the beginning of the quarter following a total satisfactory service of 306 days in the next lower grade.

"In the readjustment of the service to conform to the grades herein provided, grade 1 shall include clerks in present grade 1, grade 2 shall include clerks in present grade 2, grade 3 shall include clerks in present grade 3, grade 4 shall include clerks in present grade 4, grade 5 shall include clerks in present grade 5, and grade 6 shall include clerks in present grade 6.

"That the act approved February 28, 1919, be amended to read as follows:

"*Provided*, That the act of August 24, 1912 (37 Stat. p. 548), amended by the act approved March 3, 1917, be further amended to read as follows:

"'That hereafter, in addition to the salaries provided by law, the Postmaster General is hereby authorized to make travel allowances in lieu of actual expenses, at fixed rates per annum, not exceeding in the aggregate the sum annually appropriated, to railway postal clerks, acting railway postal clerks, and substitute railway postal clerks, including substitute railway postal clerks for railway postal clerks granted leave with pay on account of sickness, assigned to duty in railway post-office cars, while on duty, after 10 hours from the time of beginning their initial run, under such regulations as he may prescribe, and in no case shall such an allowance exceed $3 per day.'"

"Substitute railway postal clerks shall be credited with full time while traveling under orders of the department to and from their designated headquarters to take up an assignment, together with actual and necessary travel expenses, not to exceed $3 per day, while on duty away from such headquarters. When a substitute clerk performs service in a railway post office starting from his official headquarters he shall be allowed travel expenses under the law appiying to clerks regularly assigned to the run.

"Railway post-office lines shall be divided into two classes, class A and class B, and clerks assigned to class A lines shall be promoted successively to grade 4 and clerks in charge to grade 5. Clerks assigned to class B lines shall be promoted successively to grade 5 and clerks in charge to grade 6: *Provided*, That lines in present class A shall be continued in class A, and lines in present class B shall be continued in class B.

"Terminal railway post offices shall be divided into two classes, class A and class B; those having less than 20 employees shall be assigned to class A, and those having 20 or more employees shall be assigned to class B. Clerks in class A terminals shall be promoted successively to grade 4, and clerks in charge of tours to grade 5. Clerks in class B terminals shall be promoted successively to grade 5, and clerks in charge of tours to grade 6.

"Transfer offices shall be divided into two classes, class A and class B; those having less than five employees shall be assigned to class A and those having five or more employees to class B. Clerks in class A shall be promoted successively to grade 4, and clerks in charge of tours to grade 5. Clerks in class B shall be promoted successively to grade 5, and clerks in charge of tours to grade 6.

"Clerks assigned to the office of division superintendent or chief clerk shall be promoted successively to grade 4, and in the office of division superintendent four clerks may be promoted to grade 5 and eight clerks to grade 6, and in the office of chief clerk one clerk may be promoted to grade 5 and two clerks to grade 6.

"Examiners shall be promoted successively to grade 6 and assistant examiners to grade 5 whether assigned to the office of division superintendent or chief clerk: *Provided*, That service of clerks shall be based on an average of not exceeding 8 hours daily for 306 days per annum, including proper allowance for all service required on lay-off periods. Clerks required to perform service in excess of 8 hours daily, as herein provided, shall be paid in cash at the annual rate of pay or granted compensatory time at their option for such overtime. Railway postal clerks assigned to terminal railway post offices and transfer offices and laborers in the Railway Mail Service shall be required to work not more than 8 hours a day, and that the 8 hours of service shall not extend over a longer period than 10 consecutive hours, and that in cases of emergency, or if the needs of the service require, they may be required to work in excess of 8 hours a day, and for such additional service they shall be paid in proportion to their salaries as fixed by law.

"That clerks assigned to road duty shall be credited with full time for delay to trains equal to the period of time between the scheduled arrival and actual arrival of the train at destination of run.

"That section 3 of the act approved June 19, 1922, (41 Stats. p. 600), providing for leaves of absence of employees in the Postal Service, be amended by adding the following proviso: '*Provided*, That hereafter not exceeding 5 days of the 15 days' annual leave with pay, exclusive of Sundays and holidays, granted to railway postal clerks assigned to road duty each fiscal year may be carried over to the succeeding fiscal year.'

"RURAL MAIL DELIVERY SERVICE

"SEC. 8. That the salary of carriers in the Rural Mail Delivery Service for serving a rural route of 24 miles, six days in the week, shall be $1,800; on routes 22 miles and less than 24 miles, $1,728; on routes 20 miles and less than 22 miles, $1,620; on routes 18 miles and less than 20 miles, $1,440; on routes 16 miles and less than 18 miles, $1,260; on routes 14 miles and less than 16 miles, $1,080; on routes 12 miles and less than 14 miles, $1,008; on routes 10 miles and less than 12 miles, $936; on routes 8 miles and less than 10 miles, $864; on routes 6 miles and less than 8 miles, $792; on routes 4 miles and less than 6 miles, $720. Each rural carrier assigned to a route on which daily service is performed shall receive $30 per mile per annum for each mile said route is in excess of 24 miles or major fraction thereof, based on actual mileage, and each rural carrier assigned to a route on which triweekly service is performed shall receive $15 per mile for each mile said route is in excess of 24 miles or major fraction thereof, based on actual mileage.

"Deductions for failure to perform service on a standard rural delivery route for 24 miles and less shall not exceed the rate of pay per mile for service for 24 miles and less; and deductions for failure to perform service on mileage in excess of 24 miles shall not exceed the rate of compensation allowed for such excess mileage.

"In addition to the salary herein provided, each carrier in Rural Mail Delivery Service shall be paid for equipment maintenance a sum equal to 4 cents per mile per day for each mile or major fraction of a mile scheduled. Payments for equipment maintenance as provided herein shall be at the same periods and in the same manner as payments for regular compensation to rural carriers.

"A rural carrier serving one triweekly route shall be paid a salary and equipment allowance on the basis of a route one-half the length of the route served by him. A rural carrier serving two triweekly routes shall be paid a salary and equipment allowance on the basis of a route one-half of the combined length of the two routes.

"SEC. 9. That the salary of requisition fillers and packers in the division of equipment and supplies shall be as follows: One

foreman, $2,100 per annum; 10 requisition filiers and 9 packers, at $1,800 each per annum.

"SEC. 10. That the pay of carriers in the village delivery service, under such rules and regulations as the Postmaster General may prescribe, shall be from $1,150 to $1,350 per annum. The pay of substitute letter carriers in the village delivery service shall be at the rate of 50 cents per hour.

"SEC. 11. Employees in the Postal Service shall be granted 15 days' leave of absence with pay, exclusive of Sundays and holidays, each fiscal year, and sick leave with pay at the rate of 10 days a year, exclusive of Sundays and holidays, to be cumulative, but no sick leave with pay in excess of 30 days shall be granted during any one fiscal year. Sick leave shall be granted only upon satisfactory evidence of illness, in accordance with regulations to be prescribed by the Postmaster General.

"The 15 days' leave shall be credited at the rate of 1¼ days for each month of actual service.

"Whenever an employee herein provided for shall have been reduced in salary for any cause, he may be restored to his former grade or advanced to an intermediate grade at the beginning of any quarter following the reduction, and a restoration to a former grade or advancement to an intermediate grade shall not be construed as a promotion within the meaning of the law prohibiting advancement of more than one grade within one year.

"Whenever the promotion of an employee herein provided for is withheld because of unsatisfactory service, such employee may be promoted at the beginning of the second quarter thereafter, or at any subsequent quarter, on evidence that his record has been satisfactory during the intervening period.

"Hereafter when the needs of the service require the employment on Sundays or holidays of laborers or railway postal clerks at terminal railway post offices and transfer offices, they shall be allowed compensatory time on one day within six days next succeeding the Sunday, except the last three Sundays in the calendar year, and on one day within 30 days next succeeding the holiday and the last three Sundays in the year on which service is performed: *Provided, however*, That the Postmaster General may, if the exigencies of the service require it, authorize the payment of overtime for service on the last three Sundays in the calendar year or on Christmas Day in lieu of compensatory time.

"All employees herein provided for in automatic grades, who have not reached the maximum grades to which they are entitled to progress automatically, shall be promoted at the beginning of the quarter following the completion of one year's satisfactory service since their last promotion, regardless of any increases in salaries granted them by the provisions of this title.

"The Postmaster General may, when the interest of the service requires, transfer any clerk to the position of carrier or any carrier to the position of clerk and interchange the clerical force between the post office and the motor-vehicle service. Such transfer or interchange to be made to the corresponding grade and salary of the clerk or carrier transferred or interchanged.

"Substitute clerks in first and second class post offices and the Railway Mail Service and substitute letter carriers in the City Delivery Service when appointed regular clerks, railway postal clerks or carriers shall have credit for actual time served on a basis of one year for each 306 days of 8 hours served as substitute, and appointed to the grade to which such clerk or carrier would have progressed had his original appointment as substitute been to grade 1.

"Postal employees and substitute postal employees who served in the military, marine, or naval service of the United States during the World War and have not reached the maximum grade of salary shall receive credit for all time served in the military, marine, or naval service on the basis of one day's credit of eight hours in the Postal Service for each day served in the military, marine, or naval service, and be promoted to the grade to which such postal employee or substitute postal employee would have progressed had his original appointment as substitute been to grade 1. This provision shall apply to such postal employees and substitute postal employees who were in the Postal Service on October 1, 1920.

"No employee in the Postal Service shall be reduced in rank or salary as the result of the provisions of this title.

"SEC. 12. That the sums appropriated for salaries and compensation of postmasters and employees of the Postal Service in the act making appropriations for the fiscal year ending June 30, 1925, approved April 4, 1924, shall be available for the payment of salaries and compensation of postmasters and postal employees at the rates of pay herein provided; and such additional sums as may be necessary are hereby authorized to be appropriated to carry out the provisions of this title.

"SEC. 13. All acts and parts of acts inconsistent or in conflict with this title are hereby amended or repealed."

"TITLE II.—FEDERAL CORRUPT PRACTICES ACT, 1924

"SEC. 101. This title may be cited as the 'Federal corrupt practices act, 1924.'

"SEC. 102. When used in this title—

"(a) The term 'election' includes a general or special election, and, in the case of a Resident Commissioner from the Philippine Islands, an election by the Philippine Legislature, but does not include a primary election or convention of a political party;

"(b) The term 'candidate' means an individual whose name is presented at an election for election as Senator or Representative in, or Delegate or Resident Commissioner to, the Congress of the United States, whether or not such individual is elected;

"(c) The term 'political committee' includes any committee, association, or organization which accepts contributions or makes expenditures for the purpose of influencing or attempting to influence the election of candidates or presidential and vice presidential electors (1) in two or more States, or (2) whether or not in more than one State if such committee, association, or organization (other than a duly organized State or local committee of a political party) is a branch or subsidiary of a national committee, association, or organization;

"(d) The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution;

"(e) The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or any thing of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure;

"(f) The term 'person' includes an individual, partnership, committee, association, corporation, and any other organization or group of persons;

"(g) The term 'Clerk' means the Clerk of the House of Representatives of the United States;

"(h) The term 'Secretary' means the Secretary of the Senate of the United States;

"(i) The term 'State' includes Territory and possession of the United States.

"SEC. 103. (a) Every political committee shall have a chairman and a treasurer. No contribution shall be accepted, and no expenditure made, by or on behalf of a political committee for the purpose of influencing an election until such chairman and treasurer have been chosen.

"(b) It shall be the duty of the treasurer of a political committee to keep a detailed and exact account of—

"(1) All contributions made to or for such committee;

"(2) The name and address of every person making any such contribution, and the date thereof;

"(3) All expenditures made by or on behalf of such committee; and

"(4) The name and address of every person to whom any such expenditure is made, and the date thereof.

"(c) It shall be the duty of the treasurer to obtain and keep a receipted bill, stating the particulars, for every expenditure by or on behalf of a political committee exceeding $10 in amount. The treasurer shall preserve all receipted bills and accounts required to be kept by this section for a period of at least two years from the date of the filing of the statement containing such items.

"SEC. 104. Every person who receives a contribution for a political committee shall, on demand of the treasurer, and in any event within five days after the receipt of such contribution, render to the treasurer a detailed account thereof, including the name and address of the person making such contribution, and the date on which received.

"SEC. 105. (a) The treasurer of a political committee shall file with the Clerk between the 1st and 10th days of March, June, and September, in each year, and also between the 10th and 15th days, and on the 5th day, next preceding the date on which a general election is to be held, at which candidates are to be elected in two or more States, and also on the 1st day of January, a statement containing, complete as of the day next preceding the date of filing—

"(1) The name and address of each person who has made a contribution to or for such committee in one or more items of the aggregate amount or value, within the calendar year, of $100 or more, together with the amount and date of such contribution;

"(2) The total sum of the contributions made to or for such committee during the calendar year and not stated under paragraph (1);

"(3) The total sum of all contributions made to or for such committee during the calendar year;

"(4) The name and address of each person to whom an expenditure in one or more items of the aggregate amount or value, within the calendar year, of $10 or more has been made by or on behalf of such committee, and the amount, date, and purpose of such expenditure;

"(5) The total sum of all expenditures made by or on behalf of such committee during the calendar year and not stated under paragraph (4);

"(6) The total sum of expenditures made by or on behalf of such committee during the calendar year.

"(b) The statements required to be filed by subdivision (a) shall be cumulative during the calendar year to which they relate, but where there has been no change in an item reported in a previous statement only the amount need be carried forward.

"(c) The statement filed on the 1st day of January shall cover the preceding calendar year.

"SEC. 106. Every person (other than a political committee) who makes an expenditure in one or more items, other than by contribution to a political committee, aggregating $50 or more within a calendar year, for the purpose of influencing in two or more States the election of candidates, shall file with the Clerk an itemized detailed statement of such expenditure in the same manner as required of the treasurer of a political committee by section 105.

"SEC. 107. (a) Every candidate for Senator shall file with the Secretary, and every candidate for Representative, Delegate, or Resident Commissioner shall file with the Clerk not less than 10 nor more than 15 days before, and also within 30 days after, the date on which an election is to be held, a statement containing, complete as of the day next preceding the date of filing—

"(1) A correct and itemized account of each contribution received by him or by any person for him with his knowledge or consent, from any source, in aid or support of his candidacy for election, or for the purpose of influencing the result of the election, together with the name of the person who has made such contribution;

"(2) A correct and itemized account of each expenditure made by him or by any person for him with his knowledge or consent, in aid or support of his candidacy for election, or for the purpose of influencing the result of the election, together with the name of the person to whom such expenditure was made; except that only the total sum of expenditures for items specified in subdivision (c) of section 109 need be stated;

"(3) A statement of every promise or pledge made by him or by any person for him with his consent, prior to the closing of the polls on the day of the election, relative to the appointment or recommendation for appointment of any person to any public or private position or employment for the purpose of procuring support in his candidacy, and the name, address, and occupation of every person to whom any such promise or pledge has been made, together with the description of any such position. If no such promise or pledge has been made, that fact shall be specifically stated.

"(b) The statements required to be filed by subdivision (a) shall be cumulative, but where there has been no change in an item reported in a previous statement only the amount need be carried forward.

"(c) Every candidate shall inclose with his first statement a report, based upon the records of the proper State official, stating the total number of votes cast for all candidates for the office which the candidate seeks, at the general election next preceding the election at which he is a candidate.

"SEC. 108. A statement required by this title to be filed by a candidate or treasurer of a political committee or other person with the Clerk or Secretary, as the case may be—

"(a) Shall be verified by the oath or affirmation of the person filing such statement, taken before any officer authorized to administer oaths;

"(b) Shall be deemed properly filed when deposited in an established post office within the prescribed time, duly stamped, registered, and directed to the Clerk or Secretary at Washington, D. C., but in the event it is not received, a duplicate of such statement shall be promptly filed upon notice by the Clerk or Secretary of its nonreceipt;

"(c) Shall be preserved by the Clerk or Secretary for a period of two years from the date of filing, shall constitute a part of the public records of his office, and shall be open to public inspection.

"SEC. 109. (a) A candidate, in his campaign for election, shall not make expenditures in excess of the amount which he may lawfully make under the laws of the State in which he is a candidate, nor in excess of the amount which he may lawfully make under the provisions of this title.

"(b) Unless the laws of his State prescribe a less amount as the maximum limit of campaign expenditures, a candidate may make expenditures up to—

"(1) The sum of $10,000 if a candidate for Senator, or the sum of $2,500 if a candidate for Representative, Delegate, or Resident Commissioner; or

"(2) An amount equal to the amount obtained by multiplying 3 cents by the total number of votes cast at the last general election for all candidates for the office which the candidate seeks, but in no event exceeding $25,000 if a candidate for Senator or $5,000 if a candidate for Representative, Delegate, or Resident Commissioner.

"(c) Money expended by a candidate to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of the State in which he resides, or expended for his necessary personal, traveling, or subsistence expenses, or for stationery, postage, writing, or printing (other than for use on billboards or in newspapers), for distributing letters, circulars, or posters, or for telegraph or telephone service, shall not be included in determining whether his expenditures have exceeded the sum fixed by paragraph (1) or (2) of subdivision (b) as the limit of campaign expenses of a candidate.

"SEC. 110. It is unlawful for any candidate to directly or indirectly promise or pledge the appointment, or the use of his influence or support for the appointment of any person to any public or private position or employment, for the purpose of procuring support in his candidacy.

"SEC. 111. It is unlawful for any person to make or offer to make an expenditure, or to cause an expenditure to be made or offered, to any person, either to vote or withhold his vote, or to vote for or against any candidate, and it is unlawful for any person to solicit, accept, or receive any such expenditure in consideration of his vote or the withholding of his vote.

"SEC. 112. Section 118 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, is amended to read as follows:

"'SEC. 118. It is unlawful for any Senator or Representative in, or Delegate or Resident Commissioner to, Congress, or any candidate for, or individual elected as, Senator, Representative, Delegate, or Resident Commissioner, or any officer or employee of the United States, or any person receiving any salary or compensation for services from moneys derived from the Treasury of the United States, to directly or indirectly solicit, receive, or be in any manner concerned in soliciting or receiving, any assessment, subscription, or contribution for any political purpose whatever, from any other such officer, employee, or person.'

"SEC. 113. It is unlawful for any national bank, or any corporation organized by authority of any law of Congress, to make a contribution in connection with any election to any political office, or for any corporation whatever to make a contribution in connection with any election at which presidential and vice presidential electors or a Senator or Representative in, or a Delegate or Resident Commissioner to, Congress are to be voted for, or for any candidate, political committee, or other person to accept or receive any contribution prohibited by this section. Every corporation which makes any contribution in violation of this section shall be fined not more than $5,000; and every officer or director of any corporation who consents to any contribution by the corporation in violation of this section shall be fined not more than $1,000, or imprisoned not more than one year, or both.

"SEC. 114. (a) Any person who violates any of the foregoing provisions of this title, except those for which a specific penalty is imposed by sections 112 and 113, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(b) Any person who willfully violates any of the foregoing provisions of this title, except those for which a specific penalty is imposed by sections 112 and 113, shall be fined not more than $10,000 and imprisoned not more than two years.

"SEC. 115. This title shall not limit or affect the right of any person to make expenditures for proper legal expenses in contesting the results of an election.

"SEC. 116. This title shall not be construed to annul the laws of any State relating to the nomination or election of candidates, unless directly inconsistent with the provisions of this title, or to exempt any candidate from complying with such State laws.

"SEC. 117. If any provision of this title or the application thereof to any person or circumstance is held invalid, the validity of the remainder of the act and of the application of

such provision to other persons and circumstances shall not be affected thereby.

"SEC. 118. The following acts and parts of acts are hereby repealed: The act entitled 'An act providing for publicity of contributions made for the purpose of influencing elections at which Representatives in Congress are elected, approved June 25, 1910 (ch. 392, 36 Stat. p. 822), and the acts amendatory thereof, approved August 19, 1911 (ch. 33, 37 Stat. p. 25), and August 23, 1912 (ch. 349, 37 Stat. p. 360); the act entitled 'An act to prevent corrupt practices in the election of Senators, Representatives, or Delegates in Congress,' approved October 16, 1918 (ch. 187, 40 Stat. p. 1013); and section 83 of the Criminal Code of the United States, approved March 4, 1909 (ch. 321, 35 Stat. p. 1088).

"SEC. 119. This title shall take effect 30 days after its enactment."

WALTER E. EDGE,
GEO. H. MOSES,
KENNETH MCKELLAR,
*Managers on the part of the Senate.*
W. W. GRIEST,
CALVIN D. PAIGE,
THOS. M. BELL,
*Managers on the part of the House.*

Mr. SMOOT. Mr. President, I notice in the report that it is an absolutely new bill. Everything the House did and everything the Senate did is stricken out and a new proposal made.

Mr. EDGE. As a matter of fact, it is not a new bill. The conference report has been presented in that form because it is following a precedent that has been established in previous times—for instance, in the matter of the immigration bill. In five minutes I can explain the changes in the report from the bill as it left the Senate.

Mr. ROBINSON. I understand that the House struck out the amendment proposed by the Senator from Idaho [Mr. BORAH] as agreed to by the Senate relating to corrupt practices in elections, and inserted what is known as the Cable bill.

Mr. EDGE. That is correct. I intended to draw the attention of the Senate to that fact and briefly explain the Cable bill.

Mr. ROBINSON. What action does the Senator from New Jersey propose to take respecting the Cable bill, or the House amendment or substitute for the Borah provision?

Mr. EDGE. As the conference report indicates, the conferees, the managers on the part of the Senate as well as the House, unanimously agreed to the substitution. Every effort was made, it is unnecessary for me to state, I am sure, to include the Borah amendment, as we were directed by the Senate. However, an examination of the so-called Cable bill will demonstrate that the Cable bill covers practically all that the Borah amendment covered, with very much more in addition, to try to safeguard both primary and general elections.

Mr. ROBINSON. The Cable bill proposes to repeal all existing statutes regulating campaign contributions and publicity respecting the same, and creates a new system.

Mr. EDGE. That is entirely correct.

Mr. ROBINSON. It appears to be a somewhat comprehensive statement of the whole subject. Does the conference report contemplate an agreement to the House provision, or what action does the Senator propose?

Mr. EDGE. The conference report contemplates an agreement to the postal bill as well as the addition of the so-called Cable bill. The Cable bill, may I say in answer to the suggestion of the Senator from Arkansas, was prepared with the intention, and I assume it accomplishes it, of correcting various inconsistencies and some parts of existing legislation which it was deemed was made unconstitutional through the Newberry decision, all of which we handled through the Cable bill.

Mr. ROBINSON. The Cable bill has no relation to primaries or expenditures in primary elections?

Mr. EDGE. No.

Mr. ROBINSON. It does not attempt to deal with that subject?

Mr. EDGE. No.

Mr. ROBINSON. What I am anxious to know and what I have been asking the Senator is whether the action which he contemplates the Senate shall now take will result in agreeing to the House amendment, which is the Cable bill?

Mr. EDGE. It is my intention to ask the Senate to agree to the entire report of the conferees, which is a unanimous report.

Mr. McKELLAR. Mr. President, I will say to the Senator from Arkansas——

Mr. BROOKHART. Mr. President, I think this matter is going to involve quite a controversy, and I do not desire to yield for any length of time.

Mr. McKELLAR. I hope the Senator will yield. I do not think it will take long to dispose of the matter.

Mr. BROOKHART. We can try it and see.

Mr. McKELLAR. Will the Senator permit me to explain just one matter?

Mr. ROBINSON. May I ask one further question, and then I shall conclude my inquiry? Have the conference committee agreed upon the report as a whole?

Mr. EDGE. They have.

Mr. ROBINSON. I think we might give the Senate just a few minutes to look into the conference report and let the Senator from Iowa proceed with his remarks. I think that a little later there will be no difficulty in agreeing to the conference report.

Mr. MOSES. Mr. President, before that is done, if the Senator from Iowa will be good enough to grant me a few minutes' time, I wish to say that I do not want the Senator from Arkansas or any other Senator to be under any misapprehension regarding my attitude as to the legislation. It is true that I signed the conference report. I did so because there were matters relating to the Postal Service to which I wished to give my approval. I do not mean by this to intimate that I am opposed to legislation to prevent corrupt practices in elections or primaries either, but I am unalterably opposed to this manner of producing legislation.

I think that putting a rider of any sort on a bill such as the postal salaries bill is an entirely inexcusable method of producing legislation, however desirable. In the last days of the session, with a great bill here in which every Member of both Houses of Congress is deeply interested, affecting the interests of more than 300,000 Government employees, a bill to which substantially every Member of the Senate and substantially every Member of the House has given his approval, a bill representing the result of work and labor on the part of a joint subcommittee which spent days in taking testimony exhaustively—to put into the bill anything like the Cable bill, comprehensive in its subject matter and to which we have had no time to give attention in committee or the Senate to examine, I maintain is an entirely indefensible method of producing legislation of that sort. I want my personal position to be made known.

Mr. ROBINSON. May I ask the Senator a question?

Mr. MOSES. Certainly; if the Senator from Iowa [Mr. BROOKHART] will permit.

Mr. ROBINSON. The Senator from New Hampshire signed the conference report, did he not?

Mr. MOSES. I signed the conference report, and I have tried to say why I did so.

Mr. ROBINSON. Do I understand that the Senator signed the conference report and yet is opposed to it?

Mr. MOSES. I am opposed to this method of producing this kind of legislation; but if I have to take this method of legislation in order to get relief for the men in the Postal Service, I will take it. However, that is not going to prevent me from making my protest against the legislation.

Mr. ROBINSON. The Senator, then, is opposed to the Cable bill?

Mr. MOSES. No; I said not. I said that I am not opposed to that class of legislation, but I am opposed to this method of legislation.

Mr. ROBINSON. The Senator realizes that there could have been no legislation on the subject unless the amendment of the Senator from Idaho or some similar provision had been adopted?

Mr. MOSES. The Congress might have adopted it earlier in the session rather than to wait until there was a parliamentary tangle and then put it through as a rider on this bill.

Mr. ROBINSON. If it has been adopted and is satisfactory, I do not know why the Senator should give vent to his resentment.

Mr. MOSES. Because I try to stand for some orderly method of conducting the business of the Senate.

### BLIND VETERANS OF THE WORLD WAR

Mr. REED of Pennsylvania. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. BROOKHART. I yield.

Mr. REED of Pennsylvania. I thank the Senator for yielding to me for a moment. I wish to ask unanimous consent for the immediate consideration of House bill 4526, for the reason that I shall not be able to be present at the session to-night. It is a bill which we are all very anxious to get through this week if it is possible. It proposes to incorporate under a Dis-

trict of Columbia charter the United States Blind Veterans of the World War, of whom there are several hundred.

The bill carries no appropriation, and, if passed, will not in any way commit the United States to any liability. These men are about to start a campaign for the erection of a clubhouse in connection with their hospital near Baltimore, and are anxious to have their charter so as to enable them to do it. The bill has passed the House of Representatives unanimously and is unanimously recommended by the Senate Committee on the Judiciary.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the following persons, to wit: James P. Funk, of Pennsylvania; Bernard Corcoran, of New York; James Kozeluh, of Arkansas; Earl Booher, of Kansas; Carl Bronner, of Michigan; Samuel Hendrickson, of Cincinnati; Harvey E. Gilbert, of Illinois; Quiller Cole, of Georgia; Lawrence A. Bunce, of Colorado; Ludwig Guminish, of New York; Richard H. Miller, jr., of Maryland; Charles R. Fear, of Pennsylvania; Oscar M. Simpkins, of Oklahoma; Everett L. Radford, of Texas; Thomas H. Huskey, of Missouri; Lee M. Brame, of Alabama; Frank O. Berg, of Wisconsin; Henry G. Beggs, of Georgia; Lawrence V. Morrow, of Missouri; Charles R. Leguerrir, of Missouri; Walter Taylor, of Missouri; Laigear Antee, of Louisiana; Alois F. Greene, of Illinois; Loyal M. Holmes, of Maryland; Newton A. Kulp, of Pennsylvania; Roswell D. Pitman, of New York; Connie L. McLean, of Texas; Hamilton C. Miles, of Ohio; John J. Austin, of South Dakota; Irvine E. Barnes, of Missouri; Bertie W. Randall, of Missouri; Max N. Kujawski, of Indiana; Charles Freeland, of Illinois; James M. Daniels, of Tennessee; William E. Yates, of Texas; Mike Kercli, of Ohio; Peter Lionudakes, of Utah; Vaclav T. Jesek, of Texas; Samuel Hillman, of Ohio; Herbert S. Journeau, of Michigan; Charles F. Ross, of New York; Morgan Rose, of New York; Walter F. Develing, of Illinois; Rudolph E. Frye, of Maryland; Steve D. Tanner, of Montana; Joseph Hulin, of North Carolina; Blaine G. Yeoman, of Oklahoma; Thomas Williams, of West Virginia; William J. Murray, of New York; Ivan E. Bushong, of Washington; Raymond Washburn, of Ohio; William P. Alexander, of Kentucky; Burl Glover, of Ohio; John H. Williams, of Washington; Joseph L. Herver, of Oklahoma; Daniel Carbone, of Pennsylvania; John J. Varga, of Connecticut; John J. Rapp, of Pennsylvania; Charles S. Bennett, of Arkansas; Richard Knigge, of Idaho; Walter Man, of New York; Domenico Capuczi, of New York; John Kosic, of Massachusetts; Raymond S. Day, of Pennsylvania; Harry Herring, of Pennsylvania; Samuel Singer, of Massachusetts; George Graves, of Missouri; Abe Kittay, of New York; John Hanahan, of Pennsylvania; Frank J. Lhota, of Pennsylvania; Edward J. Paulson, of Pennsylvania; Ellis DeWitt, of the District of Columbia; Bernard Cady, of Maryland; John Marzullo, of Illinois; Joe Brew, of Pennsylvania; Lloyd Pierson, of Nebraska; Philip N. Harrison, of Pennsylvania, and their successors, are hereby created and declared to be a body corporate of the District of Columbia. The name of this corporation shall be "The United States Blind Veterans of the World War."

SEC. 2. That said persons named in section 1 are hereby authorized to meet to complete the organization of said corporation by the selection of officers, the adoption of a constitution and by-laws, and to do all other things necessary to carry into effect the provisions of this act.

SEC. 3. That the purposes of said corporation are to bind together for their mutual fellowship and assistance those citizens of the United States of America who have served their country in war, and who bear as a mark of such service the loss of their sight, and to perpetuate and keep alive the memories of their comradeship and to enable them by their organization to render what aid they can to the blind in general.

SEC. 4. That the corporation created by this act shall have the following powers: To have perpetual succession, with power to sue and be sued in courts of law and equity; to receive, hold, own, use, and dispose of such real estate and personal property as shall be necessary for its corporate purposes; to adopt a corporate seal and alter the same at pleasure; to adopt a constitution, by-laws, and regulations to carry out its purposes, not inconsistent with the laws of the United States or of any State; to use in carrying out the purposes of the corporation such emblems and badges as it may adopt; to establish and maintain offices for the conduct of its business; to establish State and Territorial organizations and local chapter or post organizations; to publish a magazine or other publications; and generally do any and all such acts and things as may be necessary and proper in carrying into effect the purposes of the corporation.

SEC. 5. That any honorably discharged American veteran of the allied forces who participated in the World War and whose vision has become defective to such an extent that he is eligible for training under supervisor for the blind of the United States Veterans' Bureau, and any ex-service man who is eligible for such training, shall be eligible for "active membership" in the United States Blind Veterans of the World War. The members of this corporation shall have the power to admit such other persons to "honorary" membership as they may see fit.

SEC. 6. That this organization shall be nonpolitical, and shall not be used for the dissemination of partisan principles.

SEC. 7. That said corporation and its State and local subdivisions shall have the sole and exclusive right to have and to use in carrying out its purposes the name "The United States Blind Veterans of the World War."

SEC. 8. That the right to repeal, alter, or amend this act at any time is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 668. An act to establish the Utah National Park in the State of Utah;

S. 966. An act for the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes;

S. 1192. An act to confer jurisdiction upon the United States district court, northern district of California, to adjudicate the claims of American citizens;

S. 1309. An act for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev.; and

S. 3093. An act granting certain public lands to the city of Phoenix, Ariz., for municipal, park, and other purposes.

The message also announced that the House had passed the following bills and joint resolution of the Senate, severally with amndments, in which it requested the concurrence of the Senate:

S. 2704. An act to amend paragraph (3), section 16, of the interstate commerce act;

S. 2573. An act to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes"; and

S. J. Res. 114. Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.

The message further announced that the House had passed bills and a joint resolution of the following titles, in which it requested the concurrence of the Senate:

H. R. 25. An act authorizing a per capita payment of $50 each to the members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation;

H. R. 466. An act to amend section 90 of the Judicial Code of the United States, approved March 3, 1911, so as to change the time of holding certain terms of the district court of Mississippi;

H. R. 597. An act regulating switching and switching charges on railroads in the District of Columbia, and for other purposes;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes;

H. R. 3669. An act to provide for the inspection of the battle fields of the siege of Petersburg, Va.;

H. R. 4275. An act authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims;

H. R. 5318. An act to authorize an exchange of lands with the State of Washington;

H. R. 5420. An act to provide fees to be charged by clerks of the district courts of the United States;

H. R. 5423. An act to amend section 2 of the act of August 1, 1888 (25 Stat. L. p. 357);

H. R. 5425. An act to provide for the disposition of moneys paid to or received by any official as a bribe, which may be used as evidence in any case growing out of any such transaction;

H. R. 6584. An act amending the law providing for special taxes on business and trades in Alaska;

H. R. 7144. An act to relinquish to the city of Battle Creek, Mich., all right, title, and interest of the United States in two unsurveyed islands in the Kalamazoo River;

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks reservation;

H. R. 7996. An act to regulate and fix rates of wages for employees of the Government Printing Office;

H. R. 8090. An act authorizing the Secretary of the Treasury to remove the quarantine station now situated at Fort Morgan, Ala., to Sand Island, near the entrance of the port of Mobile, Ala., and to construct thereon a new quarantine station;

H. R. 8545. An act conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the Red Pipestone Quarries, Minn.;

H. R. 8657. An act to amend section 98 of the Judicial Code, providing for the holding of the United States district court at Shelby, N. C.;

H. R. 8906. An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920;

H. R. 9076. An act to amend section 2 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922 and all other customs revenues laws," approved March 4, 1923;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.;

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.;

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services; and

H. J. Res. 257. Joint resolution providing for the procurement of a design for the use of grounds in the vicinity of the Mall by the United States Botanic Garden.

REHOBOTH CANAL BRIDGE, DELAWARE

Mr. BAYARD. I ask unanimous consent for the present consideration of the bill (S. 3409) granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Commerce with an amendment, on page 2, line 4, after the numerals "1906," to insert:

*Provided*, That the Secretary of War is hereby authorized, upon the recommendation of the Chief of Engineers, United States Army, to grant permission to the said Delaware State Highway Department, its successors and assigns, under such terms and conditions as the said Secretary may deem equitable and fair to the public, to cross and occupy such public lands pertinent to the United States Canal as may be necessary for the bridge and approaches thereto.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

So as to make the bill read:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Delaware State Highway Department, and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the canal between Rehoboth Bay and the Delaware Bay, being a part of an inland waterway, partly natural and partly artificial, from Chincoteague Bay to Delaware Bay, at a point suitable to the interests of navigation, at or near Rehoboth, in the county of Sussex, in the State of Delaware, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That the Secretary of War is hereby authorized, upon the recommendation of the Chief of Engineers, United States Army, to grant permission to the said Delaware State Highway Department, its successors and assigns, under such terms and conditions as the said Secretary may deem equitable and fair to the public, to cross and occupy such public lands pertinent to the United States Canal as may be necessary for the bridge and approaches thereto.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles, and referred as indicated below:

H. R. 7996. An act to regulate and fix rates of wages for employees of the Government Printing Office; to the Committee on Printing.

H. R. 597. An act regulating switching and switching charges on railroads in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

H. R. 8906. An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920; to the Committee on Civil Service.

H. R. 9076. An act to amend section 2 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922, and all other customs revenues laws," approved March 4, 1923; ordered to be placed on the calendar.

H. R. 6584. An act amending the law providing for special taxes on business and trades in Alaska; to the Committee on Territories and Insular Possessions.

H. R. 5318. An act to authorize an exchange of lands with the State of Washington; and

H. R. 7144. An act to relinquish to the city of Battle Creek, Mich., all right, title, and interest of the United States in two unsurveyed islands in the Kalamazoo River; to the Committee on Public Lands and Surveys.

H. R. 3669. An act to provide for the inspection of the battle fields of the siege of Petersburg, Va.; and

H. R. 7731. An act authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation; to the Committee on Military Affairs.

H. R. 9559. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes; and

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services; to the Committee on Appropriations.

H. R. 8090. An act authorizing the Secretary of the Treasury to remove the quarantine station now situated at Fort Morgan, Ala., to Sand Island, near the entrance of the port of Mobile, Ala., and to construct thereon a new quarantine station;

H. R. 9177. An act granting the consent of Congress to the counties of Kittitas and Grant, in the State of Washington, to construct a bridge across the Columbia River at or near Vantage Ferry, Wash.; and

H. R. 9345. An act granting the consent of Congress for the construction of a bridge across the Ohio River between Vanderburgh County, Ind., and Henderson County, Ky.; to the Committee on Commerce.

H. R. 466. An act to amend section 90 of the Judicial Code of the United States, approved March 3, 1911, so as to change the time of holding certain terms of the District Court of Mississippi;

H. R. 5420. An act to provide fees to be charged by clerks of the district courts of the United States;

H. R. 5423. An act to amend section 2 of the act of August 1, 1888 (25 Stat. L. p. 357);

H. R. 5425. An act to provide for the disposition of moneys paid to or received by any official as a bribe, which may be used as evidence in any case growing out of any such transaction; and

H. R. 8657. An act to amend section 98 of the Judicial Code, providing for the holding of the United States District Court at Shelby, N. C.; to the Committee on the Judiciary.

H. R. 25. An act authorizing a per capita payment of $50 each to the members of the Red Lake Band of Chippewa Indians from the proceeds of the sale of timber and lumber on the Red Lake Reservation;

H. R. 1414. An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes;

H. R. 4275. An act authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims; and

H. R. 8545. An act conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the Red Pipestone Quarries, Minn.; to the Committee on Indian Affairs.

H. J. Res. 257, Joint resolution providing for the procurement of a design for the use of grounds in the vicinity of the Mall by the United States Botanic Garden; to the Committee on the Library.

ORGANIZATION OF THE CUSTOMS SERVICE

The bill (H. R. 9076) to amend section 2 of the act entitled "An act to provide the necessary organization of the customs service for an adequate administration and enforcement of the tariff act of 1922 and all other customs revenue laws," approved March 4, 1923, was read twice by its title.

Mr. EDGE. I ask unanimous consent that the bill be substituted and take the place on the calendar of Senate bill 3357, Order of Business 688, which is exactly the same bill, and which has been reported. Then, when we consider the calendar we can consider the bill which passed the House, which is precisely the same as the Senate bill.

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Without objection, a similar bill being on the calendar, this bill will go to the calendar.

Mr. EDGE. My idea being that it should go to the calendar instead of the committee, so that it may be considered when we take up bills on the calendar.

SAN CARLOS FEDERAL IRRIGATION PROJECT, ARIZONA

The PRESIDING OFFICER laid before the Senate the amendment of the House to the bill (S. 966) for the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes, which was to strike out all after the enacting clause and to insert:

That the Secretary of the Interior, through the Indian Service, is hereby authorized to construct a dam across the canyon of the Gila River near San Carlos, Ariz., as a part of the San Carlos irrigation project, as contemplated in the report of the chief engineer of the Indian irrigation service submitted to the Commissioner of Indian Affairs on November 1, 1915, at a limit of cost of $5,500,000, for the purpose, first, of providing water for the irrigation of lands allotted to Pima Indians on the Gila River Reservation, Ariz., now without an adequate supply of water and, second, for the irrigation of such other lands in public or private ownership as, in the opinion of the said Secretary, can be served with water impounded by said dam without diminishing the supply necessary for said Indian lands: *Provided*, That the total cost of the project shall be distributed equally per acre among the lands in Indian ownership and the lands in public or private ownership that can be served from the waters impounded by said dam.

SEC. 2. That the construction charge assessed against the Indian lands shall be reimbursable to the Treasury of the United States on a per acre basis under such rules and regulations as the Secretary of the Interior may prescribe, and there is hereby created a lien against all such lands, which lien shall be recited in any patent issued therefor, prior to the reimbursement of the total amount chargeable against such land: *Provided*, That after said project is completed, the Secretary of the Interior is hereby authorized, in his discretion, with the approval of the Pima Indians, to sell, at public auction, at not less than the appraised value thereof, such surplus lands not now allotted within said Gila River Indian Reservation as he may determine to be irrigable from return and drainage waters, the proceeds of such sales to be deposited in the Treasury to reimburse the United States in part for the construction charge assessed against the Indian lands.

SEC. 3. The Secretary of the Interior shall by public notice announce the date when water is available for lands in private ownership under the project and the amount of the construction charge per irrigable acre against the same, which charge shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the third year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder until the obligation is paid in full: *Provided*, That the operation and maintenance charges on account of land in private ownership or of land in Indian ownership operated under lease shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for lands in private ownership.

SEC. 4. That no part of the sum provided for herein shall be expended for construction on account of any lands in private ownership until an appropriate repayment contract in accordance with the terms of this act and in form approved by the Secretary of the Interior shall have been properly executed by a district organized under State law, embracing the lands in public or private ownership irrigable under the project, and the execution thereof shall have been confirmed by decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary of the Interior, showing the present actual bona fide value of all such irrigable lands fixed without reference to the proposed construction of said San Carlos Dam, and shall provide that until one-half the construction charges against said lands shall have been fully paid no sale of any such lands shall be valid unless and until the purchase price involved in such sale is approved by the Secretary of the Interior, and shall also provide that upon proof of fraudulent representation as to the true consideration involved in any such sale the Secretary of the Interior is authorized to cancel the water right attaching to the land involved in such fraudulent sale; and all public lands irrigable under the project shall be entered subject to the conditions of this section which shall be applied thereto: *Provided further*, That no part of any sum provided for herein shall be expended for construction on account of any lands in private ownership until all areas of land irrigable under the project and owned by any individual in excess of 160 irrigable acres shall have been conveyed in fee to the United States free of encumbrance to again become a part of the public domain under a contract between the United States and the individual owner providing that the value as shown by said appraisal of the land so conveyed to the United States shall be credited in reduction of the construction charge thereafter to be assessed against the land retained by such owner; and lands so conveyed to the United States shall be subject to disposition by the Secretary of the Interior in farm units at the appraised price, upon such terms and conditions as he may prescribe.

SEC. 5. The Secretary of the Interior is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect; and the money hereby authorized to be appropriated shall be available for the acquiring of necessary right of way by purchase or judicial proceedings and for other purposes necessary in successfully prosecuting the work to complete the project.

Mr. ASHURST. I move that the Senate concur in the House amendment.

The motion was agreed to.

AMENDMENT OF INTERSTATE COMMERCE ACT

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 2704) to amend paragraph (3), section 16, of the interstate commerce act, which were: On page 1, line 9, after the word "accrues," to insert a comma; on page 2, line 1, after the word "accrues," to insert a comma; on page 2, line 6, after the word "accrues," to insert a comma; on page 2, line 25, after the word "carrier," to insert a comma; and on page 3, line 4, after the word "order," to insert a comma.

Mr. SMITH. Those amendments are simply marks of punctuation which were necessary; and I move that the Senate concur in the amendments of the House.

The motion was agreed to.

LANDS IN THE CITY OF PHOENIX, ARIZ.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3093) granting certain public lands to the city of Phoenix, Ariz., for municipal, park, and other purposes, which was, on page 3, line 4, after the word "has," to insert a comma and the words "for more than one year."

Mr. CAMERON. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

INVESTIGATION OF IRRIGATION PROJECTS

Mr. WARREN. I ask the Chair to lay before the Senate the amendments of the House to Senate Joint Resolution 114.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 114) authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo., which were, on page 1, line 8, after the word "Wyoming," to insert: "the Deschutes project in the State of Oregon and the Southern Lassen irrigation project in Lassen County, Calif.: *Provided*, That at least one-half the cost of all such investigations, plans, and estimates shall be advanced by the State in which the project is located or by parties interested," and to amend the title so as to read: "Joint resolution authorizing an investigation of the proposed Casper-Alcova irrigation project, Natrona County, Wyo.; the Deschutes project in the State of Oregon, and the Southern Lassen irrigation project in Lassen County, Calif."

Mr. ROBINSON. What are the amendments?

Mr. WARREN. The amendments simply include four other projects. The original resolution involved only one project. There is no money connected with it.

Mr. ROBINSON. Very well.

Mr. WARREN. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

SUPPLEMENTAL ESTIMATES OF APPROPRIATIONS

The PRESIDING OFFICER (Mr. JONES of Washington in the chair) laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the War Department, fiscal year 1924, for the purchase of capital stock of the Inland Waterways Corporation, created by law, in amount $3,000,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed (S. Doc. No. 140).

He also laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Interior Department, pertaining to the Indian Service, fiscal year 1924, for rebuilding dairy and horse barn, Carson School, Nevada, in amount $7,500, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed (S. Doc. No. 139).

PRESERVATION OF WORLD PEACE

Mr. SHIPSTEAD. On day before yesterday I submitted Concurrent Resolution No. 17. I find that there were some errors made in the printing of the resolution in the RECORD. I therefore ask unanimous consent to substitute for that resolution the corrected resolution which I now send to the desk, which I ask may be printed in the RECORD, if there be no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota? The Chair hears none, and it is so ordered.

The resolution (S. Con. Res. 20) is as follows:

Whereas a fundamental menace to world peace in the last century and a quarter has been the momentum of competitive armaments, all predicated upon untrammeled governmental power of life and death over vast populations at any time liable to be summoned and hurled against each other; and

Whereas the moral and material welfare of the world calls for a constructive measure for pacification: Therefore be it

*Resolved by the Senate (the House of Representatives concurring)*, That the President is hereby respectfully requested to propose to all the nations of the world the conclusion of a convention definitely binding them to terminate all compulsory military, naval, and related service in terms substantially as follows:

I. The high contracting parties to such convention be requested to solemnly engage each within three years from the date of its ratification of this instrument to place all their military, naval, aerial, and subsidiary services of offense and defense, and all human labor required for the preliminary preparation of material for such services, on a strictly voluntary basis, and never, during the life of this treaty, in peace or in war, in any circumstances, or on any grounds whatsoever, to compel their nationals, or to permit them to be compelled, by conscription, or by any other form of compulsion, whether direct or indirect, whether public or private, to perform military, naval, aerial, or subsidiary service at home or abroad, or wage any war for the collection of any public or private debt.

II. This treaty shall be unconditionally binding upon each of the high contracting parties for 30 years from the date of its ratification, and may not be denounced by any high contracting party within that time. It shall continue to be binding upon each of the high contracting parties indefinitely thereafter, unless denounced by that high contracting party, formal notice given, or the withdrawal three full years in advance of its effective date.

III. The high contracting parties, having in view the possibility that in some countries constitutional provisions may require considerable time to be adjusted so that this treaty may in no way conflict with any fundamental law, agree to regard the adoption by national legislatures of resolutions, or equivalent formal expressions, recording formal acceptance in principle of the treaty as ample guaranty of eventual ratification and as sufficient warrant for action in good faith by each and all of themselves.

CAUSES AND EFFECTS OF DEFLATION OF 1920

Mr. SHIPSTEAD. I ask unanimous consent to submit a resolution, and ask that it may be read, printed, and referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Minnesota? The Chair hears none, and the Secretary will read the resolution.

The reading clerk read the resolution (S. Res. 246), as follows:

Whereas it has been repeatedly charged on the floor of the Senate, upon the authority of responsible experts, that the policy of deflation inaugurated in 1920 has caused a shrinkage in the value of agricultural and other properties amounting to more than $50,000,000,000; and

Whereas this deflation policy has been in large measure responsible for the financial failure and bankruptcy of more than 600,000 farmers in the 15 wheat-producing States alone, and for the failure during the four years of 1920 to 1923 of 1,357 State and National banks, with liabilities of more than $500,000,000, and for the failure of more than 50,000 manufacturing and commercial concerns; and

Whereas the agricultural, commercial, and financial distress thus created in the agricultural sections of the Nation is now being reflected in rapidly increasing industrial and commercial depression in other sections of the country, attended by widespread unemployment and wage reductions; and

Whereas these effects are aggravated by the present policy of the Secretary of the Treasury in issuing Treasury certificates at excessive rates of interest, thus tending to increase the interest charges to all classes of borrowers; and

Whereas accurate knowledge of the causes of this unprecedented deflation is necessary as a basis for effective action by Congress to prevent the recurrence of such a calamity; and

Whereas no adequate investigation of this question has ever been made and no investigation whatever has been attempted since the production of certain vital documents, such as the confidential minutes of the secret meeting of the Federal Reserve Board on May 18, 1920: Now, therefore, be it

*Resolved*, That a select committee of five Members be elected by the Senate, with authority to investigate the causes, methods, and results of the deflation of agriculture, commerce, finance, and industry which originated in 1920, and particularly the part played in such deflation by the Federal Reserve Board, the advisory council, the class A directors, and the regional boards of the Federal reserve system, and to report its findings and recommendations to the Senate.

*Resolved further*, That for the purpose of this investigation, the said committee, or any subcommittee thereof, is authorized to conduct its investigations during the recesses of the Senate, and is empowered to administer oaths, summon and compel the attendance of witnesses, and send for and compel the production of books and papers, including all books and records of the Federal reserve system and national banks; to employ a stenographer at a cost not exceeding 25 cents per hundred words to report such hearings as may be had in pursuance hereof. All expenses incident to the accomplishment of the purposes of this resolution to be paid out of the contingent fund of the Senate.

The PRESIDING OFFICER. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. CURTIS. Mr. President, I desire to know whether the resolution provides for a separate committee to make the investigation contemplated, or does it provide that it shall be made by the Committee on Banking and Currency?

The PRESIDING OFFICER. The resolution provides for the election of the committee by the Senate.

Mr. CURTIS. Then I ask that the resolution go over, Mr. President.

The PRESIDING OFFICER. The Senator from Kansas asks that the resolution submitted by the Senator from Minnesota go over.

Mr. MOSES. The introducer of the resolution has asked that it be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as I understand.

Mr. CURTIS. I am perfectly willing to have that done.

The PRESIDING OFFICER. The Chair has referred the resolution to the Committee to Audit and Control the Contingent Expenses of the Senate.

STATEMENT OF SENATOR SIMMONS ON THE REVENUE LAW

Mr. HARRISON. I ask unanimous consent to have inserted in the RECORD a statement which appears in the New York Times of this morning, issued by the senior Senator from North Carolina [Mr. SIMMONS], the ranking member of the minority of the Finance Committee, touching the revenue law, in answer to a statement issued by the President when he signed the Democratic measure.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the statement will be printed in the RECORD.

The statement is as follows:

[From the New York Times, June 5, 1924]

SIMMONS ACCEPTS TAX AS AN ISSUE—DEMOCRATIC SENATOR SAYS PARTY WILL GLADLY GO TO COUNTRY ON REVISION—HE CONTRADICTS COOLIDGE—DISPUTES THE CONTENTION THAT INCOME TAXES THROTTLE ENTERPRISE

WASHINGTON, June 4.—President Coolidge's recent statement that the new income-tax rates would throttle business initiative and new enterprises, and similar declarations by Secretary Mellon, were sharply denied to-day by Senator SIMMONS, ranking Democrat of the Finance Committee, who asserted that Treasury figures showed that the President and the Secretary were wrong.

Terming the argument that investors would rush to tax-free securities only a "bogy," and stoutly claiming that the income-tax rates he had had written into the bill would actually release more money to industry than the Mellon plan, Senator SIMMONS accused President Coolidge of attacking Congress through bitterness over the defeat of the administration program.

Tax revision as a campaign issue would be hailed with gladness by the Democrats, the Senator said, broadly intimating that Congress was sure it reflected the wishes of the country when it amended the tax bill as it did.

"The President and Mr. Mellon," said Senator SIMMONS, "evidently die hard. It was to be expected, after their strenuous efforts in behalf of the Mellon plan, that they would be somewhat resentful, not to say humiliated, at its emphatic repudiation by the representatives of the people in both branches of the Congress. But it was not to be expected that the President would make the signing of the bill an occasion for a quasi-political speech and an ill-disguised attempt to justify this discredited Mellon scheme by an indirect assault upon the Congress.

"Manifestly, the President and Secretary of the Treasury found it hard to endure the thought that their pet plan had been rejected and a Democratic plan adopted by a Republican Congress.

AN "EXHIBITION OF CHAGRIN"

"The President's statement advances no new arguments or facts. It is merely an adroit and clever recapitulation of the overworked propaganda in favor of the Mellon plan. By many it will be regarded as a somewhat painful exhibition of disappointment and chagrin, and by others as a shrewd political move to play both ends against the middle.

"Like the statements which have heretofore emanated from Mr. Mellon, the statement of the President consists largely of a general statement based upon assumed facts. Both carefully avoid any statement of the evidence upon which their assumptions are based.

"I do not overstate the case when I say the facts of the record in the Treasury Department furnish ample evidence to refute every contention made by the President and Mr. Mellon with reference to the effect upon productive industries of the income-tax provisions of the new law and that the broad statements made by the President in this respect are not confirmed by these record facts.

"The Democratic indictment against the Mellon plan is based upon its gross discrimination against the vast multitude of taxpayers of relatively small incomes in favor of a few thousand taxpayers of great wealth.

"Clearly it does not require argument to confirm this contention, because the facts upon which it is based are disclosed in the Mellon surtax schedule and can not be camouflaged, evaded, or explained away.

"Under that plan the average reduction of surtax rates from the 1921 basis on incomes of less than $64,000 is 22 per cent; on incomes between $64,000 and $100,000, 35 per cent; and on incomes in excess of $200,000, 50 per cent. The purpose and effect of this discrimination is unmistakable.

"The President overlooks this patent discrimination and adroitly seeks to create the impression that the Mellon plan, if adopted, would have worked to the interest of the masses.

"He also treats as a matter of little or no consequence the fact that under the substituted Democratic rates over 6,500,000 taxpayers will pay less than under the Mellon rates, while only 5,400 taxpayers would pay less under the Mellon rates than under the Democratic rates.

"Surely, if the President and the Republican Party wish to make the Mellon plan, as against the Democratic plan as written in the new law, an issue in the approaching campaign they may rest assured that the issue will be heartily welcomed by the Democratic Party.

SEES GAIN TO 6,500,000 TAXPAYERS

"No proposition of legislation advanced by an administration having control of both branches of Congress, after full discussion and due consideration inside and outside of Congress, was ever more crushingly repudiated by the Representatives and accredited spokesmen of the people than was the Mellon plan. On direct votes it received only about one-half of the Republican vote of the House of Representatives and met signal defeat in the Senate.

"Assuredly, in casting their votes against this plan the Representatives of the people in Congress reflected not only their individual views with reference to its merits, but as well what they regarded as the attitude of their respective constituencies.

CONCERNING TAX-FREE SECURITIES

"Both the President and Mr. Mellon base their arguments in favor of the Mellon maximum rate of 25 per cent almost solely on the contention that any higher rate would invite investment in tax-free securities. They not only offer no evidence to support their conjectures in this regard, but they shut their eyes to the undisputed facts of record in the Treasury Department, which completely confute their contentions. They refuse to consider or discuss the indisputable fact that out of $2,879,000,000 of assets listed in 1922 for estate taxes there were found tax-free securities barely sufficient to cover funeral and administrative expenses.

"The President and Mr. Mellon refuse to discuss the well-established contention that for every dollar that escapes surtax through investment in tax-free securities more than $10 escapes surtax through failure of corporations to distribute their surplus earnings, and they denounce as rank economic heresy any proposition to force a distribution of these earnings through the imposition of surtaxes such as would have to be paid on similar earnings by an individual or partnership.

"Divest the arguments and contentions of the President and Mr. Mellon of this bogy of investment in tax-free securities and their whole case against a higher surtax rate falls to the ground.

"Not only is there no foundation for their contention that productive business is being undermined by investments in tax-exempt securities, but there is no foundation for their argument that the Mellon plan and its distribution of reductions as compared with the Democratic plan with its distribution of reductions would result in more capital being attracted to new enterprises.

"On the contrary, the record evidence shows the reverse of that contention would result.

"Leaving out of consideration the earned income provisions suggested by Mr. Mellon, under these new rates as applied to the tax collected in 1922, 5,400 individuals would pay more taxes under the Democratic plan than under the Mellon plan; but because of the lower rates of the Democratic plan upon incomes below $67,000 over 6,500,000 taxpayers with incomes of less than $67,000 would pay less tax than under the Mellon plan.

"The record shows that of the total net income returned from business for the year 1921, amounting to $2,366,318,000, only $47,000,000 of this was returned by individuals whose incomes were in excess of $70,000. Taking these several statements of facts together, it must therefore be apparent that the Democratic plan, because of its lower rates on incomes below $67,000, would result in releasing much more money for investment in productive enterprises than would the rates of the Mellon plan.

"The argument for the Democratic plan is not based upon assumptions and conjectures but upon facts disclosed in the rates of the two plans and in the data in the Treasury Department."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 3104) granting 160 acres of land to the Western State College of Colorado, at Gunnison, Colo., for the use of the Rocky Mountain biological station of said college.

The message also announced that the House had passed the following bill and joint resolution of the Senate:

S. 3188. An act for the abandonment of a portion of the present channel of the south branch of the Chicago River; and

S. J. Res. 142. Joint resolution providing for the United States Government to have representation at the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida.

The message further announced that the House had concurred in the concurrent resolution (S. Con. Res. 16) authorizing a reprint of the annotated Constitution.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker of the House had signed enrolled bills and a joint resolution of the following titles, and they were thereupon signed by the President pro tempore:

S. 3181. An act to authorize an appropriation to enable the Director of the United States Veterans' Bureau to provide additional hospital facilities;

H. R. 5478. An act to amend sections 1, 3, and 6, of an act entitled "An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment";

H. R. 7877. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8143. An act for the protection of the fisheries of Alaska, and for other purposes; and

H. J. Res. 194. Joint Resolution to print as a House document the proceedings of the national encampments of the Grand Army of the Republic, the United Spanish War Veterans, and the American Legion, for the use of the House and Senate.

COMPARISON OF MELLON INCOME-TAX PLAN WITH PRESENT LAW

Mr. COPELAND. Mr. President, I ask unanimous consent to have printed in the RECORD a very fair and illuminating analysis and comparison of the merits and effects of the Mellon bill and the Simmons Democratic revenue bill, written by Mr. R. M. Lynn, an able newspaper correspondent of this city, and printed in the News Leader, of Richmond, Va.

The article referred to is as follows:

[From the News Leader, Richmond, Va., Wednesday, June 4, 1924]

LOWER TAXES ON MAJORITY OF INCOMES BY NEW LAW THAN UNDER MELLON PLAN

WASHINGTON, June 4.—Against the background of propaganda for the Mellon tax plan, the bill which finally passed Congress and became a law stands before the Nation somewhat like an orphan wished on the family. They wanted a baby, but a scientifically bred eugenic prodigy, not a run-of-mine child without pedigree or pretensions.

At least it is properly born. Congress is the constitutional body intrusted with the laying of taxes and the production of revenue. So it can be set down that the tax bill is of respectable parentage.

In spite of all that was preached about the plan advanced by Mr. Mellon, tax reduction did not depend upon the acceptance of that plan. But thousands of persons who were instigated to write to their Congressman undoubtedly had the idea that unless the Mellon plan—and no other—passed Congress there would be no tax reduction.

If the reader is a tiny taxpayer, if he is a small taxpayer, if he is a modest taxpayer, if he is a fairly prosperous taxpayer, if he is a genuinely prosperous taxpayer, if he is an almost-rich taxpayer, if he is a rich taxpayer he will pay less in income taxes under the bill Congress passed than he would had the Mellon plan been adopted.

MOST WOULD PAY LESS

If he is a very rich taxpayer, he would pay less under the Mellon plan.

Every taxpayer in Richmond, for instance, from the smallest up to the man whose net income is $64,000 a year, pays less under the bill which took the place of the Mellon plan.

Those whose net incomes range from $64,000 up to $100,000 pay slightly more under the bill than they would pay under the Mellon plan. At $100,000 the tax is $2,900 more.

The bill it will be seen does not "swat" the rich. Whether it swats the very rich depends upon the definition of swat.

Another thing: If the business of the United States is conducted for the most part upon capital furnished by persons whose individual net incomes range up to $64,000 a year, the bill as passed does more to encourage these persons than the Mellon plan undertook to do. And the vast bulk of the business of the country—take Richmond for instance—is done on capital in firms and corporations furnished by persons whose net income is within the $64,000 outside limit. To put it differently, if the investors in business enterprises whose net income is under $64,000 were to withdraw their capital there would be revolution. If the persons whose individual income is above $64,000 a year were to withdraw their capital it would be a serious thing, but no such catastrophic consequences would follow. Given time the deficiency could be supplied by persons of smaller income.

MUCH WILL BE SAID

In the coming months it is likely that much will be said about the tax bills—the one that Mr. Mellon proposed and the one the Democrats substituted. The former is assumed to be familiar in its outlines, but the latter in several of its larger aspects needs much more publicity than it has gotten if the country is to pass intelligent judgment as between the two plans. Hence the remarks which immediately follow.

In the bill of more than 350 pages Mr. Mellon attempted to translate correct principles into a vast body of rates which would yield sufficient revenue and yet lighten the total of the tax burden. Adjustments were made in accordance with the author's theory of what constituted an equitable distribution upon all subjects of taxation. Mr. Mellon, in a word, actually undertook to write the revenue bill in its entirety. No other Secretary of the Treasury had ever done this. Under the Constitution revenue measures originate in the House.

Incidentally, the Secretary linked tax reduction with the demand that the proposed soldier bonus bill be defeated. This, as it turned out, did much finally to discredit the claim for the Mellon plan that it was a "scientific" bill, for the two proposals are essentially independent, although, of course, the passage of any law contemplating additional expenditures increases the cost of government. As Senator ROBINSON, Democratic floor leader, expressed it to the writer: "Every appropriation of Federal moneys has, of course, some relationship to proposals for tax reduction, and the unfairness of making the latter dependent upon the defeat of adjusted compensation legislation is manifest, even to many who oppose measures of the latter character."

GREAT IMPETUS TO PLAN

Great impetus was given the plan in the three weeks from the date of its publication, November 10, to the assembling of Congress December 3. When Congress met the country had been "sold" the idea that tax reduction and the Mellon plan were synonomous.

Debate in committee and on the floor extending over a period of several months developed one clear line of cleavage between the backers of the Mellon plan and its critics. On the one side were those who accepted the Secretary's arguments, figures, and principles practically without question and who contributed singularly little to the meat of the discussion. On the other side were those who challenged, not so much the taxation theories of the Secretary, but their practical application. These, chiefly Democrats, were in the majority and in the end wrote the bill substantially as it went to the President.

It was necessary for the critics to answer the Secretary's arguments, for two reasons: First, during the debates, more especially that in the Senate, there was doubt how the vote would go, and those who offered substitute proposals sought to win over the wavering; and, second, enlightenment of the public, or a large section of the public, which had taken the Mellon plan on faith, was highly desirable, as a matter of principle as well as of expediency.

LEADERS ON DEFENSIVE

No candid reader of the RECORD can fail to be impressed with the fact that the opponents of the bill embodying the views of the Secretary pressed the issue, put the administration leaders on the defensive, and outgeneraled them at all points. In the Senate SIMMONS, who is recognized as a "financial wizard," demonstrated a mastery of the subject—from the angle he saw it, at any rate—which was in striking contrast with the equipment of SMOOT, in charge of the committee bill. The latter showed to advantage only as he displayed a memory for detached facts and figures. He made no attempt to build up his case. Apparently he assumed that Mr. Mellon had said all that needed to be said as argument in chief and either could not reply to the attacks on the bill or preferred to treat them with a sort of affected disdain. At any rate, the significant fact is that bombardment of the Mellon plan encountered only the feeblest rejoinder.

To illustrate: There was no reply when the Secretary's theory of loss of income from taxpayers in the high surtax brackets was challenged. Secretary Mellon had said:

> "Taxpayers subject to the higher rates are withdrawing their capital from productive business and investing it in tax-exempt securities and adopting other lawful methods of avoiding the realization of taxable income. The result is to stop business wealth from taking the risks which are incidental to the development of new business."

Senator RALSTON made the attack which opened the way to demolition of the Secretary's contention as to the utilization of tax exempts by high-bracket taxpayers.

WOULD BE SERIOUS INDEED

Alluding to the quotation from the Secretary just above, Senator RALSTON said in the course of his speech:

> "If these statements were well founded, they would indeed be serious, but they do not seem to be supported by the Secretary's figures. The figures show that in 1920, with total net income returned of $23,735,629,183, the deduction on account of tax-exempt bonds was only $61,459,572, or about one-fourth of 1 per cent of the incomes. But in 1921 the exemptions on this account dropped to $46,994,406. A decrease in one year of $14,550,162, or almost one-fourth of the total similar exemption in 1920, on account of tax bonds can not be seriously considered as indicating any growing peril to national revenues or any alarming tendency of large income-tax payers to flee to tax-exempt bonds for refuge."

As to decedent's estates (mentioned by Secretary Mellon) the Senator produced figures from the Secretary's report to show that tax-exempt bonds constituted less than 8 per cent of such estates, or scarcely sufficient to discharge the funeral and settlement expenses. One incidental effect of the disclosure was effectually to dispose of the isolated and widely quoted case of William Rockefeller, whose estate did consist principally of tax-exempt holdings.

The Senator further presented figures on the total taxables of the country and drew the conclusion that "in reality tax-exempt securities represent about 6 per cent of the taxable wealth of the Nation." He added that "the State and local tax-exempt securities are less than 2 per cent of the taxable wealth of the country."

CHECKED UP RALSTON

Senator GLASS, a former Secretary of the Treasury, afterwards checked up on Senator RALSTON'S figures, and in a speech in the Senate said:

> "I think, just as the distinguished Senator from Indiana stated, that the relation of tax-exempt securities to the general issues of National, State, and municipal bonds has been greatly exaggerated. I confess, to my surprise, that a more careful examination and analysis of the subject, prompted by the address made by the Senator from Indiana, has convinced me that that is a fact.
>
> "I fail to find that the proportion is such, at this time at least, as to seriously menace the fiscal policy of the United States Government. What it will be at some time in the future no man may say. We are, however, now engaged in issuing tax-exempt securities at a rather alarming extent in excess of $200,000,000 by the farm loan and joint-stock land banks and many more millions by the States and subdivisions of the States; but even at the present rate it will be a long time before the issuance of these securities will become an actual menace to the fiscal affairs of the Government."

In further destruction of one of the main contentions of the Mellon plan, Senator SIMMONS and Senator JONES of New Mexico presented figures from the report of the Secretary showing that the total net income of corporations had increased from 1921, when they were over $4,000,000,000, to $6,578,000,000 in 1922, and presented the estimate of the Treasury Actuary of a further increase to $8,500,000,000 in 1923. These figures were the basis of the charge that taxpayers in the high brackets were turning to the device of corporate organization, where earnings piled up in undistributed form and escaped taxation, rather than investing in tax-exempt securities.

INCOME IS INCREASING

That corporation income is increasing, in the aggregate, and at a rapid rate, as shown above, is only one phase of the subject: Nondistribution of income is of equal importance. Figures from the Secretary's report were presented showing that in 1922 the total number of corporations making income-tax returns was 108,611. Of these 30,048 distributed no dividend, though they had total net income of $896,254,485, and despite the fact that they had previously accumulated an undivided surplus of $3,954,000,000. Of the remaining corporations, those disbursing less than 10 per cent of income were 1,867 in number, with a net taxable income of $247,000,000; their payments in dividends aggregated only a little more than $14,000,000.

One of the fundamentals of the Simmons-Jones argument against too great reduction of the surtaxes was insistence that the subject of income taxes must be viewed in relation to all the taxes which the citizens are required to pay. Wealth as represented by material things, and as represented by service, is one thing. Wealth as represented by money is another thing. The tax imposed upon the former may be, and is, passed on to somebody else. The manufacturer adds the tax item to the cost of the article he produces, and the doctor can make his bill to cover his taxes.

But great emphasis was put upon the fact as alleged—and not challenged—that the tax upon wealth as represented by income can not be passed on. It stays where it is put. It is the one and only tax which can not be handed on. Only Congress can afford relief.

Developing their theory, the opponents of the reductions in the surtax rates which Mr. Mellon advocated cited the tax totals of the Nation, the grand total being for the last year $7,428,749,000—the total for the Federal Government $3,204,133,000, and for the States, etc., $4,224,616,000. They contended—and the contention was not disputed—that 78.8 per cent of all the State, etc., tax payments represented receipts from the general property tax, which it was asserted, as a matter of common knowledge, the invisible forms of wealth very largely escaped.

They contended as to the Federal taxes that except as to the income tax and the tax on corporations, almost without exception they are taxes that except as to the income tax and the tax on corporations, almost without exception they are taxes which are borne by the consumers, making up about one-half of the total of Federal taxes. In addition, it was declared that the high tariff schedules impose in themselves, but as an incident, a burden of three and a half billion dollars, which constituted a consumption tax, borne by those who must have the necessities of life.

In distributing the reductions in income taxes—the only tax that can not be passed on—the substitute bill gave therefore a larger proportionate reduction to small than to large incomes.

FORMER ATTORNEY GENERAL HARRY M. DAUGHERTY

Mr. BROOKHART. Mr. President, on the 13th of February last a resolution by the junior Senator from Montana [Mr. WHEELER] was presented to the Senate providing for an investigation of the office of the Attorney General and certain of his assistants. The resolution was referred to the committee and on February 29, being the calendar day of March 1, it was modified, amended, and agreed to. After the presentation of the resolution, the Senator from Ohio [Mr. WILLIS] presented to the Senate a letter from the then Attorney General, in which that official stated:

> I wish you to understand, and I authorize you to say to the Senate, that any committee of investigation which the Senate, in its judgment, may appoint will be accorded every facility which the Department of Justice affords, in order that a thorough investigation of all my official acts and of the Department of Justice may be made fairly and systematically.

Again, in the same letter, the then Attorney General stated:

> I have observed in the press insinuations that so-called high officials bought and sold Sinclair Consolidated Oil Co. stock upon information regarding the making of the oil leases, the inference being that they profited thereby. In view of such publications, I desire now to deny all such insinuations and inferences and to give the facts in this connection, in so far as they relate to me personally.
>
> Before I became Attorney General or seriously considered any connection with the Government, from time to time in the ordinary course of my personal investments, I bought and paid for some stock in the Sinclair Consolidated Oil Co. Six months after the execution of the Teapot Dome lease, of April 7, 1922, endeavoring to recoup my losses in said stock, I sold a portion of my holdings therein acquired and paid for as aforesaid before I became Attorney General. Thereafter I bought back and paid for the same amount of said stock thus sold at a price slightly less than the price for which the same amount had been sold. Finally, in the fall of 1923, I sold all of my holdings in said company acquired prior to my becoming Attorney General at a net loss to me of about $28 per share. In addition to this transaction I bought 18 shares of said stock in the year 1922, the year the Teapot Dome lease was executed, which I acquired for the sole purpose of rounding out my holdings in said stock.
>
> This is the story which the testimony will reveal, and I am glad to have the Senate know of my personal business transactions in said stock in 1922. There is nothing unusual in this transaction, nothing improper, nothing indiscreet, and nothing to conceal.

Again in this letter he says:

> After the testimony has been presented by those making the charges, and I am thus advised as to what I am actually charged with and the testimony in support thereof, I further respectfully request the right to produce testimony before the committee on motion of my said counsel, and have process to compel attendance of such witnesses.

Again at the first hearing the counsel, Mr. Howland and former Senator Chamberlain mentioned and authorized in the letter from which I have just quoted, appeared and presented another communication from the then Attorney General to the committee.

I read from page 5, of part 1, of the hearings:

> Immediately on the adoption of the above resolution the Attorney General, by letter, extended to your committee every agency and facility of the Department of Justice to aid you in your investigation, and made certain requests; that is to say, that his representatives during the progress of the hearing might have certain privileges—
>
> First, that said representatives may have the right to be present at all hearings and meetings of your committee except, of course, executive sessions, and be duly notified of the time and place of such meetings; that they may be furnished with a transcript of the testimony and the right of inspection of all documents as fully and to the same extent as members of the committee.
>
> Second, that they may have the right to interrogate all witnesses that may be called before your committee.

At the end of this communication, on page 9, of part 1, of the hearings, he says:

> The Attorney General resents and condemns the indiscriminate broadcasting of unsubstantiated rumors, whispered criticisms, and false and scandalous statements, for which no one is responsible, and welcomes this opportunity, before this responsible committee of the Senate of the United States, to expose falsehood and scandal and to establish truth.

Again, during the first day of the hearings, on page 36, part 1, the following occurred:

> Mr. HOWLAND. Mr. Chairman, I would like to ask a question for information, with your permission.
>
> The CHAIRMAN. Proceed.

Mr. HOWLAND. We are advised that the subpœnas which are issued by the committee are not public documents, and we have no access to them. Now, we are informed that subpœna duces tecum has been issued to the chief cashier or bookkeeper of the bank at Washington Court House, Ohio, to bring with him all the books of the bank. I ask, if that is correct, a correct statement of the terms of the subpœna duces tecum?

Senator WHEELER. Your information is not correct. That is the bank of which Mr. Mal Daugherty is president, that you have referred to?

Mr. HOWLAND. Yes.

Senator WHEELER. The subpœna duces tecum was issued to bring with them the deposit ledgers since 1920.

Mr. HOWLAND. All the deposit ledgers?

Senator WHEELER. All of the deposit ledgers since 1920, and copies of certain other instruments. Now, I will say to you this, that the attorney for the bank called me up this morning and told me that it would be almost impossible to bring those ledgers. I told him I would take it up with the committee and see what arrangements could be made with reference to it, but that we must have one of two things: (1) Either we must send an accountant—and that is one of the things I intended to take up in executive session—either we must have an accountant go there and examine these bank books; or (2) we would have to have the books themselves.

Mr. HOWLAND. I am glad to be corrected in regard to that; and I hope, Senator WHEELER, that the latter alternative may seem satisfactory to you.

Senator WHEELER. That is something we wanted to take up in executive session ourselves after adjournment of the regular session to-day.

I will say by way of parenthesis here that the executive session approved that plan as requested by the bank and Mr. Mal Daugherty and the attorneys for H. M. Daugherty, and sent the accountant to get the information in that way.

Then this further was said:

Mr. HOWLAND. In view of the fact that the committee is investigating a particular proposition, I would like to have processes issued for Mal Daugherty, president of the bank—he will be here, but I would like to have him under subpœna—

Therefore it appears that Mr. Daugherty, by his attorneys, himself asked for the summoning of his brother, the president of this bank in Ohio, and the committee acted upon that situation in reference to that matter.

Mr. NORRIS. Mr. President, may I ask the Senator a question?

Mr. BROOKHART. I yield to the Senator from Nebraska.

Mr. NORRIS. Did the committee issue the subpœna as requested?

Mr. BROOKHART. Yes; the subpœna was issued.

Mr. NORRIS. The Senator said they acted on the matter, but he did not say whether or not they complied with the request.

Mr. BROOKHART. Let me see. Perhaps it had already been issued. I am not sure about that, but——

Mr. NORRIS. At any rate, the subpœna was issued?

Mr. BROOKHART. The subpœna was issued, and agreement was expressed between the attorneys and the committee for doing so at that time.

Again, in a letter to me as chairman of the committee, on March 17, the Attorney General refers to this request, and says:

We some time ago requested the issuance of subpœnas for James W. Holcombe and M. S. Daugherty, named among several others, at Washington Court House, Ohio.

I think we required them afterwards to state the substance of what they desired to prove by those other witnesses that we did not know about. So far as M. S. Daugherty was concerned, the committee at all times were willing to summon him.

Mr. President, from the records I have quoted it is evident that the Attorney General himself not only asked for but welcomed this investigation. It is evident that he made the proposition, that he would submit the evidence of his private affairs to this committee gladly and willingly. Upon that theory we proceeded to take testimony, and that testimony disclosed a very remarkable situation in the Attorney General's household; and since that testimony was taken he apparently has changed his mind upon all of these matters.

I am not going into great detail to-day in review of all of the testimony that has been taken by this committee. I am only going to take up the phases of it that I think point out the reasons why the Attorney General has changed his mind, and now refuses to recognize the committee, or to appear before it, or to explain the matters that have been disclosed in the testimony.

We found from the testimony that one Jess Smith was a member of the Attorney General's household; that he had been for many years a friend of the Attorney General in political matters in their State of Ohio; that he came from Washington Court House, Ohio, which had been the former home of the Attorney General himself. This relationship was so close that the testimony shows that Jess Smith even assisted in caring for the invalid wife of Mr. Daugherty. So far there would be no criticism of that association; but we go a litte further, and we find Mr. Daugherty and Mr. Smith traveling together over all parts of the United States on all sorts of official errands.

We find that Mr. Smith had an office in the Department of Justice, although he was not an employee of the Government at any time, and at no time had any official right to an office or a position there. We find that he used the official stenographers of the department, and dictated letters of all sorts, and many of them, on many different occasions—in fact, continuously and all the time. We find that Mr. Daugherty himself called in the acting chief of the department of investigation at the time when he first took office, Mr. Bailey, a man who has every appearance of being entitled to the highest confidence in every way; and Mr. Daugherty instructed Mr. Bailey to take orders from Jess Smith in his absence, and he said that Smith would talk over the matters with Bailey, the acting chief of the department of investigation; and, mind you, Bailey was a few months later succeeded by W. J. Burns, who then took charge. Mr. Daugherty not only instructed him to take the orders of Jess Smith, but he said they would then talk them over in the evenings in their apartment, or something of that kind, and in that way the Attorney General would keep in touch with many things in the department of investigation. That testimony is now uncontradicted in the record, and Mr. Daugherty declines to come before the committee, and refuses to face it.

It is disclosed by the evidence overwhelmingly that Jess Smith had access to all the files of the department, even the most confidential files. He took these files away with him. He seemed to have special control of the files relating to the appointment of officers and persons in the service of the Department of Justice in every particular. These employees regarded him as second in command after Mr. Daugherty himself. There was no assistant to the Attorney General or Assistant Attorney General who ranked up with Jess Smith in power of command over the employees generally in that department.

In connection with this situation we find that Jess Smith made a will in which he left a large share of his estate to Mr. Daugherty. We also find that he sold out his business when he came to Washington, and he had no ostensible business except what might be the income from interest on his money that he received for his business and some stocks that he owned, the total amount of his property being about $136,000, as disclosed by the files in his estate. He came here to Washington. He lived in the same house with the former Attorney General at first, up on H Street, Mr. McLean's house. From there they went to Wardman Park Hotel, and they paid, I believe, $7,800 a year for their apartments there. They lived expensively. The testimony shows that their expenses amounted to $50,000 a year here in the city of Washington.

The testimony further shows that Jess Smith collected some $500,000 in graft money paid by the big bootleggers of the country for protection from prosecution. The circumstances and details of this, as disclosed by the committee, are so well established that there can be little doubt of the truth of this situation. The report of Jess Smith's estate shows that it increased from $136,000 to $214,000 in the two years or thereabout that he was here in Washington. In this same connection, it appears that in the last few months of his life Jess Smith became worried and afraid and finally he committed suicide, took his own life in the apartments of H. M. Daugherty.

These circumstances of a conspiracy to protect crime are so intimate, so well interwoven, so well connected, so completely undisputed that the evidence, I think, unquestionably establishes the fact that there existed a conspiracy for the protection of criminals by collecting graft from them. In a general way the evidence shows that this would be collected along for a year or two, and then they would be arrested and fined on some minor matter or at a little later date Mrs. Willebrandt would put some of them in the penitentiary; but even Remus was allowed to run undisturbed for about a year and a half before anything substantial was done to stop him in his wholesale scheme of violation of the liquor laws.

This connection and conspiracy is established by these facts and these circumstances so completely that in any court the

rule of law would apply, without any doubt, to the effect that every act and every word of Jess Smith in furtherance of this conspiracy is not hearsay but is direct evidence against Daugherty himself.

In order to find out something of Mr. Daugherty's own financial situation we made an investigation of that subject at Washington Court House at the same time we attempted to investigate the bank, and we discovered this situation: This is the witness R. M. McFarland, who examined the tax returns of Mr. Daugherty before he became Attorney General.

This testimony is found on page 1423 of part 6 of the hearings:

Senator WHEELER. Did you have occasion to visit Columbus, Ohio, for the purpose of investigating the tax return of Mr. Harry M. Daugherty for the years 1920 and 1921?

Mr. MCFARLAND. Yes, sir. I looked up Mr. Daugherty's official tax return in the tax records at the courthouse at Columbus.

Senator WHEELER. Were they sworn to?

Mr. MCFARLAND. They were signed and sworn to by Mr. Daugherty.

Senator WHEELER. And have you got copies of those reports with you?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. And did you check them to see that they were correct with the original reports that had been sworn to?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. Will you hand them to me?

Mr. MCFARLAND. Yes, sir. Here is the report for 1920, or the copy that I made, and also for 1921.

Senator WHEELER. 1920 is the first page here?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. This refers to Harry M. Daugherty, the former Attorney General of the United States?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. The tax return made by him for 1920 shows as follows:

| | |
|---|---|
| One Packard car | $3,360 |
| Household goods, etc. | 150 |
| Books, pictures, jewelry | 625 |
| Office furniture | 200 |
| Chase piano | 250 |
| Victrola | 25 |
| Money on deposit | 820 |
| Value of mortgages, notes, book accounts, stocks, etc. | 7,700 |
| Value of all investments and taxable bonds, stocks | 2,000 |
| Making grand total of | 8,130 |
| Less | 100 |
| Total tax on | 8,030 |

Mr. FESS. Mr. President, will the Senator yield there?

Mr. BROOKHART. I yield.

Mr. FESS. In the State of Ohio the law does not require the listing of stock in domestic corporations, and unless this stock owned by the Attorney General was stock in a foreign corporation, it would not appear in the tax duplicate.

Mr. BROOKHART. I understand, and we desired to inquire of the Attorney General about that proposition and what, if any, stocks he held, but the Attorney General refuses to come before us, refuses to say a word, or refuses to explain.

Mr. FESS. If the Senator will yield there, I note that he has refused to come before the committee. I understand that that is because of a decision of Judge Cochran that it is not a legal procedure.

Mr. BROOKHART. I will say to the Senator that the decision of Judge Cochran does not hold it to be an illegal procedure. That is, Mr. Daugherty can come voluntarily, and that is what we asked him to do. His appearing would not be in violation of that decision. The decision, I think, is used as a subterfuge for avoiding the appearance which he himself sought in the beginning of this proceeding, and which he advertised to the country that he welcomed.

Mr. FESS. I understand that, but I have read his statement, and I take it from his statement that he takes the position that this is illegal, and therefore it can have no standing.

Mr. BROOKHART. The court did not hold it to be illegal for us to invite him to come, and it did not hold that it would be illegal for him to accept the invitation.

Mr. CARAWAY. Is it not perfectly apparent that if a man had a reasonable statement to make, he would avail himself of the opportunity?

Mr. BROOKHART. It seems so to me.

Mr. CARAWAY. Would not any gentleman refuse to disregard a reflection on his integrity, and say, "The reason I will not vindicate myself is that you are not a legal committee"?

Mr. BROOKHART. It seems so to me.

Mr. NORRIS. It seems so to anybody.

Mr. FESS. Would the Senator yield?

Mr. BROOKHART. I yield.

Mr. FESS. I do not think it does seem so to everybody.

Mr. NORRIS. It will seem so to anybody who is fair-minded. If anybody wants to crawl under the cloak of a technicality to avoid appearing before that committee under the circumstances, he is welcome to do so, of course, if the courts hold that he has a right to do it.

Mr. FESS. I think the Senator from Nebraska wants to withdraw the statement that it appears so to anybody who is fair minded.

Mr. NORRIS. No; I will stand on that statement.

Mr. FESS. I think the Senator is mistaken about it, and also very unfair, because I have watched the proceedings of this committee, and I have not indorsed all that has taken place. I do not think the Senator now wants his statement left in the RECORD that the testimony shows that $50,000 a year was expended here by the Attorney General and Mr. Smith. That statement was made, I notice, by Roxy Stinson; but does the Senator want to take that as conclusive evidence?

Mr. BROOKHART. Yes; I might say I believe that Jess Smith told that to Roxy Stinson. I believe that declaration of Jess Smith is not hearsay, under the law, but is a disclosure and a part of the conspiracy, and is therefore direct evidence against Mr. Daugherty himself.

Mr. NORRIS. Mr. President, will the Senator yield there?

Mr. BROOKHART. I yield.

Mr. NORRIS. The statement made by the Senator from Ohio, with great respect to him, does not make any defense or in any way refute the statement which I made. I have not said that all this testimony is true. I have not said that some of it could not be explained, or that some of it is not exaggerated. I do not know. But the man who does know is Mr. Daugherty, and those statements standing uncontradicted, and he refusing to come before the committee to contradict them, we have a right to assume that they are true. The man who does know if they are untrue is Daugherty himself. If they did not spend $50,000 a year, and if that is material—maybe it is not; I do not care if they spent $100,000—if that is not true, it can very easily be denied and the incorrectness of it can very easily be pointed out by the men who are charged with having spent the money.

Mr. FESS. Mr. President, if the Senator will permit me to make this statement to the Senator from Nebraska—and I make it guardedly—with great respect to the membership of this committee, if I were in Mr. Daugherty's place and had witnessed the sort of testimony that was admitted there, I certainly would not appear before this committee and I would take the position that Mr. Daugherty has taken. I say that as a responsible member of this body.

Mr. NORRIS. Mr. President, may I interrupt the Senator again?

Mr. BROOKHART. I yield.

Mr. NORRIS. A reflection upon the character of the witnesses, if proven, is something the committee ought to take into consideration. If they are saloon keepers and bartenders and bootleggers, he has a right to show that, if it does not already appear; but I submit that if a murder is committed in a saloon you would not expect to get your witnesses out of a Sunday school, and if Harry M. Daugherty is surrounded by an army of crooks and disreputable characters, that is where you will go to get your witnesses to prove a case against him, and that is where the committee went. If we had a murder or any other crime committed, surrounded by men or women of disreputable character, we would not dismiss the defendant on that ground. We would not wait until somebody committed murder in church, so that we might have respectable witnesses in order to prosecute. If Mr. Daugherty wants to reply and wants to rest upon the ground that his companions, his associates, his confidants, are all disreputable people, and that their words should not be taken, and wants to stay away on that account, he is welcome to any comfort he can get out of that, as far as I am concerned.

Mr. CARAWAY. Mr. President, may I say a word?

Mr. BROOKHART. I yield.

Mr. CARAWAY. Permit me to say this: That I can think of nothing that is more reprehensible than for a man to associate with a woman and introduce her as a lady and then, because she says something that reflects upon his character, try to brand her.

Mr. BROOKHART. Let me say to the Senator that this same woman, Roxy Stinson, was introduced to the President of the United States by Mr. Daugherty, and was taken and placed at dinner beside the President of the United States, and was accorded every honor; and now the Senator from Ohio

seems to intimate that the committee has been guilty of reprehensible conduct for taking this woman's testimony—the woman who knows more about the relations of Jess Smith and Harry M. Daugherty than perhaps any other one person.

Mr. CARAWAY. Is there anything disreputable known about this woman except that she associated with Harry Daugherty?

Mr. BROOKHART. Nothing worse.

Mr. CARAWAY. Can the Senator think of any man who values his honor who would say, "I will not vindicate my honor because I do not like the manner in which the charge was brought against me, if he has any to vindicate? And how can he expect the Senator from Ohio to come here and defend him on the floor and be accepted seriously when he himself will not make a statement; when he requires his friends to do what he will not do himself?

Mr. BROOKHART. Mr. President, I think those observations are very proper. I will say further that the letters, the correspondence, between Roxy Stinson and Jess Smith corroborate every word, practically, of her verbal testimony. She was not required to give it all from recollection. There were many letters that disclosed this relation quite as fully as her verbal statements.

Now, I will proceed a little further with Mr. Daugherty's own financial situation.

Senator WHEELER said:

I notice on this a note, "Listed as actual legal debts, $27,000." Is that correct?

Mr. MCFARLAND. Yes, sir; that was probably campaign expenses which aggregated that item.

Senator WHEELER. He also listed credits, $5,000 secured by loan, and credits of $7,700 due him but unsecured by notes. He listed 500 shares of Wright-Martin stock, worth $2,000.

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. What was the total amount of his liabilities listed there?

Mr. MCFARLAND. He listed actual legal debts for that year $27,000.

Senator WHEELER. And what did he list as being the total amount of his property?

Mr. MCFARLAND. $8,030 is the total amount taxable. He also listed credits of $5,000 secured by loans, and $7,700 due him but unsecured by notes.

Senator WHEELER. Making a total of what?

Mr. MCFARLAND. $20,730, plus 500 shares of Wright-Martin stock, which he lists at $2,000. I think the actual stock-market value of that stock would be considerably in excess of that amount, but according to his own figures the total would be $22,730.

Senator WHEELER. And his indebtedness was how much?

Mr. MCFARLAND. $27,000.

The CHAIRMAN. Is this the same Wright-Martin Co. that was investigated for war frauds?

Mr. MCFARLAND. Yes, sir. There is only one Wright-Martin Co.

The CHAIRMAN. And it was not prosecuted?

Mr. MCFARLAND. That is the one.

Senator WHEELER. I call attention to the tax return for 1921, and ask you to tell the committee what he listed according to his own sworn statement filed in Columbus, Ohio?

Mr. MCFARLAND. His 1921 tax return, made about April of that year, showed:

| | |
|---|---|
| One Packard car, valued at | $2,000 |
| Household furnishings, valued at | 1,400 |
| Musical instruments | 225 |
| Money on deposit in bank | 320 |
| Value of investments in stocks and bonds | 1,800 |
| A grand total of | 5,745 |
| Less exemption of | 100 |
| Total taxable | 5,645 |

He listed also in this year 2,500 shares of Wright-Martin stock.

Senator WHEELER. In other words, 2,000 shares more than he listed the year before?

Mr. MCFARLAND. Yes, sir. He had acquired 2,000 shares more.

Senator WHEELER. At the time he made this 1921 statement was he Attorney General of the United States?

Mr. MCFARLAND. Yes. He became Attorney General of the United States in March, 1921, and this was about a month later.

Senator WHEELER. All right. Now finish your statement.

Mr. MCFARLAND. The courthouse record shows Harry M. Daugherty also owns a house at 480 East Town Street, which he bought in 1903 for $13,150. His real-estate tax report shows this property valued at $5,000. The county records in Franklin County, where Columbus is located, show this is the only parcel of land listed in his name.

Senator WHEELER. At that time he claimed Columbus as his residence?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. And Columbus, Ohio, being his legal residence at that time would be the point at which he would have to list all of his personal property, would it not?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. In 1921, then, his total indebtedness was what, as listed?

Mr. MCFARLAND. He made no mention of indebtedness in 1921.

Senator WHEELER. And the total amount of his assets was how much that year?

Mr. MCFARLAND. According to his figures, the total would be $12,445.

Senator WHEELER. You say it would show a total of $12,445?

Mr. MCFARLAND. Yes, sir.

Senator WHEELER. I think that is all.

We called to the stand, then, Mr. John L. Phelon, and at this moment four men filed into the room and their names were afterwards furnished as Arthur I. Vorys, Esq., of Columbus, Ohio; N. P. Clyburn, Esq.; John Logan, Esq.; and John S. Phillips, Esq. These were the attorneys who showed up to stop us from further investigating Mr. Daugherty's accounts in the bank. There was quite a long discussion with the attorneys about matters, and then finally they left and we proceeded with our examination.

Senator WHEELER. Mr. Phelon, I believe you stated your name?

Mr. PHELON. John L. Phelon.

Senator WHEELER. What is your business, profession, or occupation?

Mr. PHELON. I have been an accountant.

Senator WHEELER. You are an accountant now, are you not?

Mr. PHELON. I am.

Senator WHEELER. You have been connected as an accountant with the Government?

Mr. PHELON. My connection was assistant to national bank examiner, second Federal reserve district, New York City.

Senator WHEELER. Did you have occasion on behalf of this committee to make an examination of the books of the Midland National Bank at Washington Court House, Ohio?

Mr. PHELON. I started the examination.

Senator WHEELER. And will you tell me whether or not you examined any of the records of the bank and certificates of deposit?

Mr. PHELON. Yes; I commenced with the record of certificates of deposit, beginning November 1, 1920.

Senator WHEELER. And what, if anything, did you find in connection with them?

Mr. PHELON. I had Mr. Daugherty and Miss Neall assist me in assembling the canceled certificates of deposit the first afternoon in which I was at the bank.

Senator WHEELER. Did you find any certificates of deposit made out in the name of Harry M. Daugherty, or indorsed by him?

Mr. PHELON. I did; several.

Senator WHEELER. When was it that you made this examination, or attempted to make it, started to make it?

Mr. PHELON. I believe it was on Wednesday, March 18, or March 19 it was.

Senator WHEELER. Will you state whether or not you found a certificate of deposit made out in the name of Harry M. Daugherty in the bank that had not been canceled?

Mr. PHELON. I did not.

Senator WHEELER. Did you find any certificates of deposit in the bank which had been made out to Harry M. Daugherty and canceled?

Mr. PHELON. I found certificates of deposit in the bank which had been indorsed by H. M. Daugherty.

Senator WHEELER. To whom were they made out; do you recall?

Mr. PHELON. I can not recall exactly. I think there were several certificates, and on the reverse side of them H. M. Daugherty's name appeared. I believe——

Senator WHEELER (interposing). When you say you "believe" you mean that is your best recollection?

Mr. PHELON. To the best of my knowledge and belief; yes, sir. And one of these names——

Senator WHEELER (interposing). Of course, all any witness knows is his recollection. We want you to state your recollection of what you saw there.

Mr. PHELON. My recollection was that some of these certificates bore the name of J. E. or J. A. Gray.

Senator WHEELER. And what was the amount of these certificates of deposit?

Mr. PHELON. To the best of my belief there were four of $5,000 each.

Senator WHEELER. Were there any for larger amounts?

Mr. PHELON. I can not recall the amounts of the canceled certificates.

Senator WHEELER. I understood you to tell Senator BROOKHART and myself that there was one large certificate.

Mr. PHELON. Not among the canceled certificates that I recall.

Senator WHEELER. Well, among any that had not been canceled?

Mr. PHELON. In the listing of current certificates; yes, sir.

Senator WHEELER. That is what I am asking about, in the listing of current certificates; what did you find there?

Mr. PHELON. I did not have the exact name or names applying to the numbered certificates according to the register, for the reason that I did not take off the names the first afternoon I was in the bank.

Senator WHEELER. What did you find?

Mr. PHELON. But I found, as far as I can remember, approximately $75,000 in certificates of deposit which bore the name of H. M. Daugherty. This was taken from the record of the original certificates of deposit.

Senator WHEELER. And those certificates of deposit had not been canceled?

Mr. PHELON. No, sir.

Senator WHEELER. Now, how long were you in the bank?

Mr. PHELON. Approximately four hours.

Senator WHEELER. And you went into the bank at our request and with the sanction of Mr. Mal. Daugherty, the president of the bank?

Mr. PHELON. Yes, sir.

Senator WHEELER. And when, if at all, did he stop you from going into the bank?

Mr. PHELON. The first thing on Thursday morning he stopped me from proceeding with my examination.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. BROOKHART. I yield.

Mr. FESS. When Mr. Phelon was making the investigation did he not give his report of the investigation or facts to the press, and did not Mr. Daugherty read what he was doing in the New York press, and was not that given as the reason why Mr. Daugherty said he could not come back into the bank?

Mr. BROOKHART. I am unable to tell what Mr. Daugherty's thoughts were, because we tried very hard to get him before us to find out and he never would come.

Mr. FESS. I mean M. S. Daugherty.

Mr. BROOKHART. The same is true of him. M. S. Daugherty actually appeared before us at one time. Harry M. Daugherty's attorneys asked that he be subpœnaed as a witness, as I have read, to tell about these things. Then when we got up to the facts he refused to testify and went into court and obtained a writ of habeas corpus to prevent us from compelling him to testify.

Mr. FESS. If the Senator will yield further so that he may understand the purpose of my question, I will say that I voted with the Senator in regard to bringing Mr. Daugherty here, as the Senator knows. I was making an investigation after that as to why he did not come and as to the stopping of Mr. Phelon.

Mr. BROOKHART. I will have to say to the Senator that his private investigation has not yet been disclosed to the committee. If the Senator has any evidence that will explain it, we will be glad to hear him.

Mr. FESS. I was told that he was ordered out of the bank because he was divulging the facts which he was finding, and they were being printed in the New York papers, where Mr. M. L. Daugherty himself read them, and he decided that that kind of conduct was not legitimate and might cause a run on the bank. As the protector of the depositors, he refused to let him continue. I think if that is the case there is some ground for his action.

Mr. BROOKHART. I was out there, and the only thing that had a tendency to cause a run on the bank was the refusal of Daugherty to let us see the accounts. Disclosure of them had no such tendency. It was the refusal that made trouble with the bank.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER (Mr. JONES of Washington in the chair). Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. BROOKHART. I yield.

Mr. NORRIS. He went into court, did he not?

Mr. BROOKHART. He did.

Mr. NORRIS. Did he allege that as one of the reasons, or what did he allege as the reason?

Mr. BROOKHART. He made no such claim in his court proceeding, as the Senator from Ohio knows. He claims that we are an illegal institution; that the Senate of the United States has no right to appoint a committee of investigation, with power to summon private parties.

Mr. NORRIS. He did not claim in the court proceedings that Mr. Daugherty had read in the New York papers the disclosures made by this examiner, did he?

Mr. BROOKHART. Not that I know of. No such claim has ever been made to the committee by anybody—by Mr. Daugherty or in behalf of him.

Mr. FESS. If the Senator will permit me, I think if I were the president of a bank with that sort of business going on, I would do exactly as Mr. Daugherty did, and I think every Senator would do the same thing.

Mr. BROOKHART. But there is absolutely no proof that it was going on in that way, and it was certainly contrary to the committee's instructions if it was going on.

Mr. FESS. I think so. That is the reason why I am trying to find out what the committee knew about it.

Mr. BROOKHART. If he had made complaint to the committee, it certainly would have been corrected immediately. I was out there and investigated the conduct of Mr. Phelon. I thought he was very courteous and very efficient and very decent in every respect. He seemed to be the highest type of man.

Mr. President, the Senator from Ohio [Mr. FESS]—and I regret that he has left the Chamber—suggested some hearsay statement about the reason Mr. Daugherty refused to let our examiner see the accounts of his bank. I have here and shall read the sworn testimony of the reasons, or want of reasons, which Mr. Daugherty himself gave at the time:

Senator WHEELER. What did he say to you when he stopped you from proceeding with the examination?

Mr. PHELON. I came into the bank, and I said, "Good morning, Mr. Daugherty," and some other commonplace things were said. I asked Mr. Daugherty in what manner he proved his individual deposit ledgers, and he told me he struck proof the morning after the close of business the day before. In other words, he did not prove his individual deposit accounts the night of the day in which the entries were made, but did it the following morning.

Then he said, "Mr. Phelon, sit down for a moment, I want to talk to you." So I sat down. Mr. Daugherty then said, "Mr. Phelon, I have talked to my attorneys, and we have decided to let the matter stand as it is." I then asked Mr. Daugherty what he meant; whether he intended that I should not proceed with the examination. He says, "That is it, exactly." Those words are possibly not in the exact language that he used, but that is the sense of it.

Senator WHEELER. That is the substance of his language?

Mr. PHELON. Yes; that is the substance of it. I then said, "I am very sorry you have taken this attitude," and immediately left the bank.

Senator WHEELER. Did he say why he did not want you to examine the records?

Mr. PHELON. He gave no reasons whatsoever.

Senator WHEELER. He did not complain, did he, in any way, because of the fact of your examination not being conducted all right?

Mr. PHELON. No, sir; he gave no reason whatsoever.

Senator WHEELER. Well, Mr. Phelon, did he state anything to you with reference to being called, or that he was going to be called as a witness?

Mr. PHELON. Yes. Mr. Daugherty on Wednesday afternoon said to me, when I asked him certain questions in connection with the work, "Now, Mr. Phelon, I do not know whether I should answer these questions or not."

Senator WHEELER. Mr. Daugherty stated that to you?

Mr. PHELON. Yes, sir. He says, "There may be some questions I do not want to answer." I said, "All right, Mr. Daugherty, you are privileged to answer what you please." He said, "Of course, you know my idea is that I will probably be called before the Senate committee." I said, "I do not know as you will ever appear before the Senate committee." He said, "Well, I shall, because I have requested them to subpœna me." I said, "Oh, is that so?"

Senator WHEELER. And when we did subpœna him he refused to come.

Mr. PHELON. Yes, sir.

* * * * * * *

Senator WHEELER. Now, did you ask for and endeavor to get the number of safe-deposit boxes there in the bank?

Mr. PHELON. I asked for nothing. I had worked only on this certificate of deposit account, which I had asked him for, was all. Beyond the certificate of deposit account I asked for nothing. But I had talked with Mr. Daugherty about his various accounts in the bank, merely talked to him.

Senator WHEELER. What, if anything, did he say in reference to those?

Mr. PHELON. I asked him, for instance, for a statement and he told me he would get that later. I asked him for his last national bank examiner's report, so that I might look it over to get a line on the bank, and Mr. Daugherty brought out his last comptroller's call, which is not the same thing at all. I asked Mr. Daugherty various questions about the bank, and especially in connection with his accounts, but I did not get very much information from him.

Senator WHEELER. Was there anything else that you noticed unusual about the bank or the conditions in the bank?

Mr. PHELON. No. The most striking thing to me was the very large certificates of deposit, as I mentioned. I have here four certificates of deposit which aggregate over $100,000.

Senator WHEELER. And your recollection is that about $74,000 of that was in the name of Harry M. Daugherty?

Mr. PHELON. As I recall.

Senator WHEELER. I think that is all I wish to ask.

We proved further in the testimony that this J. E. or J. A. Gray was a person altogether unknown in that community.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. BROOKHART. I do.

Mr. NORRIS. May I ask where this man Gray, or his name, appeared?

Mr. BROOKHART. His name appeared as that of a person who had indorsed over to Mr. Daugherty certain of these certificates, and we were desirous of locating him, if possible.

Mr. NORRIS. Did you ever locate him?

Mr. BROOKHART. We were not able to locate him, and so far as the old residents of the community were concerned he was a person entirely unknown. We never did get any trace whatsoever of him.

Now, Mr. President, I want to touch a little more——

Mr. NORRIS. Before the Senator leaves that man Gray, or the name Gray, of course the committee were unable to ascertain from Mr. Daugherty who he was.

Mr. BROOKHART. Yes; he refused to tell us.

Mr. NORRIS. But did they make any other investigation?

Mr. BROOKHART. Yes; we examined several witnesses about him.

Mr. NORRIS. And were unable to find out anything about him?

Mr. BROOKHART. We were unable to find any trace of any such man.

Mr. NORRIS. Did any evidence disclose the name of a colored chauffeur that Mr. Daugherty had whose name was Gray? Was there any evidence of that kind?

Mr. BROOKHART. I do not recall it. There was something about those colored chauffeurs. I do not recollect the names.

Mr. NORRIS. I have been told that he had a chauffeur by the name of Gray. I do not know anything directly about it.

Mr. BROOKHART. We can probably ascertain from that suggestion whether or not it is correct. We certainly will try to do so.

This testimony discloses this situation:

Mr. Daugherty, on his sworn statement in 1920, outside of his homestead, was in debt $5,000 more than he was worth. He had a homestead that had cost him about $13,000. That is his sworn statement of his property. The suggestion is made that he might have had property that was tax exempt in Ohio and, therefore, that it would not appear in his returns. If he had such property, he could have appeared before the committee and disclosed it, and it could have been traced and confirmed. He chose not to do that. On this record, in less than three years, we find that his $27,000 of debts had disappeared and that he had some $75,000 of deposits in that bank and had increased his Wright-Martin aircraft stock from 500 to 2,500 shares.

The Wright-Martin Co. was one of those that were under investigation for fraudulent transactions with the Government; and all those matters stand uncontradicted and unexplained in the record, and that after Mr. Daugherty had so willingly expressed his desire to disclose his private affairs to the committee and to let us know that there had been nothing wrong in his private business.

Under that situation it occurs to the committee that instead of assailing the committee constantly, instead of making war upon the investigators, a little bit of honest disclosure of the truth, if there be any truth, would have helped this matter far more; but Mr. Daugherty avoided all of that. He brought these suits, and then, when the court ruled that the Senate has no authority whatever to appoint a committee and summon a witness before it or to compel the attendance of witnesses for these purposes—because this resolution did not state anything about legislative purposes—he says for that reason he will not appear before the committee.

As I said, I am not going into the general mass of testimony that was taken in reference to the conduct of the Department of Justice. These things that show so much inefficiency and delay without cause may be explained by other officers of the Department of Justice, and they shall have their opportunity; but I want to refer to one case in particular, which shows the opportunity for the Jess Smiths and the Howard Manningtons to collect this graft. I refer to what was called the Old Hickory case.

Mr. Storck, an expert accountant, was a witness in that case.

Senator WHEELER. Now, prior to your going into the Department of Justice, what was your business?

Mr. STORCK. Certified public accountant in New York.

I will say that Mr. Storck is now employed in the Department of Justice and is trusted by the new Attorney General, and is without doubt a competent and efficient man.

Senator WHEELER. And for how long a time had you been a certified public accountant in the city of New York?

Mr. STORCK. Since 1897.

Senator WHEELER. Are you a member of any association?

Mr. STORCK. I was formerly a member of the American Association of Certified Public Accountants.

Senator WHEELER. And you have worked for various branches of the Government here, have you?

Mr. STORCK. I have; yes, sir.

Senator WHEELER. What branches of the Government?

Mr. STORCK. I worked for War, State, Justice, congressional committees, etc.

Senator WHEELER. How long have you been employed by the Government?

Mr. STORCK. Since 1909 or 1910.

Senator WHEELER. When did you first go into the Department of Justice?

Mr. STORCK. I think it was on September 29, 1909.

Mr. Storck says:

I was assigned to make a preliminary survey of this matter—

I refer now to what is commonly known as the Old Hickory case against the Du Ponts—

about the 21st of August, 1923, by Mr. John H. Crim, then Assistant Attorney General. When I arrived at Nashville I found that the special agent in charge of the bureau of investigation had in his employ four men in a period of a year and a half getting up data for an investigation.

Senator JONES. What are you reading from?

Mr. STORCK. I am reading from my notes.

Senator JONES. From notes made as you were making the survey?

Mr. STORCK. Yes, sir. I always made notes of my investigations, sir.

Senator WHEELER. When was the subpœna issued for you?

Mr. STORCK. Yesterday.

Senator WHEELER. Had you had any previous knowledge that you were to be subpœnaed?

Mr. STORCK. No, sir. After a period of 10 days I prepared a preliminary report addressed to Mr. Crim, under confidential cover, as to my ideas as to how an investigation should be started from the leads then in my possession, and I stated to him that for the proper conduct of the investigation it would be necessary to have at least 40 men.

Senator WHEELER. Read a little slower, so we can understand it.

Mr. STORCK. That is, agents and accountants. I received a reply from Mr. Crim, in which he stated, in substance, that he was taking the matter up with the Attorney General with a view to having this investigation started at once. Not hearing from the department for a period of 10 days, I again took the matter up with Mr. Crim. This was about September 15, 1923. I received a telegram from him to report to Washington at once. When I arrived at Washington I conferred with Mr. Crim. He stated that he had had the matter up several times with the Attorney General and that he, the Attorney General, was about to appoint special counsel to handle this case; that he was doing everything in his power to further the investigation, and for me to return to Nashville at once and await instructions.

I want to say in reference to John W. H. Crim that, so far as the testimony shows, he was at all times energetic and persistent in the cases that were assigned to him; but it occurred many times that when something efficient seemed to be started the case was transferred to other parties, and new and original investigations were started.

Senator WHEELER. How long had this case been pending?

Mr. STORCK. Prior to that?

Senator WHEELER. Yes.

Mr. STORCK. Since 1919. A short while afterwards I prepared a memorandum consisting of some twenty-odd pages advising Mr. Crim of the leads and the methods under which I thought the investigation should start, and sent the original to him under confidential cover. Mr. Crim acknowledged receipt and again stated that he was doing all that he possibly could.

Senator WHEELER. When was that?

Mr. STORCK. This was around September 15 to 25, 1923.

Mr. Crim acknowledged receipt and again stated that he was doing all he could to further the investigation and gave me names of a Mr. Beasley and Mr. Robert Williams, of Chattanooga, whom, he stated, had been engaged by the department to look after the Government's interest in this case, and advised me to see both of these gentlemen and confer with them.

Senator WHEELER. Were these men lawyers or special agents?

Mr. STORCK. These were lawyers. I took the matter up with Mr. Beasley, who was in Nashville, and he stated to me that he had not been employed by the department, although he had expected to be, and as soon as his appointment was confirmed he would confer with me. I communicated this to Mr. Crim, and I received a reply from him advising me again that he had had several conferences with the Attorney General.

Senator WHEELER. Several conferences?

Mr. STORCK. Yes, sir; and that a Mr. James Towler——

Senator WHEELER (interposing). Who was Mr. James Towler?

Mr. STORCK. He has been in the department a number of years. He comes from Tennessee. In connection with this matter and toward the appointment of competent counsel he assured me he had done everything he possibly could to further this investigation, and that he was resigning his position, which was to take effect on or about December 1.

Senator WHEELER. Did he state why he was resigning?

Mr. STORCK. No, sir; he has not stated that to me.

Senator WHEELER. How?

Mr. STORCK. He has not stated that to me. In this letter to me, though, he stated, in substance, "From the data that I have before me on Old Hickory the same indicates that if an investigation is made the Government can recover millions." During the time that I was at Nashville it became necessary, in order to conduct my investigation, for me to secure a list of the subsidiary corporations controlled by the Du Ponts, as I had information that 90 per cent or more of the purchases for the Old Hickory Powder Co. were made from the subsidiary companies of the Du Ponts. I wired Mr. Burns's department to get me this information. On one of my visits to the department I was informed by Mr. Cunningham, who was in charge of accountants, that this information was being secured for me, and that five men were being employed at the office of the Standard Statistics Co., in New York, at a compensation of $8 a day, to secure the information, and that said information would be forwarded to me in the course of the next week or 10 days. I subsequently found out that this was not being done, and I have never received the information I called for.

Senator WHEELER. You never got the information that you called for?

Mr. STORCK. No, sir.

Senator WHEELER. You had not up to to-day?

Mr. STORCK. No, sir; I have never seen it. In the earliest part of January, 1924, between the 6th and 10th, I took this matter up again with Mr. Crim.

Senator WHEELER. Was he still then in the department?

Mr. STORCK. He had resigned and had been engaged to take up another case—that of the Veterans' Bureau matter. The United States attorney, Mr. McLean, of Nashville, was present, and Mr. Towler, a special agent. This was here in Washington. Mr. Crim stated that he was no longer Assistant Attorney General, and he had nothing to do with the matter. Mr. McLean, the United States attorney, advised me that there was to be a conference that day in the office of General Williams. That is the Chief of Ordnance. At this conference there were to be present Colonel Anderson—Colonel Anderson is a special assistant to the Attorney General in the war transactions section, and who then had charge of the case—Mr. Cameron, director of accounting; Mr. McLean, Mr. Towler, and Mr. William S. Gregg.

Senator WHEELER. That is McLean, the United States attorney?

Mr. STORCK. The United States attorney, yes; and Mr. William S. Gregg, attorney for the Du Pont Co.

Senator WHEELER. Gregg was counsel for the Du Ponts?

Mr. STORCK. For the Du Pont Co. I was asked whether or not I would attend such a conference. I had not been invited to the conference, and there was some discussion the night previous to the effect that the war transactions section would not pay my expenses for railroad travel from New York to Washington, amounting to $8.14.

Senator WHEELER. Why would they not pay it?

Mr. STORCK. They claimed they had no money. But Mr. Burns's division stated it was necessary that I be present and advised that the expenses would be borne by the "detection and prosecution of crime." That is an appropriation. I went to the conference and was surprised to learn that Colonel Anderson, Major Cornduff, special assistant to the Attorney General——

Senator WHEELER. What was the other one's name?

Mr. STORCK. Cornduff—and Mr. Cameron had prepared a questionnaire advising the Du Pont people what they were alleged to be charged with, and I found that my original confidential memorandum addressed to Mr. Crim suggesting the lines of investigation that should be made had been shown to Mr. Gregg.

Senator WHEELER. The confidential files of the Department of Justice, then, had been turned over to the Du Pont Powder Co.?

Mr. STORCK. Not the confidential files, no; the confidential memorandum that I had written to Mr. Crim.

Senator WHEELER. The confidential memorandum that you, as an agent of the Department of Justice, had furnished Mr. Crim had been turned over to the Du Pont people?

Mr. STORCK. Yes, sir.

Senator WHEELER. I wonder if the Department of Justice would be kind enough to furnish us with a copy of that confidential memorandum, or would it be too confidential for the committee to have?

Mr. HOWLAND. We will take it up with the new Attorney General.

Mr. STORCK. Do you wish the date? September 12, 1923.

Senator WHEELER. How did they get hold of this document, if you know?

Mr. STORCK. I do not know.

Senator WHEELER. All you know is that they had it in their possession when you went in there?

Mr. STORCK. Yes, sir.

Senator WHEELER. And these were leads that you had given in a memorandum to Mr. Crim for the purpose of showing how the information could be obtained upon which the Government could and should base its case?

Mr. STORCK. That is correct.

Senator WHEELER. Did they have the original or did they have a copy?

Mr. STORCK. My original memorandum, with my signature on it.

Senator WHEELER. They had your original memorandum with your signature on it?

Mr. STORCK. Yes, sir.

Senator MOSES. You mean that they had it in their possession when you went to this conference?

Mr. STORCK. Yes, sir.

Senator MOSES. You saw it in their possession?

Mr. STORCK. Yes, sir.

Senator WHEELER. And by permitting them, of course, to have that original memorandum they would be able to cover up or destroy the various leads which you had furnished the Department of Justice?

Mr. STORCK. Yes; they were apprised of what I was trying to get at.

Mr. President, the district attorney, Mr. McLean, who is still the district attorney at Nashville, Tenn., corroborated every word of that. I think there is no doubt of the truth of it.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Tennessee?

Mr. BROOKHART. I yield.

Mr. McKELLAR. It was also corroborated by Mr. J. M. Towler.

Mr. BROOKHART. That is right.

Mr. McKELLAR. Substantially, there were three witnesses to it. I do not know Mr. Storck so well, but the other two gentlemen are from Tennessee. One is a Republican and the other is a Democrat, and they are both as fine men as we have. They are excellent officials, and, in my judgment, were plainly seeking in every way to do their sworn duty, but were being handicapped, not by Mr. Crim, their immediate superior here, because as long as he was there they had every facility for proceeding with their work, but Mr. Crim himself was handicapped by the department, and these officers were prevented from doing their duty in that matter.

Mr. BROOKHART. I think there is no doubt of that situation.

Mr. NORRIS. Mr. President, I would like to inquire of the Senator how they happened to get these respectable witnesses?

Mr. McKELLAR. Two of them came from Tennessee. That is one explanation of it.

Mr. NORRIS. I doubt whether that would add anything to their respectability, but it might. [Laughter.]

Mr. CARAWAY. I would like to ask the Senator why he wants to discredit these two witnesses?

Mr. McKELLAR. They can not be discredited. Their characters are so good that I am quite sure that neither one of them can be discredited. They can be believed anywhere.

Mr. BROOKHART. I am sure their appearance bears that out. Mr. McLean appeared to be a very able, very efficient, and very earnest official. I have seen no higher type of man anywhere than Mr. McLean. Mr. Storck, the other witness, appeared to me to be the same type of man.

Mr. NORRIS. What happened down there finally in that du Pont investigation?

Mr. BROOKHART. Nothing has happened as yet. The present Attorney General has the matter in charge now, and probably there will be some action.

Mr. McKELLAR. If the Senator will yield to me again, I presented some of these facts to the present Attorney General, Mr. Stone, and received a letter from him this morning in which he said that he was having the matter thoroughly examined into, and, while he did not say so in words, I judge it is his purpose to proceed in order that the Government's interests may be protected.

From the testimony that was given, a part of which I have read, I am quite sure that the Du Pont Co. owes the Government a very large sum, and if the department will follow the advice and suggestions of these three gentlemen—Mr. Storck, Mr. McLean, the district attorney, and Mr. Towler, who is an employee of the Department of Justice—I am quite sure a very large sum will be recovered, and I am sure it ought to be recovered.

Mr. BROOKHART. I think that is perhaps the true situation at the present time.

In reference to this case, I will say that the evidence shows frauds, and great frauds, in that transaction down there, beyond controversy. These subsidiary companies would sell their stuff to this Du Pont contracting company for the Government there at prices which were clear out of all reason. They would charge freight that was clearly in excess of the actual freight. They did everything to swell the cost of that plant at that point, and, of course, to reap and take millions in profits and graft they were not entitled to take.

I only give that as an illustration. There are many other things that have been developed in this testimony, I will say to the Senator from Ohio, by witnesses as good and as credible as those from Tennessee. Those witnesses the Senator from Ohio wants to discredit have been corroborated in such a way, by evidence that can not be discredited, by evidence that can not be contradicted, that this whole case rests upon substance, and not upon surmise.

Mr. McKELLAR. Mr. President, the Senator has been very kind, and I dislike to interrupt him so often, but the point has been made as to the character of these witnesses. Has the Attorney General ever presented any witnesses of as good or better character than these to testify in his behalf before the Senator's committee?

Mr. BROOKHART. We have examined Mr. Crim and others he suggested, and they have been good witnesses, but not any better than these other witnesses, in any particular.

Mr. FESS. Mr. President, will the Senator yield?

Mr. BROOKHART. I yield.

Mr. FESS. Has the Attorney General ever had an opportunity of presenting any witnesses up to June 6, the day when he was asked to come before the committee?

Mr. BROOKHART. Mr. Crim was one of the witnesses he suggested, and we brought him in. The understanding was that when we got our side in he was to present his side. That was the arrangement of procedure.

Mr. FESS. As I recall Mr. Crim's testimony, he stated under oath that he did not believe Mr. Daugherty was guilty of the charges?

Mr. BROOKHART. Yes; but he also stated that he knew nothing about the Jess Smith graft, which I think is true.

Mr. FESS. I think I ought to say this much; the Senator knows how I feel about it. I have no apology to make of any sort. I hold no brief for Harry Daugherty or for his office. I have voted with the Senator on all matters to bring all facts before the Senate. I have very bitterly condemned some of the testimony that was brought in. I think it would not have been admitted in any court in America, and while the Senator says that that testimony was corroborated, I think there is too much weight given to that as evidence rather than as testimony. It is mere testimony, no evidence at all, as I see it, and it would be discredited in any court I know of.

I would also like to say to the Senator that, so far as getting a decision from the Supreme Court on the power of the Senate is concerned, I would like to see that done, and I hope the case will go to the Supreme Court, so that we may know precisely what the power of the Senate is.

Mr. BROOKHART. Mr. President, I would like to ask the Senator if he defends the relations Daugherty maintained with Jess Smith and Howard Mannington?

Mr. FESS. I do not. I should not say as to Howard Mannington, because I do not know about that. But as to Smith, no.

Mr. BROOKHART. We have proof of some thirty or forty thousand dollars of checks paid to Howard Mannington for political influence, with his indorsement on them in evidence. There is no doubt about that.

Mr. FESS. I would certainly condemn it, just as the Senator would condemn it.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. BROOKHART. I yield.

Mr. McKELLAR. The question was asked as to whether the former Attorney General had had the right up to June 6 to submit testimony? I may be mistaken about it, and I am asking the Senator for information, and to correct me if I am mistaken, but as I understand it, from the beginning of this investigation Mr. Daugherty has had counsel present, with the right to cross-examine all witnesses. Is that correct?

Mr. BROOKHART. That is true, and I remember a Mr. Hayes we summoned at his suggestion directly in connection with the Roxy Stinson testimony, early in the case.

Mr. McKELLAR. As I understand it, then, the Attorney General from the very beginning of the investigation has had his counsel there, cross-examining all witnesses who appeared against him, and was himself invited by the committee, after the committee had finished its testimony, to come; it was perfectly willing to hear him and perfectly willing to hear his good witnesses, if he had them, or any witnesses he had. After his counsel had represented him during the entire proceeding, with the right to cross-examine and in most instances cross-examining the witnesses, then he refused to come, and they refused to take further steps in the matter?

Mr. BROOKHART. That is correct. As soon as we invited Mr. Daugherty to appear before the committee and testify his counsel took their marbles and went home.

Mr. President, much was said in the newspapers against the committee. It was Daugherty's policy to attack the committee from the start. This whole scheme of Daugherty's seems to be government by criminal blackmail. That seems to be his idea of government. He consulted with Burns and with Coan and with Lockwood, and sent out and trumped up the testimony that indicted Senator WHEELER in Montana. There is little doubt of that. His idea was not to defend himself but to get something on the committee. He had detectives in my State investigating me. He was investigating everybody connected with this transaction.

A man named Fink, who first disclosed to us the testimony of Roxy Stinson, an old acquaintance of hers, went to his attorney, Mr. Stern, in Buffalo, and told him what he knew about that. Mr. Stern immediately consulted with Colonel Donovan, the United States district attorney at Buffalo, and I want to say that Colonel Donovan, although his superior was in question, was equal to the occasion. He is evidently a big, strong, honest man.

Mr. President, Colonel Donovan sent these people to the Senator from New York [Mr. WADSWORTH]. He heard their story of the transaction and very properly turned it over to me as chairman of the committee. Then we sized the thing up. We were suspicious of the man Fink from the very start. We believed from the very start that he had been connected with the Daugherty organization. That is the reason why Senator WHEELER himself went and served the subpœna. We did not want any improper work in connection with the matter. Then Roxy Stinson came and testified, and a little bit later the man Fink was put under arrest up in New York in some kind of a swindle with which he had been connected. Who got him out of jail? The only information we have is that Daugherty's attorney did that thing. Then he appeared again before the committee with an old subpœna that we had had issued in the first instance and from which he had been released. He said, "I am a witness before this committee and I want to announce a conspiracy on the part of WHEELER and BROOKHART and the committee to blacken President Coolidge and get Roxy Stinson drunk" and a lot of stuff of that kind, all framed up by the same Daugherty. I say that this man has had that view from the start—"Get something on these people who are trying to find out the truth, and stop this investigation."

I have never seen a case like it in all the world. There was no occasion for anything of the sort. Suppose the committee was hostile, if he was right he could win. Suppose the committee did believe adversely, if he had been a square and true officer in that office, it would be no trouble to clear it up. But instead of that he wants to cover up these things. He wants to cover up his association with Jess Smith, which the Senator from Ohio [Mr. FESS] himself admits that he condemned. He waited until the testimony was in, which shows a condemning set of circumstances, a situation that can not be explained upon any other theory except that graft and corruption was going on in that office. Then when the committee invites him to come

in he refuses to come. This is the brave fighting Daugherty. He is a man who fights in the dark and stabs you in the back. He is not the man who appears to your face and fights like a man.

Mr. CARAWAY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Arkansas?

Mr. BROOKHART. I yield.

Mr. CARAWAY. He followed the example set by Mr. Fall, did he not, who claimed constitutional exemption against testifying? He just refused to come. Both of them followed that same line and refused to explain what they did.

Mr. BROOKHART. It was very much the same. Their situation was exactly the same. Here is Daugherty with funds in his hands, a large amount of funds which are not accounted for and can not be accounted for out of his own property and his own earnings. How did he get them? Where did they come from? Mr. Fall was in exactly the same situation. The testimony has developed exactly the same situation. Perhaps he was afraid to attempt a false explanation, as Fall did, and which brought him to his ruin.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Tennessee?

Mr. BROOKHART. I yield.

Mr. McKELLAR. After taking part in the hearings and appearing there daily by counsel, and having his own counsel examine the witnesses, when the time came for him to present his own side of the case, if he had any, and he declined to do it, why is not that really a confession of guilt?

Mr. BROOKHART. It is justly so to any reasonable mind. It is a confession that he has no explanation.

Mr. President, in conclusion I desire to submit a resolution and to ask immediate consideration of it. It provides for an appeal of the case that was decided against us out in Ohio.

The PRESIDING OFFICER. The Senator from Iowa submits a resolution and asks for its immediate consideration. The resolution will be read for the information of the Senate.

The reading clerk read the resolution (S. Res. 247), as follows:

Whereas in a proceeding in the United States District Court for the Southern District of Ohio, Western Division, entitled "In the matter of the application of Mally S. Daugherty for writ of habeas corpus," an opinion has been handed down and judgment entered by the judge hearing said cause which seriously affects the constitutional rights and power of the Senate of the United States and of the Congress; and

Whereas it is believed that said opinion and judgment are erroneous; and

Whereas it is highly desirable to have the law in the matter settled by the Supreme Court: Therefore be it

*Resolved*, That the Attorney General, on behalf of the Senate and the respondent in said cause, be requested to have the proper officials of his department, including counsel heretofore designated in the cause, take the necessary steps for a prompt review and determination thereof by the Supreme Court.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. FESS. Mr. President, reserving the right to object, I simply want to say that I hope the resolution will be passed, because I think it raises a very important question with reference to the Senate. I have read Judge Cochran's decision over very carefully. It is rather a strong presentation, and I think the Senate ought to give authority that we can have the matter finally settled, once for all. I hope the resolution will be agreed to.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. NORRIS. Mr. President, I do not want the resolution to pass out of the Senate with the comment of the Senator from Ohio remaining unanswered. I do not want the court, if it does consider the view of the Senate on the matter, to be able to find when it came up here only a comment by a Senator here who said that this was a very strong opinion and intimating very strongly that the judge was right and that we had no jurisdiction.

Mr. ASHURST. Mr. President, will the Senator yield to me at that point?

Mr. NORRIS. I yield.

Mr. ASHURST. With all respect for the classical learning of the junior Senator from Ohio [Mr. FESS], of course, we know he is not a lawyer. He has demonstrated that this morning. He said, amongst other things, that this is a very strong opinion.

Mr. FESS. Mr. President, will the Senator from Arizona yield to me?

Mr. ASHURST. I have not the floor.

The PRESIDING OFFICER. The Senator from Nebraska has the floor. Does he yield to the Senator from Ohio?

Mr. NORRIS. I will ask both Senators to permit me to proceed.

The PRESIDING OFFICER. The Senator from Nebraska declines to yield.

Mr. NORRIS. Mr. President, I want to be perfectly frank. I have not read the opinion, but if it is going to be determined judicially that the legislative branch or one of the parts of the legislative branch of this Government can not investigate, can not inquire as to fraud, can not investigate executive officials, their employees, their subordinates, even the principals themselves—if we do not have the power to investigate, if we are compelled without investigation to enact laws in ignorance of what may be done by the executive departments, then the end of this kind of government in which we are now living is near at hand. If there is anything that is fundamental it is that the legislative branch of the Government has the right to know what the executive branch of the Government does in an official way. If it is impossible, if it shall be held impossible by our courts and that we have no right to investigate, we had better abolish Congress and let the Executive be supreme and have a monarchy at once.

Mr. President, it seems so plain that if that branch of the Government upon whose shoulders rests its perpetuity, which must enact the laws, which must make appropriations to carry on, is to be prevented from knowing what Executives are doing whose duty it is to carry out the laws, to expend the money, to prosecute criminals and offenders—if we have no right to know what is being done by the Attorney General of the United States, the head of the Department of Justice, surrounded by an army of detectives, with hundreds of millions of dollars of public funds in his control—if his official conduct can not be looked into by the legislative department, then this Government fails.

Why, think of it, Mr. President. Think of the Attorney General having the right to expend hundreds of millions of dollars of money for the purpose of punishing wrongdoers and violators of the law, or for the purpose of recovering hundreds of millions of dollars that investigation may show is due to the Government, if his conduct can not be looked into and he still has the right to use that money, even to frame up criminal action against Members of the Senate or of the House, to trail men, to trail their families, to break the locks of their offices and go in to find something "on," as they use the expression, Members of the Senate or of the House. Is it possible that the legislative branch of the Government has no right to look into it and that we may be restrained by an injunction of a court or some other proceeding?

I repeat, Mr. President, that it is an outrageous proposition. No government founded as ours is can live if that fundamental principle is violated. We would be helpless.

There would not be a Member of the legislative body in either branch but what would have all kinds of things framed up on him. There would not be a criminal in all the land who, if he had the money to make his peace, could not escape punishment. What would be the use of our enacting laws to punish criminals if perchance a dishonest Attorney General at the head of our Department of Justice should turn them all out, refuse to permit anybody to look into the matter, refuse to permit the legislative branch through its committees to find out how or if the money of the taxpayers of the country was being squandered in illegal methods, in disgraceful methods, in unlawful methods?

Mr. President, I do not believe that it can be possible that any court upon a fair trial is going to say that the House of Representatives or the Senate has no right and no jurisdiction to investigate any department of the Federal Government it may see fit to investigate.

Mr. BORAH. Mr. President, before the Senator from Nebraska takes his seat will he answer a question?

Mr. NORRIS. Certainly.

Mr. BORAH. I do not understand that the court did hold that at all.

Mr. NORRIS. I have not read the opinion, but that is what it is claimed to have held.

Mr. McKELLAR. What did it hold?

Mr. BORAH. I have not seen the opinion.

Mr. ROBINSON. I think I can answer the Senator's question.

Mr. BORAH. The court specifically stated that the question of the right of Congress to acquire information through investigation for legislation was not involved.

Mr. ASHURST obtained the floor.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Arkansas?

Mr. ASHURST. I yield with pleasure.

Mr. ROBINSON. Mr. President, I have not examined an authentic copy of the court's opinion, but I have read newspaper reports of the decision by Judge Cochran, and assuming them to be fairly accurate, an analysis of his opinion shows that the decision is based largely upon an attempted distinction between an investigation of the Attorney General's office and transactions relating to his office and, on the other hand, an investigation of the Attorney General as an individual.

The judge used this language:

> The power of the Senate to investigate the Attorney General's office or any department of the Government to the fullest extent is not involved in this case. * * * What the Senate is engaged in doing is not investigating the Attorney General's office, but investigating the former Attorney General. In so doing it is exercising a judicial function not authorized by the Constitution.

Mr. CARAWAY. If the Senator will permit me, I desire to ask how did the court ever arrive at that conclusion?

Mr. ROBINSON. I am going to discuss that matter for a moment, with the indulgence of the Senator from Arizona.

Mr. ASHURST. Mr. President, I yield for that purpose.

Mr. ROBINSON. This ruling, which is a different way of stating the proposition announced by the Senator from Idaho, as his interpretation of the judge's decision is based on an erroneous statement of facts.

Mr. BORAH. That is the conclusion to which I came when I read the opinion; that it was not so much an erroneous conclusion of law or statement of law as it was a statement of a principle of law based upon an erroneous conclusion of facts.

Mr. ROBINSON. That is undoubtedly true, and I believe I can convince the Senate of that in a five-minute statement.

Mr. ASHURST. I yield, if I may, Mr. President, if I shall not thereby lose the floor.

The PRESIDING OFFICER. The Senator may yield unless some other Senator makes the point of order. The Chair, however, will not make the point of order.

Mr. ASHURST. I thank the Chair.

Mr. ROBINSON. I thank both the Chair and the Senator from Arizona [Mr. ASHURST].

Taking the judge's statement of the case and comparing it fairly with the record, the decision can not stand the test, and does not merit the approval which the junior Senator from Ohio [Mr. FESS] has accorded it. The assumption that the investigation is personal to the Attorney General and does not extend to the Department of Justice or to the office of the Attorney General is unauthorized and is contradicted by the face of the resolution under which the committee was proceeding. To support this statement I cite the language of the resolution, as follows:

> To investigate the circumstances and facts and report the same to the Senate concerning the alleged failure of Harry M. Daugherty, Attorney General of the United States, to properly prosecute violators of the Sherman Antitrust Act and the Clayton Act against monopolies and unlawful restraint of trade; the alleged neglect and failure of the said Harry M. Daugherty, Attorney General of the United States, to arrest and prosecute Albert B. Fall, Harry F. Sinclair—

And so forth.

Every purpose of the investigation was directed to the integrity of the proceedings of the Attorney General as such. It was in every sense of the word an investigation of his office, an investigation of his official acts. There is not a word in the language of the resolution that justifies the judge or any Senator or anyone else in assuming that the Senate had entered upon an investigation of an individual, and, therefore, was performing a function judicial in nature and in no wise related to its legislative functions.

Under the language of the resolution the power of the committee was very broad, and it was made very broad purposely by the Senate; but it was in no sense directed to the personal affairs of the Attorney General. It comprehended his official transactions and the affairs of his office and department, and no basis for the distinction made by the judge appears on the face of the resolution.

The second resolution expressly avows that the proceeding against the alleged contemnor, Mr. Mal S. Daugherty, is in aid of the legislative purpose of the Senate; and the suggestion by the judge that the language in the second resolution, "to obtain information as the basis for such legislation and other action as the Senate may deem necessary and proper," shows that no legislative action was in view until after the authority of the Senate had been challenged is absurd upon its face. It was not necessary or in conformity to precedent that the Senate should express in the resolution the purpose of the investigation or the possible results to be derived from it. It was not necessary for the Senate to incorporate in its resolution the legislation which it was expected might be considered as the result of the investigation; and, as a matter of law, the language "and other action as the Senate may deem necessary and proper" can not be regarded as a declaration of purpose by the Senate to abuse its constitutional power.

The decision of Judge Cochran is based on the premise that the Senate was engaged in a meddlesome and spiteful procedure which had no relation to its official duties and responsibilities. It will be interesting, and it is important, to obtain a decision from the Supreme Court of the United States on the subject.

I desire to thank the Senator from Arizona for his indulgence.

Mr. ASHURST. Mr. President, I intended to advert to the opinion of Judge Cochran, but the discussion just concluded is so illuminating that it is unnecessary to consume time upon that subject other than to say that the opinion labors through 30 pages of typewritten matter and finally says that Congress may appropriate $4,000,000,000 annually but that it has not the power to inquire where one penny of the $4,000,000,000 goes or how one penny thereof is spent.

I would not have asked the Senate to hear me this afternoon except for the fact that from the day the committee began to hold its hearings upon the investigation of the régime of Harry M. Daugherty it has been subjected to a rapid-fire volley of abuse, slander, vilification, and attempted intimidation. Of that treatment we probably have no complaint. When the five Senators assumed the duty of serving on the committee to investigate the Attorney General's department under Mr. Daugherty's activities they knew they were "going into harm's way." Let us review the facts.

The Daugherty investigating committee, of which the Senator from Iowa [Mr. BROOKHART] is chairman, was elected by the Senate. Membership on that committee is no place for a dilletante; service on that committee requires its members to give and to receive hard blows. Your committee struck hard blows, but they were fair blows and they were aimed in defense of the temple of justice. Each individual member of the committee contributed his due part to this work. We have not always agreed amongst ourselves as to procedure; indeed, when one reflects upon the magnitude of the subject, its vast ramifications and its multitudinous details, it could not be expected that we could agree in all respects; but I say for the RECORD that each member of this committee has held steadfastly to the main purpose, namely, to discover the truth.

My classical friend, the Senator from Ohio [Mr. FESS], whose works I read with delight, to-day demonstrated in a few moments that he is not a lawyer. I admire his scholarship, but a man may be a scholar and yet never have read law; a man may be a lawyer and yet not be a scholar. By my classically learned friend from Ohio complained about the character of the testimony. I did not apprehend, until I heard his remark, that I would be obliged to read an excerpt from Greenleaf on Evidence. Senators will pardon me for this performance, but it does seem necessary, in view of the remark of Senator FESS, that I should now read from Greenleaf on Evidence, at page 122:

> 93. Circumstantial evidence——

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Arkansas?

Mr. ASHURST. I yield.

Mr. CARAWAY. Is not Greenleaf dead?

Mr. ASHURST. He is dead.

Mr. CARAWAY. Then, according to the Senator from Ohio, of course his testimony is incompetent. [Laughter.]

Mr. ASHURST. Greenleaf is gathered to his fathers, but the rules about which he wrote still guard and guide innocence and give it a safe delivery, and still confound the guilty.

> 93. Circumstantial evidence: The evidence in proof of a conspiracy will generally, from the nature of the case, be circumstantial.

Who is this now talking—some "demagogue" on the hustings seeking to make votes? No. A legal authority is speaking of the correct procedure in courts of justice.

Though the common design is the essence of the charge, it is not necessary to prove that the defendants came together and actually agreed in terms to have that design and to pursue it by common means. If it be proved that the defendants pursued by their acts the same object, often by the same means, one performing one part and another another part of the same, so as to complete it, with a view to the attainment of the same object, the jury will be justified in the conclusion that they were engaged in a conspiracy to effect that object. Nor is it necessary to prove that the conspiracy originated with the defendants, or that they even met during the process of its concoction, for every person entering into a conspiracy or common design already formed is deemed in law a party to all acts done by any of the other parties, before or afterwards, in furtherance of the common design.

PAR. 94. Acts and declarations of other conspirators: The principle on which the acts and declarations of other conspirators and acts done at different times are admitted in evidence against the persons prosecuted is that by the act of conspiring together the conspirators have jointly assumed to themselves, as a body, the attribute of individuality.

Your committee ascertained at once that there was competent evidence tending to show a conspiracy involving former Attorney General Daugherty.

If you ask me, Did the former Attorney General suddenly and in a mysterious manner acquire opulence during his term of office—and that is a circumstance for your consideration—I ask you to read pages 1423, 1424, 1425, 1426, 1427, and 1428 of part 6 of the hearings held by your committee.

If you ask me for an expression of opinion as to how some of the largest and most important of the Government's cases were conducted under Mr. Daugherty's term of office, I refer you to pages 1139 and 1140 et seq. of part 5 of the hearings, being the testimony of Mr. George Storck, and you will perceive how confidential evidence that had been gathered by the Government's faithful accountants was placed into the hands of the defendants.

The confidential evidence was in a case involving $139,000,000 against the Old Hickory Powder Co., a subsidiary corporation of the Du Pont Co., or which at least sold 90 per cent of its products to and bought 90 per cent of its materials from the Du Pont Co. The Du Pont attorneys were found to have in their possession the secret confidential statements and data of the Department of Justice that were submitted under cover and in confidence of the Department of Justice. How did the Du Pont attorneys come into possession of the Government's statements, data, and evidence in a case involving $139,000,000? That is a fair sample, that is a thumb-nail sketch of how some cases of great magnitude and importance were conducted under the régime of the late Attorney General, Mr. Daugherty.

My fellow Senators, if this testimony in the Daugherty investigation, consisting to date of 2,023 printed pages, appears too formidable, too voluminous for your perusal—remember that you must read all that testimony before you may vote to exculpate or inculpate a fellow citizen—no conscientious Senator can or will vote upon a report in this case unless and until he reads the evidence. Conjuring you, therefore, to read the testimony herein, I refrain now from an extended statement or copious comment thereon until a more appropriate occasion, when I shall then discuss in detail this evidence, shall canvass it, witness by witness, and make observations as to my views regarding its probative and evidentiary value.

If, unhappily, any Senator should be so remiss in his public duty as to fear that this evidence is too tedious to read; if, through lassitude or inertness, any Senator should fail to read the same, then, as an antidote to ennui, I commend this testimony for his perusal, because he will find within the four corners of these seven volumes of testimony a narrative as gripping and as startling as any that he will ever read. So when we are confronted with the statement that there is hearsay testimony in the record, our answer to you is, "Read the testimony!" Those who complain of hearsay have neither read law nor read the evidence.

This testimony is drawn from all parts of the United States. It is offered by persons in various walks of life. It gathers strength as it goes. It tells not only that certain men have betrayed the trust placed in them, but it also plainly tells you by whom, to whom, and for what purpose money was corruptly paid.

It tells of the illegal withdrawal and sales of liquor; it tells of a man who took charge of the Department of Justice with modest if not small resources and who suddenly acquired opulence, but who refuses now to explain to the committee in what manner his fortune was so enormously increased. This testimony tells also of honest and brave officials who spurned bribes and who courageously stood against intimidation; it tells of subordinates promoted for infidelity to the public service, and of other persons demoted for fidelity to their duties. It lays bare in the Department of Justice cupidity and revenge under the régime of Mr. Daugherty; it frequently exhibits the itching palm of an extended official hand; it runs the gamut of human emotions. It tells of a factotum in the Department of Justice soliciting bribes. It tells of the exhibition of moving-picture films illegally transported and then exhibited for the delectation of those officials whose duty it was to prosecute such transporting. Illegal plots, counterplots, espionage, decoys,, dictographs, thousand-dollar bills, and the exploring of Senators' offices come and go in the pages of this testimony; and these devices, these plots, counterplots, spies, thousand-dollar bills, and ubiquitous detectives were not employed by the former Attorney General to detect and prosecute crime, but were frequently employed to shield profiteers, bribe takers, and favorites. The spying upon Senators, the attempt to intimidate them, the attempt to destroy the character of the chairman of the committee, Senator BROOKHART, and the indictment of a member of the committee, Senator WHEELER, are disclosed by this record; and I say that Senator WHEELER pressed forward in the discharge of his duty with a courage and a capability unsurpassed in our annals. Attempts to stir up revolution and incite rebellion in the territory of a neighboring friendly country have a place in this picture.

This testimony relates the sordid story of how, when Harry M. Daugherty assumed the great office of Attorney General, an evil brood of harpies flocked about his department; and it was to such men as the Jess Smiths, the Howard Manningtons, the Jap Mumas, the Thomas Felders, the Gaston B. Means, the Urions, and their ilk that Mr. Daugherty's confidence was given.

This testimony discloses the sudden and unexplained opulence of Jess Smith, who was the roommate, the messmate, and the constant companion of former Attorney General Daugherty. Jess Smith came to Washington an obscure merchant of modest fortune. He was given a desk and a room in the Department of Justice. No one knew what official relation he had with the Department of Justice, but all knew him to be the "man of influence" who moved the pawns, who gave orders, and saw to it that the orders were obeyed.

Witness after witness, men of good character and men of bad character, have under oath related to your committee how they received orders at the Department of Justice from Jess Smith, and how they reported to Jess Smith upon matters of the gravest consequence and largest import. Mr. Daugherty now refuses to tell this committee why this obscure merchant from Washington Court House, Ohio, with no qualifications to fit him for a position in the Department of Justice, was given such a prominent place in its energies.

Regarding the lack of credibility on the part of some of the witnesses who have testified before your committee; and I am delighted to know that I now have the attention of my friend the junior Senator from Ohio [Mr. FESS], because I think he wants to be just. He said he has no brief for Mr. Daugherty, and I believe him. He has denounced the association of the former Attorney General with Jess Smith. It is but simple truth for me to say that many of the witnesses who came before your committee and related damaging circumstances against the integrity of the former Attorney General have not been impeached, and in my judgment will not and can not be impeached. Mr. Daugherty was subtle and ingenious in declining to submit to a cross-examination, but it was disingenous to pretend that it was because the committee had been ascertained to have no power. I repeat that many witnesses of truth and of good character, yea, of high character, the highest character, have testified; and truth also requires me to say, and I now say it here, that some of the witnesses testifying against Mr. Daugherty were of doubtful and some were of despicable character; but some of those he denounces as despicable characters were once Mr. Daugherty's closest friends.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Iowa?

Mr. ASHURST. I yield.

Mr. BROOKHART. I should like to ask the Senator if it does not appear from the evidence that in this association of Jess Smith and Harry M. Daugherty, Daugherty was distinctly the dominating force and character?

Mr. ASHURST. There is no doubt about it.

Mr. ROBINSON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Arkansas?

Mr. ASHURST. I yield?

Mr. ROBINSON. What reason has been assigned for having Mr. Smith come to Washington and establish himself in the

Department of Justice? I understand that he was in the clothing business. He was not a lawyer, was he?

Mr. ASHURST. No; he was not.

Mr. CARAWAY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the junior Senator from Arkansas?

Mr. ASHURST. I do.

Mr. CARAWAY. I hope the Senator will remember that he was the man who went between all the folks who had the money and then gave it up. They had to have somebody do that, did they not?

Mr. ROBINSON. I know; but I am asking what reason has been assigned for his presence here and for his connection with the Department of Justice.

Mr. ASHURST. The query that the Senator has propounded is the clue that led to most of these disclosures. Why should an obscure merchant, who had no learning in the law, be stationed in the room and house and office of the Attorney General and with the stern ruthlessness of a Navajo chief, in a mysterious manner, direct the coming and going and the duties of many officials in the Department of Justice? That very curiosity on our part, that very intuition of the committee, is partly what led to these disclosures; but it has not been yet satisfactorily answered as to why Jess Smith was placed there. He is dead, it is true, dead by his own hand, but the path of an investigator must not be stopped by sympathy for the living or sympathy for the dead. Read these hundreds of telegrams; read these hundreds of letters between Mr. Daugherty and the satellites that moved around him. Read the telegrams between Daugherty and Smith. Read them and then tell me, if you can, that Mr. Daugherty was ignorant of what strange transactions and wicked forays Jess Smith was carrying on. If Attorney General Daugherty was ignorant of what evil business Jess Smith was carrying on, then the Chief of the Department of Justice was oblivious to that which a thousand men hereabout well knew.

Mr. ROBINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona further yield to the Senator from Arkansas?

Mr. ASHURST. I do.

Mr. ROBINSON. I read somewhere a statement, either in a public address or in a letter from the former Attorney General, in which he expressed great resentment at the imputation of improper conduct, dishonesty, and graft on the part of Mr. Jess Smith.

Mr. ASHURST. Yes.

Mr. ROBINSON. Has the Senator seen anywhere an explanation from the Attorney General as to why Mr. Smith was brought to Washington or why he came to Washington and occupied a chair or an office in the Department of Justice throughout the period of his life while the Attorney General was at the head of that department?

Mr. ASHURST. There is no evidence in these seven volumes of testimony giving any clue or reason why, in good faith, Jess Smith was here; but witness after witness, good men and bad men, show that Jess Smith was the go-between, the corrupt link between Daugherty and the bribe givers.

Mr. ROBINSON. He had no official connection with the department?

Mr. ASHURST. No official connection with the department.

Mr. ROBINSON. I can very readily understand how, if he were a lawyer and had official connection there, he might occupy that relationship with the former Attorney General.

Mr. ASHURST. Quite so.

Mr. ROBINSON. But it is incomprehensible, in the absence of some explanation from some source, that he should have maintained himself in the position of bribe solicitor and divider and occupied a chair in the Attorney General's office and lived part of the time with the Attorney General, and that all of that should have occurred without the Attorney General having some knowledge of his activities. And it is surpassing strange that he never has offered any explanation of bringing him to Washington.

Mr. ASHURST. Now, I read one or two telegrams.

Here is a telegram to Jess Smith:

ASHEVILLE, N. C., *April 3, 1923.*

JESS W. SMITH,
*Washington Court House, Ohio:*

Great place here. For about three weeks quite cool. No necessity you hurry here, but will expect you by 12th. Come by way of Washington. This by far most restful place we have been. Am improving. * * * All three of our organization here. Send regards to all.

H. M. DAUGHERTY.

Another:

[Western Union telegram]

WASHINGTON, D. C., *April 5, 1923.*

JESS W. SMITH,
*Washington Court House, Ohio:*

Your letter April 3. Will be here next Monday, and anxious to see you.

RUSH L. HOLLAND,
*Assistant Attorney General.*

[Western Union telegram]

WASHINGTON, D. C., *May 14, 1923.*

JESS W. SMITH,
*Washington Court House, Ohio:*

Kindly wire me Waldo Hotel, Clarksburg, W. Va. if I can see you and Mr. Daugherty Thursday, if so you stating hour and place. I will leave Clarksburg Wednesday night and meet you not later than Thursday noon. Good luck to you both.

G. D. GOFF,
*Assistant Attorney General.*

[Western Union telegram]

WASHINGTON COURT HOUSE, OHIO, *May 16, 1923.*

Hon. GUY D. GOFF,
*Clarksburg, W. Va.:*

Telegram just received. Will meet you Deshler Hotel, Columbus, Ohio, Thursday around noon or earlier. Wire me your time arrival there.

JESS W. SMITH.

Mr. CARAWAY. Mr. President, may I interrupt the Senator?

Mr. ASHURST. Certainly.

Mr. CARAWAY. I was just going to ask the Senator this: If there was any explanation that would lighten the infamy that now rests upon the memory of Jess Smith; if Daugherty were an innocent man and a man of any sense of honor, would he not now come forward and make it?

Mr. ASHURST. Especially when he was a beneficiary, and when members of his family were beneficiaries under Jess Smith's will.

I have frankly said that some of these witnesses were of doubtful and some of them were of despicable character. Can I make it more plain? But, I repeat, it is also due to the truth to say that even as to the witnesses of doubtful character who have testified, Mr. Daugherty refuses to come before the committee and refute their testimony or deny the same. But whether they be good or bad, whether these witnesses are to be condemned or despised, they once composed Mr. Daugherty's list and circle of close companions. The very witness against whom he inveighs the bitterest is a person with whom he broke bread in the house of a man of great political influence. The person he most furiously attempted to destroy by insinuations published in the press was a witness who told a set of incriminating circumstances that no art could have constructed and no ingenuity could have invented.

If your committee be asked why we did not call witnesses of better character than some of those I have just described, we reply that of necessity we called those witnesses with whom the former Attorney General constantly fraternized; hence such question really implies, why did Mr. Daugherty have such doubtful characters around him?

If Daugherty had not given his confidence to birds of passage and to birds of ill-omen, those same birds of passage and birds of ill-omen could not be heard to caw against him to-day. He who fraternizes with thieves, thugs, bribe givers, and bootleggers, and all that ilk has no right to complain of their treachery.

Mr. Daugherty declines to come before the committee and explain away any of these damaging circumstances. He knew and his counsel knew every opportunity would be given and was given to cross-examine all witnesses. A man in his situation and position, so foully and falsely accused, as he claims to be, would not only be willing to offer his explanation and defense but would demand his right to be heard and explain away the damaging circumstances.

But good or bad as the character of some of the witnesses may be, I repeat that their testimony has not been impeached.

A circumstance important in making up your minds on this case is as follows: During the progress of the hearings attempts were made by the agents of the then Attorney General to intimidate witnesses who were summoned to appear before this committee. An attempt was made by one of Mr. Daugherty's friends to deprive this committee of the opportunity for further examining a material witness, and here is a happy circumstance, to wit: Within 24 hours after Mr. Daugherty was removed, the Solicitor General, Mr. James M. Beck, reversed

Mr. Daugherty's reckless and relentless policy and prevented further attempts to defeat the committee's plan of action.

If Solicitor General Beck never did any other public service except the one to which I have just alluded, he has earned my respect for his timely and appropriate action.

It is also significant that when the new Attorney General, Mr. Stone, assumed his office, the wharf rats infesting the Department of Justice under Mr. Daugherty ran to cover.

We have all read history, and we remember the description of the system in vogue in England in the seventeenth and eighteenth centuries, where the Government exchanged earldoms, dukedoms, and estates for votes. We have read with shocking amazement of the avarice of the Duke of Marlborough, who, for gold and power, without scruple and without shame, betrayed both the exiled and the reigning monarch. We have read of the sordid rapacity of Seymour, Leeds, and Sir John Trevor, but their exploits were tame and prosaic when compared to the gross betrayal of public trust under the régime of Attorney General Daugherty.

Mr. FESS. Mr. President, I will take no extended time, because I have only one or two observations to make.

I repeat, I read the decision of Judge Cochran with a good deal of care, and I now again repeat what I said, that I think it is very strong. I am not going to try to prejudge a coordinate branch either by a favorable comment or a criticism, such as was offered a little while ago by the Senator from Nebraska.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. FESS. I yield to the Senator.

Mr. NORRIS. I was not aware that I offered a criticism of a coordinate branch of the Government. Is that what the Senator wants to imply? What other branch of the Government did I criticize?

Mr. FESS. I understand that the Senator from Nebraska, if I can understand English, expressed great surprise at the possibility of a coordinate branch of the Government pronouncing in favor of this decision handed down in the lower court.

Mr. NORRIS. If the Senator means to imply that I have criticized the judiciary, even the judge who made this decision, he has another guess coming. I have not done any such thing.

Mr. FESS. I will say to the Senator that I do not deal in guesses.

Mr. NORRIS. The Senator is dealing in guesses now when he makes that kind of an assertion.

Mr. FESS. Not a guess.

Mr. NORRIS. I have not read the opinion, and I am not criticizing even the judge who made the decision, but I am claiming that if that decision is correct, and neither the Senate nor the House has any power to make an investigation, then we had better close up both the Senate and the House.

Mr. FESS. That question has not been raised.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Idaho?

Mr. FESS. I yield.

Mr. BORAH. The court has not laid down any such rule as that the Senator from Nebraska is criticizing.

Mr. FESS. I understand that it has not.

Mr. BORAH. The court expressly stated that the right of the Senate to investigate a department of the Government, or to make inquiry for the purpose of legislation, was not involved in the case.

Mr. FESS. That is my understanding, and the court very discriminatingly made the distinction between a legislative and a judicial function, that the court has not the function to indicate what legislation should be, but only sits in decision upon what the legislation is. That was very clear in the decision.

Mr. NORRIS. If the Senator will pardon me again, if I were the judge, and the matter came before me, and I thought the committee had no jurisdiction and no authority, and I did not have courage enough to say so by my decision, I would feel that I ought to be kicked off the bench.

Mr. FESS. Is not the Senator now criticizing the court in that statement?

Mr. NORRIS. No; I am not criticizing the court, and there is no intimation of criticism of the court.

Mr. FESS. What assumption is the Senator making?

Mr. NORRIS. I will tell the Senator why I rose in the first place. When the proposition was laid before the Senate by the Senator from Iowa [Mr. BROOKHART] that we appeal this case, the Senator from Ohio took occasion to say that while he was in favor of it he wanted to comment on the great ability of the judge who wrote the opinion, and so forth.

Mr. FESS. The Senator from Ohio made no such statement as that.

Mr. NORRIS. Something to that effect. I did not want this case to go into the court with the Senate saying to the court, "Here is this case. Now, pass on it; but we hope you will decide it against the Senate." That is about what I thought the Senator was trying to get into this record.

Mr. FESS. The Senator from Ohio has not been here very long, but he has had some legislative experience. The Senator from Nebraska hardly would state that the Senator from Ohio was trying to get into the RECORD, either while a Member of the other branch of Congress or of this branch; such a practice as that I do not follow, and I think the Senator ought to withdraw that statement.

If the Senator is in a temper of mind to listen to my statement, I made the statement a moment ago that I thought this decision was a very strong one. I made that statement because my prejudged view of the case was, until I read the decision, that the decision was wrong; but when I read it, it struck me that it was very strong, and I think the big thing here is to determine judicially by a court of last resort what rights this body has in matters of an investigation. That is why I urged that we appeal the case. Until a decision is handed down by the Supreme Court of the land the question will remain an open one, and still controverted.

Mr. BORAH. Mr. President——

Mr. FESS. I yield.

Mr. BORAH. The Senator says he thinks the decision is very strong. That, perhaps, is a proper remark, taking the record as it was presented to the court. What I say is not intended as a criticism of the court, but I think the decision is very weak, so far as establishing any principles which may guide the Senate in the future are concerned, because the court expressly stated that those things which we would like to know with reference to our future conduct are not involved in this decision, and it does not decide them. For instance, the court does not decide the question as to our right to investigate a department. He does not decide the question as to our right to investigate an Attorney General or a Secretary of State. He does not decide the question of our right to inquire for purposes of legislation. Those are the things in which we are interested.

Of course we are discussing this decision without the record of the case before us in such way as to know precisely what the record was upon which the court was called upon to pass, and the court was bound by the record. He could not decide matters outside of the record, and the record may have been made up in such a way as to justify the decision, and in that sense it may be a strong decision upon the record. But, so far as establishing principles for our future guidance, there is very little in the case that will help us, and if it goes to the Supreme Court and the Supreme Court decides it upon the same narrow basis on which the court below decided it—and it might have been compelled to decide it upon a narrow issue by reason of the record—we will not have any guidance afforded by the decision for our future conduct.

Mr. FESS. Mr. President, there is no doubt in my mind about the power of the Senate to secure information through an investigation or otherwise for data to guide this body in legislating. That is not a question in dispute. I do not think there is any doubt either about the province of this body making an investigation of any of the executive departments. That is not in dispute. But there is the question of investigating a man who happens to be attached to the department.

While it is true that the resolution upon which we acted and the resolution for which I voted was one providing for an investigation of the Department of Justice, the court had before it not only the resolution but also the hearings, and if the upper court on this appeal should take the evidence that was offered in the hearings and the speeches made on the floor, especially the last speech made by a member of the committee, it would again be evident that it is a man who is being investigated and not a department. It is one thing to take the instruction of a resolution, and it is another thing to abandon that resolution and go afield to do what the resolution did not authorize. That is what the committee has done, and that is what the decision as rendered holds, and when it goes to the higher court we will wait and see what will be the decision of that court on the same point.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. FESS. I yield.

Mr. McKELLAR. How could the Senate investigate a department unless it investigated those persons who were acting as heads of the department and running the department? How would it be possible to make such an investigation otherwise?

Mr. FESS. That does not mean the investigation is to go into the private affairs of an individual who happens to hold the office.

Mr. McKELLAR. It would shed light on the public acts of the official.

Mr. FESS. That matter will be before the court in regular order.

Mr. BORAH. Mr. President——

Mr. FESS. I yield to the Senator from Idaho.

Mr. BORAH. My opinion is that that is just what the court decided. Whether it was justified in doing so or not, I regret we can not tell, because we have not the record; but all the court did decide in the case, in my opinion, from what I have had time to read, is that they were not investigating Daugherty as an Attorney General or even as a retired Attorney General, but that they were going into his personal, private affairs. If the record justifies that conclusion——

Mr. FESS. I think the Senator is right in that. I have read it all very carefully.

Mr. BORAH. So, as a matter of fact, it all turns upon the question of whether the court was justified from the record in saying that the committee had gotten outside of the question of investigating the Attorney General and was investigating the private affairs of the Attorney General. The court decided it upon that theory. So it gives the Senate no light whatever upon the principles which should guide us with reference to carrying out the resolution which we passed.

Mr. FESS. In other words, if the Supreme Court upon appeal decides upon the limited basis on which the Senator thinks the lower court has decided, even with that decision we would not have the guidance that we are seeking. That may be true. I am rather inclined to think that is true.

Mr. BORAH. There is one thing the court said, however, which seems to me to be interesting if he is quoted correctly in the papers. As I understand the court, he declared that in order that we might be under the rule of inquiring for the purpose of legislation it would be necessary for both the House and the Senate to authorize the investigation and to state in the resolution that it was for the purpose of securing information in regard to the legislation. My guess is that the Supreme Court would not sustain any such rule as that.

Mr. FESS. I do not believe, I will say to the Senator, that the decision includes that it must be a resolution passed by both the House and the Senate. I agree with the Senator that it would not need the concurrence of the House to get information that would be constitutional. I think the Senator is entirely correct in that.

Mr. President, all the matter that I have from the beginning resisted was the manner of the investigation. It has been a very delicate thing, because it was conducted by members of the committee; every one of whom is of the highest character. It is a difficult thing to differ from men doing what in their judgment is the proper thing. I have thought from the beginning that the conduct of the investigation was not in order. I have been pretty free in my criticism here on the floor of the Senate and elsewhere. I think the country is not responding or reacting very favorably to the manner in which it has been done. My judgment is that that is the core of the decision.

So far as the playful reference of my friend from Arizona is concerned in his commiseration with me that I am not a lawyer, I think I ought to say that the difficulty about it is that I could not take the time to practice, although I did for about a dozen years. But I had to give over my time to the teaching of law in a university of law in which I had much to do with the teaching of evidence. Probably I have forgotten too much law to keep up with my friend from Arizona, and I humbly beg his pardon and make the humiliating apology to him.

Mr. President, I ask unanimous consent to insert in the RECORD the letter of ex-Attorney General Daugherty declining to appear before the committee.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The letter referred to is, as follows:

JUNE 4, 1924.

HON. SMITH W. BROOKHART,
*Chairman Select Committee of the Senate Investigating the Department of Justice and H. M. Daugherty, formerly Attorney General, Washington, D. C.*

DEAR SIR: I beg to acknowledge, through my counsel, your verbal suggestion of the 31st ult. that I appear before your committee on Friday, June 6. This is the first intimation I have had from your committee that I was to be accorded the privilege of a hearing and, up to this time, of course, have had no opportunity of calling witnesses on my behalf or on behalf of the Department of Justice.

Before definitely replying to your suggestion that I appear before your committee, I wish to call your attention to certain matters which seem to me to be pertinent at this time.

1. The great volume of business of the Department of Justice, so diversified that it vitally touches every branch of the Government, is of necessity handled in detail by the various Assistant Attorneys General and Special Assistants to the Attorney General, but under the general direction and supervision of the Attorney General himself. In order to arrive at a correct judgment regarding any particular case it is absolutely necessary to call said assistants who have had that case in charge and who, having access to the files of the department, can fully and accurately advise the committee in every detail in connection therewith. It would be absolutely necessary for me or any Attorney General to refer to such assistants and to the files before I could with any degree of satisfaction attempt to make a statement before your committee. That being true, such assistants and others having the active charge of cases and fully advised with reference to all details and executive work under inquiry, and who have full access to and the use of records and files pertaining thereto, and are familiar with every phase of such cases, should have been called before your committee prior to my appearance. The adoption of such a course would in all probability eliminate the necessity of my appearance in connection with the investigation of my official duties, by reason of the fact that full and accurate information would be in the possession of the committee as a result of calling the assistants in active charge of litigation. The calling of these witnesses at the commencement of the inquiry would have enabled the committee to bring this inquiry to an end at an earlier date, at least in so far as it concerned my official conduct as Attorney General.

2. Since the commencement of your inquiry—that is to say, on the 12th day of March last—I have hoped to be asked to appear before your committee and have been somewhat surprised that I was not asked to appear at an earlier period in your proceedings, as I was under the impression that the investigation would be confined to my official actions as Attorney General of the United States and matters directly relating thereto. The fact that your committee has not up to the present time called a single witness suggested by me and has sought for evidence from unexpected sources and generally from persons so situated that under ordinary circumstances very little credence would be given their testimony, has from the beginning caused me to feel that there was a feeling of antagonism entertained toward me by certain members of your committee and that these members of your committee instead of prosecuting a fair and impartial inquiry into my official conduct as Attorney General of the United States, have made a desperate attempt to blacken my reputation and injure my standing in the country by the statements of unreliable witnesses which would not be admitted in any court of justice. I have never been able to understand why your investigation was conducted upon such unusual and peculiar lines, and with such bitter personal feeling toward me on the part of certain members of your committee. Nevertheless, full of confidence in the ability of the Department of Justice to demonstrate to the satisfaction of your committee, or any other, the fact that it functioned during the time of my administration to a high degree of efficiency, I have been ready and anxious to assist your committee in every way within my power to make public the splendid record of accomplishment of the department.

At this point I take occasion to contradict and deny any inference, surmise, or suspicion that I profited in any illegal, corrupt, or unethical way, directly or indirectly, by reason of any activities of political associates or friends at any time, or that my conduct, either official or personal, was directly or indirectly influenced at any time, in any way, by venal and corrupt motives. No witness has appeared before your committee who has by surmise, innuendo, suspicion, or otherwise intimated the existence of any such circumstance, except by way of the grave, and the silence of the tomb has forever rendered the direct denial of these slanders impossible.

3. The controversy which arose in regard to the power of your committee to issue a subpœna duces tecum to the officers of the Midland National Bank of Washington Court House, Ohio, to produce certain books and documents, resulted in an appeal to the courts on the part of the bank and a judicial determination of the powers of your committee. A copy of the opinion of Judge Cochran, of the Federal Court for the Southern District of Ohio, was placed in my hands on Monday evening, June 2. A careful examination of this opinion has settled, as it seems to me, the course which I must now adopt in connection with this investigation and has answered for me your request that I appear before your committee on Friday next. Judge Cochran holds squarely that your committee has been and is now exercising a power not granted by the Constitution, expressly or by implication, and that each and all of your actions under Senate Resolution No. 157 are absolutely void. In view of this decision, and in obedience thereto, it would seem to me to be a vain thing to continue an illegal proceeding

and inquiry, and I must therefore decline to appear before your committee. From the very commencement of your hearings—that is, on the 12th day of March last—I have been constantly represented by counsel at all of said hearings, and during all this time have entertained the hope and have been encouraged by the promise that ultimately I would have the privilege of producing witnesses on my own behalf and on behalf of the Department of Justice. The decision of the court above referred to has changed the whole situation and rendered it unnecessary for me to appear before your committee in person or by counsel, and their attendance at your hearings will be discontinued from and after this date.

For your convenience and for purposes of the record I submit herewith a true copy of the opinion of Judge Cochran.

Very truly yours,

H. M. DAUGHERTY.

Mr. JONES of Washington. Mr. President, I feel that I should say a word, and I am a little bit embarrassed in doing it, too, because I do not desire in any way to reflect upon the action of any member of the committee. In anything that I may say I do not intend to do so, nor to question their right or the propriety of their taking the course that they may take, but I do feel, in view of the discussion that has been had and the fact that I am a member of the committee, that I ought to say a word in justice to myself.

I feel, Mr. President, that I am sitting as a judge in this case, that I am expected to report to the Senate at the conclusion of the investigation my opinion based upon all the evidence taken. We have not concluded the taking of testimony, so I have felt and I still feel that it is my duty to withhold a definite judgment or the expression of a conclusive decision until all the testimony has been taken on both sides of all the questions involved in the case and that then and then only is the proper time for me to express my conclusion. So, Mr. President, I have refrained publicly and I propose to refrain from expressing my conclusion until we complete the taking of the testimony in the case and I have then had the time to give it all careful study and consideration.

I am in favor of passing the resolution proposed by the Senator from Iowa.

Mr. BORAH. Mr. President, I have no intention of discussing at length the decision of the court. It has been printed in full in the RECORD of yesterday's proceedings. I want to read a paragraph or two, however, to show the circumscribed view which the court took of the case before the court, and the questions upon which he did not pass. He said:

> But it should be borne distinctly in mind that the question raised here is not as to the power of Congress to compel evidence from outsiders in aid of legislation but of either branch thereof acting by itself without previous action on the part of Congress. The necessities of this case, however, do not require that I should pass on this question.

Whatever the court may have said after that upon the subject, of course, would be mere dicta. Again, it is said:

> It is urged that such is the case because the investigation was not, at the start, expressly based on the ground that it was in aid of legislation, if such is the case. But I do not find it necessary to determine this question.

So the court determines neither the proposition of an inquiry in aid of legislation nor the question of whether or not the resolution must originally disclose whether it is in aid of legislation, two of the most important principles with which we can be concerned in matters of investigation. I pause to say, too, that the case of Kilbourn versus Thompson, upon which the court relies principally, decided neither one of those questions. The question of how far away we may go in making inquiries for the purpose of legislation or the question of what the resolution must disclose as to our desire to secure information for legislation, so far as I have been able to find, has never been passed upon by the Supreme Court, and certainly is not passed upon by this court.

Mr. McKELLAR. Mr. President——

Mr. BORAH. I yield to the Senator from Tennessee.

Mr. McKELLAR. Does not the Senator think that the trial judge in this case might be excused upon a statement that he himself made in the delivery of his opinion? I call the Senator's attention to it:

> A Federal district judge is the humblest and loneliest member of the Federal judiciary. He is at the bottom and has no one to help him think clear and straight.

If this was the position of the judge in delivering this opinion, it seems to me that we ought not to criticize him either directly or indirectly. If the poor fellow was lonely and he did not have anybody to help him think clear and straight, as he himself said, how can it be possible for anybody to blame him?

Mr. BORAH. My experience is that I can think a good deal better alone than I can in a crowd. I do not think that is what interfered with the court. I think it was the condition of the record. The court did not make the record in the case but the court was bound by the record.

The court further said:

> The power of the Senate to investigate the Attorney General's office or any department of the Government to the fullest extent is not involved here. In brief of counsel for respondent this is said:
>
> "In order that the legislative function may be performed, properly outside of the court, it must be conceded that the first duty of the legislature is to properly and fully inform itself. In no matter can this duty be more paramount than in respect to the conduct of the various departments of the Government itself. This would seem to be the first and foremost duty. Annually, Congress must legislate for the continued support and, therefore, for the very existence or ability to continue to function for all the departments of the Government. To contend that such power and such duty are not present and inherent and intrinsic is to say that Congress must pass willy-nilly the money of the people (not their money, nor the money of the departments, but of the people, contributed by enforced taxation). The complaint is generally that too much is spent in that manner as it is, and for the court to deny the power of Congress to inform itself with the aid of compulsory process to get the information would not merely be the height of effrontery but would be destructive."

The court, after quoting that, says:

> I hold nothing contrary to this.

So, Mr. President, I think, notwithstanding the statement made by the Senator from Arkansas [Mr. ROBINSON], that the error of the court, if error there be, lies in the fact that the court arrived at a wrong conclusion as to what the record was before it. That I do not discuss. The principles of law which the court has announced may be entirely correct if we take the court's view of the record; but the decision throws very little light upon what the Congress would like to know with reference to other inquiries. It is apparent from the decision itself that the court was very careful to confine its opinion to the specific matter before it, as the court viewed it, and not to indulge in an effort to decide general principles of law which might be relevant in other investigations.

I want to say that, in my opinion, the courts will ultimately determine that we have a right to investigate for the purpose of legislation, and that each body of Congress, whether it be the Senate or the House of Representatives, has a right to initiate its proceedings without the concurrence of the other body for that purpose; but I do think that we shall be held to disclose by the record which we present to the court the desire for legislation or the necessity or the reasonableness of the claim that we are asking information for the purpose of legislating.

Mr. EDGE obtained the floor.

Mr. HARRISON. Mr. President, will the Senator from New Jersey yield to me just for a moment?

Mr. EDGE. I am only going to make a brief statement and I shall have the floor for about only two minutes.

I have not the slightest desire to interfere with the disposition of the pending matter if it is the intention of the Senate to dispose of it to-day, but I simply rose to draw attention to the fact that we have only a little over two days left of the session. I have been trying to get the attention of the Senate to a conference report, which includes two most important measures, the postal salary readjustment bill, and a complete new corrupt practices act which has been considered by the other House as well as this. The conference report after action here must also be considered in the House. I sincerely hope that I may be able, without interfering with the pending resolution, to have the conference report to which I refer considered this afternoon.

Mr. MOSES. Mr. President, I quite agree with the Senator from New Jersey [Mr. EDGE] that at this stage of the session there are other things more important and of more consequence to the Senate and to the country than the attempt to pass upon the uncompleted testimony which has been taken by the select committee investigating the Department of Justice. The Senator from Washington [Mr. JONES] and I happen to be members of the nominal majority party and of the actual minority party in the committee which has been conducting that investigation. We have felt that it would be necessary for us at some time to formulate a report, possibly in consonance with that which would be presented by the majority of the committee, quite

probably, so far as I am concerned, in dissent, at least in some particulars. I took occasion the other day in the committee to record briefly my dissent from certain conclusions there announced. I take occasion now to express a certain dissent from what has here been said.

It is true, Mr. President, that substantially everything which has ever been cited as having been adduced in evidence before the committee has been so adduced. Much of it remains uncorroborated to this day; practically all of it is hearsay, and upon those portions of evidence the committee, I suppose, will formulate its report.

As I have sat with great patience, Mr. President, throughout the prolonged hearings of the committee, as I have witnessed with some impatience some of the proceedings of the committee, as I have paid close attention to the various sensational and startling lines of testimony brought before us, there constantly has run through my mind the phrase of the grandmother in Tennyson's poem, who spoke of a lie which is half a truth as ever the blackest of lies.

Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from New Hampshire will state the inquiry.

Mr. MOSES. May I ask what is the status of the resolution presented by the junior Senator from Iowa [Mr. BROOKHART]?

The PRESIDENT pro tempore. It is the pending question. Senators who favor agreeing to the resolution submitted by the Senator from Iowa will say "aye"——

Mr. SHIPSTEAD. Mr. President, I should like to have the resolution read. Some Senators have been away from the Chamber attending meetings of committees, I among them. I do not know what the resolution is; I did not hear it, and I ask that it may be read.

The PRESIDENT pro tempore. The Secretary will read the resolution.

The reading clerk read the resolution submitted by Mr. BROOKHART, as follows:

Whereas in a proceeding in the United States district court for the southern district of Ohio, western division, entitled "In the matter of the application of Mally S. Daugherty for writ of habeas corpus," an opinion has been handed down and judgment entered by the judge hearing said cause, which seriously affects the constitutional rights and power of the Senate of the United States and of the Congress; and

Whereas it is believed that said opinion and judgment are erroneous; and

Whereas it is highly desirable to have the law in the matter settled by the Supreme Court: Therefore be it

*Resolved*, That the Attorney General, on behalf of the Senate and the respondent in said cause, be requested to have the proper officials of his department, including counsel heretofore designated in the cause, take the necessary steps for a prompt review and determination thereof by the Supreme Court.

Mr. WILLIS. Mr. President, I have just heard the statement in the second "whereas," that the Senate of the United States is about to pronounce a decision of a court of the United States erroneous.

I am very much in favor of having this case carried to the highest court of the land. In my judgment the matter is now where it should be, namely, before the courts; but I can not believe that the Senate of the United States wants to put itself in the attitude of saying that a case now in process of final determination by the courts of the United States has been erroneously decided.

I move, therefore, that the whereas, whatever the appropriate number is—I think it is the second whereas—be stricken from the resolution.

Mr. BORAH. I do not suppose the "whereases" have anything to do with the resolution.

Mr. WILLIS. Perhaps not; but I think the Senate ought not to be on record as undertaking to review the decision of a court.

I move that that language be stricken from the resolution.

Mr. BORAH. Of course, Mr. President, the general statement which the Senator makes is correct. We are not undertaking to sit as a court of review. I believe that was put in as a mere formal matter to justify our seeking an appeal. The "whereases" do not throw any light upon the resolution one way or the other, anyway.

Mr. WALSH of Montana. Mr. President, I was unfortunately absent from the Chamber when the resolution was read from the desk. I am unadvised as to what the resolution calls for. I ask that the resolution be read in its entirety.

The PRESIDENT pro tempore. The Secretary will read the resolution.

The reading clerk again read the resolution.

Mr. WALSH of Montana. Mr. President, I have not been fully advised concerning the exact foundation for these proceedings. I should like to be more completely advised by the chairman of the committee or others who are familiar with it.

My understanding about the matter is that subpœnas duces tecum were issued requiring the attendance of certain witnesses and requiring them to bring certain books and records, the latter being alleged to be private in character and confidential, and likewise that the committee, possibly anticipating that some objections would be made upon that ground, and for other reasons, issued a simple subpœna simply requiring the attendance of the witnesses—nothing else—and that this subpœna requiring his attendance was disputed upon the ground, in some way or other, that the Senate of the United States has not the power even to compel the attendance of a witness before one of its committees.

The gravity of a contention of that kind must be obvious to anybody who reflects for a moment. It seems to me altogether appropriate that the Senate of the United States should take every step necessary to vindicate what has long been considered its undoubted authority and power, without which, it seems to me, it can not properly function at all. Perhaps the Senator from Iowa can give us definite information on that point.

Mr. BROOKHART. Mr. President, I think the Senator from Montana has the correct understanding of the situation. The attorney representing the committee, Colonel Chantland, was of opinion that the Senate should adopt a resolution directing this appeal to be taken in order that there might be no question about the authority of the lawyer when he comes to prosecute the appeal, and this resolution was prepared by him for that purpose.

The Senator from Ohio objects to one of the whereases.

Mr. WILLIS. That portion of it.

Mr. BROOKHART. He objects to the words—

Whereas it is believed that said opinion and judgment are erroneous,

That is no slam at the court or anything of that kind. That is the usual formal statement.

Then the resolution proceeds:

Whereas it is highly desirable to have the law in the matter settled by the Supreme Court: Therefore—

And so forth.

I see no impropriety in that statement. It is the way an attorney talks to a court when he is talking right to his face.

Mr. GLASS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Virginia?

Mr. WALSH of Montana. I do.

Mr. GLASS. Suppose we were to expunge that "whereas." In what different situation would we be? The action taken itself is indicative of the fact that we think the opinion is erroneous, or we would not take the action. What matters it if we express that opinion textually? If we take that action, we indicate that that is our opinion.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Nebraska?

Mr. WALSH of Montana. I do.

Mr. NORRIS. I should like to make this suggestion: If we do not believe the decision is wrong, what is the sense of taking an appeal from it? When you try a lawsuit, even in a justice of the peace court, and the decision is against you, and you think it is right, do you appeal? And if you think it is wrong, what objection is there to saying so? There never yet was an appeal taken but that it was based on the theory that the man who took it at least claimed that the decision was wrong. If we do not believe it is wrong, let us not appeal from it.

Mr. WILLIS, Mr. BORAH, and other Senators addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Montana yield; and if so, to whom?

Mr. WALSH of Montana. I yield to the Senator from Ohio.

Mr. WILLIS. If I may have the attention of the Senator from Nebraska, I think my motion was to strike out the whole paragraph, which read as follows:

Whereas it is believed that said opinion and judgment are erroneous; and

Whereas it is highly desirable to have the law in the matter settled by the Supreme Court.

I desire to strike out from that whereas the words "said opinion and judgment are erroneous; and whereas," so that it will read:

Whereas it is believed that it is highly desirable to have the law in the matter settled by the Supreme Court.

I want to say to the Senator from Nebraska that the purpose of this resolution is to get a final decision in the matter by the highest court in the land; but I, as the humblest Member of the Senate, do not desire to be on record here as saying in a resolution that a decision of the court is erroneous. It seems to me that language can be stricken out and still we will have all the authority for carrying up the case as it ought to be carried.

Mr. WALSH of Montana. Mr. President, the Senator from Ohio doubtless is aware that if we expect to get this decision reversed by any court we shall be obliged to tell the court that we think it is erroneous.

Mr. WILLIS. Oh, I understand that. That is a matter of the pleadings; but it seems to me the Senate ought not to go on record as criticizing a decision of a court and declaring that the court has erred.

Mr. WALSH of Montana. But we empower our representatives to say so in our behalf.

Mr. BORAH. Mr. President, as suggested by the Senator from Virginia [Mr. GLASS], it is wholly immaterial whether this language is out or in, because the fact of taking the appeal is based upon the theory, I suppose, that we think the opinion is erroneous. The "whereases" in a resolution do not signify anything, to my mind, one way or the other.

Mr. McKELLAR. Mr. President, may I ask the Senator from Ohio a question? What is the law in his State about the taking of appeals? Is it required that reasons be given or not? In some jurisdictions they require reasons to be given.

Mr. WILLIS. So far as I know there is no law of that kind in Ohio; but, anyhow, the Senator recognizes the vast difference between the rather unusual proceeding in which we are now engaged and the ordinary appeal of a case in regular course through the courts. What I am seeking to avoid is at least an apparent prejudgment of the case by having the Senate officially declare that this decision is erroneous.

Mr. BROOKHART. The Senate does not declare that.

Mr. WILLIS. It says it believes so.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield to the Senator from Nebraska.

Mr. NORRIS. We either believe the decision is wrong or we believe it is right. Suppose we do not say that we believe it is wrong. Then we ought to say that we believe it is right, and we ought to say, "Whereas, we believe that the decision is right," we are going to appeal it.

If I were drawing the resolution, I would not have put any whereases in it, because I do not think they add anything to it or detract anything from it; but, since they are there, I do not want to go on record as striking out the one that says we think the decision is erroneous.

Mr. CARAWAY. Mr. President, while the Senator from Ohio is so tender of the courts, I should like to have him introduce a resolution to strike out, on page 10483 of the RECORD, this statement from the judge himself, because it is not complimentary to himself, and the Senator wants to protect the judge. The judge says this:

A Federal district judge is the humblest and loneliest member of the Federal judiciary. He is at the bottom and has no one to help him think clear and straight.

That is a criticism of the Federal judge. Why does not the Senator from Ohio have it stricken from the opinion? He is the keeper of the dignity of the court.

Mr. WALSH of Montana. Mr. President, I really did not get the information I was seeking. I wanted to know whether the proceedings in the court in the State of Ohio are founded upon a subpœna which merely called for the presence of the witness.

Mr. BROOKHART. They are, and the decision is founded upon the idea that the committee has no authority even to subpœna a witness for what the court holds to be an investigation of a private party.

Mr. WALSH of Montana. Now I desire to make a further observation in connection with this matter.

The resolution directs the Attorney General to prosecute this appeal; but, strange as it may appear, things have come to such a pass—and I am not sure that it can be avoided—that the Attorney General does not any longer represent the Government of the United States in the Supreme Court of the United States. My information is that the retiring Attorney General never appeared there except in some formal matters, or on the occasion of the deliverance of obsequies upon the death of some official of the Government, or possibly some member of the court. His predecessor, according to my information, never appeared there, either; and when we say here that the Attorney General shall present this matter by appeal to the Court of Appeals or the Supreme Court, as the case may be, we merely mean that some assistant in his office shall present it.

Mr. President, this is a profoundly important matter. Its eventual consequences, if that theory should be sustained, no Member of this body has sufficient foresight or sagacity to understand.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Montana yield to the Senator from Iowa?

Mr. WALSH of Montana. I yield.

Mr. BROOKHART. With reference to the attorney who is representing the committee, I will state that the committee selected him in the Department of Justice.

Mr. WALSH of Montana. Yes; I so understand.

Mr. BROOKHART. The resolution is so worded that he will continue to represent them.

Mr. WALSH of Montana. That is right, and that is why I make these remarks.

Mr. BROOKHART. I think it would be well to have the committee represented by any of the distinguished lawyers in the Senate, when it comes to the hearing, in addition to the representative of the Department of Justice, and I would be delighted to have the resolution so amended that that may be done.

Mr. WALSH of Montana. Mr. President, I feel that there is no member of the American bar of talent so high as that his services should not be secured in a matter of this character. Without in the slightest degree disparaging the gentleman who had charge of the matter in the past, I do not believe he occupies such a preeminent place at the bar of the country as that this tremendously important question should be intrusted solely to him. I do not know what ought to be suggested in the matter, but I should like to see this matter presented to the Supreme Court by one of the foremost members of the American bar.

I venture to say that eminent members of the American bar would feel honored by being invited to associate themselves with the Attorney General's office in the presentation of this matter to the Supreme Court, and that without any compensation.

Mr. BROOKHART. Mr. President, I would be glad to accept an amendment that would authorize the committee to secure the services of counsel in additon to the other counsel.

Mr. WALSH of Montana. I am glad to hear the Senator's statement.

Mr. BROOKHART. I would like to ask the Senator if he thinks the suggested modification of the whereas would make any difference in the effect of the resolution?

Mr. WALSH of Montana. No; I do not. That is merely formal.

Mr. ROBINSON. Mr. President, may I bring to the Senator's attention another point. I note that the word "appeal" is used. The resolution directs that an appeal be prosecuted. I presume the word "appeal" is intended and would be construed to mean the prosecution of such process as would bring the matter before the Supreme Court for decision, whether by writ of error or otherwise.

Mr. BROOKHART. That is the idea.

Mr. ROBINSON. I am sure that is the interpretation that would be given to it.

Mr. BROOKHART. I think so.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Ohio.

Mr. BROOKHART. I will accept the amendment of the Senator from Ohio.

Mr. NORRIS. I will object to that.

Mr. CARAWAY. Oh, no; we will not accept that amendment.

Mr. NORRIS. I would like to have the yeas and nays. If you want to strike out one whereas, take them all out.

Mr. MOSES. What became of the suggestion of the Senator from Ohio?

Mr. McKELLAR. We are asking for the yeas and nays on it.

Mr. MOSES. On the motion he makes?

Mr. McKELLAR. On the motion he makes to strike out.

Mr. WILLIS. With the consent of the Senate, I modify the original motion, which I would like to have the Secretary state now.

Mr. HEFLIN. What is the proposition now, as it reads?

The PRESIDING OFFICER. The Senator from Ohio desires to modify his motion, as the Chair understands, but the first question, I think, is on the resolution itself, and not the preamble.

Mr. HEFLIN. The Senator from Ohio withdraws his motion regarding the preamble?

Mr. WILLIS. Oh, no.

Mr. McKELLAR. I ask that the amendment of the Senator from Ohio be stated.

Mr. WILLIS. As modified?

Mr. McKELLAR. Yes; as modified.

The PRESIDING OFFICER. The Secretary will report the amendment offered by the Senator from Ohio.

The READING CLERK. In the second whereas the Senator from Ohio proposes to strike out the words "said opinion and judgment are erroneous; and, whereas," so that as modified it would read:

Whereas it is believed that it is highly desirable to have the law in the matter settled by the Supreme Court.

Mr. McKELLAR. On that I ask for the yeas and nays.

The PRESIDING OFFICER. The Chair is of the opinion that the Senate must first pass upon the resolution itself, and that the recitals in the whereases at the beginning of the resolution will be acted upon after that. The question is upon agreeing to the resolution.

Mr. BALL. Is the vote on the resolution now, or on the amendment to the resolution?

The PRESIDING OFFICER. The Senator from Montana is to offer an amendment to the resolution.

Mr. WALSH of Montana. I offer this amendment, to cover the conclusion of the resolution which has been presented:

And the special committee appointed under Senate Resolution No. 157 is hereby authorized and empowered to secure the services of such other counsel, to act in conjunction with the Attorney General, as to it may seem necessary and advisable.

The PRESIDING OFFICER. The question is upon agreeing to the amendment offered by the Senator from Montana.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is upon the resolution as amended.

Mr. McKELLAR. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr WILLIS. So that there may be no misunderstanding, I desire to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. WILLIS. What is the question upon which we are about to vote?

The PRESIDING OFFICER. The question is upon the resolution itself, as amended by the amendment offered by the Senator from Montana.

Mr. WALSH of Montana. It just occurred to me that possibly, with the amendment which has now been agreed to, the resolution must be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. WILLIS. I think so.

Mr. ROBINSON. That committee can probably report the matter immediately. I suggest that if the chairman of the committee is present, we give him an opportunity to report immediately, so that the matter may be acted upon now.

Mr. McKELLAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The principal clerk will call the roll.

The principal clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Adams | Fletcher | Lenroot | Sheppard |
| Ashurst | Frazier | Lodge | Shields |
| Ball | George | McKellar | Shipstead |
| Bayard | Gerry | McKinley | Simmons |
| Borah | Glass | McLean | Smith |
| Brandegee | Gooding | McNary | Spencer |
| Brookhart | Hale | Moses | Stanfield |
| Broussard | Harris | Neely | Stephens |
| Bruce | Harrison | Norbeck | Sterling |
| Bursum | Heflin | Norris | Swanson |
| Capper | Howell | Oddie | Trammell |
| Caraway | Johnson, Calif. | Overman | Wadsworth |
| Copeland | Johnson, Minn. | Pepper | Walsh, Mass. |
| Dale | Jones, N. Mex. | Phipps | Walsh, Mont. |
| Dill | Kendrick | Pittman | Willis |
| Edge | King | Ransdell | |
| Ferris | Ladd | Reed, Mo. | |
| Fess | La Follette | Robinson | |

The PRESIDING OFFICER. Sixty-nine Senators having answered to their names, there is a quorum present.

Mr. ROBINSON. Mr. President, it was stated that on account of the nature of an amendment which was proposed, and I believe accepted by the author of the resolution, it was necessary that the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate. The statute makes that requirement. I suggested that the reference be made and the committee discharged from consideration of the resolution, so that the Senate might act upon it immediately. I inquire whether any report has been made by the Committee to Audit and Control the Contingent Expenses of the Senate?

The PRESIDENT pro tempore. The Chair is advised that no report has been made.

Mr. ROBINSON. I ask unanimous consent, for the purpose of complying with the statutory requirement and avoiding any question as to the legality of the resolution and the right of the committee to employ counsel, that the resolution be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, and that the committee be asked to report immediately, or that it be discharged from the further consideration of the resolution.

SEVERAL SENATORS. Let the committee be discharged.

Mr. ROBINSON. I ask that the committee be discharged from the further consideration of the resolution.

Mr. MOSES. Mr. President, I have no objection to any parliamentary step which the Senator from Arkansas may wish to take, but as a member of the committee—not the Committee to Audit and Control the Contingent Expenses of the Senate, but of the Committee to Investigate the Department of Justice—I am of the opinion that the committee already has sufficient authority, under the amendments to the original resolution creating the committee, to do everything which the Senator from Montana has proposed in his amendment. I think the language of the amendment giving the committee authority to employ clerks, experts, accountants, and other assistants as it may seem necessary is sufficiently broad to enable the committee to employ counsel to defend any action in which it may be an interested party.

Mr. ROBINSON. Mr. President, my suggestion is intended to obviate any controversy as to the right of the committee to employ special counsel, and that can be done by referring the matter to the committee and discharging the committee, or directing it to report forthwith.

Mr. MOSES. As I said, I have no objection to the Senate making any unnecessary gestures which it pleases in the matter, but my opinion remains that the committee already has authority to do this thing.

The PRESIDENT pro tempore. Is there objection to the request for unanimous consent? The Chair hears none, and it is so ordered. The question is upon agreeing to the resolution as amended.

Mr. PEPPER. Mr. President, I believe a vote is about to be taken on the resolution as amended. I wish to state my position upon that resolution, which briefly is this: I was prepared to vote for the resolution as offered, because it seems to me that the Senate ought to take official cognizance of the judicial decision by a Federal judge which so seriously affects its power or the power of one of its committees. I should have been of opinion that that cognizance should be taken by the Senate, whether we thought the decision right or wrong, because, as suggested by several Senators, the important matter is to have the law settled, and it will not be settled until the Supreme Court has passed upon the question. Therefore I attach relatively little importance to the recital which has been debated here, although, personally, I am not prepared to commit myself on the legal proposition.

I can not vote for the resolution, however, as amended, because, as I understand it, it authorizes a committee of the Senate to employ counsel in connection with a litigation to which the Senate is not a party and in which the Senate has no right to appear. I should suppose that we were entirely safe in intrusting this matter to the Department of Jusice.

The point made by the Senator from Montana is undoubtedly sound, that in the practice of many administrations the Attorney General himself seldom appears to argue. The Solicitor General appears on the part of the United States, and the very competent, able, and distinguished Solicitor General will, no doubt, have charge of this case on appeal. But I can not vote for a resolution authorizing the Senate committee to retain counsel to represent it in a litigation to which we are not parties.

Mr. BROOKHART. Mr. President——

Mr. PEPPER. I yield to the Senator from Iowa.

Mr. BROOKHART. The real party to the suit is the Assistant Sergeant at Arms of the Senate, who went out there on order of the Senate to perform this duty. To say that the Senate is not a party and ought not to defend him and take care of him seems to me to be clear out of reason.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. PEPPER. I yield.

Mr. ROBINSON. Is it not a fact that the important issue to be determined in the litigation is the question of the extent and nature of the power of the Senate to make investigations?

Mr. PEPPER. Undoubtedly, and that is the reason why——

Mr. ROBINSON. Will the Senator yield further?

Mr. PEPPER. Let me finish my sentence first. Undoubtedly so, and that is the reason why I am in favor of urging that an appeal be taken in order that the question may be decisively settled.

Mr. ROBINSON. Will the Senator now yield to another question?

Mr. PEPPER. I yield.

Mr. ROBINSON. If the Senator desires to safeguard those prerogatives, it can not be an unwise policy to see that the case is presented by counsel who are qualified and who are interested in the success of the case.

Mr. PEPPER. That may or may not be a wise policy, but the point I am making is that after the Senate has passed its resolution and after the committee has retained counsel, and after counsel has gone to the court, it will be a rather humiliating position to discover that the counsel has no standing to appear in the cause, and if heard could only be heard as amicus curiæ. Therefore I can not vote for the resolution.

Mr. REED of Missouri. Mr. President, to my mind there is a very great importance attached to our proceeding here to-day. For something over a century of time the Senate and the House of Representatives and the various legislative bodies of the States have exercised a practically undisputed right to inquire into any question or matter or thing which relates to the administration of the Nation, or of the State, if it be a State legislative body, and to inquire relative to any question, matter, or thing which may affect or throw light upon the legislative duties of the body conducting the investigation. Courts have not been in the habit of denying to the legislative body this means of gaining information.

We are confronted with the fact that a court has held that this power so long exercised and so long acquiesced in by the bar, the bench, and the public generally does not exist—that, indeed, being in my judgment the effect of the opinion of the judge of the court. I read the opinion so far as it was printed in the press, and there was enough printed in the space covered by that part of the opinion which I read to have contained four or five opinions. I tried to get at the reasoning of the court. As nearly as I can arrive at it he has struck at the very heart of the power of legislative bodies to exercise the functions they have heretofore employed without challenge.

It would not be, perhaps, consistent with the proprieties to discuss the opinion, but I can not refrain from saying that as I read it I recalled an experience I had when I was a law student and went along with one of the lawyers, with whom I had the honor of studying to hear an argument in the Supreme Court.

The lawyer upon the other side was not possessed of much learning but with a great deal of enthusiasm and a vast flood of words. When he came to argue his case, the Chief Justice asked him, "Mr. Jones, we have been looking over your petition, and we are not quite able to say whether it sounds in tort or sounds in contract. Will you please explain to us just the nature of your case?" Mr. Jones, in a long and involved rigmarole of words, undertook to explain, but did not explain. Whereupon the Chief Justice turned to the attorney on the other side, the man whose books I happened to be carrying that day, and said, "Colonel Clark, can you tell us what is in the petition?" Colonel Clark replied, "If your honor please, in the language of the late lamented Hamlet, 'Words.'" I recalled that incident as I read the dissertation of the learned judge who decided this case.

If it be true that the legislative branch of the Government can not by resolution of either House inquire into facts which affect the conduct of public officers or which affect the propriety of proposed legislation, then there is, indeed, a necessity for one amendment to the Constitution of the United States.

Mr. BORAH. Mr. President, will the Senator yield?

Mr. REED of Missouri. I yield.

Mr. BORAH. I do not want to concede in passing upon the proposition that the court has decided anything of that kind. The court expressly states that he does not decide that question.

Mr. REED of Missouri. I do not know what he decided. I have been unable to determine what he decided.

Mr. BORAH. I do not know exactly what the court did decide, but I know what it did not decide. That is the comfort of the decision, the fact that these important matters in which we are interested are not passed upon by the court adversely. I think that it is extremely important before the record goes to the Supreme Court that the record be made up in such way that the court will be authorized to pass upon these questions.

Mr. GLASS. The court evidently decided one question, and that was that Mr. Daugherty did not have to appear here in Washington.

Mr. BORAH. Exactly; but that was decided upon a point which aids us very little in the general proposition. It turns upon his construction of the facts in the record, which I confess I do not understand. I am speaking of the legal principle of which the Senator speaks, to wit, that we have not the right to inquire for the purpose of legislation.

Mr. ROBINSON. It was held that it was not an investigation to aid legislation, that it is not an inquiry into the affairs of the Department of Justice, that it was a mere interference with the private affairs of an individual, and that therefore the attempt of the Senate to carry on the investigation was an effort to discharge a judicial function rather than to act in aid of its legislative affairs.

Mr. REED of Missouri. The Senator from Arkansas, I think, has as correctly stated as any human being can what the judge said. When we are through with it, all that we know is what the Senator from Virginia has indicated, that the court undertook to stop the investigation. There is wrapped up in the decision of this question, as my friend from Idaho of course concedes, this proposition: Is the Senate of the United States or indeed the entire Congress of the United States the judges of the time and the necessity for inquiring into facts which may affect the public business; and if so, are they authorized to go ahead and secure that evidence, or can they be controlled by a subordinate judge of a coordinate branch of the Government and their discretion and action dominated and dictated by that judge? I think that question is squarely here and I want to see the question properly attended to in the court.

Mr. BORAH. Mr. President——

Mr. REED of Missouri. I yield to the Senator from Idaho.

Mr. BORAH. I only want to make this suggestion, and then I will not interrupt the Senator again. I think a record can be made up which will present all of these questions. But the more I look into the record which was presented the more I am of the opinion that the record was not full and complete for presentation of the questions. The questions which should be presented, as stated by the Senator, are, of course, of extremely great importance, but the court can only pass upon matters which are in the record.

Mr. REED of Missouri. That perhaps emphasizes the necessity for the employment of special counsel.

Mr. BORAH. I was not arguing against that.

Mr. REED of Missouri. No.

Mr. ROBINSON. I think the Senator from Missouri is right in his position. The practical effect of the decision is to restrain and circumscribe the power of the Senate, and that is the purpose of it. It is to deny to the Senate information which the Senate thinks it is entitled to in the performance of its duties. If the decision should be sustained, it would have that practical effect.

Mr. BROOKHART. Certainly any officer by resigning could head off any investigation under the peculiar wording of the decision. That is quite certain if the judge is correct.

Mr. WALSH of Montana. Mr. President, will the Senator from Missouri pardon me for interrupting him for a moment?

Mr. REED of Missouri. Certainly.

Mr. WALSH of Montana. I have a word to say to the Senator from Pennsylvania, with the permission of the Senator from Missouri. I feel very certain that the Senator from Pennsylvania must have misconceived the character of the proceedings under which the opinion in question was rendered.

Mr. PEPPER. Perhaps I did. I would be glad to be corrected if that is the fact.

Mr. WALSH of Montana. The Senator took the position, as I understood from his remarks, that the Senate was not a party to the litigation at all, and, therefore, that the Senate would be in the nature of an intruder; but that is not the situation at all. The Senate, acting through its committee, served its subpœna on M. S. Daugherty, commanding Daugherty to appear before one of its committees. Daugherty declined to appear or omitted to appear. The committee re-

ported the facts to the Senate, and the Senate thereupon adopted a resolution directing that Daugherty be cited to the bar of the Senate for contempt of the Senate. The writ was accordingly placed in the hands of our Sergeant at Arms, who proceeded to arrest Daugherty and to bring him here before the bar of the Senate. Thereupon counsel for Daugherty sued out a writ of habeas corpus directed against David S. Barry, the Sergeant at Arms of the Senate, acting in an official capacity as our representative, to bring the body of Daugherty before the court that it might inquire why and by what authority and what power the Senate of the United States undertook to bring him here. Thereupon he was released in proceedings, Daugherty being one party and Barry being the other party.

Mr. ROBINSON. But in every practical sense the proceeding was against the Senate of the United States.

Mr. WALSH of Montana. The proceeding was against the Senate of the United States. Accordingly, Mr. President, the Attorney General not being the official attorney of the Senate of the United States and acting in the matter merely by courtesy and by request of the Senate very properly comes before the Senate to say, "I should like to have authority to appeal this case," recognizing that he must get that authority from the Senate of the United States. The Senate says, "We shall be very glad to do so; we are obliged to the Attorney General for his courtesy, and we would like associate counsel." But, Mr. President, if it were otherwise, I can not for one moment conceive that the Attorney General of the United States, gentleman as he is, would for an instant hesitate about associating with him any counsel which the Senate of the United States might think advisable so to associate in the case. If he did, however—and I can not conceive, as I have stated, that he would—I am perfectly certain that any court before which the matter may come, recognizing the vital interest of the Senate of the United States in the matter to be determined by it, although it might not technically be a party to the proceedings, I can not conceive that a court would for an instant hesitate to hear the representatives of the Senate as amicus curiæ.

Mr. PEPPER. Mr. President, my thought was that when a witness is alleged to be in contempt of the Senate or of the House of Representatives and has been placed under arrest by the Sergeant at Arms of either body and a habeas corpus issues, the question precipitated is one of the sovereignty of the United States, and that it has to do with the question whether the authority of the United States has or has not been properly exercised by one of the branches of the legislative body; and that that being so, the United States, as a sovereign, is the actor in the case and is represented in that capacity by its Attorney General.

I quite recognize that the Senate has a substantial interest in the outcome of the controversy, and I am heartily in favor of urging as strongly as possible that an appeal should be taken, but I am not willing to vote to suggest an associate or additional counsel; I am in favor of leaving it where it properly belongs—in the hands of the Department of Justice and the Attorney General, being assured that when the question does come before the Supreme Court on appeal it will be properly handled and disposed of, so far as counsel for the appellant is concerned, by the Solicitor General or anybody else whom the Attorney General may designate.

Mr. WALSH of Montana and Mr. NORRIS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Missouri yield; and if so, to whom?

Mr. REED of Missouri. I yield first to the Senator from Montana, in order to complete the colloquy.

Mr. WALSH of Montana. Mr. President, I feel like saying this in further explanation of the amendment proposed by me: The Attorney General came before the Committee on Public Lands a few days ago to confer with us in relation to the employment of counsel to prosecute the proceedings authorized by the Senate in relation to section 36. The name of Mr. Knight, of California, was, it will be recalled, sent to the Senate in that connection, and being rejected the Attorney General recommended the appointment of Mr. Morrow, whose name has now been sent in. I said to the Attorney General at that time, "Why, Mr. Attorney General, everybody has confidence in you. What is the use of appointing another attorney at all in this matter? Why do you not take care of it yourself?" The Attorney General laughed and asked me if I did not think he had enough to do as it is. That is why I feel that he will be obliged to get some one else to take care of this matter for him; and we may very properly have the committee select the associate counsel.

Mr. BROOKHART. Mr. President, there is one little matter in reference to this controversy which I might explain and which may be of some assistance. There is a statute providing that when a committee of Congress or officers of a department are involved in litigation of this kind they may apply to the district attorney in the district where the controversy occurs. Then, after that, the Attorney General may assist in the defense or prosecution of the case. That is what was done in this instance. I made the application to General Hough, the district attorney in Ohio. He reported the facts to the Attorney General, and then an attorney who was agreeable to the committee was sent out and conducted the trial in the court. The committee, however, did not have to go to the Attorney General at all. We could have come back to the Senate in the first place and asked the authority to employ another attorney.

Mr. NORRIS. Mr. President——

Mr. REED of Missouri. I yield to the Senator from Nebraska.

Mr. NORRIS. Mr. President, I should like to suggest to the Senator from Pennsylvania, in reference to his objection to the amendment to the resolution offered by the Senator from Montana, that it seems to me quite apparent that his position is not well taken, if he considers for a moment what might very likely be the situation in this particular case. His objection to the particular amendment is that the Attorney General ought to conduct this litigation on the part of the Senate.

Mr. PEPPER. Mr. President, will the Senator yield?

Mr. NORRIS. I will yield in just a moment. The controversy originally was in reality between the Senate and Attorney General Daugherty. It is true that he is not Attorney General now; but suppose he had remained in that office and was Attorney General at the time, if the theory of the Senator from Pennsylvania be right, we would be absolutely at the mercy of the very official with whom we are having the litigation to select counsel for us.

Mr. PEPPER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. PEPPER. I beg the Senator to yield merely in order that I may say a word in answer to what has just been said by the Senator from Nebraska.

Mr. REED of Missouri. I yield.

Mr. PEPPER. If the facts were different, my view of what would be proper to do under the circumstances might also be different. I call the attention of the Senator from Nebraska to the fact that I was not debating an amendment to a resolution which has already been adopted, but I was venturing to suggest the reason why I as an individual Senator would have been happy to vote for the resolution as introduced by the Senator from Iowa but could not vote for it as amended, for the reason that in my judgment it puts the Senate in a wrong relation to the litigation.

Mr. REED of Missouri. Mr. President, I am unable quite to follow the distinguished Senator from Pennsylvania in his line of reasoning. The original resolution read:

> Therefore be it
>
> *Resolved*, That the Attorney General, on behalf of the Senate and the respondent in said cause, be requested to have the proper officials of his department, including counsel heretofore designated in the cause, take the necessary steps for a prompt review.

I am unaware whether special counsel was employed or not. What is the fact about that?

Mr. WALSH of Montana. The Attorney General designated one of his assistants.

Mr. REED of Missouri. Very well. If we can undertake in the original resolution to designate the counsel to be employed, I see no distinction between that and the proposal that the committee may employ additional counsel, because, in either event, the Senate is undertaking, in a way, to interfere in the matter of the selection of counsel.

Mr. President, I have yielded to a number of Senators, and merely wish to conclude very briefly what I was going to say.

My respect for the courts, whether I have agreed with their decisions or not, and my desire that the courts shall always be held in reverence by the people of this country is so great that I do not want to comment upon the particular decision further than I have already done. I might say some things that perhaps would be improper. I recognize that when a court decides a case we must all, as good citizens, bow to its judgment; but we do have the right to appeal in this instance to the highest tribunal in the land—at least such is conceived to be our right—and until the highest tribunal in this land has said that a legislative body exists without the power of ascer-

tainment of facts upon which to act, I will never believe that it is the law of this land, and nobody else will believe it.

The former Attorney General was presumptively a great lawyer, and in his statement to the committee in which he declined to testify he substantially admits that until he was enlightened by this remarkable decision—I will not say "remarkable," but this decision of first instance in the State of Ohio—he thought it was the right of the committee not only to bring him before the committee but to bring all of his subordinates before the committee; indeed, he complained in his letter that his subordinates ought to have been brought before the committee or been requested to come.

A little plain common sense is always a good thing to employ when you come to consider any question of law; for, after all, law is the common sense of the ages crystallized into statutes or into rules which have the effect of statutes. The common sense of the ages has held to the doctrine that any body required to legislate with reference to the affairs of a people has the right to determine, by such investigations as it deems proper, what the facts are with relation to the particular matters touching which it is about to act. The common sense of the ages has been that that right is not to be interfered with save and except in those instances where, under the guise of proceeding under legislative sanction or legislative power, an abuse of the fundamental rights of the citizen has been perpetrated. That common sense had so impressed itself upon the minds of the people of this country, including the Attorney General, that when these several investigations were begun no one thought of challenging the general authority of a committee to inquire. The truth is that the challenge came out of the lips of desperation at the hour of conviction.

It will be recalled that Mr. Fall expressed his great anxiety to appear and to make a clear and clean statement regarding all of his activities as the head of the Department of the Interior, and that anxiety continued until one fact after another had been brought forward, so that out of these facts there had been forged a chain of circumstances which pointed indubitably to his guilt; and then the former Secretary of the Interior—himself a lawyer of some distinction, and advised by lawyers of great ability—did not challenge the general authority of the committee, but took refuge beneath the shield of the Constitution, which, of course, provides that no citizen can be obliged to give testimony which will tend to incriminate himself.

Again, we were told by Mr. Daugherty that he wanted to disclose every fact and circumstance; that he was eager to appear before the committee and testify. If I am not mistaken, his brother, Mal Daugherty, evinced a similar desire to appear. But, Mr. President, some things happened in the meantime. Telegrams were discovered, various facts were demonstrated, which made it perfectly apparent that the committee was in pursuit of a line of investigation almost certain to result in conviction; and when the committee, pursuing the very practical and sensible line of investigation of the books and accounts of the Attorney General, proceeded to Ohio and sought to bring in the books and accounts which any honest man ought to have been glad to have laid before the committee, it was then that we found the defense in these matters driven to the extraordinary expedient of challenging the general authority of a legislative body to make an investigation at all; and when that decision had been rendered we find the former Attorney General seizing upon it as the excuse for a failure to testify.

Mr. President, whether this committee had authority under the law or did not have authority has nothing to do with the propriety of the Attorney General disclosing to the people of the United States the facts touching his conduct of the office of Attorney General. It had only to do with the necessity of his testifying against his will. When any man who has held the high, the exalted, and the responsible office of the chief prosecutor of this land, engaged for years of time in prosecuting men and seeking to send them to the penitentiary for violation of the law, calling to his aid grand juries and special investigators of the Department of Justice, prying into their secrets and using all of the power and influence and dominance of his great office for the purpose of sending the humble citizen to the penitentiary, or fining him and taking away his goods and chattels—when such a man is obliged to take refuge behind the pretense that he is not compelled to testify, and therefore that it is improper to testify, as sorry a spectacle is presented to the American people as has ever offended against the good taste, the judgment, and the sense of decency of the people of the United States.

I am for this resolution. Let us allow this committee to select their own counsel. Let us present this case on behalf of the Senate of the United States. The Supreme Court, I am sure, will not hesitate to read the brief or listen to the arguments of counsel representing one of the great coordinate branches of this Government in an issue which challenges its jurisdiction and strikes at its right of investigation.

The PRESIDENT pro tempore. The question is upon agreeing to the resolution as amended. Upon that question the yeas and nays have been ordered, and the Secretary will call the roll.

Mr. WALSH of Montana. Mr. President, upon reflection there is no reason why the resolution should not be passed with the amendment. The question will be only as to the right to make the payments to counsel. That can be taken care of, I dare say, in some other way.

Mr. WILLIS. Mr. President, may we have the question stated? Some of us were unavoidably absent from the Chamber. Just what is the precise question now before the Senate?

The PRESIDENT pro tempore. The precise question is upon agreeing to the resolution as amended.

Mr. WILLIS. And the vote has not yet been had, of course, upon the preamble. That will follow?

The PRESIDENT pro tempore. The vote upon the Senator's motion to strike out a portion of the preamble will follow.

Mr. DILL. Mr. President, what is the amendment? May we have the amendment stated?

The PRESIDENT pro tempore. The Secretary will state the amendment.

Mr. DILL. I withdraw the request. I understand it now.

Mr. MOSES. There is no amendment pending. The amendment has been agreed to, as I understand.

The PRESIDENT pro tempore. The amendment has been agreed to. The question is upon agreeing to the resolution as amended. Upon that question the yeas and nays have been ordered. The Secretary will call the roll.

The reading clerk called the roll.

Mr. LODGE. I have a general pair with the senior Senator from Alabama [Mr. UNDERWOOD]. I understand that on this question he would vote as I am about to vote, and I vote "yea."

Mr. GERRY. I desire to announce that the Senator from Oklahoma [Mr. OWEN] is paired with the Senator from West Virginia [Mr. ELKINS]. If present, the Senator from Oklahoma would vote "yea."

Mr. TRAMMELL (after having voted in the affirmative). I have a pair with the senior Senator from Rhode Island [Mr. COLT]. In his absence I transfer that pair to the junior Senator from Indiana [Mr. RALSTON], and allow my vote to stand.

Mr. WALSH of Montana. I desire to announce that my colleague [Mr. WHEELER] is unavoidably absent, and that if present he would vote "yea."

Mr. ERNST. I have a general pair with the senior Senator from Kentucky [Mr. STANLEY], and I understand that if present he would vote "yea." I am therefore at liberty to vote, and I vote "yea."

Mr. PHIPPS. I have a general pair with the junior Senator from South Carolina [Mr. DIAL]. I understand that if present he would vote "yea," and therefore I am at liberty to vote. I vote "yea."

Mr. ROBINSON. I desire to announce that the junior Senator from Georgia [Mr. GEORGE] is necessarily absent. If he were present, he would vote "yea."

Mr. SHEPPARD. My colleague, the junior Senator from Texas [Mr. MAYFIELD], is unavoidably detained from the Senate. If he were present, he would vote "yea."

The result was announced—yeas 70, nays 2, as follows:

YEAS—70

| | | | |
|---|---|---|---|
| Adams | Edwards | Kendrick | Reed, Mo. |
| Ashurst | Ernst | Keyes | Robinson |
| Ball | Ferris | King | Sheppard |

| Cameron | George | Norbeck | Stanley |
| Colt | Gooding | Owen | Stephens |
| Couzens | Greene | Ralston | Underwood |
| Dial | Ladd | Reed, Pa. | Warren |
| Elkins | McCormick | Shortridge | Weller |
| Fernald | Mayfield | Smoot | Wheeler |

So the resolution as amended was agreed to.

The PRESIDENT pro tempore. The question now is upon the preamble, which the Senator from Ohio moves to amend.

Mr. ROBINSON. May I inquire if upon my request for unanimous consent the resolution was referred to the Committee to Audit and Control the Contingent Expenses of the Senate, and that committee discharged from the further consideration of the resolution?

The PRESIDENT pro tempore. The Senate has already given its consent to that request. The Secretary will report the amendment proposed by the Senator from Ohio [Mr. WILLIS] to the preamble.

The READING CLERK. The second whereas reads:

Whereas it is believed that said opinion and judgment are erroneous; and

Whereas it is highly desirable to have the law in the matter settled by the Supreme Court.

The Senator from Ohio proposes to strike out the words—

said opinion and judgment are erroneous; and

Whereas

So that as amended it would read:

Whereas it is believed that it is highly desirable to have the law in the matter settled by the Supreme Court.

Mr. WILLIS. Mr. President, without taking more than a moment of time, I would like to state that Senators will observe the effect of this amendment, if agreed to, will be simply to strike out of the whereas any expression of opinion as to whether or not the action of the lower court was correct. I personally do not believe that the Senate wants to resolve itself into a reviewing court. I think the matter is now in the courts, where it belongs, and that we should follow the regular procedure. Therefore, I have offered this amendment.

Mr. NORRIS. Mr. President, this resolution would suit me entirely if there were no whereases whatever in it. As I said once before this afternoon, if I had been drawing a resolution, I would have had no whereases in it. They are, of course, not technically a part of the resolution. A whereas is only explanatory, for the reason that it is a sort of an argument for a resolution.

It is proper to have whereases, however, if we want to have them, even though they do not have any legal effect, and these whereases are in the resolution. I am opposed to striking out any part of a whereas like the part sought to be stricken out. It seems to me like making an apology for passing the resolution. Since we have the whereas here, I am opposed to striking out a very vital part of it.

If we do not believe the ruling was erroneous, then we ought to abide by the decision of the court. If we are going to appeal it, the appeal ought to be based upon the fact that we believe the decision to be erroneous. If we believe it is erroneous, it is not dishonorable, it is not disrespectful, to say so.

Mr. WILLIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Ohio?

Mr. NORRIS. I yield.

Mr. WILLIS. I should like to have the Senator's opinion upon this point; without going into the question as to whether or not the decision of the lower court is erroneous, does he not think it is desirable to have a matter finally settled by the highest court of the land, and may there not be some who are willing to vote for this resolution simply in order to have the matter finally settled, but who yet do not believe that the decision of the lower court was erroneous?

Mr. NORRIS. If the decision is not erroneous, there is no use and there is no sense in trying to change it. If we have received a judgment that is not wrong, and which we do not believe to be wrong, let us like men abide by it.

Mr. McKELLAR. If there are Senators who believe the decision is not erroneous, they ought to vote that way. It is up to them.

Mr. WILLIS. Mr. President, just a word in response to the Senator from Tennessee. I think that observation is not correct or fair. So far as I am concerned, I believe the decision of the lower court is right, but I do not desire that the matter shall be left there. I want the matter decided finally by the highest court in the land, and it is not fair to say that if I think the decision of the lower court is correct, I should therefore vote against this resolution. That is not logical at all.

Mr. NORRIS. That is for the Senator from Ohio to decide.

Mr. REED of Missouri. Mr. President——

Mr. NORRIS. I yield.

Mr. REED of Missouri. If the Senator from Ohio does not believe that decision to be wrong, he has no business in joining in an appeal. The first thing you have to do to get an appeal is to swear that you are aggrieved by the decision of the lower court. There is no disrespect in a recital by the Senate that we regard this decision as erroneous. Every litigant in court who preserves a right on appeal must do so by objecting to the decision, by saving his exception, and by alleging not only in his motion for a new trial but in his assignment of error that the trial court committed error in certain specified particulars. If the Senator from Ohio thinks that neither the Senate of the United States nor any other legislative body has the right to summon a witness, and believes this decision to be a correct decision, he has no right to join in this appeal.

Mr. NORRIS. In discussing the question here involved we hear such things said as that we ought not to be discourteous to the court, we ought to have respect for the court, we ought not to criticize the court. And yet every case that has ever been decided by the Supreme Court of the United States that came up from a lower court, and that means practically every one, has been there because somebody has felt aggrieved by some court's action, somebody has complained, somebody has claimed in argument that the lower court was wrong, and no court of any enlightened country has felt aggrieved on account of it. It is no disrespect to this court to say that we think its decision is wrong.

There seems to be some dispute as to what it has decided, but the effect of it has been at least that the committee of the Senate making the investigation can not compel the attendance of a witness to testify before that committee. Once establish that fact by final judicial decision and we might as well close the doors of the Senate and the House, and every other legislative assembly in the land might as well do the same thing. We would be at the mercy then of any department of the Government, particularly the Department of Justice. Then we could be met by injunction whenever we undertook to uncover anything anywhere in any department and thrust aside.

The result of it goes almost beyond the imagination. It would mean the destruction of our form of government unless we changed the Constitution, if that be held to be the law. We have involved in the proposition the very existence of the legislative branch of our Government.

Now, just a word not bearing perhaps particularly on the pending question. When the resolution providing for the appointment or election of the committee was before the Senate there was considerable criticism on the part of some who, it seemed to me, were extraordinarily zealous in protecting the Attorney General. I said on that occasion that no matter what might be the personnel of the committee the hearings would be public, the Attorney General could be represented by counsel, he would have compulsory attendance of witnesses, and he would be allowed to cross-examine all witnesses summoned by the committee.

I said if that is done it is immaterial what the personnel of the committee may be. The country is going to form its judgment. The real judgment is going to be formed by the people of the country who hear the evidence. If the committee is unfair, if the committee takes any procedure that curtails the rights of the Attorney General to have a fair investigation, to cross-examine witnesses, to testify himself, and bring others to testify on his behalf, the country will know it. They will render judgment regardless of what may be the opinion or the personnel of the committee.

The investigation has gone on, not finished, it is true, and startling evidence has developed. The Attorney General has been represented every day by two attorneys, ex-Senator Chamberlain and ex-Congressman Howland, both able and eminent attorneys. They have cross-examined every witness that they wanted to cross-examine. They have protected every right that the Attorney General could possibly have. The hearings have been in the open before the American people. But now it is said by some, "Why, some members of the committee have not been fair." As far as results are concerned it is immaterial what they think. He has not been deprived of the privilege of calling a single witness. He has not been deprived of the right to examine and cross-examine every witness that appeared. The evidence was all taken in the face of the American people, and all preserved and printed. What difference does it make even if for argument's sake we admit that the committee has been unfair; that some members have been too zealous; that they have been prosecutors as I have heard claimed? No right of the Attorney General has been taken away. No evidence has been covered up, but on

the other hand the most startling conditions have been shown to exist around the Attorney General.

Mr. REED of Missouri. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Missouri?

Mr. NORRIS. I yield.

Mr. REED of Missouri. The Senator has referred to criticism of the committee on the ground that it has taken a trend toward prosecution. The Senator has been a judge of a court. Did he ever know the attorney for a guilty man brought to the bar of justice who did not spend most of the time abusing the prosecuting attorney and the officers of the law?

Mr. NORRIS. As a rule, that is their usual pastime, it is true.

I do not agree with the charge that the committee has been unjust and unfair, but I am not offering my testimony on it. I simply want to say that, as far as I have been able to see, they have done their duty and done it fearlessly. They started out while Daugherty was in office, surrounded by a horde of detectives, trailing them every step they took, interfering with all the witnesses. Instead of the Department of Justice helping to ferret out crime, it has had its hundreds of secret detectives trying to forestall anything that the committee might do.

After Daugherty had professed his eagerness to go on the witness stand, after he had on several occasions given publicity to statements showing how he was going to make everything plain and clear, the time came when the committee courteously invited him to come before them and take the stand. The opportunity that he had been longing to get he declines to accept. He declines to go any further. He gives as his reason that the committee has no legal authority. If that authority has been denied, it has been denied because of the action that he has taken—or, at least, the action of his own brother—to deny the authority of the committee. It is immaterial, in my judgment, as far as Daugherty is concerned, whether the committee has any authority or whether it has unlimited authority. If he is innocent, if he is now anxious to do what he has always said he was going to embrace the first opportunity to do, now is his time. Even though the committee has had no authority, when he refuses to go further, when he refuses to come before the committee, in my judgment he enters a plea of guilty to all of the charges that have been made upon which evidence has been produced.

Until the investigation reached the stage where he refused to come to the committee, I withheld comment so far as I was concerned. However dark and black the evidence might look, it seemed to me that in trying a case or lawsuit or investigation of that kind we ought to withhold our judgment, no matter how bad it might look, until those charged had had a full and fair opportunity to offer their evidence and explain. When the time came and he refused to go on and refused to explain, then he has in effect acknowledged his guilt, and that is the reason why it seems to me now, when the investigation has reached that stage, that it is proper for anybody on the committee or off of it to express freely their opinion, and for the Senate to express its opinion freely, because, as far as he is concerned, he has admitted by his refusal to proceed a condition of chicanery and of disgraceful conduct and of corruption surrounding that office while he held it that must bring the blush of shame to every honest American citizen.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

Mr. McKELLAR. Let us have the yeas and nays.

The yeas and nays were ordered, and the principal clerk proceeded to call the roll.

Mr. LODGE (when his name was called). I transfer my pair with the senior Senator from Alabama [Mr. UNDERWOOD] to the senior Senator from Illinois [Mr. McCORMICK] and will vote. I vote "yea."

Mr. PHIPPS (when his name was called). I transfer my pair with the junior Senator from South Carolina [Mr. DIAL] to the senior Senator from Vermont [Mr. GREENE] and will vote. I vote "yea."

Mr. TRAMMELL (when his name was called.) I transfer my pair from the senior Senator from Rhode Island [Mr. COLT] to the junior Senator from Indiana [Mr. RALSTON] and vote "nay."

The roll call was concluded.

Mr. BAYARD (after having voted in the negative). I have a general pair with the junior Senator from Pennsylvania [Mr. REED]. I had supposed he was present, but I find he is absent. I therefore transfer my pair to the junior Senator from Montana [Mr. WHEELER] and will allow my vote to stand.

Mr. ERNST (after having voted in the affirmative). I transfer my general pair with the senior Senator from Kentucky [Mr. STANLEY] to the junior Senator from California [Mr. SHORTRIDGE], and will allow my vote to stand.

Mr. SHEPPARD. The junior Senator from Texas [Mr. MAYFIELD] is unavoidably absent. If he were present, he would vote "nay."

Mr. ROBINSON. The Senator from Georgia [Mr. GEORGE] is necessarily absent. If present, he would vote "nay."

Mr. JONES of New Mexico. I have a general pair with the Senator from Maine [Mr. FERNALD]. I transfer that to the Senator from Georgia [Mr. GEORGE], and vote "nay."

Mr. GLASS. I have a general pair with the Senator from Connecticut [Mr. McLEAN]. I transfer that pair to the Senator from Texas [Mr. MAYFIELD], and vote "nay."

The result was announced—yeas 29, nays 44, as follows:

YEAS—29

| | | | |
|---|---|---|---|
| Ball | Edge | Lodge | Sterling |
| Brandegee | Ernst | McKinley | Wadsworth |
| Bursum | Fess | McNary | Warren |
| Cameron | Gooding | Moses | Watson |

| | | | |
|---|---|---|---|
| Borah | Fernald | Norbeck | Smoot |
| Bruce | George | Owen | Stanley |
| Colt | Greene | Pepper | Underwood |
| Couzens | McCormick | Ralston | Weller |
| Dial | McLean | Reed, Pa. | Wheeler |
| Elkins | Mayfield | Shortridge | |

So the amendment of Mr. WILLIS to the preamble was rejected.

The PRESIDENT pro tempore. The question now is upon agreeing to the preamble, which, without objection, will be agreed to.

INDEPENDENT OFFICES APPROPRIATIONS—CONFERENCE REPORT

Mr. WARREN. I present a conference report on the independent offices appropriation bill.

The PRESIDENT pro tempore. The conference report will be read.

The conference report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8233) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 5, 6, 7, and 15.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 8, 9, 12, and 14, and agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "No part of the moneys appropriated or made available by this act for the United States Shipping Board or the United States Shipping Board Emergency Fleet Corporation shall, unless the President shall otherwise direct, be used or expended for the repair or reconditioning of any vessel owned or controlled by the Government, if the expense of such repair or reconditioning is in excess of $50,000, until a reasonable opportunity has been given to the available Government navy yards to estimate upon the cost of such repair or reconditioning if performed by such navy yards within the limit of time within which the work is to be done: *Provided*, That this limitation shall only apply to vessels while in the harbors of the United States, and all expenditures in connection with such work are to be considered in estimating the cost"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the follow-

ing: "$10,000 except the following: One at not to exceed $25,000, and five at not to exceed $18,000 each"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 4 and 10.

F. E. WARREN,
W. L. JONES,
LEE S. OVERMAN,
*Managers on the part of the Senate.*
WILL R. WOOD,
J. W. SUMMERS,
JOHN N. SANDLIN,
*Managers on the part of the House.*

Mr. ROBINSON. Mr. President, I ask the Senator from Wyoming what are the outstanding amendments about which agreement has not been reached?

Mr. WARREN. There are two such amendments. As the report was previously submitted two amendments were not agreed to on the House side. The matter came back to the Senate and was again referred to the committee of conference. This is a second report in which the two items have been changed. One item is merely nominal, while the other is quite important. One is in reference to the repair of ships and the other to the compensation of attorneys for the Emergency Fleet Corporation. The bill in the first place fixed $11,000 as the maximum salary for the attorneys, with the exception of three who might receive $18,000. Under the change which has been made $10,000 is fixed as the maximum compensation for attorneys, except two, who may receive $18,000. I move the adoption of the report so that it may go to the House for action by that body.

Mr. McKELLAR. What was done with the provision as to work being performed in navy yards?

Mr. WARREN. The conferees changed the $100,000 limit to $50,000. There are one or two other minor changes.

Mr. McKELLAR. The conferees have agreed upon that?

Mr. WARREN. Yes.

Mr. COPELAND. Mr. President, I am sorry I was out of the Chamber when the conference report was presented. As I understand, the change which has been made provides that the amount shall be $50,000 instead of $100,000.

Mr. WARREN. That is the principal change.

Mr. COPELAND. What other changes are there?

Mr. WARREN. They are not important; a few words have been changed to perfect the provision, but those changes I do not think make any difference, perhaps, so far as the objection the Senator has is concerned.

Mr. COPELAND. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. COPELAND. Under the rules does not the report have to go over for a day?

The PRESIDENT pro tempore. The Chair is of the opinion that it does not have to lie over for a day.

Mr. WARREN. Mr. President, the motion is to agree to the report, on which, of course, the Senator may have the yeas and nays, if he so desires.

The PRESIDENT pro tempore. If the Senator from New York will examine Rule XXVII, he will find that it discloses what must be done upon the presentation of a conference report.

Mr. COPELAND. Mr. President, of course I am dissatisfied with the report, because it does not give an opportunity to the navy yards to bid upon work unless the amount is in excess of $50,000, and then only if the President shall so direct. Furthermore, there is no provision, in case the bid of a navy yard should be the low bid, that the contract would be let to the navy yard.

The PRESIDENT pro tempore. May the Chair relieve the situation a little by saying that the conference report itself is not before the Senate for consideration? When the question of the consideration of the conference report is raised, then it must be decided by the Senate.

Mr. WARREN. I have moved that the Senate agree to the report.

Mr. ROBINSON. The Senator from Wyoming moved to agree to the conference report.

The PRESIDENT pro tempore. The rule makes it the duty of the Chair to put the question of the consideration of a conference report to the Senate, and that is to be determined without debate. If the Senate shall vote to consider the conference report, then it will be before the Senate.

Mr. McKELLAR. Mr. President, may I ask the Senator a question?

Mr. WARREN. Certainly.

Mr. McKELLAR. Does the agreement as reported by the conferees in reference to work done by navy yards embody the provision as adopted by either the House or the Senate, or is it a new provision?

Mr. WARREN. It is made up of the two. It is very much like the present law, except that it is more liberal, in so far as the work that may be done at navy yards is concerned.

Mr. MOSES. Mr. President, may we have the regular order?

The PRESIDENT pro tempore. The regular order is, will the Senate proceed to the consideration of the conference report? [Putting the question.] The ayes have it, and the conference report is now before the Senate. The question is upon agreeing to the report.

Mr. BURSUM. I desire to inquire what is the status of the unfinished business.

The PRESIDENT pro tempore. The status is the same. The question is on agreeing to the conference report.

The report was agreed to.

### DEFICIENCY APPROPRIATIONS

Mr. WARREN, from the Committee on Appropriations, to which was referred the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, reported it with amendments.

### ESTATE OF CHARLES L. FREER

Mr. WARREN, from the Committee on Appropriations, to which was referred the bill (S. 3368) to cancel the additional taxes together with all penalties and other charges assessed against the estate of Charles L. Freer, deceased, and to remit any further taxes, penalties, or charges which may hereafter be found due from the said estate, reported it without amendment and submitted a report (No. 772) thereon.

### POSTMASTERS AND POSTAL EMPLOYEES—CONFERENCE REPORT

Mr. EDGE. Mr. President, I now ask unanimous consent that the Senate proceed to the conference report on Senate bill 1898, being the postal salary readjustment bill embodying also the corrupt practices act.

The PRESIDENT pro tempore. Is there objection?

Mr. BURSUM. Mr. President, I object.

Mr. EDGE. Then I move——

Mr. BURSUM. Mr. President——

Mr. EDGE. I think I still have the floor, Mr. President. I have not given up the floor.

Mr. BURSUM. I ask that the regular order may be proceeded with.

The PRESIDENT pro tempore. The Chair desires to ask the Senator from New Mexico if he is preferring a request?

Mr. BURSUM. I objected to the request of the Senator from New Jersey [Mr. EDGE] for unanimous consent.

The PRESIDENT pro tempore. That was the end of the request for unanimous consent.

Mr. EDGE. Now, Mr. President, I move that the Senate proceed to the conference report on Senate bill 1898.

Mr. HEFLIN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Alabama?

Mr. EDGE. I yield.

Mr. HEFLIN. I was going to ask the Senator from New Mexico [Mr. BURSUM] to withdraw his objection. It is very important that the conference report may be adopted and go to the House of Representatives. I think it would take but a few moments to get the conference report through, if the Senator from New Jersey can have the right of way.

Mr. BURSUM. If there is not likely to be debate I will not object, but I understood that the report would occasion considerable debate. If, however, there will not be much time taken on it——

Mr. HEFLIN. I do not think it will take up very much time.

Mr. BURSUM. Then I have no objection. I will agree that the unfinished business may be temporarily laid aside with the understanding that there will not be much debate on the conference report. I withdraw my objection to the consideration of the conference report.

Mr. EDGE. I thank the Senator from New Mexico, and I hope that the conference report may be speedily disposed of.

The PRESIDENT pro tempore. The Chair hears no objection to the unanimous consent asked for by the Senator from New Jersey.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 1898) reclassifying the salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes.

Mr. EDGE. I move that the Senate agree to the conference report.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

Mr. ADAMS. Mr. President, I wish to make an inquiry of the Senator from New Jersey in reference to subparagraph (c), which appears on page 15 of the report. My inquiry is as to why the particular definition of a "political committee"? Apparently the provision is so framed as only to refer to committees which function in more than one State or which are subdivisions of a larger committee. It seems to me that the bill, should it become a law, could be easily evaded by reason of that definition.

Mr. EDGE. Mr. President, in answer to the Senator from Colorado I will say that the definition of "political committee" in paragraph C has, in my opinion, been amplified for the very wise purpose of endeavoring to comprehend all political committees, including subcommittees of national committees, political or otherwise, which might take part or become interested in a political campaign. I can not see any possible objection to having the subdivisions of political committees so clearly defined that the act would comprehend any possible subcommittee spending money, securing contributions, or interesting itself financially in a campaign.

Mr. ADAMS. My only inquiry was whether the language was broad enough, not whether it was too narrow. I wondered if it did not open the way by which some campaign collection committees might escape.

Mr. EDGE. I will say to the Senator, as I have already indicated, that the language of the section has been amplified by the conferees in order to make it broader than it was originally.

Mr. FESS. Mr. President, will the Senator from New Jersey yield there?

Mr. EDGE. I yield to the Senator from Ohio.

Mr. FESS. The present law is easily evaded by organizations that are not known as political committees—for instance, by industrial committees; and collections may be made in a way that the law does not cover. The provision now under consideration, however, includes all of those, for the term "political committee" comprehends any kind of a committee collecting money for election purposes.

Mr. EDGE. The intent is, as the Senator from Ohio very properly has said, to comprehend the activities of any organization interested in a political campaign.

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Tennessee?

Mr. McKELLAR. I ask for the floor in my own right. The Senator from New Jersey has yielded the floor, I understand.

Mr. EDGE. I will yield to the Senator from Tennessee.

Mr. McKELLAR. I thought the Senator had yielded the floor.

Mr. EDGE. No; Mr. President.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Massachusetts?

Mr. EDGE. I yield to the Senator from Massachusetts.

Mr. WALSH of Massachusetts. Mr. President, I should like to ask the Senator if there is any provision in this amendment, which seeks to regulate corrupt practices in elections, limiting the amount of money which may be raised and expended in an election?

Mr. EDGE. Mr. President, the provision as found in the conference report is patterned very much after the existing law so far as the limit being $10,000 for a Senator and, as I recall, $2,500 for a Member of the other House. However, the present law, which has been more or less in a position of uncertainty on account of various decisions of the Supreme Court, has been strengthened to take care of the weaknesses disclosed by those decisions. Further than that——

Mr. WALSH of Massachusetts. The Senator does not answer my question. It may be answered "yes" or "no." There is a limit in this amendment to the amount of money that a candidate may spend; is that not the fact?

Mr. EDGE. Yes.

Mr. WALSH of Massachusetts. A candidate for Senator himself can spend but $10,000, but his political committee and the political committee of his party can spend any amount of money.

Mr. EDGE. That is not entirely correct.

Mr. WALSH of Massachusetts. Will the Senator state in what particular it is not correct?

Mr. EDGE. The act plainly stipulates that wherever a State law exists—and they exist in most of the States of the Union—the State law, of course, will be in effect.

Mr. WALSH of Massachusetts. I doubt the accuracy of that statement. But if it is a good thing for the States to limit the amount of money that may be expended in political campaigns, why should not the National Government do so? As I read the whole amendment, I believe it has much merit; I think it is an improvement over the present law. There are two serious evils that lead to corrupt practices in elections; one is the secrecy with which money is raised and expended, and the second is the unlimited amount that it is possible to raise and spend to control elections. I think this amendment has merit in that it does provide for publicity of the amount of money collected and expended and requires public returns from time to time; but the greatest evil of all, namely, that one political committee can spend unlimited amounts and another can spend but $5,000, is still untouched by this bill. It seems to me that is the end we ought to strive to reach, to limit the amount of money that may be expended by a political committee. To limit the amount a candidate may spend is not of special consequence.

For a poor man to spend $10,000 is impossible, but for a very wealthy man to spend $10,000 is inconsequential, when his own personal committee and the committee of the political party of which he is a member can spend any amount of money without violating the law.

I think I ought to say to the Senator that I hope the amendment to control corrupt practices in elections will be accepted, and that the conference report will be agreed to; but I want to call attention to the fact that we have not yet obtained a corrupt practices act that really reaches the greatest of all evils in our elections, of unlimited amounts of money being spent to promote the election of individuals. Of course, it would have been much better to have this subject dealt with in a separate bill in the earlier days of the session rather than making it a hastily considered rider to another subject matter.

Mr. EDGE. Mr. President, I am very glad that the Senator has admitted that the work of the conferees, which has been limited to a very few hours, and with a bill with which they were totally unacquainted, has at least contributed somewhat to improve the present corrupt practices laws.

Mr. WALSH of Massachusetts. There is no doubt about that.

Mr. EDGE. I appreciate that the bill is perhaps not all that it might be, but the improvements in the law are very decided and direct. For instance, it provides that there shall be publicity of contributions, as I recall, five or six times a year—every quarter, and before and after an election. Under existing legislation that is not required. In other words, we have improved the situation as best we could with a conference report. It is absolutely necessary, if we want any corrupt-practices legislation on the statute books as the result of this session, to adopt this report.

Mr. WALSH of Massachusetts. Mr. President, I want to call attention again to the fact that I think the amendment of the Senator from Idaho that has been taken out in conference is broader and a better amendment on the question of publicity, but this conference amendment is better than the present law in dealing with the problem of proper publicity for amounts received and amounts expended; but there is still the very serious evil that one political candidate may have a million dollars behind him to help elect him and another candidate may have only a few thousand dollars behind him. In other words, there is no limit to the amount that can be spent in advertising, in circularizing, in canvassing and soliciting, in carrying voters to the polls, and in many other practices by which elections are influenced.

Mr. DILL. Mr. President, the Senator spoke of this being an improvement over the present law. As I understand, there is no law on this subject at the present time with relation to Congressmen and Senators; is there?

Mr. EDGE. It is under more or less legal doubt, I believe.

Mr. DILL. I mean as a result of the decision of the Supreme Court.

Mr. EDGE. I understand that it has been declared unconstitutional so far as it relates to primary elections.

Mr. DILL. Does this amendment—I have not had time to read it—exclude, under expenditures, the same things that are excluded under the law that previously existed before the Supreme Court decision?

Mr. EDGE. According to my recollection, it does. I have not had time to compare it with the old law.

Mr. DILL. The old law limited to $10,000 the amount that a Senator might spend.

Mr. EDGE. Ten thousand dollars.

Mr. WALSH of Massachusetts. That he himself can spend.

Mr. EDGE. And it permitted him to spend money for certain purposes—half a dozen in number, as I recall—without their being included in the $10,000.

Mr. DILL. And this makes a limit of $25,000?

Mr. EDGE. Oh, no; this retains the limit of $10,000 for Senators, and $2,500 for Members of the lower House.

Mr. McKELLAR. It is $25,000 for the big States.

Mr. EDGE. It has a new provision, I might say, that has been frequently discussed when such legislation was before the Senate in the past, that in States where the population permitted, computing the expenditure at 3 cents, I think, per voter, they could spend a maximum of $25,000 if the State laws did not interfere and the population was great enough to so permit.

Mr. WALSH of Massachusetts. The limit is only on what a candidate himself can contribute and spend on his own election. There is no limit upon the amount that may be raised by committees to elect him.

Mr. DILL. There is no limit to what other people may spend in his behalf.

Mr. WALSH of Massachusetts. He himself can give only $10,000 to his committee. They can spend $10,000,000.

Mr. EDGE. Mr. President, while technically the Senator from Massachusetts is correct, I am quite sure, as was the design of the Senator from Idaho with his amendment, that the publicity of contributors four times a year—every quarter—will have a tendency to limit contributions. The object of the amendment of the Senator from Idaho to publish these contributions every 10 days was to accomplish that purpose. If the contributions are published quarterly, and before the election, it must have that tendency. Otherwise, of course, the aim of either amendment in this particular fails.

Mr. McKELLAR. Mr. President, just a word or two about this bill before it is passed.

So far as the readjustment of postal salaries is concerned, there is no difference of opinion on the part of anybody. I believe all concede that it should pass; but about the Federal corrupt practices act there was a difference in the conference committee, and there is a difference between the two Houses.

Personally, I want to say that neither of the proposed plans met my approval, for the reason that neither the Borah plan nor the House plan fixed a limit upon the amount that a party could spend. It is unlimited under this plan. It was unlimited under the Borah plan. The Borah plan, as it seemed to me, provided for a little better publicity than this plan does; and I think I violate no confidence in saying that I very earnestly sought to have the conferees report both plans. I did not think there was any antagonism between the two plans, and I thought both plans might well have been adopted.

We ought to do something to limit campaign expenditures in this country. We ought to do something to have a proper corrupt practices act. This is the very best that we could do at this particular time of the session, and therefore I voted to report this as being the very best we could get. If I had to choose, as I did have to choose, between the Borah plan and this plan, I should choose the Borah plan first; but I believe that this plan is a considerable step in the right direction, and it is all that we could get at this time, and I think it ought to be adopted by the Senate.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. EDGE. Is it not correct, likewise, without violating any confidence, to say that the House conferees were instructed by special resolution, and that it was absolutely impossible to do anything else than what we did?

Mr. McKELLAR. The Senator is exactly right. It was absolutely impossible to do anything else than what we did do, namely, to report the House bill.

While this bill does not limit the amount that a political committee can spend, it does provide for a fairly good publicity; and if it is enforced, as I believe it will be enforced, I believe it will do a great deal of good.

I regret very much that we did not put some limitation upon campaign expenditures. I said the other day, and I say again, that four years ago, when our Republican friends spent nearly $10,000,000 in their campaign, and reported that fact to the Secretary of the Senate and the Clerk of the House, it was too much; and I believed that when the Democrats spent some two and a half million dollars that was too much. It is not necessary that these enormous expenditures should be made in campaigns. There is but one purpose in it, and that is to debauch the electorate, and the Congress ought to put a limitation upon it. Some time ago I prepared a bill for the purpose of putting a limitation upon it, but my bill has not been reported, and it was impossible to get it before the Senate at this session.

I regret it very much. I think it is a better bill, perhaps, than either one of the plans that have been suggested; but so anxious am I to put something on the statute books that will in some way limit the extravagant and excessive and sometimes, I have no doubt, illegal use of money in elections, that I accepted this plan rather than not have any plan at all.

In conclusion, I will say that I hope the Senate will adopt this plan as being the best that we can get at this time.

Mr. BORAH. Mr. President, I am in accord with the suggestion of the Senator from Tennessee that the Senate, under the circumstances, ought to adopt this conference report, including the provision with reference to campaign funds.

I think the amendment which was incorporated in the report in lieu of the amendment which I offered is in many respects a good one. Nothing could be gained at this time by pointing out what I think are its defects, but it has sufficient virtues to entitle it to adoption. It is a step in the right direction, and a very substantial step. Evidently the Member who prepared the amendment, Mr. CABLE, of the House, has spent considerable time upon the subject, and with good results, and I am, therefore, heartily in favor of this measure.

Mr. EDGE. Mr. President, will the Senator yield?

Mr. BORAH. Yes.

Mr. EDGE. The difficulty brought out by the Senator from Massachusetts [Mr. WALSH] as to the pending legislation not limiting the contributions would not have been remedied by the amendment of the Senator from Idaho himself, except through the publicity feature. Is not that correct?

Mr. BORAH. Yes; my opinion is that ultimately we will solve this question by securing publicity with reference to campaign funds. I do not believe it is practicable in our country, owing to the way the population is distributed to specify a particular amount of money which may be expended by the candidate. Neither is it practicable, in my judgment, to specify a particular sum which a committee may expend. If we can secure the kind of publicity which accompanies the progress of the campaign, it is my opinion that that will be the only real solution of the utilization of money in the campaign.

I think there are some advantages which my amendment has which are not incorporated in this one. But, on the other hand, there are some things here which I did not cover; but I am in favor of the adoption of the report of the conference committee so far as that feature of it is concerned.

The PRESIDENT pro tempore. The question is upon agreeing to the conference report.

The report was agreed to.

### EXPENDITURES IN THE PRESIDENTIAL CAMPAIGN

Mr. MOSES. Mr. President, out of order, I ask unanimous consent to present a report from the Committee on Printing, and I ask further unanimous consent for its immediate consideration. If it takes longer than 10 minutes of 6, I will agree to withdraw it.

Mr. LA FOLLETTE. Mr. President——

Mr. MOSES. I yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. I ask the Senator to yield to me to introduce a resolution, which I send to the desk and ask to have read.

Mr. MOSES. I yield to the Senator.

The PRESIDENT pro tempore. Without objection, the resolution will be received and read.

The resolution (S. Res. 248) was read, as follows:

*Resolved*, That a special committee of five Senators be elected forthwith to investigate and report to the Senate on December 5, 1924, the campaign expenditures made by or on behalf of, or in support of, or in opposition to, any and all candidates for President and Vice President and presidential electors; the names of the persons, firms, or corporations contributing to the said candidate or candidates or their party committee or committees, or any other agency, the amounts contributed, pledged, loaned, or otherwise made available for use, the method of expenditure of said sums, and all the facts in relation thereto, not only as to the subscriptions of money and the expenditures thereof but as to the use of any other means of influence, including the promise of patronage, and all other facts in

relation thereto that would not only be of public interest but would aid the Congress in any necessary remedial legislation.

That said committee is hereby empowered to sit and act during the adjournment of Congress at such time and place as it may deem necessary; to require by subpœna, or otherwise, the attendance of witnesses, the production of books, papers, and documents; to employ stenographers at a cost of not exceeding 25 cents per hundred words. The chairman of the committee, or any member thereof, may administer oaths to witnesses. Subpœnas for witnesses shall be issued under the signature of the chairman of the committee. Every person who, having been summoned as a witness by authority of said committee, willfully makes default, or who, having appeared, refuses to answer any question pertinent to the investigation heretofore authorized, shall be held to the penalties provided by section 102 of the Revised Statutes of the United States.

The expenses thereof shall be paid from the contingent fund of the Senate on vouchers ordered by said committee, signed by the chairman thereof and approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. LA FOLLETTE. I ask that the resolution lie on the table, to be called up later.

Mr. ROBINSON. I ask unanimous consent that the resolution just read be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. MOSES. I yield to the Senator from Arkansas for the purpose of making that request.

Mr. ROBINSON. I thank the Senator.

The PRESIDENT pro tempore. It will be so referred.

CLAIMS OF CHOCTAW AND CHICKASAW INDIANS

Mr. HARRELD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Hampshire yield to the Senator from Oklahoma?

Mr. MOSES. I yield to the Senator from Oklahoma on the express condition that any time he occupies may not be taken out of my elapsed time, as I have been yielded to by the Senator from New Mexico [Mr. BURSUM].

Mr. HARRELD. I desire to submit a concurrent resolution (S. Con. Res. 21), which I ask to have read. I also ask for its immediate consideration.

The PRESIDENT pro tempore. The Secretary will read the resolution offered by the Senator from Oklahoma, for information.

The reading clerk read the concurrent resolution, as follows:

*Resolved by the Senate (the House of Representatives concurring)*, That the President of the United States be requested to return to the House of Representatives the enrolled bill (H. R. 5325) conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes.

The PRESIDENT pro tempore. The Senator from Oklahoma asks unanimous consent for the immediate consideration of the bill just read. Is there objection?

The concurrent resolution was considered by unanimous consent and agreed to.

LANDS IN PYRAMID LAKE INDIAN RESERVATION, NEV.

Mr. PITTMAN. Mr. President——

Mr. MOSES. I yield to the Senator from Nevada on the same conditions under which I yielded to the Senator from Oklahoma.

Mr. PITTMAN. I ask that the Chair lay before the Senate the amendment of the House to Senate bill 1309.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1309) for the relief of settlers and town-site occupants of certain lands in the Pyramid Lake Indian Reservation, Nev., which was on page 2, lines 10 and 11, to strike out "used by the Secretary of the Interior" and to insert in lieu thereof "subject to appropriation by Congress."

Mr. PITTMAN. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

GOVERNMENT PRINTING OFFICE EMPLOYEES

Mr. MOSES. Now I ask further unanimous consent for the immediate consideration of the bill (H. R. 7996) to regulate and fix rates of wages for employees of the Government Printing Office, which I have been permitted to report under unanimous consent.

I desire to state to the Senate that this is Senate action upon a bill passed by the House terminating a controversy which has existed for six years to my personal knowledge with reference to the conduct of the Government Printing Office. In its terms it carries an increase of salaries, due to the reclassification act, in part, which does not apply to the employees of the Government Printing Office. But this bill is a legislative anomaly, in this, that whereas it carries an increase in pay in the Government Printing Office amounting, net, to 5 cents an hour, it does not cost the Government in the end anything, because under the statute the rates charged by the Government Printing Office for public documents and all other classes of printed matter which under the statute may be sold are regulated by the overhead cost of running the establishment, and a Senate amendment is here provided extending the time before which the act shall not take effect to the 1st of July, so that the Government Printer can readjust the schedule of prices for the Government Printing Office so as to absorb almost completely the slight increase which this bill carries.

Mr. McKELLAR. Mr. President——

Mr. MOSES. I yield.

Mr. McKELLAR. About what would the immediate increase in salaries be?

Mr. MOSES. The immediate increase in salaries under the procedure which I have outlined is estimated by the Public Printer to be something like $100,000, and probably will be much less, because, if I may advert to a subject which is never discussed on the floor, namely, politics, there will be a great amount of political printing, probably, from the Government Printing Office in the next six months which will completely absorb the increases.

Mr. McKELLAR. The Senator speaks by the card, does he?

Mr. MOSES. Of course, I realize that in dragging politics on the floor I am following the constant practice of the Senate, and I beg the pardon of the Senator from Tennessee for doing it.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Hampshire?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. MOSES. There are some amendments proposed by the Committee on Printing.

The PRESIDENT pro tempore. The Secretary will state the amendments.

The amendments were, on page 1, line 3, after the word "that" to insert "on and after July 1, 1924"; in line 4, after the word "wages" to insert "and salaries"; on page 2, line 2, after the words "and after" to strike out "the passage of this act," and to insert "July 1, 1924"; on page 2, line 15, after the word "wages" to insert a comma and the word "salaries"; in line 18, after the word "wages" to insert a comma and the word "salaries"; in line 20, after the word "further" to strike out, "That no employee of the Government Printing Office whose wage or compensation is increased as provided for herein shall, on and after said increase becomes effective, receive any additional compensation provided for in the act approved March 4, 1923, known as the $240 bonus act," and to insert "That employees and officers of the Government Printing Office shall continue to be paid at the existing rates of wages, salaries, and compensation (including night rate) as provided by law until such time as their wages, salaries, and compensation shall be determined as hereinbefore provided"; and on page 3, at the beginning of line 6, to change the section number from 3 to 2, so as to make the bill read:

*Be it enacted, etc.*, That on and after July 1, 1924, the Public Printer may employ, at such rates of wages and salaries, including compensation for night and overtime work, as he may deem for the interest of the Government and just to the persons employed, except as otherwise provided herein, such journeymen, apprentices, laborers, and other persons as may be necessary for the work of the Government Printing Office; but he shall not at any time employ more persons than the necessities of the public work may require or more than 200 apprentices at any one time: *Provided*, That on and after July 1, 1924, the minimum pay of all journeymen printers, pressmen, and bookbinders employed in the Government Printing Office shall be at the rate of 90 cents an hour for the time actually employed: *Provided further*, That except as hereinbefore provided, the rates of wages, including compensation for night and overtime work, for more than ten employees of the same occupation shall be determined by a conference between the Public Printer and a committee selected by the trades affected, and the rates and compensation so agreed upon shall become effective upon approval by the Joint Committee on Printing; if the Public Printer and the committee representing any trade fail to agree as to wages, salaries, and compensation, either party is hereby granted the right of appeal to the Joint Committee on Printing, and the decision of said committee shall be final; the wages, salaries, and compensation determined as provided herein shall not be subject to change oftener than once a year thereafter: *Provided further*, That employees and officers of the Government Printing Office shall continue

to be paid at the existing rates of wages, salaries, and compensation (including night rate) as provided by law until such time as their wages, salaries, and compensation shall be determined as hereinbefore provided.

SEC. 2. All acts or parts of acts in conflict with the provisions of this act are hereby repealed.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read "A bill to regulate and fix rates of pay for employees and officers of the Government Printing Office."

CLASSIFICATION OF GOVERNMENT EMPLOYEES

Mr. STERLING. Mr. President, from the Committee on Civil Service I report the joint resolution (S. J. Res. 146) to amend section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and the field service," introduced this morning, and ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

*Resolved, etc.*, That paragraph 5, under the heading "Custodial service," of section 13 of the act entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," be amended by striking out the sums $780 and $840 from the rates of compensation fixed for grade 2 in said section, and that paragraph 7, under said heading in said section 13, be amended by striking out the sums $900 and $960 as rates of compensation fixed for grade 3 in said service; said amendments being made necessary for purpose of correcting a clerical error in preparing the bill for the signature of the President, the bill as it passed both Houses and agreed to in conference not having included the sums proposed to be stricken out.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

EXTENSION OF AIRPLANE MAIL SERVICE TO BOSTON, MASS.

Mr. STERLING. Mr. President, from the Committee on Post Offices and Post Roads I report favorably, with an amendment, the bill (S. 3319) authorizing the extension and operation of the transcontinental airplane mail service to Boston, Mass., and I call the matter to the attention of the Senator from Massachusetts.

Mr. LODGE. I ask unanimous consent for the immediate consideraton of this bill.

Mr. MOSES. Let the bill be read.

The READING CLERK. The committee proposes to strike out, on line 4, the words "and directed" after the word "authorized," so as to make the bill read:

*Be it enacted, etc.*, That the Postmaster General is hereby authorized to extend and operate the transcontinental airplane mail service to Boston, Mass.: *Provided*, That the appropriations heretofore or hereafter made for the operation and maintenance of the transcontinental airplane mail service shall be sufficient for such purpose.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was agreed to.

Mr. MOSES. Mr. President, I move to amend by inserting after the words "to Boston, Mass.," the words "and to Manchester, N. H."

The PRESIDENT pro tempore. The question is upon agreeing to the amendment proposed by the Senator from New Hampshire.

Mr. MOSES. I ask for a division.

Mr. OVERMAN. Mr. President, is there anything now before the Senate except the unfinished business?

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from New Hampshire.

Mr. OVERMAN. The Senator surely is not serious.

Mr. MOSES. I am just as serious as any Senator can be. We are all besieged by requests to make the route of this transcontinental mail service go through our cities. The Senator from Massachusetts is besieged by requests to make it go through Boston, Mass., and I am besieged by requests to make it go through cities in my State. If you are going to play favorites, I want to know about it; that is all.

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from New Hampshire.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ST. MARYS RIVER BRIDGE

Mr. SHEPPARD. Mr. President, from the Committee on Commerce I report back favorably without amendment the bill (S. 3464) granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River. I direct the attention of the Senator from Georgia to the bill.

Mr. GEORGE. Mr. President, I ask unanimous consent for the present consideration of the bill just reported.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the States of Georgia and Florida, through their respective highway departments, and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the St. Marys River, at a point suitable to the interests of navigation, at or near St. Marys, Camden County, Ga., known as the "Borrell Tract," and to the shore opposite thereto, known as "Roses Bluff," in the county of Nassau, in the State of Florida, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

TERM OF COURT AT SHELBY, N. C.

Mr. OVERMAN. Mr. President, I report back favorably from the Committee on the Judiciary, without amendment, the bill (H. R. 8657) to amend section 98 of the Judicial Code providing for the holding of the United States district court at Shelby, N. C. I ask for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That section 98 of the Judicial Code be, and the same is hereby, amended by adding the following language:

"That terms of the District Court of the United States for the Western District of North Carolina shall be held in each and every year in the town of Shelby, N. C.: *Provided*, That suitable accommodations for holding court at Shelby are furnished free of expense to the United States."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SOLDIERS' HOME HOSPITAL, SANTA MONICA, CALIF.

Mr. WARREN. Mr. President, I ask that the Senate proceed now to the consideration of House bill 2821, authorizing the erection of a sanitary fireproof hospital at the National Home for Disabled Volunteer Soldiers at Santa Monica, Calif.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the Board of Managers of the National Home for Disabled Volunteer Soldiers be, and it is hereby, authorized and directed to cause to be erected at the Pacific branch of said home at Santa Monica, Calif., on land now owned by the United States, a sanitary fireproof hospital of a capacity for 500 beds at a total cost of not more than $1,500,000. Such hospital shall include all the necessary buildings, with the appropriate mechanical equipment, including roads and trackage facilities leading thereto, for the accommodation of patients, and storage, laundry, and necessary furniture, equipment, and accessories as may be approved by the Board of Managers of the National Home for Disabled Volunteer Soldiers.

SEC. 2. That the persons who shall be entitled to the privileges of treatment in this hospital when constructed, and who may be admitted thereto upon the order of a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers, shall be the following: Honorably discharged officers, soldiers, sailors, and marines who served in the Regular, Volunteer, or other forces of the United States in the war with Mexico, the Civil War, the war with Spain, and the World

War, or in any war in which the country has been engaged, in campaigns against hostile Indians, or who served in any of the extra-territorial possessions of the United States in foreign countries, including Mexican border service, or in the Organized Militia or National Guard when called into the Federal service, and who are disabled by diseases or wounds and by reason of such disability are either temporarily or permanently incapacitated from earning a living.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PAYMENT OF TAXES TO STEVENS AND FERRY COUNTIES, WASH.

Mr. DILL, from the Committee on Indian Affairs, to which was referred the bill (H. R. 1414) to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes, reported it without amendment and submitted a report (No. 765) thereon.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House insisted on its amendment to the amendment of the Senate No. 1 to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, and that the House further insisted on its disagreement to the amendments of the Senate Nos. 2 to 167, inclusive, to said bill.

The message also announced that the House had passed a bill (H. R. 7998) granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 7998) granting public lands to the city of Golden, Colo., to secure a supply of water for municipal and domestic purposes, was read twice by its title and referred to the Committee on Public Lands and Surveys.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on June 4, 1924, the President approved and signed the following acts:

S. 1213. An act for the relief of Harold Kernan; and

S. 1941. An act for the relief of Ezra S. Pond.

SUPPLEMENTAL ESTIMATE, BUREAU OF MINES (S. DOC. NO. 141)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Interior Department, Bureau of Mines, fiscal year 1924, to remain available until June 30, 1925, for the development of oil shale, etc., $90,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

REPORT OF UNITED STATES COAL COMMISSION

Mr. MOSES. Mr. President, I ask unanimous consent for the present consideration of Calendar No. 671, which is a resolution providing for the printing of the report of the Coal Commission and which through inadvertance was omitted in the various reports of the Committee on Printing the other day.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from New Hampshire?

Mr. SIMMONS. I object. We have set apart the time between 8 and 11 o'clock to-night to consider matters on the calendar.

Mr. MOSES. If that is the attitude of the Senator from North Carolina, there will be no unobjected bills to-night on the calendar until No. 671 is reached.

Mr. SIMMONS. I will ask the Senator from New Hampshire in all good humor——

Mr. MOSES. It will only take one minute to pass the resolution.

Mr. SIMMONS. Why is not the Senator willing to take his chances with the other bills on the calendar after 8 o'clock?

Mr. MOSES. One of the reasons is that the resolution has been here for a long time and it was solely through inadvertence that it was not immediately considered when reported. It will take one minute to do it.

Mr. SIMMONS. Upon that statement of the Senator I withdraw my objection. I made the statement because I am anxious that the pension bill shall be called up and concluded.

Mr. MOSES. I am just as anxious as the Senator to have the pension bill considered.

The concurrent resolution (S. Con. Res. 3), providing for the printing of the report of the United States Coal Commission, which had been reported from the Committee on Printing without amendment, was considered by unanimous consent and agreed to, as follows:

*Resolved by the Senate (the House of Representatives concurring)*, That the report of the United States Coal Commission relative to the anthracite and bituminous coal industry, with accompanying papers, charts, diagrams, and illustrations (including not to exceed one supplemental volume), be printed as a Senate document, with contents and index, and that 5,000 additional copies be printed, of which 1,100 copies shall be for the use of the Senate document room, 100 copies for the use of the Committee on Mines and Mining of the Senate, 3,500 copies for the use of the House document room, and 300 copies for the use of the House Committee on Interstate and Foreign Commerce.

PENSIONS AND INCREASE OF PENSIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 6426) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

The next amendment of the Committee on Pensions was, on page 43, after line 6, to insert:

The name of Frederick Antoni, late of Company C, Nineteenth Regiment United States Infantry, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of John H. Berard, late of the Signal Corps, United States Army, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Christopher Dennis, late of Company L, Twenty-fifth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Remigia J. Buell, now known as Remigia J. Meacham, former widow of Charles T. Meacham, late of Company C, First Regiment Michigan Volunteers, Mexican War, and pay her a pension at the rate of $30 per month.

The name of Esta Abbott, widow of Minor E. Abbott, late private, United States Marine Corps, Regular Establishment, and pay her a pension at the rate of $12 per month, with $2 per month additional for each of soldier's minor children under 16 years of age.

The name of John S. Schooler, late of Company D, Twenty-second Regiment United States Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The name of La Barron T. Marshall, late of Company F, Second Regiment Wisconsin Infantry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Maywood Smith, late of Company H, Forty-fourth Regiment United States Volunteer Infantry, war with Spain, and pay him a pension at the rate of $18 per month in lieu of that he is now receiving.

The name of Claude L. Bonta, late of Company C, Twenty-second Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Robert H. Cowan, late second lieutenant, Company K, Second Regiment North Carolina Infantry, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Laura Briggs, dependent mother of Alvin E. Briggs, late of Company B, Third Regiment Field Artillery, New York National Guard, Regular Establishment, and pay her a pension at the rate of $12 per month.

The name of William A. Williams, late of Company H, Two hundred and second Regiment New York Infantry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Jasper N. Stanfill, alias Joseph N. Stanfill, late of Company M, Fourth Regiment Tennessee Infantry, war with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Ellen L. Curran, widow of Patrick Curran, late of Company I, Twentieth Regiment United States Infantry, Regular Establishment, and pay her a pension at the rate of $12 per month.

The name of Filen Whalin, late of Company B, Third Regiment Kentucky Volunteer Infantry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Ludwig Zugner, late of Thirty-fourth Company, United States Coast Artillery Corps, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of James M. Cline, late of One hundred and sixty-eighth Company, United States Coast Artillery Corps, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Mattie E. Prewitt, widow of John N. Prewitt, late of Company D, Second Regiment Kentucky Volunteers, Mexican War, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of August Getz, late of Company E, Third Regiment United States Infantry, Indian wars, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James K. Harvey, late of Company M, Eleventh Regiment United States Infantry, war with Spain, and pay him a pension at the rate of $12 per month.

The name of Mary L. Reese, widow of Thomas J. Reese, late of Company F, Eighth Regiment Pennsylvania Infantry, war with Spain, and pay her a pension at the rate of $20 per month.

The name of Lawson Ellsworth, late of Company C, One hundred and sixtieth Regiment Indiana Infantry, war with Spain, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Mary F. Lunau, widow of Frank Lunau, late of Troop A, Fifth Regiment United States Cavalry, Indian wars, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Alden T. Wathan, late of the Hospital Corps, United States Army, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Mathias Backes, late of Troop C, Fourth Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $24 per month.

The name of Ada M. Young, widow of Charles Young, late lieutenant colonel of the Ninth Regiment United States Cavalry, and pay her a pension at the rate of $50 per month, with $4 per month additional on account of the children of soldier under 16 years of age; said pension to be paid her in lieu of compensation which she now receives from the Veterans' Bureau.

The name of Martha R. Biddle, widow of William P. Biddle, late major general commandant, United States Marine Corps, Regular Establishment, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Charles D. Felter, late of the United States Marine Corps, war with Spain, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Gilbert E. Mayor, late of Company L, Twentieth Regiment Kansas Infantry, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Mary F. Conway, widow of Michael F. Conway, late of Company B, Seventh Regiment United States Infantry, Indian wars, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Joseph Holtz, late of Battery B, First Colorado Field Artillery, Regular Establishment, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Charles Fuhr, late of the U. S. S. *Minneapolis* and *Washington*, United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Lenora Piper, former widow of Francis Cunningham, late of Company D, Third Regiment Tennessee Volunteer Infantry, Mexican War, and pay her a pension at the rate of $20 per month.

The name of William F. Elfeldt, late of Battery M, Fifth Regiment United States Artillery, war with Spain, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Walter A. Bailey, late of Company B, Sixth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Lester L. Coffee, late of Company L, First Regiment Arkansas Infantry, war with Spain, and pay him a pension at the rate of $18 per month.

The name of John J. McNally, late of United States ship *Georgia*, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The PRESIDENT pro tempore. That concludes the amendments of the committee. If there are no further amendments as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CIVIL GOVERNMENT FOR PORTO RICO

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 2573) to amend and reenact sections 20, 22, and 50 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes," which were: On page 1, lines 8 and 9, to strike out "not less than $5,000 and not more than"; on page 1, lines 9 and 10, to strike out "as shall be fixed by the Legislature of Porto Rico"; on page 3, line 23, after the word "and," to insert the following: "also those appointed by the Governor of Porto Rico"; and, on page 4, line 3, to strike out all after "departments" down to and including "$6,000" in line 6, and to insert "$6,000; chief justice of the supreme court, $7,500; associate justices of the supreme court, $6,500."

Mr. WILLIS. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

ALTERATIONS AND CONSTRUCTION OF CERTAIN NAVAL VESSELS

The PRESIDENT pro tempore. Under the order previously made the Chair lays before the Senate House bill 8687.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8687) to authorize alterations to certain naval vessels and to provide for the construction of additional vessels, which had been reported from the Committee on Naval Affairs without amendment, and which was read, as follows:

*Be it enacted, etc.*, That alterations are hereby authorized for the United States ships *New York, Texas, Florida, Utah, Arkansas*, and *Wyoming*, to consist of the installation of additional protection against submarine attack, of the installation of antiair attack deck protection, of the conversion of such vessels to oil burning, and, in addition, for the *New York* and *Texas*, the purchase, manufacture, and installation of new fire-control systems, at a total cost not to exceed $18,360,000 in all.

SEC. 2. That the President of the United States is hereby authorized to undertake prior to July 1, 1927, the construction of the vessels enumerated below: Eight scout cruisers, carrying protection and armament suited to their size and type, to have the highest practicable speed and the greatest desirable radius of action, and to cost, exclusive of armor and armament, not to exceed $11,100,000 each; six river gunboats, to cost, exclusive of armament, not to exceed $700,000 each: *Provided*, That in the construction of the vessels herein enumerated the President is authorized, in his discretion, to make use of the naval ordnance plant at South Charleston, W. Va., for the manufacture of armor and armament needed for such vessels.

Vessels to be constructed or reconditioned by this act shall be constructed or reconditioned in the Government navy yards of the United States when time and facilities permit and when in the judgment of the Secretary of the Navy such construction or reconditioning would not involve an appreciable increase in the cost of the Government.

SEC. 3. That the alterations to capital ships and the construction of new vessels under the authorization contained in this act shall be subject to the limitations prescribed by the treaty limiting naval armament, ratified August 17, 1923.

SEC. 4. That in the event of an international conference for the limitation of naval armaments the President is hereby empowered, in his discretion, to suspend in whole or in part any or all alterations or construction authorized in this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. KING subsequently entered a motion to reconsider the vote by which the bill was passed.

EXECUTIVE SESSION

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session, the Senate (at 6 o'clock and 15 minutes p. m.) under the order previously entered, took a recess until 8 o'clock p. m.

---

EVENING SESSION

The Senate reassembled at 8 o'clock p. m., on the expiration of the recess.

APPROPRIATONS FOR THE DISTRICT OF COLUMBIA CONFERENCE REPORT

Mr. PHIPPS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, having met, after free and full conference have been unable to agree.

LAWRENCE C. PHIPPS,
W. L. JONES,
L. HEISLER BALL,
CARTER GLASS,
E. I. EDWARDS,
*Managers on the part of the Senate.*
C. R. DAVIS,
FRANK H. FUNK,
W. A. AYRES,
*Managers on the part of the House.*

The report was agreed to.

The PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

IN THE HOUSE OF REPRESENTATIVES,
*June 5, 1924.*

*Resolved*, That the House insists on its amendment to the amendment of the Senate No. 1 to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes.

*Resolved further*, That the House further insists on its disagreement to amendments 2 to 167, inclusive, to said bill.

Mr. PHIPPS. I move that the Senate insist on its amendments, ask a further conference with the House, and that the Chair appoint the conferees on the part of the Senate at the further conference.

The motion was agreed to, and the President pro tempore appointed Mr. PHIPPS, Mr. JONES of Washington, Mr. BALL, Mr. GLASS, and Mr. EDWARDS conferees on the part of the Senate.

ORDER OF BUSINESS

Mr. NORRIS. Mr. President, I ask unanimous consent out of order to report from the Committee on Agriculture and Forestry two bills, and I ask unanimous consent for their present consideration.

Mr. ROBINSON. Does the Senator desire to consider them both at once?

Mr. NORRIS. No; I will take them one at a time.

Mr. ROBINSON. I suggest that the first one be reported.

Mr. SMOOT. The unanimous-consent agreement will not permit that, I think.

Mr. NORRIS. Is there a unanimous-consent agreement that it would conflict with?

Mr. MOSES. Yes; from 8 to 11 o'clock.

Mr. NORRIS. Of course, I do not expect to have the unanimous-consent agreement set aside.

Mr. SMOOT. If we get through with the calendar before 11 o'clock, the Senator can call up the bills.

Mr. FLETCHER. Regular order!

The PRESIDENT pro tempore. Under the unanimous-consent agreement as the Chair conceives it, conference reports are first in order, appropriation bills are next in order, and the calendar next in order.

Mr. NORRIS. I withdraw the request.

THE CALENDAR

The PRESIDENT pro tempore. The clerk will state the first bill on the calendar.

The bill (S. 55) making an appropriation to pay the State of Massachusetts for expenses incurred and paid, at the request of the President, in protecting the harbors and fortifying the coast during the Civil War, in accordance with the findings of the Court of Claims and Senate Report No. 764, Sixty-sixth Congress, third session, was announced as first in order.

Mr. OVERMAN. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1181) naming the seat of government of the United States was announced as next in order.

Mr. McKELLAR. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 33) making eligible for retirement under certain conditions officers of the Army of the United States, other than officers of the Regular Army, who incurred physical disability in line of duty while in the service of the United States during the World War, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. It will be passed over.

The joint resolution (S. J. Res. 46) for the relief of Capt. Ramon B. Harrison was announced as next in order.

Mr. SMOOT. Let the joint resolution go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The joint resolution (S. J. Res. 60) to stimulate crop production in the United States was announced as next in order.

Mr. BAYARD. Let it go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The resolution (S. Res. 124) directing the Interstate Commerce Commission to secure information relative to amount of money expended for the purpose of creating public interest favorable to railroad sentiment was announced as next in order.

Mr. SMOOT. Let it go over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 185) to promote agriculture by stabilizing the price of wheat was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2401) providing for the compensation of retired warrant officers and enlisted men of the Army, Navy, and Marine Corps, or any other service or department created by or under the jurisdiction of the United States Government, and warrant officers and enlisted men of the Reserve Corps of the Army and Navy, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2691) to amend the Penal Code was announced as next in order.

Mr. KING. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2299) to validate the payment of commutation of quarters, heat, and light under the act of April 16, 1918, and of rental and subsistence allowances under the act of June 10, 1922, was announced as next in order.

Mr. SMOOT. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2149) to facilitate and simplify the work of the Forest Service, United States Department of Agriculture, and to promote reforestation, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2150) to authorize arrests by officers and employees of the Department of Agriculture in certain cases and to amend section 62 of the act of March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2151) to increase the subsistence and per diem allowances of certain officers and employees of the Department of Agriculture was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

GIRLS' DORMITORY, FORT LAPWAI SANATORIUM, IDAHO

The bill (H. R. 192) to provide for a girls' dormitory at Fort Lapwai Sanatorium, Lapwai, Idaho, was announced as next in order.

Mr. GOODING. Mr. President, I hope there will be no objection to the bill. It provides for building a girls' dormitory at the Fort Lapwai Indian Reservation. No building has been erected there for a number of years. What they have there is in unfit condition. This has been recommended by the Secretary of the Interior, authorized by the Budget, and passed by the House without amendment, and I hope that it may be permitted to pass.

Mr. KING. I ask that the report be read.

The PRESIDENT pro tempore. The report will be read.

The reading clerk read the report, as follows:

The Committee on Indian Affairs, to whom was referred the bill (H. R. 192) to provide for a girls' dormitory at the Fort Lapwai Sanatorium, Lapwai, Idaho, having considered the same, report favorably thereon with the recommendation that the bill do pass without amendment.

The facts are fully set forth in House Report No. 133, Sixty-eighth Congress, first session, which is appended hereto and made a part of this report.

[House Report No. 133, Sixty-eighth Congress, first session]

The Committee on Indian Affairs, to whom was referred the bill (H. R. 192) to provide for a girls' dormitory at the Lapwai Indian Sanatorium, Lapwai, Idaho, having considered the same, report thereon with a recommendation that it do pass with the following amendment:

Line 3, after the word "hereby," insert "authorized to be."

This legislation is very much needed to properly care for the girls at the Lapwai Indian School, and meets the approbation of the Department of the Interior as well as that of your committee, as evidenced by the letter from the Secretary of the Interior, which is attached hereto and made a part of this report.

DEPARTMENT OF THE INTERIOR,
*Washington, December 29, 1923.*

Hon. HOMER P. SNYDER,
*Chairman Committee on Indian Affairs,*
*House of Representatives.*

MY DEAR MR. SNYDER: I have your letter dated December 17, 1923, requesting a report on H. R. 192, a bill to provide for a girls' dormitory at the Fort Lapwai Sanatorium, Fort Lapwai, Idaho.

With the exception of the employees' quarters and the laundry, the Fort Lapwai plant is made up of frame buildings, some of which are rather old. The place was originally established as a military fort in 1863. It was abandoned by the Army as a fort in 1884 and established as an Indian school by the Indian Service in 1886. Practically all of the principal buildings date back to within a few years of the establishment of the school. The girls' dormitory, which has capacity for 50 girls, is divided so as to provide dormitory space on the second floor only, the first floor being used for a dining room, kitchen, and sewing room. The present building is not satisfactorily adapted, nor adequate in space, for a sanatorium school dormitory such as is needed at Fort Lapwai. A new dormitory building would serve an excellent purpose at this institution, but an estimate therefor was not included in the Budget.

Very truly yours, HUBERT WORK, *Secretary.*

Mr. KING. I would like to ask the Senator from Idaho whether there is any necessity for the building; whether, after it has been constructed, there will be any inmates for it; and, if so, from what reservation they come and where they are now being cared for?

Mr. GOODING. They are at the Lapwai Indian Reservation at the present time. They come from different Indian tribes. I do not know exactly from what part of the country they come. Some come from Alaska. The buildings, as I said before, are all old and in unfit condition for the patients. These are young girls afflicted with tuberculosis. The Indian Commissioner, together with the Secretary of the Interior, feels that the appropriation should be authorized. It is only an appropriation. I hope it may be permitted to pass.

The PRESIDING OFFICER (Mr. CURTIS in the chair). Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, There is hereby authorized to be appropriated out of the Treasury of the United States the sum of $50,000 for the purpose of constructing and equipping a girls' dormitory for the housing of patients being treated for tuberculosis in the Fort Lapwai Sanatorium, said dormitory to be erected on the grounds now occupied by the sanatorium at Lapwai, Idaho.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LANDS FOR THE CLALLAM TRIBE OF INDIANS, WASHINGTON

The bill (S. 1707) appropriating money to purchase lands for the Clallam Tribe of Indians in the State of Washington, and for other purposes, was announced as next in order.

The bill had been reported from the Committee on Indian Affairs with an amendment to strike out all after the enacting clause and insert the following:

That there is hereby authorized to be appropriated, out of moneys in the Treasury of the United States not otherwise appropriated, the sum of $600,000, to be paid per capita to the Clallam Indians of the State of Washington upon enrollment of said Indians to be made under the direction of and to be approved by the Secretary of the Interior: *Provided*, That before payment to the individual Indians they shall relinquish in writing all claims of any nature against the United States under any treaty, agreement, or act of Congress, and agree to accept such payment in full satisfaction of any and all claims whatsoever against the United States: *And provided further*, That the shares of minor children shall be retained in the Treasury of the United States, where they shall draw interest at the rate of 3½ per cent per annum until such minors reach the age of majority under the laws of the State of Washington, after which such minors shall be paid their shares upon application to the Secretary of the Interior: *Provided further*, That not more than 10 per cent of the amount appropriated, and in no event not more than $15,000 thereof, shall be paid to the attorney employed by the tribe under contract approved by the Secretary of the Interior.

Mr. KING. Mr. President, I would like an explanation of the bill.

Mr. JONES of Washington. The bill authorizes an appropriation of $600,000. I know that that sounds a little bit large, yet the facts in the case I think will appeal to everyone. The facts briefly are these: The Clallam Indians are involved. There were 4,000 or 5,000 of them a great many years ago. They entered into an agreement with the Government together with other Indians under which the Skokomish Indian Reservation was established. These Indians thought they were going to have certain territory that they had been occupying for a great many years, but they found as a matter of fact they were going to be put on the same reservation with the Skokomish Indians, their hereditary enemies. They refused to go on the tract with those Indians. There are now some three or four hundred of them. The report read in part as follows:

There are now between 300 and 400 Indians, some of whom are in need of immediate assistance. A number of these Indians reside on a small tract of about 213 acres near Jamestown, Wash., which tract they themselves purchased about 40 years ago. They have always been loyal and peaceable, and it is the boast of the Clallam Indians "that they have never shed the blood of a white person." They have never received any land from the Government but have managed to get along by fishing, working in factories and mills, and doing farm work for the whites, and their income at best has been meager.

The reason of that was very plain, because these lands were very heavily timbered and it was impossible for them to make a living on them. This in brief is the condition: These Indians surrendered to the Government a large tract of their land and believed they were going to be placed upon a reservation. When they found the reservation they were going upon it was discovered to be among their hereditary enemies. The Committee on Indian Affairs looked into this very carefully. They considered it at several meetings and came to the conclusion that it was but just and fair that we should recommend this treatment to the Indians. I hope in justice to them that the bill may be passed.

Mr. ASHURST. Mr. President, I recall distinctly the various hearings held before the Committee on Indian Affairs when the bill was up for consideration. It appealed very wholesomely to my sense of justice. They are not asking all that is due them in justice. They are not asking that much. It is rather a poor substitute for what is really and justly due them. The best that can be done is proposed in the bill, and I think that it ought to be passed. I remember distinctly the hearings before the committee. I know of no case in the Northwest that appears to be stronger than this one.

Mr. ROBINSON. The original draft of the bill contemplated the purchase of land for the use of the Indians.

Mr. JONES of Washington. It did.

Mr. ROBINSON. I see it has been changed and modified to provide for a per capita payment.

Mr. JONES of Washington. It has been. There was no public land to be taken, and they could not get land for less than $100 or $200 per acre.

Mr. FLETCHER. How much per capita would it amount to?

Mr. JONES of Washington. They estimate that there are about 400 Indians, so it would be about $1,000 per capita.

Mr. ROBINSON. It would be $1,500 per capita if there are 400 of them.

Mr. JONES of Washington. Yes; that is true.

Mr. FLETCHER. The Government would pay the amount to each individual, and they would still be in the same situation they are now in.

Mr. JONES of Washington. They are a very industrious tribe of Indians. This would enable them to get a small tract of land and build some small homes.

Mr. ASHURST. They own about 2,000 acres now.

Mr. JONES of Washington. They have about 2,000 acres.

Mr. ASHURST. It is the purpose to take this money and buy a small tract to add to the 2,000 acres which the tribe now holds.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 1809) for the relief of Emelus S. Tozier was announced as next in order.

Mr. KING. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1639) to provide for the appointment of a court reporter by each judge of the United States district court, fixing their salaries and fees, defining their duties, and repealing all laws and parts of laws inconsistent herewith, was announced as next in order.

Mr. KING. Let that bill go over.

Mr. JOHNSON of Minnesota. I should like to ask that that bill go over. The Senator from Montana [Mr. WALSH] is interested in the bill. Probably we can recur to the bill later on.

CAPT. JOHN W. LOVELAND, JR., DECEASED

The bill (S. 1387) to provide for payment of the amount of a war-risk insurance policy to a beneficiary designated by Capt. John W. Loveland, jr., deceased, was announced as next in order.

Mr. KING. Reserving the right to object——

Mr. CURTIS. I ask that the bill go over.

Mr. EDGE. I trust objection will be withheld until I can make a brief statement.

Mr. SPENCER. The Senator has five minutes in which to explain the bill.

Mr. EDGE. This bill has been on the calendar for some time. The case has been investigated by two distinct committees of the Senate. Last year it was considered by a subcommittee, over which the Senator from Delaware [Mr. BAYARD] presided, and he reported it favorably to the Senate. This year another committee, over which the Senator from Missouri [Mr. SPENCER] presided, has taken like action. It is the case of a soldier who died while he was making every possible effort to have his war insurance readjusted. It is a very worthy case. The objections which have been made have been made, so far as I can ascertain, without an effort to study the real facts of the case. If the Senators will permit the Senator from Missouri, who has investigated the matter thoroughly this year, as the Senator from Delaware did last year, to make a statement, I am sure they will approve of the bill.

Mr. ROBINSON. I inquire of the Senator in charge of the bill whether the bill was not considered by the Senate on a former occasion at some length?

Mr. EDGE. I have just stated that it was.

Mr. ROBINSON. And objection was made to it after it was discussed at length.

Mr. EDGE. The objection then made, I may say, was for the purpose of affording further investigation, as will be disclosed by the RECORD.

Mr. ROBINSON. The report of the department on the bill is adverse. I will read a brief statement from that report:

In view of the general terms of the war risk insurance act, applying to all alike, and the fact that the bill is a special measure which amounts in effect to a pension, I am opposed to such special legislation as opening the way to the granting of free insurance. The proposed measure as a matter of policy seems to me inadvisable.

Mr. SPENCER. Mr. President, will the Senator from Arkansas yield to me?

Mr. KING. I have objected to the consideration of the bill.

Mr. SPENCER. The bill now before the Senate was referred to me by the committee.

Mr. KING. Regular order, Mr. President.

Mr. SPENCER. I desire to give the Senate the facts in the case. It is an interesting state of facts. Captain Loveland while in the service took out insurance. When he was dis-

charged from the service in January, 1919, he wrote to the department and stated, "I want to continue my insurance; give me the facts upon which I can continue it and the information that I need." From January 1, 1919, until August 29 of the same year he received no answer. Here we come to the crux of the case. On August 29 the department wrote back to him and gave him some information, but not the information for which he had asked. The same day he replied to the department and stated, "That is not the information I want. What is the rate and what must I do? And here is my check for the last premium." On August 29, after that letter was sent, so far as Captain Loveland or his people know there was no answer whatever from the department. Here is what the department says: "When that letter came to us we answered it in this way; we sent a circular containing the information that he wanted." When the department was asked, "How do you know that you answered the letter?" the officials stated, "Because when such letters come we have the custom of putting with a blue pencil a mark on the letter to which we send a circular reply."

When the committee investigated those facts, here were the two sides of the case: If the department did not give him the information, on every principle of law and of justice, his insurance being in dispute, he was entitled to his insurance. He died in the month of October.

If the department is right, and the officials gave him the information, there is no cause of action. But they say that the only evidence they have is the blue pencil mark upon his letter which indicates that a circular letter of information went out to him. He and his people say that no letter ever came to him and that he never got the answer which he wanted, and that he was waiting for it every day. Under those circumstances the committee gave him the benefit of the doubt and decided that he was entitled to his insurance.

Mr. KING. Objection was made.

The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 2885) for the relief of the Davis Construction Co. was announced as next in order.

Mr. OVERMAN. Let that bill go over.

Mr. EDGE. Do I understand that objection was made to the consideration of Senate bill 1387?

The PRESIDENT pro tempore. The bill to which the Senator refers has been passed over.

Mr. EDGE. On whose objection?

Mr. KING. I objected to the consideration of the bill.

The PRESIDENT pro tempore. The Senator from Utah objected to the consideration of the bill.

EUSTACIO B. DAVISON

The bill (S. 513) for the relief of Eustacio B. Davison was announced as next in order.

Mr. KING. Let that bill go over.

Mr. ASHURST. Mr. President, will the Senator from Utah permit me to make an explanation of the bill?

Mr. KING. As the Senator from Arizona has suggested that he desires to make an explanation of the bill I shall be very glad to hear the explanation.

Mr. ASHURST. Mr. President, Mr. Davison enlisted as a soldier; he was wounded in battle; was laid out for dead; and was about to be buried in a trench with dead soldiers, when it was ascertained by a physician that there was a spark of life in him. He was unconscious, but was taken to the hospital, and after many weeks recovered. He rejoined his comrades, but never gave any notice of that fact to the appropriate officers, and was, therefore, listed as a deserter. He was not a deserter in fact. He is dead. His widow is 82 years of age. He has surviving him children who have a pride in his service, which they think was, and which really was, an honorable service, and they only seek by this bill to remove the defect that has rested on his record.

It is not proposed any pension is ever to be granted under this bill; it is merely to correct an error in the soldier's record.

Mr. KING. The Senator is in error as to that.

M. FLETCHER. The bill provides that no pension shall accrue prior to its passage, but a pension may be paid subsequently.

Mr. ASHURST. The proviso reads:

*Provided*, That no pension shall accrue prior to the passage of this act.

I am willing to add the words "or subsequent to the passage of this act," and I will move an amendment so that it will read:

*Provided*, That no pension shall accrue prior to the passage of this act or subsequent thereto.

I ask that that amendment may be adopted in line 11, after the word "act."

Mr. ROBINSON. The same object could be accomplished by inserting the words "or subsequent" after the word "prior."

Mr. ASHURST. The children of this soldier do not seek a pension; they only wish to have his record cleared.

Mr. SMITH. Mr. President, if the facts are as stated by the Senator—and I have no doubt that they are—and if we remove the disability and allow his name to be placed on the roll, his widow should be entitled to a pension.

Mr. ASHURST. His children would not wish it.

The able and diligent Senator from Texas [Mr SHEPPARD]—and we all know how diligently he labors—wrote the report in this case, and really knows as much about it as I do. The report, in my judgment, is absolutely correct and can not be disputed.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Arizona will be stated.

The READING CLERK. In line 10, after the word "prior," it is proposed to insert the words "or subsequent," so as to make the bill read:

*Be it enacted, etc.*, That in the administration of the pension laws and the laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, Eustacio B. Davison, formerly of Companies A and H, Eighty-seventh Regiment New York Volunteer Infantry, shall be held and considered to have been honorably discharged from the military service of the United States as a sergeant on the 13th day of June, 1862: *Provided*, That no pension shall accrue prior or subsequent to the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF THE JUDICIAL CODE

The bill (S. 2060) to amend the Judicial Code, further to define the jurisdiction of the circuit courts of appeals and of the Supreme Court, and for other purposes, was announced as next in order.

Mr. ROBINSON. Mr. President, that appears to be a very important bill; it proposes to amend the Judicial Code in many important particulars. I think it ought to receive more consideration than it can have under the present circumstances.

The PRESIDENT pro tempore. If the Senate will pardon the Presiding Officer, who reported the bill and introduced it, he will say that he has no disposition to bring it up for consideration at the present session.

Mr. ROBINSON. Very well. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

EXTENSION OF INSURANCE AND COLLECT-ON-DELIVERY SERVICE

The bill (H. R. 4442) to extend the insurance and collect-on-delivery service to third-class mail, and for other purposes, was considered as in Committee of the Whole, and was read, as follows:

*Be it enacted, etc.*, That the requirement of section 8 of the act of August 24, 1912, making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1913, and for other purposes (37 Stat. L. pp. 557, 558, 559), applicable to fourth-class (parcel post) mail: "That the Postmaster General shall make provision by regulation for the indemnification of shippers for shipment injured or lost, by insurance or otherwise, and when desired for the collection on delivery of the postage and price of the article shipped, fixing such charges as may be necessary to pay the cost of such additional service," is hereby extended to cover third-class domestic mail.

Mr. KING. I should like to have an explanation of that measure.

Mr. STERLING. Mr. President, the purpose of the bill is simply to extend the insurance and collect-on-delivery features of fourth-class mail to third-class mail. There seems to be quite a demand among the users of the mail that that should be done. Fourth-class mail, of course, may now be insured and there may be collection on delivery in the case of such mail.

Mr. ROBINSON. How would the bill affect the postal revenues? What would be the result with respect to a deficit or an increase in revenue?

Mr. SMOOT. I do not think it would affect that at all.

Mr. STERLING. I do not think it will affect the postal revenues at all, I will say to the Senator.

Mr. ROBINSON. Very well.

Mr. KING. Is there any dubiety in regard to the matter? Will it place an additional burden on the department?

Mr. STERLING. No; I do not see how it would. The bill merely provides for insurance on third-class mail and also for the collect on delivery privilege; that is all. I do not see how it will decrease the revenues.

Mr. KING. It will necessitate an increase in the personnel of the department.

Mr. STERLING. I do not think so.

Mr. SMOOT. None at all.

Mr. STERLING. I will say that this has been recommended by the Postmaster General. I quote from a letter from the Postmaster General to the chairman of the House committee in relation to his bill, in which he says:

> In reply I beg to inform you that the bill meets with the approval of the department, the language thereof being identical with a recommendation contained on page 74 of its annual report for the last fiscal year, and it is recommended that this provision be enacted into law.

Mr. BAYARD. May I ask the Senator from South Dakota a question?

Mr. STERLING. Certainly.

Mr. BAYARD. Will not this require extra work in the offices in sorting out this class of mail, and will it not delay the delivery of the mail if the postmen are required to secure delivery receipts?

Mr. STERLING. I can hardly answer the Senator in regard to that. But it does not occur to me that there will be any great delay.

Mr. BAYARD. I should think it would delay proceedings in the office in sorting the mail, and delivery would also be retarded by the postmen being required to wait in order to have a receipt signed.

Mr. STERLING. I do not think it will interfere with the delivery of the mail at all.

Mr. SMOOT. Mr. President, I will say to the Senator that it will not take a particle more time to give a receipt where the package is delivered at destination than to give a receipt where it is mailed. I think it is proper and right that the bill should be passed. If the Senator or I should desire to send third-class matter collect on delivery, as is proposed to be allowed by this bill, I think he and I should have such right and have the amount collected at the other end of the line.

Mr. BAYARD. I quite agree to that; but will the fee charged under its operation compensate for the extra work?

Mr. SMOOT. A fee would be charged the same as in the case of other mail.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ALLOWANCES OF OFFICERS OF ARMY, NAVY, AND RELATED SERVICES

Mr. WADSWORTH. Mr. President, a short time ago Order of Business 268, being the bill (S. 2299) to validate the payment of commutation of quarters, heat, and light under the act of April 16, 1918, and of rental and subsistence allowances under the act of June 10, 1922, went over upon objection of the Senator from Utah [Mr. SMOOT]. It may be remembered that this bill has been on the calendar for something like two and a half or three months, during which period the Senator from Nebraska [Mr. HOWELL], the Senator from Utah [Mr. KING], and I have been discussing the question of the commutation of quarters, heat, light, and rental allowances for those officers of the Army and Navy and related services who have dependent mothers.

I may say for the information of the Senate, although it may not be interesting, that the Senator from Nebraska and I have been consulting on the question for some time and have agreed to an amendment which we believe will protect the Treasury from undue pressure from the officers in the military service on the ground of dependent mothers.

This bill is printed on the calendar with the notation, "Motion entered to reconsider vote." It has passed the Senate once. If it can be brought up, I desire to offer an amendment which has been agreed to by the Senator from Nebraska and myself and which he and I are convinced will correct the situation and save the Government from abuse.

Mr. SMOOT. Mr. President, the bill can not pass the House at this session of Congress, anyway. I have not seen the amendment, and I do not know what it provides. But I do know that the calendar is full in season and out of season of measures designed to give some kind of advantage to men in the Regular Army.

Mr. WADSWORTH. And the regular Navy and the Coast Guard and the Public Health Service.

Mr. SMOOT. Yes.

Mr. WADSWORTH. As a matter of fact, the rulings of the comptroller have nullified the law.

Mr. SMOOT. I will say to the Senator that I do not want it to be taken up to-night.

Mr. WADSWORTH. Very well.

V. E. SCHERMERHORN AND OTHERS

The bill (H. R. 6049) for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth was announced as next in order.

Mr. STANFIELD. Mr. President, a few moments ago Senate bill 2685, Order of Business 354, was announced, and I rose for the purpose of attracting the attention of the Chair. The Senator from New Jersey [Mr. EDGE] asked who was objecting. I think, under the rule, we have five minutes on bills. I do not believe that any Senator who objected to that bill understood its provisions or he would not have objected. I should like to move that we return to Order of Business 354.

The PRESIDENT pro tempore. The Chair is of the opinion that a bill already passed over can be returned to only by unanimous consent, under the agreement already made.

Mr. STANFIELD. I ask unanimous consent that we return to that bill.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the Senate return to Order of Business 354, Senate bill 2685.

Mr. WADSWORTH. Mr. President——

The PRESIDENT pro tempore. Does the Senator object?

Mr. WADSWORTH. Just a moment, Mr. President. I do not desire to interpose an unnecessary objection to the request of the Senator from Oregon; but if the Senator from Utah [Mr. SMOOT] is going to adopt the attitude that he has adopted about a bill which has already passed the Senate and against which there is nothing pending but a motion to reconsider, I shall insist that all bills once having been passed over shall not be returned to.

The PRESIDENT pro tempore. Objection is made.

Mr. STANFIELD. I hope the Senator will not make an objection. If he does, I want to serve notice that I am going to object as long as I can stand on the floor and object to bills being considered.

Mr. WADSWORTH. The Senator from Oregon and I find ourselves in the same position.

Mr. STANFIELD. Then, I think, Mr. President, we might just as well adjourn, because I shall object to the consideration of every bill that comes up.

Mr. CURTIS. Mr. President, I hope the Senator will not take that stand. I want, just for a moment, to explain Order of Business No. 400, House bill 6049.

This bill has passed the Senate in about three different Congresses. It is for the destruction of property belonging to some men at Fort Riley as the result of the carelessness of a Regular soldier. The amount reported here was found by a commission of Army officers who investigated the matter and found that it was due to these men whose property was destroyed. The bill has been recommended by the War Department, and I hope there will not be any objection to it.

Mr. STANFIELD. Mr. President, I object.

The PRESIDENT pro tempore. The Senator from Oregon objects, and the bill will be passed over.

AKTIESELSKABET MARIE DI GIORGIO

The bill (H. R. 8235) for the relief of Aktieselskabet Marie di Giorgio, a Norwegian corporation, of Christiania, Norway, was announced as next in order.

Mr. ROBINSON. Mr. President, the Senator from Oregon [Mr. STANFIELD] has announced his purpose of objecting to the consideration of any bill on the calendar unless consent is granted to return to a bill which was objected to some time ago. Such procedure, of course, can not be tolerated by the Senate. If he persists in that attitude, I think the Senate might just as well adjourn.

Mr. STANFIELD. Mr. President, I renew my request for unanimous consent to return to Senate bill 2685. I think I am entitled to it.

Mr. ROBINSON. Mr. President, under the procedure of the Senate no Senator has a right to insist upon returning to a bill that has been passed over upon the objection of any Senator. I know nothing about the merits of the bill in which the Senator from Oregon is interested, but it must be recognized that Senators have the right to object to the consideration of bills on the calendar.

Mr. STANFIELD. Will the Senator yield?

Mr. ROBINSON. If the Senator seeks to prevent the consideration of other measures on the calendar merely because a Senator has exercised his right to object to a bill in which

he is interested, he is pursuing a course that can not find justification in the procedure, precedents, or practices of the Senate.

Mr. STANFIELD. Mr. President, will the Senator yield?

Mr. ROBINSON. I yield to the Senator for a question.

Mr. STANFIELD. Under the unanimous-consent agreement I was entitled to five minutes on this bill. I endeavored, unsuccessfully, to attract the attention of the Chair. All that I am asking is this: I am not going to object or take offense——

Mr. ROBINSON. Mr. President, that is an utterly irrelevant statement. The bill had been passed over upon objection of some Senator—I do not know who objected—and the Senate had proceeded to dispose of a number of other bills. The Senator from Oregon thereupon rose and insisted upon the right to recur to a measure that had already been passed over upon an objection being made, which any Senator had the right to make. The Senator from Oregon thereupon threatened the Senate with objecting to the consideration of any other measure upon the calendar.

I give notice now that with that statement made there will be no recurrence to the bill of the Senator from Oregon. It will not be considered with that statement outstanding under any conditions, and I shall move to adjourn unless the Senator from Oregon promptly withdraws his statement.

Mr. STANFIELD. Mr. President, I hope the Senator from Arkansas will not take that stand. I think I am entitled to return to Senate bill 2685.

Mr. ROBINSON. Mr. President, I have stated that there will be no recurrence with the statement of the Senator from Oregon outstanding. If the Senator from Oregon wishes to withdraw that statement and let the Senate proceed and subsequently submits a respectful request for unanimous consent, I myself will give it due consideration. If he chooses to pursue that course, there will be no further bills considered. There will be no recurrence at present.

Mr. STANFIELD. Mr. President——

Mr. ROBINSON. I yield to the Senator for a question.

The PRESIDENT pro tempore. The order of business is the calling of the calendar as determined by the unanimous-consent agreement. The Chair sees nothing to do but to go on with the calling of the calendar.

Mr. ROBINSON. The Chair is correct.

Mr. McKINLEY. Mr. President, I do not believe the Senator from Arkansas quite understood what the Senator from Oregon was going to say.

Mr. ROBINSON. Oh, yes; everyone understood the statement of the Senator from Oregon. It was perfectly clear. He objected to the next bill and announced from the floor that no other bill would be considered. Mr. President, I call for the regular order.

The PRESIDENT pro tempore. The regular order is the consideration of the calendar. Is there objection to the consideration of House bill 8235, the title of which has been stated by the Secretary?

Mr. WADSWORTH. Mr. President, reserving the right to object to this bill, I desire to state that I may be the cause of this situation. It was I who offered an objection to the consideration of the bill to which the Senator from Oregon desired to return. That objection may have been unreasonable. I admit it. It came from me as the result of an objection from the senior Senator from Utah [Mr. SMOOT], directed against a bill which has been on the calendar for three months, in support of which the Military Affairs Committee and I have been working all this time, endeavoring to frame language which would be satisfactory to those who objected to the bill. The language now has been agreed upon; and when I asked an opportunity to present an amendment to the bill, the bill not being on the calendar in the usual sense but having already passed the Senate and being merely printed here with a notation of a motion to reconsider made by the junior Senator from Utah [Mr. KING], I confess that I felt it was unfair that the Military Affairs Committee should not be given a chance to perfect its own measure. That was the reason for my objection to other Senators having the privilege of going back to their bills.

I do not want to stand in the way of the Senator from Oregon. I understand his interest, and I have no objection to his bill; and with this statement, giving my reasons for having made that objection, I withdraw the objection.

Mr. ROBINSON. Mr. President, I shall certainly object; and I have made it clear that there will be no consideration of the bill proposed by the Senator from Oregon with his statement outstanding that Senators must consent to the consideration of that bill or he will object to all bills on the calendar. We might just as well settle that matter now.

Mr. STANFIELD. Mr. President, will the Senator yield? I think he is misquoting what I said.

Mr. ROBINSON. Mr. President, I call for the regular order.

The PRESIDENT pro tempore. The Secretary will state the next bill on the calendar.

BRUUSGAARD KIOSTERUDS DAMPSKIBS AKTIESELSKAB

The bill (H. R. 8237) for the relief of Bruusgaard Kiosteruds Dampskibs Aktieselskab, a Norwegian corporation of Drammen, Norway, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THOMPSON-VACHE BOAT CO.

The bill (H. R. 2123) for the relief of the Thompson-Vache Boat Co., of Bonnots Mill, Mo., was announced as next in order.

The PRESIDENT pro tempore. This bill has been passed, and a motion to reconsider has been entered.

Mr. SPENCER. Mr. President, is there any objection to the consideration of this bill?

Mr. ROBINSON. I understand the record shows a motion to reconsider the bill, which has already passed, and the motion to reconsider is pending.

Mr. SPENCER. Not House bill 2123.

The PRESIDENT pro tempore. The question is upon the motion to reconsider.

Mr. KING. I withdraw the motion, Mr. President.

Mr. SPENCER. I misunderstood the situation.

Mr. REED of Missouri. Mr. President, if the motion is withdrawn, I think the RECORD ought to show that there was a reconsideration, and that the bill then passed. Would not that be the regular order?

The PRESIDENT pro tempore. It would.

Mr. REED of Missouri. It simply gives this concern a chance to go to court.

The Senate proceeded to consider the bill, which was ordered to a third reading, read the third time, and passed.

C. C. CARSON

The bill (H. R. 2126) for the relief of C. C. Carson was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1733) to authorize the Secretary of War to secure for the United States title to certain private lands contiguous to and within the Militia Target Range Reservation, State of Utah, was announced as next in order.

Mr. WADSWORTH. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

HARRY ROSS HUBBARD

The bill (S. 336) for the relief of Harry Ross Hubbard was considered as in Committee of the Whole, and was read, as follows:

*Be it enacted, etc.*, That the Comptroller General of the United States is authorized and directed to credit the accounts of Harry Ross Hubbard, lieutenant (junior grade) United States Navy, with the sum of $942.25, disallowed in item 5 of statement of differences, certificate No. N-1379-E, dated May 6, 1922.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PROTECTION OF FOREST LANDS, ETC.

The bill (S. 1182) to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote the continuous production of timber on lands chiefly suitable therefor, was announced as next in order.

Mr. KING. Mr. President, may I have an explanation of that bill? It is a very important one. If it can be passed this evening, I shall not object.

Mr. McNARY. I concur with the remarks of the Senator from Utah. The bill is a very large one. It comprehends a national plan for reforestation. I want to give notice that to-morrow morning I shall move to take it up for consideration.

Mr. KING. The Senator understood that no objection was made?

Mr. McNARY. Yes.

Mr. KING. I did not object.

Mr. McNARY. I appreciate that very much indeed.

The PRESIDENT pro tempore. The Senator from Oregon asks that the bill be passed over?

Mr. McNARY. I do.

The PRESIDENT pro tempore. It will be passed over.

Mr. STANFIELD. Mr. President, in view of the withdrawal of the objection of the Senator from New York to Senate bill 2685, Order of Business 354, and inasmuch as we have passed some bills since I served notice that I should object to the passage of other bills, it is evident that I have withdrawn and retracted that statement. I now ask unanimous consent to recur to Order of Business 354.

Mr. ROBINSON. Mr. President, I suggest to the Senator that he let the calendar proceed for awhile, and I think there will be no objection, upon his statement, to recurring to the bill a little later.

Mr. STANFIELD. I hope the Senator from Arkansas is not now going to object.

Mr. ROBINSON. I suggest to the Senator that he let the calendar proceed for the present.

The PRESIDENT pro tempore. Objection is made.

BILL PASSED OVER

The bill (S. 56) for the allowance of certain claims for indemnity for spoliations by the French prior to July 31, 1801, as reported by the Court of Claims, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

REGULATION OF CHILD LABOR

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States giving Congress power to limit or prohibit child labor, was announced as next in order.

Mr. FLETCHER. That measure should be disposed of. It ought to be indefinitely postponed.

Mr. WARREN. It should go off the calendar.

Mr. ROBINSON. That is a joint resolution, identical with one from the House of Representatives which passed the Senate a few days ago, and this should be disposed of.

Mr. FLETCHER. I think it ought to be indefinitely postponed, and go off the calendar, and I so move.

The motion was agreed to.

The PRESIDENT pro tempore. The joint resolution will be indefinitely postponed.

BILL PASSED OVER

The bill (S. 246) for the relief of Margaret I. Varnum, was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

J. H. TOULOUSE

The bill (S. 354) for the relief of J. H. Toulouse, was considered as in Committee of the Whole, and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $631.20 to J. H. Toulouse, to reimburse him for expenses incurred by him in connection with the devising and preparation of certain forms that were adopted by the Sales Tax Unit of the Bureau of Internal Revenue in connection with the collection of the tax on admissions.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3091) declaring an emergency in respect to certain agricultural commodities, to promote equality between agricultural commodities and other commodities, and for other purposes, was announced as next in order.

Mr. WADSWORTH. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

HUBERT REYNOLDS

The bill (H. R. 5541) for the relief of Hubert Reynolds was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the act entitled "An act for the relief of Hubert Reynolds," approved September 21, 1922, be, and the same is hereby, amended by substituting $57,983.20 for the amount $69,300 in line 5, in order that the Postmaster General may be authorized to credit the former postmaster at Greeley, Colo., for the actual value of certain war savings stamps instead of their maturity value as provided by the act.

Mr. KING. May I have an explanation of this measure, Mr. President? It seeks to appropriate $57,000. Is the Senator from Colorado familiar with this bill?

Mr. PHIPPS. I have just read the report. I think the bill should pass, because it merely seeks to correct the amount that was credited to the postmaster, based on the maturity value of the war saving stamps, when he should have been credited with the value at the time the stamps were delivered to him. This is to straighten out the record, and if the bill is not passed the amount will stand there as a balance, because the Government is not going to refund that amount to Mr. Reynolds or to anyone else. I see no objection to the passage of the bill. The report seems to be definite and conclusive.

Mr. KING. I confess that I was unable to comprehend the statement of the Senator because of the noise and confusion in the Chamber. Was this a theft or an embezzlement of funds intrusted to the postmaster for which he now seeks compensation at the hands of the Government?

Mr. PHIPPS. It was a theft, or burglary, and was so found. The postmaster was credited with the gross sum of about $69,300, the maturity value of the war savings stamps, which was thought at that time to be the proper credit to be given, but, as a matter of fact, he should only have been credited with the current or present value of the stamps at the time they were delivered to him. By crediting him with the present value instead of the maturity value the records of the Treasury Department and the Post Office Department can be closed. If the bill is not passed, there will remain a balance there of some $11,000, to which neither Reynolds nor anyone else is entitled.

Mr. KING. Is there any evidence to show that he was free from blame for the theft?

Mr. PHIPPS. Oh, yes; it was on that theory that the Congress passed the former bill, but they gave him credit for the maturity value of the stamps instead of the present value of the stamps. This reduces the amount of the credit.

Mr. KING. This is a bill asking for $57,000 instead of $11,000.

Mr. CAPPER. I call the attention of the Senator from Utah to the statement of Postmaster General New on page 2, in his letter, in which he says:

> The evidence in the case showing that the loss of these stamps resulted from no fault or negligence on the part of the postmaster, he was relieved of responsibility by this act.

This bill, it will be seen, was prepared by the Post Office Department and sent up here with the request that Congress pass it as prepared.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ALBERT O. TUCKER

The bill (S. 2035) for the relief of Albert O. Tucker was considered as in Committee of the Whole, and was read, as follows:

*Be it enacted, etc.*, That in the administration of the pension laws and the laws conferring rights and privileges upon honorably discharged soldiers, Albert O. Tucker, late of Company K, Eleventh Regiment Connecticut Volunteer Infantry, shall be held and considered to have been honorably discharged from the military service of the United States as a member of said company and regiment from July 23, 1863: *Provided*, That no pension shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MEXICAN NATIONALS ADMITTED INTO THE UNITED STATES

The resolution (S. Res. 202) directing the Secretary of Labor to furnish information as to the number of Mexican nationals admitted into the United States during the past 12 months was read and agreed to, as follows:

*Resolved*, That the Secretary of Labor be hereby directed to transmit to the Senate a statement furnishing complete information as to the number of nationals of Mexico admitted into the United States during the past 12 months.

The PRESIDENT pro tempore. The Committee on Education and Labor recommend that the preamble be stricken out, and it will be stricken out.

INDUSTRIAL VOCATIONAL REHABILITATION

The bill (S. 2590) to amend sections 1, 3, and 6 of an act entitled "An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment" was announced as next in order.

Mr. FESS. I ask that that be indefinitely postponed.

The PRESIDENT pro tempore. Without objection, it will be indefinitely postponed.

AGRICULTURAL INFORMATION

The bill (H. R. 7111) to promote American agriculture by making more extensively available and by expanding the service now rendered by the Department of Agriculture in gathering and disseminating information regarding agricultural production, competition, and demand in foreign countries in promoting the sale of farm products abroad, and in other ways, was announced as next in order.

Mr. SMOOT. That can not be passed to-night. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. LADD. Mr. President, I hope the Senator will withdraw his opposition for a moment. I would like to explain this bill for just a moment, if he will withdraw his objection.

The Department of Agriculture is very anxious to have this enacted into law in order that they can carry on their work without misunderstanding. I hope the bill may be passed.

Mr. KING. Objection is made.

Mr. SHIELDS. Mr. President, this is a bill in which the Department of Agriculture is very much interested. It is largely a reenactment of existing legislation for the purpose of clarifying it and codifying it, and its passage would greatly facilitate the disposition of agricultural products in the foreign market.

Mr. KING. I insist on my objection.

The PRESIDENT pro tempore. The bill will be passed over.

BILL PASSED OVER

The bill (S. 1638) authorizing the Court of Claims to adjudicate the claim of Capt. David McD. Shearer for compensation for the adoption and use and acquisition by the United States Government of his patented inventions was announced as next in order.

Mr. SMOOT. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

RELIEF FOR VICTIMS OF AIRPLANE ACCIDENT AT LANGIN FIELD

The bill (S. 1740) to provide relief for the victims of the airplane accident at Langin Field was considered as in Committee of the Whole, and was read, as follows:

*Be it enacted, etc.*, That the Secretary of War is authorized and directed to pay, in lieu of any other payment now authorized by law, (a) the sum of $5,000 to the personal representative of every person not in the military or naval forces of the United States who was killed or whose death is a direct result of injuries sustained in the airplane accident at Langin Field, Moundsville, W. Va., on July 10, 1921; (b) a reasonable amount, not exceeding $2,000, to every such person who was injured in such accident, as reimbursement for medical, surgical, and hospital attendance, supplies, and expenses, and as compensation for loss of time as a direct result of such injury; (c) a reasonable amount to the owner of any property destroyed or damaged by such accident as compensation for such destruction or damage.

SEC. 2. That the amounts to be paid under subdivisions (b) and (c) of section 1 shall be determined after a public hearing by a board of officers appointed by the commanding officer of the nearest aviation post and approved by the Chief of the Air Service and the Secretary of War.

SEC. 3. That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ALLOWANCES TO RETIRED GOVERNMENT EMPLOYEES

The bill (S. 3011) to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, was announced as next in order.

Mr. KING. Let that go over.

Mr. STANFIELD. Mr. President, this is the civil service retirement act, providing for an increase from the maximum of $720 a year to the civil-service retired employees on annuities to the maximum of $1,200 per annum. I hope that whoever has objected to the bill will withdraw the objection and that it may pass at this time. Otherwise I wish to give notice that at the first opportunity I shall move for the immediate consideration of the bill.

Mr. REED of Missouri. Mr. President, do I understand that the bill proposes to raise the retirement pay from $720 to $1,200?

Mr. STANFIELD. That is correct; it does.

Mr. REED of Missouri. I do not want to be understood as opposing the bill, but does not the Senator think that a bill of that importance merits more consideration than we can give it under the five-minute rule?

Mr. STANFIELD. I will say to the Senator from Missouri that I am perfectly willing that it should have more consideration.

Mr. REED of Missouri. I do not want to be understood as objecting.

Mr. STANFIELD. I only wanted the opportunity to give notice that I shall move for its consideration at the first opportunity.

Mr. SMITH. Before we leave this, I would like to ask the Senator what the status of this bill is in the House. Is a bill of similar character being considered in the House?

Mr. STANFIELD. A bill of a similar character has been reported to the House.

Mr. SMITH. Can the Senator tell me what progress it has made in the House?

Mr. STANFIELD. It has been reported from the committee, I think.

Mr. SMITH. The reason I am asking is this: That I am very much interested in this, and there are some features of it that I think are meritorious, and I think the bill ought to be considered and passed at this session.

Mr. STANFIELD. The most I know about it is from the newspaper accounts, which state, as I understand, that in the House there will not be a rule so that the bill can be considered at this session of Congress. However, I think we should consider it here.

The PRESIDENT pro tempore. Objection being made, the bill will be passed over.

BILL PASSED OVER

The bill (S. 626) to prevent the sale of cotton and grain in future markets was announced as next in order.

Mr. OVERMAN. Let that go over.

Mr. KING. The Senator from Louisiana, who is not here this evening, wanted to be heard in regard to that bill.

The PRESIDENT pro tempore. The bill will be passed over.

ALBERT WOOD

The bill (S. 147) for the relief of Albert Wood was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on line 6, to strike out "$1,475" and to insert in lieu thereof "$750," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay to Albert Wood, of Vernonia, Columbia County, Oreg., out of any moneys in the Treasury not otherwise expended, the sum of $750, in full compensation for losses suffered by him through and in connection with the cancellation by the Post Office Department in October, 1915, of a contract held by him for carrying the mails on star route No. 73195, in the State of Oregon, from July 1, 1914, to June 30, 1918.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House had concurred in the following concurrent resolution (S. Con. Res. 21) of the Senate:

*Resolved by the Senate (the House of Representatives concurring)*, That the President of the United States be requested to return to the House of Representatives the enrolled bill (H. R. 5325) conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

A bill (H. R. 6645) to amend the national prohibition act, to provide for a bureau of prohibition in the Treasury Department, to define its powers and duties, and to place its personnel under the civil service act; and

A bill (H. R. 7558) to authorize the payment of an indemnity to the Government of Norway on account of losses sustained by the owners of the Norwegian steamship *Hassel* as the result of a collision between that steamship and the American steamship *Ausable*.

INVESTIGATION OF LOSSES BY WHEAT GROWERS

Mr. NORBECK submitted the following resolution (S. Res. 249), which was referred to the Committee on Agriculture and Forestry:

Whereas the Government of the United States during the World War generally maintained a policy of noninterference with the prices of staple commodities; and

Whereas this policy resulted in the prices of most commodities soaring to entirely new and unheard-of price levels; and

Whereas the Government did not follow its policy of noninterference in regard to wheat, but on the other hand by various means did depress the price of wheat until it was finally fixed at $2.20 per bushel; and

Whereas such price was much below the prevailing market price at the time it was fixed: Now, therefore, be it

*Resolved*, That the Committee on Agriculture and Forestry, or any subcommittee thereof, be, and it hereby is, authorized and directed to investigate the amount of losses that were sustained by the wheat growers of the United States during the period of governmental interference with, and regulation of, the price of wheat, and make report to Congress not later than January 1, 1925.

Said Committee on Agriculture and Forestry, or any subcommittee thereof, is authorized to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding 25 cents per 100 words, to report such hearings as may be had on this subject before said committee, the expense thereof to be paid out of the contingent fund of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 6645) to amend the national prohibition act, to provide for a bureau of prohibition in the Treasury Department, to define its powers and duties, and to place its personnel under the civil service act, was read twice by its title and referred to the Committee on the Judiciary.

ADJUDICATION OF CLAIMS OF AMERICAN CITIZENS

The PRESIDING OFFICER (Mr. LENROOT in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 1192) to confer jurisdiction upon the United States District Court, Northern District of California, to adjudicate the claims of American citizens, which was, on page 1, to strike out all after the word "therefor" in line 12 down to and including "Sea" in line 5, page 2.

Mr. SHORTRIDGE. I move that the Senate concur in the House amendment.

The motion was agreed to.

SCHOOL TEACHERS IN THE DISTRICT OF COLUMBIA

The bill (S. 1230) to amend section 11 of the act entitled "An act for the retirement of public-school teachers in the District of Columbia," approved January 15, 1920, was announced as next in order.

Mr. KING. Let the bill go over.

Mr. McKINLEY. Mr. President, I hope the Senator who objected will permit me to make a statement. The bill is in the interest of 22 District of Columbia school-teachers who had taught for many long years and who had broken down and had to retire just before the general retirement law went into effect. The bill would permit them to receive a pension or retirement pay which the other teachers now receive. It would cost about $9,000. When the bill was first introduced last year there were 28 teachers involved. Since that time six have died and two that I know of are in the home for incurables, entirely dependent upon charity for their support. It seems only right that the bill should pass and I ask that the Senator who objected may withdraw his objection.

Mr. KING. I objected to the passage of the bill for this reason only. It is held by some of the departments that this would constitute a precedent under which all persons who have been in the employ of the Government and who may have retired before the pension bill was passed would have a right to apply to the Government to have a like pension.

As soon as information which I have sought is furnished, which would determine whether this is a precedent and if so what it would impose upon the Government, I shall not object to the consideration of the bill, but until that information is available I hope the Senator will do me the courtesy not to ask for its consideration. I hope to get the information tomorrow.

The PRESIDENT pro tempore. The bill will be passed over.

BILL PASSED OVER

The bill (S. 1642) to provide for the purchase and sale of farm products was announced as next in order.

Mr. SMOOT. Mr. President, I hardly think the bill can be considered under the five-minute rule. I therefore ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

LENA GARAGNON OWENS

A bill (H. R. 2647) for the relief of Lena Garagnon Owens was considered as in Committee of the Whole and was read as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized to pay to Lena Garagnon Owens, of San Antonio, Tex., out of any money not otherwise appropriated, the sum of $3,819.50, in full settlement of her claim against the Government of the United States for damages done to her property and personal injuries sustained through being run down in the streets of San Antonio, Tex., on April 25, 1913, by a section of Battery B, United States Artillery, from Fort Sam Houston, Tex.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

WILLIAM H. FLAGG

The bill (H. R. 4012) to reimburse William H. Flagg and others for property destroyed by mail airplane *No. 73*, operated by the Post Office Department, was considered as in Committee of the Whole and was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized to pay to William H. Flagg and E. B. Flagg, of the city of Cleveland, Ohio, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $2,500, in full settlement of all damages sustained by them as a result of the destruction of their residence, furniture, and personal effects, caused my mail airplane *No. 73*, operated by the United States Post Office Department, striking the said Flaggs' residence and thereby wrecking and burning the same: *Provided*, That no insurance company shall be subrogated to the rights of the said William H. Flagg and E. B. Flagg.

SEC. 2. That the Secretary of the Treasury be, and he is hereby, authorized to pay to Mary Torok and Elmer Torok, of the city of Cleveland, Ohio, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $460, in full settlement of all damages sustained by them as a result of the destruction of their house, caused by mail airplane *No. 73*, operated by the United States Post Office Department, striking the said Mary and Elmer Torok's house and thereby wrecking and burning the same: *Provided*, That no insurance company shall be subrogated to the rights of the said Mary Torok and Elmer Torok.

SEC. 3. That the Secretary of the Treasury be, and he is hereby, authorized to pay to Perry J. Lotz, of the city of Cleveland, Ohio, out of any money in the Treasury of the United States not otherwise appropriated, the sum of $432.24, in full settlement of all damages sustained by him as a result of the destruction of his furniture and personal effects, caused by mail airplane *No. 73*, operated by the United States Post Office Department, striking the said Lotz's residence and thereby wrecking and burning the same: *Provided*, That no insurance company shall be subrogated to the rights of the said Perry J. Lotz.

Mr. FLETCHER. Mr. President, it seems to me it might be advisable to amend the bill so as to provide punishment as for a summary offense of an operator of an airplane who knocks down a house and burns it in this way.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOREIGN-TRADE ZONES

The bill (S. 2570) to provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States to expedite and encourage foreign commerce, and for other purposes, was announced as next in order.

Mr. SMOOT. Mr. President, the Senator from Washington [Mr. JONES] asked me to request that this bill be passed over.

The PRESIDENT pro tempore. The bill will be passed over.

PRESIDENTIAL RESPONSIBILITIES

The joint resolution (S. J. Res. 47) establishing a congressional committee to consider ways and means through legislation to lighten the responsibilities of the President was announced as next in order.

Mr. KING. Let the joint resolution go over.

Mr. EDGE. Mr. President, apparently the Senate has not very much sympathy with our overburdened Executives. The joint resolution, in my judgment, has much merit and many possibilities if a commission would really investigate the situation. Everyone knows without question that no one can relieve the Executive of his political responsibilities, but it is to be considered that through the operation of time the Executive

to-day is compelled, perfunctorily in a way, to sign his name thousands of times, and is compelled to assume membership on many boards and commissions upon which he can not possibly serve; that is, with the knowledge that any public servant would like to have in order to give proper service. Going back just a few months in our recollection and realizing that one President tragically passed away, to a great extent unquestionably overburdened with the responsibilities of the office, and another one likewise only recently passed away, it does seem to me if there is any possible way by which we can relieve the burdens of the President, certainly we ought at least to make the effort to do so.

Mr. ROBINSON. Mr. President, may I ask the Senator a question?

Mr. EDGE. I yield to the Senator from Arkansas.

Mr. ROBINSON. Is the Senator advised whether the Chief Executive desires to be relieved of his responsibilities?

Mr. EDGE. I know nothing about the desire of the Chief Executive, but if the Senator from Arkansas will recall, as I am sure he will seriously, following the passing away of President Harding the newspapers throughout the land in editorial after editorial discussed the great burdens on the Chief Executive of the country and suggested that there might be, in a perfectly logical, businesslike manner, some relief afforded at least from the technical responsibilities and the more or less perfunctory responsibilities of the Chief Executive. My object——

Mr. ROBINSON. Mr. President——

Mr. EDGE. Just a moment. I only have five minutes, the Senator must remember. My object in introducing the joint resolution was to some extent to recognize the justification of just such a criticism and just such an expressed desire. Such a committee could not do any harm. It can at least investigate existing statutes stretching over a period of 140 years. The committee can report to the Senate whether it is feasible or possible to relieve the responsibilities or otherwise. The passage of the resolution can do no harm. It may do no good.

Mr. BAYARD. Mr. President——

Mr. EDGE. I yield to the Senator from Delaware.

Mr. BAYARD. May I suggest to the Senator from New Jersey that if a committee of the Senate were appointed and undertook to confer with the President, he would probably object to our trespassing upon the affairs of the Executive.

Mr. EDGE. It is not a personal proposition at all, and I am quite sure that any Chief Executive would gladly see a committee of the Senate considering the many possibilities to relieve him of the technical burdens of the office. I have presented the resolution. It is a possibility. I believe it has merit. If the Senate does not care to pass it, it is entirely a matter for the Senate to determine. If any Member wishes to object, that is his privilege.

Mr. KING. I suggest to the Senator that the measure calls for an investigation. We recently had a very scorching letter from the President of the United States charging the Senate with encroaching upon the prerogatives of the Chief Executive.

Mr. EDGE. I appreciated that the introduction of the resolution would afford an opportunity for many references that might not be directed to the desire of the sponsor of the resolution. If any Senator wishes to object, it is his privilege.

Mr. KING. I object.

Mr. ROBINSON. Mr. President, will the Senator yield? I wish to suggest——

Mr. WADSWORTH. Regular order.

The PRESIDENT pro tempore. The regular order is demanded. The Clerk will report the next bill on the calendar.

WAR RISK INSURANCE ACT

The bill (S. 2155) to amend and modify the war risk insurance act was announced as next in order.

SEVERAL SENATORS. Over!

The PRESIDENT pro tempore. The bill will be passed over.

JOHN H. RHEINLANDER

The bill (S. 893) for the relief of John H. Rheinlander was considered as in Committee of the Whole and read, as follows:

*Be it enacted, etc.*, That there be paid, out of any money in the Treasury not otherwise appropriated, the sum of $1,200 to John H. Rheinlander, of St. Louis, Mo., to compensate him in full for all claims he may have against the United States arising out of injuries received by him while in the Government employ in the Quartermaster's Department, United States Army, at St. Louis, Mo., in February, 1883.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FLAGSTAFF AT FORT SUMTER

The joint resolution (S. J. Res. 87) authorizing the erection of a flagstaff at Fort Sumter, and for other purposes, was announced as next in order.

Mr. ASHURST. Let that go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

ALMEDA LUCAS

The bill (S. 149) for the relief of Almeda Lucas was considered as in Committee of the Whole and read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury is authorized and directed to pay to Almeda Lucas, the widow of Preston B. C. Lucas, the sum of $5,000, out of any money in the Treasury not otherwise appropriated, as compensation for the loss of certain lands and buildings in Tillamook County, Oreg., as a result of a resurvey of the homestead of the said Preston B. C. Lucas after the issuance of a final patent.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDINGS IN THE DISTRICT OF COLUMBIA

The bill (S. 2284) to provide for the construction of certain public buildings in the District of Columbia was announced as next in order.

Mr. WADSWORTH. Let the bill go over.

Mr. ROBINSON. Mr. President, this is a very important bill.

Mr. WADSWORTH. Yes. It amounts to only $50,000,000.

Mr. ROBINSON. It authorizes an appropriation of $50,000,000 and the expenditure of $10,000,000 annually. I think the bill should be considered, but I do not think it ought to be passed under the present order. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

COAST GUARD VESSEL

The bill (H. R. 6817) to provide for the construction of a vessel for the Coast Guard was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDENT pro tempore. It will go over.

OGDEN CHAMBER OF COMMERCE

The bill (S. 660) for the relief of the Ogden Chamber of Commerce was announced as next in order.

Mr. WADSWORTH. Mr. President, will the Senator from Utah give an explanation of the bill?

Mr. SMOOT. At the time it was decided to locate the arsenal at Ogden, Utah, an appropriation was made for the erection of buildings and for the purchase of land. The War Department asked the Chamber of Commerce of Ogden to get the price of the land and take options on the land, which the Chamber of Commerce did, holding it for the Government. When they secured the option, the Government authorized them to close the deal. They went to the bank and borrowed $21,000 to close the deal. That is the amount of interest that the War Department claimed they could not pay, but they could pay and did pay the principal amount of $21,000. This is the interest at 8 per cent on $21,000 from July 1, 1922, to November 15, 1922, inclusive, on the $21,000 that the Ogden Chamber of Commerce paid in the shape of interest for the Government.

Mr. WADSWORTH. As a matter of fact may I ask the Senator if the interest was not in the nature of rental for the property?

Mr. SMOOT. No; there was no rental charged.

Mr. WADSWORTH. I read from the report:

The annual rental charge to the Government was equal to the annual interest paid upon such borrowed money at 8 per cent.

The good people of Ogden, of course, would like to have the property purchased by the Government and an Army station established there. The Government purchased the property, having first secured possession of it or access to it through an option secured first by the Ogden Chamber of Commerce. Now the Ogden Chamber of Commerce comes back to us and wants $653 to pay the rental on the property for a few months and include in their bill 68 cents for taxes. I think that is "small potatoes," and I object to the consideration of the bill.

The PRESIDENT pro tempore. The bill will be passed over.

ROBERT JUNE

The bill (S. 2586) for the relief of Robert June was announced as next in order.

SEVERAL SENATORS. Over!

The PRESIDENT pro tempore. The bill will go over.

D. H. M'ADAM

The bill (H. R. 1438) for the relief of D. H. MacAdam was announced as next in order.

Mr. FLETCHER. Let the bill go over.

Mr. ROBINSON. Will the Senator making the objection permit an explanation? I think the unanimous-consent agreement under which we are operating provides for that.

It is to afford relief to D. H. MacAdam, postmaster of Honolulu, Hawaii. He took over the office several years ago from one Peterson, who was then the postmaster. Post-office inspectors had examined the office and found the accounts correct. Some years later the succeeding postmaster, MacAdam, discovered a very large shortage in the accounts of his predecessor, Peterson, and a portion of that shortage was collected from the bondsman of the former postmaster. The remaining $5,514.39 is the claim outstanding against the present postmaster, who has been in no sense negligent, who is not even charged with any form of embezzlement or malfeasance or misfeasance in office. The shortage arose under his predecessors. The post-office inspectors gave them clearance. The present postmaster discovered the shortage; and this is to relieve him from further liability. The bill ought to pass.

Mr. SPENCER. Mr. President, I merely wish to add to what the Senator from Arkansas [Mr. ROBINSON] has said, that the man who was responsible for that shortage confessed his guilt, was tried and convicted, and is now in the penitentiary; so that this bill is eminently a fair bill. The beneficiary of the bill was not at all responsible for the shortage.

Mr. FLETCHER. If I am responsible for the objection to the consideration of the bill, I withdraw it.

Mr. SMOOT. I wish also to say to the Senator from Florida that the beneficiary of the bill has lost almost everything he had because of this transaction.

Mr. ROBINSON. Objection to the consideration of the bill has been withdrawn.

Mr. FLETCHER. In view of the statements which have been made, I withdraw my objection to the consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to pay to D. H. MacAdam, of Honolulu, Hawaii, $5,514.39, being the extent of liability of D. H. MacAdam, as postmaster at Honolulu, Hawaii, to the Government of the United States, owing to the embezzlement of Federal funds by the assistant postmaster at Honolulu, Hawaii, prior to and during the term of office of D. H. MacAdam as postmaster at Honolulu, Hawaii.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SERGT. ALVIN C. YORK

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 412) authorizing the President of the United States to appoint Sergt. Alvin C. York as a captain in the United States Army and then place him on the retired list. It authorizes the President of the United States, by and with the advice and consent of the Senate, to appoint Sergt. Alvin C. York, late of Company G, Three hundred and twenty-eighth Infantry, United States Army, an officer with the rank of captain in the United States Army and then to place him on the retired list in that grade.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. WADSWORTH subsequently said: Mr. President, was Order of Business 536, being Senate bill 412, passed?

The PRESIDENT pro tempore. That bill was passed.

Mr. WADSWORTH. I am not going to break the understanding here, but I wish I had been paying attention when that bill was reached on the calendar.

AMENDMENT OF TRADING WITH THE ENEMY ACT

The bill (S. 1548) to amend section 9 of an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved March 4, 1923, as amended, was announced as next in order.

Mr. KING. Mr. President, I shall reserve the right to object to the consideration of that bill. I call the attention of the Senator from California [Mr. SHORTRIDGE] to the fact that I objected to the consideration of the bill the other evening when it was called on the calendar, and I have not seen any reason to change my mind. If, however, he desires to make an explanation of the bill, I shall withhold my objection until he shall have done so.

Mr. SHORTRIDGE. Mr. President, in view of the statement of my friend, it may be idle to attempt to change his present opinion, and yet I may say a word or two.

This bill will not cost the Government any money. It merely authorizes a certain number of citizens in California to commence and to maintain an action in the Federal court as against certain foreign insurance companies. It is claimed—and of course the claim will have to be established by competent evidence—that a fraud was committed by these insurance companies upon the prospective plaintiffs. They seek to commence this action and to maintain it. Therefore it is suggested that the prospective defendants, who are alleged to have committed fraud, shall not be permitted to interpose the statute of limitations.

The second proposition of the bill is that these various plaintiffs may combine and bring one action instead of many; that is the purpose of the bill.

Certain property was seized by the Alien Property Custodian; that property is in the possession of that officer. Claims have been filed with that officer. In order to maintain those claims the suit contemplated will have to be brought. I submit to my learned legal friend from Utah [Mr. KING] that it is but just to permit these citizens to commence the action and have it determined upon the merits. It is perfectly competent for Congress to authorize or to enact or provide in a case such as this that the statute of limitations may not be interposed and become a bar to action.

I have reason to think that, perhaps, the Senator from Utah has received a copy of a very impertinent and improper letter which was sent to some Senators in respect of this action. It is claimed by the representatives of the alien insurance companies, which are German insurance companies, that they did not have ample opportunity to appear before the Committee on the Judiciary in respect of this measure. It has been explained that they will have ample opportunity to appear in that action and there to litigate the whole matter. As the law now is, they will never receive one cent of that money which is in the possession of the Alien Property Custodian until these claims are settled; that is the law as it is to-day; so that it will be to the interest, in point of fact, of these prospective defendant companies to have this matter determined. Wherefore I suggest to my friend the Senator from Utah that this bill might well be enacted into law. I believe it just; I believe it entirely meritorious; and I think if it can get through the other House and shall become a law at this session that all parties in the end will be well satisfied.

Mr. WALSH of Montana. May I be pardoned for saying a word in reference to this matter, inasmuch as the bill was considered by the Committee on the Judiciary, of which I am a member? As I understand, these causes of action, if they were prosecuted as independent actions against the various insurance companies, would be barred by the statute of limitations.

Mr. KING. By the statute of limitations of California.

Mr. WALSH of Montana. Yes.

Mr. KING. And we propose to go into the State of California and set aside the statute of limitations of that State by a Federal statute.

Mr. WALSH of Montana. I want to correct that. That is not the situation at all, if the Senator will pardon me. We are proposing to give these parties a certain right of action against the Alien Property Custodian with respect to property which is in his hands.

We can deny these people any right of action at all. We now propose to provide that in the proceeding which we have authorized them to bring against the Alien Property Custodian, the claimants in California may assert a right against them in the proceedings, and in that proceeding the insurance companies will not be able to set up the bar of the statute of limitations. In other words, we give them a right of action, but we affix to it just such conditions as we see fit, and one of the conditions that we affix is that, in maintaining an action against the Alien Property Custodian with reference to any property in his hands which they claim, they shall not plead the statute of limitations against any claim which any American citizen may set up. We are now providing that these claimants may set up their claim notwithstanding it would otherwise be barred by the statute of limitations, but only in the matter of the assertion of their rights against this particular property. In other words, as I have stated to the Senate, we are giving them a right of action which they would not otherwise have, and we are making provision that they must not plead the statute of limitations against these claims of American citizens.

Mr. KING. Mr. President, I confess that I do not quite understand the Senator from Montana. The point in brief

as I understand it is this: Certain people in California are seeking to bring a suit which is barred by the statute of limitations of the State of California. They want Congress to set aside that statute of limitations so that they may bring suit against the Alien Property Custodian.

Mr. WALSH of Montana. If the Senator will pardon me, that is not the case. We are not authorizing them to bring a suit, but we provide that whenever these companies bring a suit against the Alien Property Custodian——

Mr. KING. To recover their own property.

Mr. WALSH of Montana. To recover their property.

Mr. KING. Which we are holding in trust.

Mr. WALSH of Montana. The Senator understands that situation. I am simply endeavoring to acquaint him with the conditions. We are merely providing that when the insurance companies bring suit these people may set up their claims against them, and the companies shall not be at liberty to plead the statute of limitations.

Mr. KING. I regret very much to feel constrained to adhere to my objection.

The PRESIDENT pro tempore. Objection is made.

DEFICIENCY APPROPRIATIONS

Mr. WARREN. Mr. President, according to the calendar, we are now less than 30 days from the end of the fiscal year. I ask unanimous consent that the Senate proceed to the consideration of House bill 9559, being the second deficiency appropriation bill.

The PRESIDING OFFICER (Mr. LENROOT in the chair). The Senator from Wyoming asks unanimous consent that the Senate proceed to the consideration of House bill 9559, being the second deficiency appropriation bill. Is there objection?

Mr. ASHURST. Mr. President, I appreciate the necessity for the passage of the deficiency bill. It carries items that should be passed and go to conference. My colleague [Mr. CAMERON] has proposed some amendments to this bill which are vital and which are recommended by the fact-finding commission. I join heartily with my colleague in his advocacy of those amendments. I submit for the consideration of Senators the question as to whether or not we ought to take up the deficiency appropriation bill, appropriating millions of dollars, and consider this bill under the five-minute rule.

Mr. ROBINSON. I suggest to the Senator that the five-minute rule would not apply to the appropriation bill.

The PRESIDING OFFICER. The five-minute rule would not apply.

Is there objection to the request of the Senator from Wyoming?

Mr. GLASS. Mr. President, reserving the right to object, I submit that to grant the unanimous consent asked by the Senator from Wyoming would mean to discharge the balance of the calendar for the evening. I wonder if the Senator from Wyoming will not withhold his request? I have a bill on the calendar which I have been waiting here to have reached.

Mr. WARREN. I think I am familiar with the bill which the Senator has in mind; it is an important bill. If the Senator will allow me to get up the appropriation bill, I will be glad to yield to him if the measure which he desires to have considered will not lead to any extended debate.

Mr. CAMERON. Mr. President, I object to the request for unanimous consent to take up the deficiency bill.

Mr. WARREN. Mr. President, I move that the Senate proceed to the consideration of House bill 9559, the second deficiency appropriation bill.

Mr. ASHURST. Mr. President, my colleague objected to the request of the Senator from Wyoming for unanimous consent to consider the deficiency bill. I ask that the agreement be read to see whether or not this is an eligible motion. I have no disposition to be captious or to willfully delay the appropriation bill, but my colleague and I believe that some amendments vital to the people of our State ought to go on this bill, and we want to be sure that we will not be hampered by a five-minute rule.

The PRESIDING OFFICER. The Secretary will read the unanimous-consent agreement.

The reading clerk read as follows:

*Ordered* (by unanimous consent) that when the Senate concludes its business on Thursday afternoon, June 5, 1924, it take a recess until 8 p. m., and at the evening session from 8 to 11 p. m. the Senate shall consider only conference reports, appropriation bills, and unobjected bills on the calendar under Rule VIII; and if there be any objection made, a Senator may be allowed five minutes to explain the bill.

Mr. WARREN. Mr. President——

Mr. ASHURST. Will the Senator yield to me?

Mr. WARREN. I wish to say a few words.

Mr. ASHURST. I beg pardon.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WARREN. This is a bill which it is no pleasure to me to take up against the wishes of my colleagues in the Senate, but it is a matter of necessity. There are certain clerks and members of the committee that have worked night and day over it and spent most of last night upon it in order to get it ready. I think we ought to get it along, if possible, to-night, so that we may meet the exigencies of the House differing with us as to our amendments, and the conferences that will have to follow.

Mr. ASHURST. If the Senator will yield to me, I desire to state that since reading the unanimous-consent agreement I am of opinion—and I think I should frankly say so—that the motion is an eligible motion under the peculiar wording of the agreement. It says:

Shall consider only conference reports, appropriation bills, and unobjected bills.

I really believe—and I have never had any hesitancy in expressing what I think—I really think the motion, therefore, is eligible; but the appropriation bill would not be subject to the five-minute rule.

Mr. WARREN. I understood that the motion was within the rule; but, on the other hand, I am perfectly willing to withdraw it and allow the Senate to go on with the calendar if I may take up the appropriation bill later, and if I may have the attendance of Senators to take up the bill later on.

Mr. BORAH. Does the Senator mean later on to-night?

Mr. WARREN. Yes.

Mr. BORAH. Oh, well, if we are going to take it up to-night let us take it up now.

Mr. BRANDEGEE. Yes; let us take it up now.

Mr. WARREN. I wish to do what the Senators wish to have me do.

Mr. HEFLIN. If it will take only a little while, I think we had better take it up now.

Mr. FLETCHER. Mr. President, under the unanimous-consent agreement I do not think the Senator has to make any motion. All he has to do is to call up the bill.

Mr. WARREN. I called it up, and an objection was made, and that is the reason why I made the motion; but I think the Senator is right. Really, the purpose of making the unanimous-consent agreement, in the first instance was to permit the consideration of appropriation bills and conference reports.

Mr. President, I do not hear any particular opposition to taking up the bill, and I therefore make the motion. The Senate can vote it down, if it desires, and I shall be perfectly satisfied either way.

The PRESIDING OFFICER. The Senator from Wyoming moves that the Senate proceed to the consideration of the House bill 9559.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years; to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, which had been reported from the Committee on Appropriations, with amendments.

Mr. WARREN. Mr. President, I ask that the formal reading of the bill be dispensed with, and that it be read for amendment, the amendments of the committee to be first considered.

The PRESIDING OFFICER. The Senator from Wyoming asks unanimous consent that the formal reading of the bill be dispensed with, and that it be read for amendment, the committee amendments to be first considered. Is there objection?

Mr. KING. Mr. President, that means, as I understand, that the bill must be read textually. We have had no chance to see it, and I shall insist that it be read textually—not merely a few words, but the entire bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming? The Chair hears none.

SALE OF MILK, CREAM, ETC., IN THE DISTRICT

Mr. GLASS. Mr. President——

Mr. WARREN. I promised to yield to the Senator from Virginia.

Mr. GLASS. I understood that the Senator from Wyoming would yield to me to ask unanimous consent to consider a bill on the calendar.

Mr. WARREN. I assumed that to be the next bill or two on the calendar.

Mr. GLASS. Mr. President, I ask unanimous consent for the consideration of Senate bill 2803, to regulate within the District of Columbia the sale of milk, cream, and certain milk products, and for other purposes.

Mr. SMOOT. What is the calendar number?

Mr. GLASS. It is Order of Business No. 540.

The PRESIDING OFFICER. The Senator from Virginia asks unanimous consent for the present consideration of Senate bill 2803. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GLASS. Mr. President, I will explain that this is the bill which was reached on the last day set apart for the consideration of bills on the calendar by unanimous consent. It was unanimously reported by a subcommittee of the Committee on the District of Columbia, unanimously approved by the Commissioners of the District, and unanimously approved and reported from the District of Columbia Committee; but there were objections on the last occasion, and those objections have been met.

I propose an amendment in the nature of a substitute for the bill, which I send to the desk and ask to have read.

The PRESIDING OFFICER (Mr. HARRISON in the chair). The Secretary will read the amendment in the nature of a substitute.

The READING CLERK. It is proposed to strike out all after the enacting clause, and to insert in lieu thereof the following:

That from and after the passage of this act none but pure, clean, and wholesome milk, cream, or ice cream conforming to the definitions hereinafter specified shall be produced in or shipped into the District of Columbia or held or offered for sale therein, and then only as hereinafter provided.

SEC. 2. That no person shall keep or maintain a dairy or dairy farm within the District of Columbia, or produce for sale any milk or cream therein, or bring or send into said District for sale any milk, cream, or ice cream without a permit so to do from the health officer of said District, and then only in accordance with the terms of said permit. Said permit shall be for the calendar year only in which it is issued and shall be renewable annually on the 1st day of January of each calendar year thereafter. Application for said permit shall be in writing upon a form prescribed by said health officer and shall be accompanied by such detailed description of the dairy or dairy farm or other place where said milk, cream, or ice cream are produced, handled, stored, manufactured, sold, or offered for sale as the said health officer may require, and shall be accompanied by a certificate signed by an official of the health department of the District of Columbia, the United States Department of Agriculture, or some veterinarian authorized by the United States Department of Agriculture or the health department of the District of Columbia, detailed for the purpose, certifying that the cattle producing such milk or cream are physically sound, and in the case of milk or cream held, offered for sale, or sold as such shall in addition be accompanied by a certificate signed by one of the officials aforesaid certifying the cattle producing such milk or cream have reacted negatively to the tuberculin test as prescribed by the Bureau of Animal Industry, United States Department of Agriculture, within one year previous to the filing of the application: *Provided*, That a permit may be issued to a corporation, partnership, or mutual association to ship milk and cream under the same conditions as the individual shipper: *Provided further*, That the health officer may accept the certification of a State or municipal health officer: *And provided further*, That final action on each application shall, if practicable, be taken within 30 days after the receipt of such application at the health department.

SEC. 3. That the health officer is hereby authorized and empowered to suspend any permit issued under authority of this act whenever in his opinion the public health is endangered by the impurity or unwholesomeness of the milk supply of any such farm, corporation, partnership, or mutual association, and such suspension shall remain in force until such time as the said health officer is satisfied the danger no longer continues: *Provided*, That whenever any permit is suspended the health officer shall furnish in writing to the holder of said permit his reasons for such suspension, and the dealer receiving such milk or cream shall also be promptly notified by the health officer of such suspension.

SEC. 4. That nothing in this act shall be construed to prohibit interstate shipments of milk or cream into the District of Columbia for manufacturing into ice cream: *Provided*, That such milk or cream is produced or handled in accordance with the specifications of an authorized medical milk commission or a State board of health.

SEC. 5. That failure or refusal on the part of any person holding a permit under authority of this act to permit the health officer of the District of Columbia, or his duly appointed representative, to inspect the dairy, dairy farm, cattle, and all appurtenances of such dairy, dairy farm, or other places where said milk, cream, or ice cream are produced, stored, manufactured, handled, offered for sale, or sold may be deemed sufficient to suspend or revoke such permit at the discretion of said health officer.

SEC. 6. That the health officer or his duly appointed representative be, and he is hereby, authorized to seize all milk, cream, or ice cream which may, in violation of the provisions of this act, be brought into the District of Columbia. The owner of any such milk, cream, or ice cream shall be at once notified of such seizure; and if he shall fail within 24 hours to direct the removal of the same from the District of Columbia, the health officer may destroy or otherwise dispose of the said milk, cream, or ice cream.

SEC. 7. That the health officer of the District of Columbia, under the direction of and with the approval of the Commissioners of said District, is hereby authorized and empowered to make and enforce all such reasonable regulations consistent with this act from time to time as he may deem proper to protect the milk, cream, and ice-cream supply of the said District of Columbia: *Provided, however*, That such regulations shall be published once at least 30 days in some daily newspaper in the District of Columbia of general circulation before any penalty be exacted for violation thereof.

SEC. 8. That all milk wagons within the District of Columbia shall have the name of the owner, the number of the permit, and the location of the dairy from which said wagons haul milk or cream painted thereon plainly and legibly: *Provided*, That all trucks or wagons engaged in bringing milk, cream, or ice cream into the said District shall have the name and address of the owner painted plainly and legibly thereon.

SEC. 9. That all persons within the District of Columbia, having or offering for sale, or having in their possession with intent to sell milk, cream, or ice cream, shall at all times keep the name or names of the person or persons from whom the said milk, cream, or ice cream have been obtained posted in a conspicuous place wherever such milk, cream, or ice cream are kept or offered for sale: *Provided, however*, That general distributors of milk, cream, or ice cream shall only be required to keep a record of the name of all persons from whom said distributor is receiving milk, cream, or ice cream, which record shall at all times be open to inspection by the health officer or his duly authorized representative.

SEC. 10. That no person shall sell, exchange, or deliver, or have in his possession with intent to sell, exchange, or deliver, any "skimmed milk," or "reconstructed milk," or "reconstructed cream" unless every can, vessel, package, or container is plainly labeled conveying to the purchaser the exact nature of its contents.

SEC. 11. That it shall be unlawful for any person or persons to sell, offer for sale, or have in their possession with intent to sell, within the District of Columbia, milk or cream taken from cows less than 15 days before or 7 days after parturition, nor shall any such milk or cream be used in the manufacture of ice cream.

SEC. 12. That any person or persons holding a permit issued under authority of this act being afflicted, or any member of his family, hired help, or other person on said dairy farm being afflicted with a communicable disease, or if he has reason to suspect any such communicable disease, shall report the same to the health officer of the District of Columbia within 24 hours after becoming aware thereof. Willful violation of this section shall be deemed sufficient cause for revocation of said permit.

SEC. 13. That for the purpose and within the meaning of this act "milk" shall be held to be the lacteal secretion obtained from the complete milking of cows.

"Cream" is that portion of the milk rich in fat which rises to the surface of the milk on standing or is separated from it by centrifugal force or otherwise, and shall contain not less than 20 per cent of butterfat and shall not be offered for sale or sold unless and until it has been pasteurized under regulations prescribed by the health officer, and shall be free from pathogenic organisms and from visible dirt.

The term "pasteurized" as used in the act shall be held to mean the heating of milk or cream to a temperature of not less than 142° F. and maintained at such temperature for a period of not less than 30 minutes, then immediately cooled to a temperature of not more than 45° F. and maintained at not more than that temperature.

"Raw milk" is milk produced from healthy cows as determined by physical examination and by a tuberculin test made within one year previous to the time of filing of the application; said physical examination and tuberculin test shall be made by an official of the health department of the District of Columbia, the United States Department of Agriculture, or some veterinarian authorized by the United States Department of Agriculture or the health department of the District of Columbia, to make such examination and tuberculin test; and said tuberculin test shall be repeated at least one time during each succeeding calendar year; and when reactors are found in any dairy herd licensed under this act, the tuberculin test shall be repeated semiannually thereafter until such time as tuberculosis is eradicated from the herd: *Provided*, That no cow or bull shall be added to any dairy herd licensed under this act until such cow or bull has first been physically examined and tuberculin tested as hereinbefore provided. The farm on which the milk is produced shall rate not less than 80

per cent, the dairy from which such milk is sold or distributed not less than 90 per cent, and the cows producing the milk not less than 95 per cent on the rating cards in use at the time by the health department of the District of Columbia, and said milk shall not at any time contain less than 3.5 per cent of butterfat nor less than 11.5 per cent of total solids; nor shall it contain when delivered to the consumer more than 20,000 bacteria per cubic centimeter total count, and no colon bacilli or other pathogenic organism shall be present in one-fiftieth cubic centimeter, and the milk shall be free from all visible dirt.

"Pasteurized milk" is milk produced from healthy cows, as determined by the physical examination and tuberculin test as hereinbefore provided for "raw" milk. Said milk shall be pasteurized under regulations prescribed by the health officer. The milk immediately after being pasteurized shall be cooled to a temperature of not more than 45° F. and maintained to at least such temperature. The farm on which the milk is produced must rate not less than 70 per cent, the dairy from which said milk is sold or distributed not less than 85 per cent, and the cows producing the milk not less than 90 per cent on the rating cards in use at the time by the health department of the District of Columbia. It shall not contain less than 3.5 per cent of butterfat or 11.5 per cent total solids; nor shall it contain when delivered to the consumer more than 50,000 bacteria total count per cubic centimeter, and be free from colon bacilli and other pathogenic organisms and all visible dirt. No such milk shall be pasteurized more than one time.

"Certified milk" is milk produced and handled in accordance with specifications of an authorized medical milk commission and must be labeled according to the specifications of the commission which certifies to the quality of the product. A copy of the necessary articles of certification must be filed in the health department of the District of Columbia and be approved by the health officer of said District.

"Reconstructed milk" or "cream" means milk or cream which has been concentrated or dried in any manner and subsequently restored to a liquid state.

"Skimmed milk" is that part of milk from which the fat has been partly or entirely removed and shall contain not less than 9 per cent of milk solids, inclusive of fat.

"Ice cream" means the frozen product or mixture made from pasteurized cream, milk, or product of milk sweetened with sugar, to which has been added pure, wholesome food gelatin, vegetable gum, or other thickener, with or without wholesome flavoring extract, fruits, nuts, cocoa, chocolate, eggs, cake, candy, or confections, and which contains not less than 8 per cent, by weight, of milk (butter) fat.

SEC. 14. That no person in the District of Columbia shall handle, sell, offer for sale, or have in his possession with intent to sell, any milk, cream, or ice cream which does not comply with the definitions hereinbefore specified, and all bottles, cans, vessels, or other containers in which said milk or cream is sold or offered for sale shall have plainly and legibly printed thereon the grade of the milk or cream which is contained therein.

SEC. 15. That the pasteurization of all milk or cream required under this act to be pasteurized shall be done under regulations to be prescribed by the health officer of the District of Columbia and open to the supervision of said health officer.

SEC. 16. That any person who shall molest, hinder, or in any manner prevent said health officer or his duly appointed agent from performing any duty imposed upon him or them by the provisions of this act shall be deemed guilty of violating the provisions of said act and be liable to the penalty prescribed therefor.

SEC. 17. That every person or persons receiving a permit to ship milk or cream into the District of Columbia from any creamery or receiving station aforesaid shall keep posted at all times in such creamery or receiving station the names of all persons licensed under this act who are delivering milk or cream at any such creamery or receiving station, and shall keep a record of all milk and cream received and furnish from time to time a sworn statement giving such information relative thereto as the said health officer may require. The health officer of the District of Columbia shall have power by regulation to include other places than creameries or receiving stations, under the provisions of this section, from time to time as may be necessary in his judgment.

SEC. 18. That no person in the District of Columbia licensed under this act shall receive any milk or cream from any source until he shall have first ascertained from the health department that the person from whom such milk is obtained holds a license from the health officer of said District to send milk or cream into the District of Columbia.

SEC. 19. That any person or persons violating any of the provisions of this act, or of any of the regulations promulgated hereunder, shall, on conviction, be punished for the first offense by a fine of not more than $10, for the second offense by a fine of not more than $50, and for any subsequent offenses within one year a fine of not more than $500, or by imprisonment in the workhouse for not more than 30 days, or by both such fine and imprisonment, in the discretion of the court, and in addition any license issued under authority of this act may be revoked. Prosecutions hereunder shall be in the police court by the District of Columbia.

SEC. 20. That all acts and parts of acts inconsistent with the foregoing be, and the same are hereby, repealed.

Mr. GLASS. Mr. President, I suggest that the Senator from New York [Mr. COPELAND], who has great familiarity with the subject matter of the bill, briefly state the nature of it.

Mr. LENROOT. Mr. President, I wish to say that I have a number of objections to this bill from constituents in my State who ship large quantities of cream and milk. I do not know what these changes are. For the present I shall have to object for that reason.

Mr. COPELAND. I hope the Senator will withhold his objection for a moment.

Mr. LENROOT. I will.

Mr. COPELAND. We have met all the objections of the milk and cream shippers from the State of Wisconsin, from Minnesota, and from Pennsylvania.

Mr. WILLIS. Mr. President——

Mr. COPELAND. And from Ohio.

Mr. WILLIS. The Senator will remember that I stated to him certain objections that were made by the milk producers in my State.

Mr. COPELAND. Yes.

Mr. WILLIS. Does the Senator think that those objections have been met?

Mr. COPELAND. I will say to the Senator from Ohio and to the Senator from Wisconsin, as well as to the Senators from Minnesota and Pennsylvania, that all those objections have been met, and the shippers are entirely satisfied, with just one exception, which I want to mention now.

I ask leave to present an amendment to page 9, line 9, inserting the word "now" between "cards" and "in," and to strike out the last three words, so that it will read:

On the rating cards now in use—

And so forth. With that amendment, Mr. President, this bill meets every objection. Furthermore, if it is enforced, it will give the city of Washington the highest grade of milk of any city in the world.

Mr. PEPPER. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Pennsylvania?

Mr. COPELAND. I yield.

Mr. PEPPER. I wish to inquire specifically whether the amendments now proposed eliminate the disqualification of a shipper because he may happen to be engaged in furnishing uncertified milk to some of his customers, while furnishing certified milk to others?

Mr. COPELAND. Mr. President, section 17 originally contained language which made impossible the thing mentioned by the Senator from Pennsylvania; but with the elimination of the first half of that section the objection has been met, and that milk can be shipped.

Mr. LENROOT. Mr. President, upon the assurances that have been given, I withdraw the objection.

The PRESIDING OFFICER. The objection is withdrawn. The question is on the amendment, in the nature of a substitute, offered by the Senator from Virginia.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to regulate within the District of Columbia the sale of milk, cream, and ice cream, and for other purposes."

### JOHN F. MALLEY

Mr. WALSH of Massachusetts (for Mr. CARAWAY), from the Committee on Claims, to which was referred the bill (S. 2714) for the relief of John F. Malley, reported it with amendments and submitted a report (No. 773) thereon.

### AMENDMENT OF BANKRUPTCY LAWS

Mr. WALSH of Montana, from the Committee on the Judiciary, to which was referred the bill (S. 1649) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, reported it with amendments and submitted a report (No. 774) thereon.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House further insisted on its amendment to the amendment of the Senate numbered 1 to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes; still further insisted on its disagreement to the amendments of the Senate numbered 2 to 167, inclusive, to the said bill; agreed to a further conference; and that Mr. DAVIS of Minnesota, Mr. FUNK, Mr. MADDEN, Mr. AYRES, and Mr. BYRNS of Tennessee were appointed managers on the part of the House at the further conference.

DEFICIENCY APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

The PRESIDING OFFICER (Mr. LENROOT in the chair). The Secretary will read the bill.

The principal clerk proceeded to read the bill.

Mr. HARRISON. Mr. President, a parliamentary inquiry. Was there an agreement that the committee amendments should be first considered?

The PRESIDING OFFICER. There was.

Mr. HARRISON. Reserving the right to object, may I ask the Senator from Wyoming if he has any objection to an amendment that was considered by the committee to increase the amount of the appropriation by $10,000 for the naval stores industry?

Mr. WARREN. I shall be glad if the Senator will repeat his statement. My attention was diverted.

Mr. HARRISON. I desire to have incorporated in the bill an amendment that carries $10,000 for general expenses under the Bureau of Chemistry for enabling the Secretary of Agriculture to carry into effect the provisions of the act of March 3, 1923.

Mr. WARREN. Let me say that I know what the item is, but we are working under a unanimous-consent agreement that we shall first consider the amendments of the committee.

Mr. HARRISON. I understand; but I just want to know, before we proceed with this unanimous-consent agreement, if the Senator is going to raise any objection to the amendment when I propose it.

Mr. WARREN. The Senator will have a perfect right to offer the amendment just as soon as we finish the consideration of the committee amendments.

The PRESIDING OFFICER. The Secretary will state the first amendment of the committee.

The first amendment of the Committee on Appropriations was, at the top of page 2, to insert:

SENATE

For additional amount to pay John G. Holland, jr., for services as assistant clerk to the Committee on Public Lands and Surveys during the investigation of leases upon naval oil reserves, $250.

The amendment was agreed to.

The next amendment was, on page 2, after line 5, to insert:

For additional amount to pay Ernest K. Hill for services as assistant clerk to the Committee on Public Lands and Surveys during the investigation of leases upon naval oil reserves, $250.

The amendment was agreed to.

The next amendment was, on page 2, after line 9, to insert:

For additional salary of the Postmaster of the Senate, fiscal year 1924, $860.

The amendment was agreed to.

The next amendment was, on page 2, after line 11, to insert:

For payment to Albert Reid for expert services rendered by him to the Senate Committee on Finance during the Sixty-eighth Congress, first session, in compiling, editing, and indexing hearings, special reports, and bills relating to the revenue act of 1924 and the World War adjusted compensation act, $125.

The amendment was agreed to.

The next amendment was, on page 2, after line 17, to insert:

To pay Alexander K. Meek for extra and expert services rendered to the Committee on Pensions during the first session of the Sixty-eighth Congress as an assistant clerk to said committee, by detail from the Bureau of Pensions, $1,200.

The amendment was agreed to.

The next amendment was, on page 2, after line 22, to insert:

For miscellaneous items exclusive of labor, $50,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 23, to insert:

For additional amount to pay Louis Rose and U. G. Gordon, employees of the Senate, $40 each for services rendered the Committee on Privileges and Elections during investigation of the election in 1922 of a Senator from the State of Texas, $80.

The amendment was agreed to.

The next amendment was, under the heading "Architect of the Capitol," on page 4, after line 17, to insert:

Capitol Building and repairs: For amount required in connection with the completion of the frieze in the rotunda of the Capitol, fiscal years 1924 and 1925, $5,000.

The amendment was agreed to.

The next amendment was, under the heading "American Battle Monuments Commission," on page 5, line 14, before the word "motor-propelled," to strike out "one"; in line 15, after the word "carrying," strike out "vehicle" and to insert "vehicles"; and in line 16, after the word "War," to insert "or other departments of the Government," so as to make the paragraph read:

The appropriation of $95,750 made for the expenses of the American Battle Monuments Commission by the act of April 2, 1924, Public No. 66, Sixty-eighth Congress, is hereby made available for the maintenance, repair, and operation of motor-propelled passenger-carrying vehicles that may be furnished by the Secretary of War or other departments of the Government for the official use of the said commission in foreign countries.

The amendment was agreed to.

The next amendment was, under the heading "District of Columbia. Public schools," on page 8, after line 3, to insert:

For additional amount required for payment of salaries of administrative and supervisory officers, teachers, librarians, and attendance officers in the public schools during the fiscal year ending June 30, 1925, including two first assistant superintendents and one chief examiner, $1,148,570: *Provided*, That this sum and the amounts specifically appropriated in the District of Columbia appropriation act for the fiscal year 1925, for salaries of officers, teachers, librarians, attendance officers, longevity pay, and allowance to principals are authorized to be consolidated and treated as one amount for the payment of salaries of administrative and supervisory officers, teachers, librarians, and attendance officers in such numbers and at such rates of compensation as shall be authorized by law for said fiscal year: *Provided further*, That the appropriation for Americanization work for the fiscal year 1925 is hereby reduced by the sum of $1,800, which sum is hereby authorized to be transferred to and made a part of the foregoing consolidated amount.

The amendment was agreed to.

The next amendment was, on page 8, after line 21, to insert:

For additional amount for salaries of employees of the community center department of the public schools for the fiscal year 1925, $3,400, to be paid wholly out of the revenues of the District of Columbia: *Provided*, That in addition to this sum, the appropriation contained in the District of Columbia appropriation act for the fiscal year 1925 is made available for the payment of the salaries of one general director, two general secretaries, and seven full-time community secretaries, at such rates of compensation as shall be authorized by law for said fiscal year, and for the payment of compensation of other employees, other than janitors, including part-time community secretaries, at such rates of pay as shall be fixed by the Board of Education: *Provided further*, That not more than 85 per cent of the total amount appropriated for the community center department for the fiscal year ending June 30, 1925, shall be expended for salaries of employees.

The amendment was agreed to.

The next amendment was, on page 14, after line 9, to insert:

MEDICAL CHARITIES

For care and treatment of indigent patients under contracts to be made by the Board of Charities with the following institutions and for not to exceed the following amounts, respectively:

Central Dispensary and Emergency Hospital: Fiscal year 1922, $2,991.15; fiscal year 1923, $8,303.40.

Eastern Dispensary and Casualty Hospital: Fiscal year 1922, $878.35; fiscal year 1923, $6,236.15.

The amendment was agreed to.

The next amendment was, under the heading "Federal Board for Vocational Education," on page 19, after line 8, to insert:

To extend to the Territory of Hawaii the benefits of the act approved June 2, 1920 (41 Stat. p. 735), in accordance with the provisions of the act entitled "An act to extend the provisions of certain laws to the Territory of Hawaii," approved March 10, 1924, fiscal year 1925, $5,000.

The amendment was agreed to.

The next amendment was, under the heading "Department of Commerce, Bureau of Foreign and Domestic Commerce," on page 24, after line 17, to insert:

The Secretary of Commerce is authorized and directed to pay, out of any current appropriation for the Bureau of Foreign and Domestic Commerce, the amount of any official checks not exceeding the sum of $1,000 drawn in the fiscal year 1924 by James W. Boyer, jr., special disbursing agent at Constantinople, Turkey, which for any reason can not be paid from the officers' credit balance with the Treasurer of the United States: *Provided*, That the amount of any payments made hereunder shall not be held to relieve the disbursing officer issuing such checks, nor the sureties on his bond, from responsibility or liability to the United States.

The amendment was agreed to.

The next amendment was, under the heading "Interior Department," on page 26, after line 21, to insert:

GENERAL LAND OFFICE

Reimbursement to State of Utah: To reimburse the State of Utah, as provided in the act of Congress approved August 18, 1894, for moneys advanced by said State to the United States on April 12, 1922, August 12, 1922, and November 13, 1922, to secure the survey of lands granted to said State, $50,000.

The amendment was agreed to.

The next amendment was, under the heading "Interior Department, Bureau of Indian Affairs," on page 27, after line 9, to insert:

For rebuilding dairy and horse barns at Carson City Indian School, Carson City, Nev., fiscal years 1924 and 1925, $7,500.

The amendment was agreed to.

The next amendment was, under the subhead "Reclamation Service," on page 29, after line 8, to insert:

For all expenditures authorized by the act of June 17, 1902 (32 Stat. p. 388), and acts amendatory thereof or supplementary thereto, known as the reclamation law and all other acts under which expenditures from said fund are authorized, including salaries in the District of Columbia and elsewhere; examination of estimates for appropriations in the field; refunds for overcollections hereafter received on account of water-right charges, rentals, and deposits for other purposes; printing and binding, not exceeding $15,000; purchase, maintenance, and operation of horse-drawn or motor-propelled passenger-carrying vehicles; payment of damages caused to the owners of lands or private property of any kind by reason of the operations of the United States, its officers or employees, in the survey, construction, operation, or maintenance of irrigation works, and which may be compromised by agreement between the claimant and the Secretary of the Interior; and payment for official telephone service in the field hereafter incurred in case of official telephones installed in private houses when authorized under regulations established by the Secretary of the Interior.

The amendment was agreed to.

The next amendment was, at the top of page 31, to insert:

North Platte irrigation project, Nebraska and Wyoming: For continued investigations, commencement of construction of the Guernsey Reservoir, and incidental operations, $800,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 4, to insert:

Spanish Springs irrigation project, Nevada: For continued investigations, commencement of construction, and incidental operations, $200,000.

The amendment was agreed to.

Mr. WARREN. Mr. President, the language, line 8 down to and including line 20, ought to be in italics, as the items included therein are all committee amendments.

The PRESIDENT pro tempore. The amendments will be stated.

The READING CLERK. On page 31, at the beginning of line 8, it is proposed to insert:

Salt Lake Basin irrigation project, Utah: For continued investigations, continuation of construction, and incidental operations, $1,500,000.

The amendment was agreed to.

Mr. PITTMAN. Mr. President, has the amendment beginning in line 5, on page 31, been agreed to?

The PRESIDENT pro tempore. That amendment has been agreed to.

Mr. WARREN. I desire to say to the Senator from Nevada that there is a complication in reference to that time; but I have endeavored to do what the Senator from Nevada would desire to be done and what I should desire to be done in a similar case. When the fact-finding commission reported in reference to this matter they reported in favor of an appropriation of $800,000 for the Spanish Springs irrigation project in Nevada, as they reported in favor of an appropriation of $2,500,000 for the preceding item, but they also reported that this year they could only use $200,000; and that was the estimate that came from the Budget Bureau.

I thought perhaps it would suit the Senators from Nevada better—and the Committee on Appropriations concurred in that opinion—to have a smaller amount, which would be unassailable, rather than to appropriate the larger sum. Of course, however, if that is not satisfactory, I shall not resist if the Senator from Nevada moves to increase the appropriation to $800,000.

Mr. PITTMAN. Mr. President, I remember that when the bill making appropriations for the Interior Department was under consideration there was under discussion before the committee, if I am not mistaken, the items for the North Platte, the Spanish Springs, the Salt Lake Basin irrigation, the Owyhee, and the Warm Springs (Vale) irrigation projects.

Mr. WARREN. I think there was a bill introduced in the House in reference to those items, but not in the Senate.

Mr. PITTMAN. I notice here that Salt Lake Basin irrigation project, in Utah, has an appropriation of $1,500,000; that the Owyhee project, in Oregon, has an appropriation of $1,250,000; that the Warm Spring (Vale) irrigation project, in Oregon, has an appropriation of $250,000; and that the Yakima irrigation project, in Washington, has an appropriation of $1,500,000.

Mr. WARREN. Does the Senator desire that the amount of the appropriation for the Spanish Springs irrigation project, in Nevada, shall be increased from $200,000 to $800,000?

Mr. PITTMAN. I desire that the appropriation for that purpose shall be increased to $800,000.

Mr. WARREN. An amendment to that effect would be an amendment to the committee amendment, and would be in order.

Mr. PITTMAN. I offer that amendment.

Mr. ODDIE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to his colleague?

Mr. PITTMAN. I shall yield after the amendment which I have offered shall have been stated.

Mr. ODDIE. Mr. President, I have an amendment pending before the Senate increasing the amount of this appropriation to $800,000.

Mr. PITTMAN. The amendment which my colleague desires to offer is possibly the one which I have just offered.

The PRESIDENT pro tempore. To what amendment is the junior Senator from Nevada referring?

Mr. ODDIE. I am referring to the amendment which I presented on May 20 last, and which was printed.

Mr. PITTMAN. The amendment which I offer is exactly the same proposition which my colleague has pending. He has offered a bill in the nature of an amendment to be offered when this bill came up. It is immaterial, however, whether the junior Senator from Nevada offers the amendment or I offer it.

The PRESIDENT pro tempore. The Chair understands that the amendment must be offered at this time.

Mr. PITTMAN. I have just moved an amendment to increase the item on page 31, beginning in line 5, from $200,000 to $800,000.

Mr. WARREN. Being a committee amendment, it is, of course, open to amendment.

The PRESIDENT pro tempore. The vote by which the committee amendment was agreed to will have to be reconsidered.

Mr. WARREN. That may, of course, be done.

Mr. PITTMAN. I ask unanimous consent that the vote whereby the committee amendment was agreed to may be reconsidered.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The vote whereby the committee amendment on page 31, from line 5 to line 7, was agreed to is reconsidered.

Mr. ODDIE. Mr. President——

Mr. PITTMAN. I move to amend the committee amendment on page 31, line 7, by striking out "$200,000" and inserting in lieu thereof "$800,000."

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the senior Senator from Nevada to the committee amendment.

The READING CLERK. On page 31, line 7, it is proposed to strike out "$200,000" and to insert "$800,000," so as to make the clause read:

Spanish Springs irrigation project, Nevada: For continued investigations, commencement of construction, and incidental operations, $800,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is upon agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 31, after line 10, to insert:

Owyhee irrigation project, Oregon: For continued investigations, commencement of construction, and incidental operations, $1,250,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 13, to insert:

Warm Springs (Vale) irrigation project, Oregon: For continued investigations and for first payment toward purchase of an interest in the Warm Springs Reservoir, $250,000;

The amendment was agreed to.

The next amendment was, on page 31, after line 17, to insert:

Yakima irrigation project, Washington: For continued investigations, commencement of construction of the Kittitas unit, and incidental operations, $1,500,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 20, to insert:

BUREAU OF MINES

For the development of oil shale, including construction of necessary plant, purchase, lease, or condemnation of necessary land for erection of plant; purchase or mining of shale, operation of plant, and for all necessary expenses incident thereto, including clerical and technical assistance in the District of Columbia and elsewhere, to remain available until June 30, 1925, $90,000.

The amendment was agreed to.

The next amendment was, under the heading "Judicial—Marshals, District Attorneys, Clerks, and Other Expenses of United States Courts," on page 36, line 13, after the figures "$1,000," to insert a comma and "to be available also for one set of Federal Reporter and Digests thereof," so as to read:

For 1924, $1,000, to be available also for one set of Federal Reporter and Digests thereof.

The amendment was agreed to.

The next amendment was, under the heading "Department of Labor—Bureau of Immigration," on page 38, at the end of line 10, to strike out "$75,000" and to insert "$100,000," so as to read:

The amount which may be expended for personal services in the District of Columbia from the appropriation "Expenses of regulating immigration, 1925," is hereby increased from $50,000 to $100,000.

The amendment was agreed to.

The next amendment was, under the heading "Navy Department," on page 41, after line 21, to insert:

Damage claims: To pay claims for damages to or losses of privately owned property adjusted and determined by the Navy Department, under the provisions of the act entitled "An act to provide a method for the settlement of claims arising against the Government of the United States in sums not exceeding $1,000 in any one case," approved December 28, 1922, as fully set forth in House Documents Nos. 258, 261, and 275, reported to Congress at its present session, $11,379.10.

The amendment was agreed to.

The next amendment was, on page 42, after line 18, to insert:

Fishery rights, Pearl Harbor, Hawaii: For necessary costs and expenses of condemnation proceedings authorized by the act approved June 28, 1921 (42 Stat. L. 67), entitled "An act to provide for the acquisition by the United States of private rights of fishery in and about Pearl Harbor, Territory of Hawaii," fiscal years 1924 and 1925, $5,000.

The amendment was agreed to.

The next amendment was, under the heading "State Department," on page 48, line 13, before the word "conference," to strike out "nineteenth" and to insert "twenty-third," and in line 16, before the word "conference," to strike out "nineteenth" and to insert "twenty-third," so as to make the paragraph read:

Twenty-third conference of the Interparliamentary Union: For the purpose of defraying the expenses in the city of Washington and elsewhere in the United States, incident to the twenty-third conference of the Interparliamentary Union, to be held in Washington in 1925, to be expended under such rules and regulations as the Secretary of State may prescribe, for salaries in the District of Columbia or elsewhere, rent, printing and binding, traveling and subsistence expenses (notwithstanding the provisions of any other act); and such other expenses as may be necessary, $50,000, as authorized by public resolution approved May 13, 1924, to remain available until December 31, 1925.

The amendment was agreed to.

The next amendment was, under the heading "Treasury Department," on page 50, after line 4, to insert:

OFFICE OF THE SECRETARY

For payment of the increase in the salary of the Government Actuary, as provided by section 1102 of the revenue act of 1924, for the fiscal years that follow:

For 1924, $281.95;

For 1925, $2,300.

The amendment was agreed to.

The next amendment was, under the subhead "Internal Revenue Service," on page 51, after line 22, to insert:

Refunding income taxes under title 12 of revenue act of 1924: For the refunding of taxes required by title 12 of the revenue act of 1924, approved June 2, 1924, providing for an allowance by credit or refund of 25 per cent of the taxes imposed by parts 1 and 2 of title 2 of the revenue act of 1921, to remain available until June 30, 1925, $16,140,000.

The amendment was agreed to.

The next amendment was, at the top of page 54, to insert:

SUPPRESSING COUNTERFEITING AND OTHER CRIMES

For expenses incurred in suppressing counterfeiting and other crimes, including the same objects specified under this head in the act making appropriations for the Treasury Department for the fiscal year ended June 30, 1923, $756.62.

The amendment was agreed to.

The next amendment was, under the heading "War Department," on page 57, after line 14, to insert:

The Secretary of War is authorized and directed to pay out of any current appropriation for the War Department the amount of any official checks, not exceeding the sum of $20,000, drawn in the fiscal year 1924 by the military attaché at Santiago, Chile, and cashed by foreign banks or foreign branches of American banks, which for any reason can not be paid from the officer's credit balance with the Treasurer of the United States: *Provided*, That the amount of any payments made hereunder shall be charged to the officer drawing such checks.

The amendment was agreed to.

The next amendment was, at the top of page 58, to insert:

Control of floods: For preliminary examinations and surveys with a view to the control of floods in accordance with the provisions of the act approved May 31, 1924, fiscal years 1924 and 1925, as follows: North Branch of the Susquehanna River, Pa. and N. Y., $8,000; Allegheny and Monongahela Rivers, $25,000; Puyallup River, Wash., $5,000; in all, $38,000.

The amendment was agreed to.

The next amendment was, under the heading "Judgments, United States courts," on page 58, at the end of line 18, to increase the appropriation for the payment of final judgments and decrees, etc., under the Department of Labor, from $328.75 to $10,340.66.

The amendment was agreed to.

The next amendment was, on page 58, after line 19, to insert:

Under the Treasury Department, $1,701.64.

The amendment was agreed to.

The next amendment was, on page 58, line 21, after the words "in all," to strike out "$6,224.12" and to insert "$17,937.67," so as to read:

Under the War Department, $412.25; in all, $17,937.67, together with such additional sum as may be necessary to pay interest on the respective judgments at the rate of 4 per cent from the date thereof until the time this appropriation is made.

The amendment was agreed to.

The next amendment was, under the heading "Judgments, Court of Claims," on page 60, after line 11, to insert:

For payment of the judgments rendered by the Court of Claims and reported to Congress during the present session in Senate Document No. 152, namely:

Under Independent Offices—

United States Food Administration, $6,564.52;

Under the Navy Department, $819,851.29;

Under the Treasury Department, $181,364.99;

Under the War Department, $489,522.79;

in all, $1,497,303.69, together with such additional sum as may be necessary to pay interest on certain of the judgments at the legal rate per annum as and where specified in said judgments. None of the judgments contained herein shall be paid until the right of appeal shall have expired.

The amendment was agreed to.

The next amendment was, on page 67, after line 16, to insert:

AUDITED CLAIMS

SEC. 3. That for the payment of the following claims, certified to be due by the General Accounting Office under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1921 and prior years unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in Senate Document No. 136, reported to Congress at its present session, there is appropriated as follows:

INDEPENDENT OFFICES

For salaries and expenses, Railroad Labor Board, $27.78.

For Interstate Commerce Commission, 90 cents.

For medical and hospital services, Veterans' Bureau, $8,035.01.

For vocational rehabilitation, Veterans' Bureau, $107.77.

DEPARTMENT OF AGRICULTURE

For general expenses, Bureau of Plant Industry, $484.73.

For general expenses, Forest Service, $2.63.

For general expenses, Bureau of Animal Industry, $25.

For general expenses, States Relations Service, $5.

For purchase and distribution of valuable seeds, $421.04.

DEPARTMENT OF COMMERCE

For increase of compensation, Department of Commerce, 22 cents.

For general expenses, Lighthouse Service, $311.73.

For salaries, lighthouse vessels, $2.25.

DEPARTMENT OF THE INTERIOR

For operating mine-rescue cars, Bureau of Mines, $14.40.

For industry among Indians, $1.18.

For water supply for stock and increasing grazing range on unallotted Indian lands, $2,001.80.

For support of Sioux of different tribes, subsistence and civilization, South Dakota, $58.88.

For Indian school, Rapid City, S. Dak., school building and assembly hall, $1.20.

DEPARTMENT OF JUSTICE

For fees of jurors, United States courts, $101.40.

For fees of witnesses, United States courts, $84.50.

For supplies for United States courts, $10.16.

DEPARTMENT OF LABOR

For national security and defense, Department of Labor, 60 cents.

For War Emergency Employment Service, $26.01.

NAVY DEPARTMENT

For pay, miscellaneous, $246.04.

For maintenance, Quartermaster's Department, Marine Corps, $1.66.

For transportation, Bureau of Navigation, $416.62.

For pay of the Navy, $295.84.

For freight, Bureau of Supplies and Accounts, $287.52.

For Medical Department, Bureau of Medicine and Surgery, $8,169.95.

DEPARTMENT OF STATE

For salaries of secretaries, Diplomatic Service, $901.85.

TREASURY DEPARTMENT

For collecting the revenue from customs, $49.60.

For refunding internal-revenue collections, $20.92.

For collecting the war revenue, $1,147.50.

For Coast Guard, $1,135.32.

For pay of other employees, Public Health Service, $1.83.

For freight, transportation, etc., Public Health Service, $1.80.

For pay of personnel and maintenance of hospitals, Public Health Service, $3.01.

For furniture and repairs of same for public buildings, $6.50.

WAR DEPARTMENT

For increase of compensation, Military Establishment, $1,326.35.

For increase of aviation, Signal Corps, $6.33.

For Air Service, Army, $66,854.43.

For arming, equipping, and training the National Guard, $197.59.

For armament of fortifications, $706.15.

For armament of fortifications, Panama Canal, $145.75.

For seacoast batteries, Panama Canal, $669.85.

For fire control at fortifications, $4.98.

For Ordnance Service, $248.77.

For replacing ordnance and ordnance stores, $60.45.

For quartermaster supplies, equipment, etc., Reserve Officers' Training Corps, $9.61.

For chemical warfare service, Army, $32,710.51.

For commercial telephone service at coast artillery posts, $489.41.

For Watervliet Arsenal, West Troy, N. Y., $51.90.

For barracks and quarters, $123.84.

For general appropriations, Quartermaster Corps, $13,059.04.

For pay, etc., of the Army, $95,614.84.

For supplies, services, and transportation, Quartermaster Corps, $21,394.85.

For disposition of remains of officers, soldiers, and civil employees, $153.45.

POST OFFICE DEPARTMENT

For city delivery carriers, $925.91.

For clerks, first and second class post offices, $401.62.

For indemnities, domestic mail, $35.71.

For indemnities, international mail, $725.11.

For railroad transportation, $11,637.52.

For rent, light, and fuel, $66.67.

For vehicle service, $60.96.

Total, audited claims, section 3, $267,040.25, together with such additional sum, due to increase in rate of exchange, as may be necessary to pay claim in foreign currency as specified in certificate of settlement of the General Accounting Office, No. 029325.

The amendment was agreed to.

The next amendment was, on page 72, line 14, to change the section number from 3 to 4.

The amendment was agreed to.

The PRESIDENT pro tempore. This completes the committee amendments. The bill is still before the Senate as in Committee of the Whole and open to amendment.

Mr. WARREN. Mr. President, I have several committee amendments to offer yet.

I am instructed by the committee to offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment offered by the Senator from Wyoming.

The READING CLERK. On page 19, after line 14, it is proposed to insert:

For cooperative vocational rehabilitation of persons disabled in industry, fiscal year 1925, $834,000.

For the purpose of making studies, investigations, and reports regarding the vocational rehabilitation of disabled persons and their placements in suitable or gainful occupations and for the administrative expenses of said board incident to performing the duties imposed by the act of June 2, 1920 (41 Stat. p. 735), as amended, including salaries of such assistants, experts, clerks, and other employees, in the District of Columbia or elsewhere as the board may deem necessary, actual traveling and other necessary expenses incurred by the members of the board and by its employees, under its orders, including attendance at meetings of educational associations and other organizations, rent and equipment of offices in the District of Columbia and elsewhere, purchase of books of reference, law books, and periodicals, stationery, typewriters and exchange thereof, miscellaneous supplies, postage on foreign mail, printing and binding to be done at the Government Printing Office, and all other necessary expenses, fiscal year 1925, $75,000.

Mr. KING. Mr. President, I should like some explanation of that amendment, because the bill which was passed the other day, as I understand, carries an appropriation.

Mr. WARREN. That was simply an authorization. This is the appropriation.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Wyoming.

The amendment was agreed to.

Mr. WARREN. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 31, after line 20, it is proposed to insert:

There is hereby established in the Department of the Interior a bureau of reclamation, and there shall be a director of the said bureau who shall be thoroughly equipped for the duties of said office by technical education and experience and who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall receive a salary of $10,000 per annum, and there shall

also be in the said bureau such experts and other employees, to be appointed subject to the civil service laws and regulations, as may be required to carry out the purposes of the reclamation act of June 17, 1902 (32 Stat. p. 388), and acts amendatory thereof or supplementary thereto, in accordance with the appropriations made from time to time by Congress for such purposes.

The amendment was agreed to.

Mr. WARREN. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 72, after line 13, it is proposed to insert the following:

SEC. 4. On and after July, 1924, when not otherwise provided by law, heads of executive departments and other Government establishments are authorized to prescribe per diem rates of allowance, not exceeding $5, in lieu of subsistence, to persons engaged in field work or traveling on official business away from their designated posts of duty, or there shall be paid to such persons their actual expenses of subsistence not exceeding $5 per day while so engaged or traveling; but neither a per diem allowance in lieu of subsistence nor actual expenses of subsistence shall be paid to any person in any branch of the public service of the United States unless absent from his designated post of duty and then only for the period of time actually engaged in the discharge of official duties.

The amendment was agreed to.

Mr. HARRISON. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 22, after line 21, it is proposed to insert:

BUREAU OF CHEMISTRY

To enable the Secretary of Agriculture to carry into effect the provisions of the act of March 3, 1923, entitled "An act establishing standard grades of naval stores, preventing deception in transactions in naval stores, regulating traffic therein, and for other purposes," $10,000, to remain available until June 30, 1925.

The amendment was agreed to.

Mr. WARREN. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 72, after line 13, it is proposed to insert:

SEC. 5. Subsection A. That when used in this section—

(a) The word "Secretary" means the Secretary of the Interior.

(b) The words "reclamation law" mean the act of June 17, 1902 (32 Stat. p. 388), and all acts amendatory thereof or supplementary thereto.

(c) The words "reclamation fund" mean the fund provided by the reclamation law.

(d) The word "project" means a Federal irrigation project authorized by the reclamation law.

(e) The words "division of a project" mean a substantial irrigable area of a project designated as a division by order of the Secretary.

Subsection B. That no new project or new division of the project shall be approved for construction or estimates submitted therefor by the Secretary until information in detail shall be secured by him concerning the water supply, the engineering features, the cost of construction, land prices, and the probable cost of development, and he shall have made a finding in writing that it is feasible, that it is adaptable for actual settlement and farm homes, and that it will probably return the cost thereof to the United States.

Subsection C. That the Secretary is hereby authorized, under regulations to be promulgated by him, to require of each applicant, including preference right ex-service men for entry to public lands on a project, such qualifications as to industry, experience, character, and capital as in his opinion are necessary to give reasonable assurance of success by the prospective settler. The Secretary is authorized to appoint boards in part composed of private citizens to assist in determining such qualifications.

Subsection D. That the irrigable lands of each new project and new division of a project hereafter approved shall be classified by the Secretary with respect to their power, under a proper agricultural program, to support a family and pay water charges, and the Secretary is authorized to fix different construction charges against different classes of land under the same project for the purpose of equitably apportioning the total construction cost so that all lands may as far as practicable bear the burden of such cost according to their productive value.

Subsection E. That hereafter the Secretary shall as to each irrigable acre of land in each new project, or a new division of a project, issue two public notices relating to construction charges. The first public notice shall be issued when the land is ready for settlement and will announce the construction charge per irrigable acre. The second public notice shall be issued when in the opinion of the Secretary the agricultural development of the project shall have advanced sufficiently to warrant the commencement of payment of installments of such construction charge. The second public notice shall fix the date when payments will begin on the construction charge announced by the first public notice, which date shall be not more than five years from the date of the first public notice.

Subsection F. That hereafter all project construction charges shall be made payable in annual installments based on the productive power of the land as provided in this subsection. The installment of the construction charge per irrigable acre payable each year shall be 5 per cent of the average gross annual acre income for the 10 calendar years first preceding, or for all years of record if fewer than 10 years are available, of the area in cultivation in the division or subdivision thereof of the project in which the land is located, as found by the Secretary annually. The decison of the Secretary as to the amount of any such installment shall be conclusive. These annual payments shall continue until the total construction charge against each unit is paid. The Secretary is authorized upon request to amend any existing contract for a project water right so that it will provide for payment of the construction charge thereunder in accordance with the provisions of this subsection or for the deferment of such construction charges for a period of three years from the approval of this section, or both.

Subsection G. That whenever two-thirds of the irrigable area of any project, or division of a project, shall be covered by water right contracts between the water users and the United States, said project shall be required, as a condition precedent to receiving the benefits of this section, to take over, through a legally organized water users' association or irrigation district, the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as the Secretary may prescribe, and thereafter the United States, in its relations to said project, shall deal with a water users' association or irrigation district, and when the water users assume control of a project, the operation and maintenance charges for the year then current shall be covered into the construction account to be repaid as part of the construction repayments.

Subsection H. That the penalty of 1 per cent per month against delinquent accounts, provided in section 3 and section 6 of the act of August 13, 1914 (38 Stat. p. 686), is hereby reduced to one-half of 1 per cent per month, as to all installments which may hereafter become due.

Subsection I. That whenever the water users take over the care, operation, and maintenance of a project or a division of a project the total accumulated net profits, as determined by the Secretary, derived from the operation of project power plants, leasing of project grazing and farm lands, and the sale or use of town sites shall be credited to the construction charge of the project, or a division thereof, and thereafter the net profits from such sources may be used by the water users to be credited annually, first, on account of project construction charge; second, on account of project operation and maintenance charge; and, third, as the water users may direct. No distribution to individual water users shall be made out of any such profits before all obligations to the Government shall have been fully paid.

Subsection J. That all moneys or profits as determined by the Secretary heretofore or hereafter derived from the sale or rental of surplus water under the Warren Act of February 21, 1911 (36 Stat. p. 925), or from the connection of a new project with an existing project shall be credited to the project or division of the project to which the construction cost has been charged.

Subsection K. That on each existing project where, in the opinion of the Secretary, it appears that on account of lack of fertility in the soil, an inadequate water supply, or other physical causes, settlers are unable to pay construction costs, or whenever it appears that the cost of any reclamation project by reason of error or mistake or for any cause has been apportioned or charged upon a smaller area of land than the total area of land under said project, the Secretary is authorized to undertake a comprehensive and detailed survey to ascertain all pertinent facts, and report in each case the result of such survey to the Congress, with his recommendations: *Provided*, That the cost and expense of each such survey shall be charged to the appropriation for the project on account of which the same is made, but shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the project.

Subsection L. That in any adjustment of water charges as provided in this section all due and unpaid charges to the United States, both on account of construction and on account of operation and maintenance, including interest and penalties, shall be added in each case to the total obligation of the water user, and the new total thus established shall then be the construction charge against the land in question.

Subsection M. That every entryman or assignee on a project farm unit not yet patented, which unit shall be found by the Secretary to be insufficient to support a family and pay water charges, shall have the right upon application to exchange his entry for another farm unit of unentered public land on the same or another project located in the same State, in which event all installments of construction charges theretofore paid on account of the relinquished farm unit shall be credited on account of the new farm unit taken in exchange: *Provided*, That where two entrymen apply for the same farm unit under the exchange provision of this subsection, only one of whom is an ex-service man, as defined by the joint resolution of January 21, 1922 (42 Stat. p. 358), the ex-service man shall have a preference in making such exchange.

Subsection N. That all contracts providing for new projects and new divisions of projects shall require that all operation and maintenance charges shall be payable in advance. In each case where the care, operation, and maintenance of a project or division of a project are tranferred to the water users the contract shall require the payment of operation and maintenance charges in advance. That whenever an adjustment of water charges is made under this section the adjustment contract shall provide that thereafter all operation and maintenance charges shall be payable in advance.

Subsection O. That the cost and expense after June 30, 1925, of the main office at Washington, D. C., of the Bureau of Reclamation in the Department of the Interior, and the cost and expense of general investigation heretofore and hereafter authorized by the Secretary, shall be charged to the general reclamation fund and shall not be charged as a part of the construction or operation and maintenance cost payable by the water users under the projects.

Subsection P. That where, in the opinion of the Secretary, a right of way or easement of any kind over public land is required in connection with a project the Secretary may reserve the same to the United States by filing in the General Land Office and in the appropriate local land office copies of an instrument giving a description of the right of way or easement and notice that the same is reserved to the United States for Federal irrigation purposes under this section, in which event entry for such land and the patent issued therefor shall be subject to the right of way or easement so described in such instrument; and reference to each such instrument shall be made in the appropriate tract books and also in the patent.

Subsection Q. That where real property or any interest therein heretofore has been, or hereafter shall be, donated and conveyed to the United States for use in connection with a project, and the Secretary decides not to utilize the donation, he is authorized without charge to reconvey such property or any part thereof to the donating grantor, or to the heirs, successors, or assigns of such grantor.

Subsection R. That there is hereby authorized to be appropriated from the general Treasury the sum of $100,000 for investigations to be made by the Secretary through the Bureau of Reclamation to obtain necessary information to determine how arid and semi-arid, swamp, and cut-over timberlands may best be developed.

Mr. NORRIS. Mr. President, I desire to offer one or two amendments to the pending amendment.

Mr. LENROOT. Mr. President, I ask unanimous consent that this amendment may be passed by temporarily, in order that we may dispose of some other amendments.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. LENROOT. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Senator from Wisconsin offers an amendment, which will be stated.

The READING CLERK. On page 34, after line 22, it is proposed to insert as a separate paragraph the following:

Appropriations for salaries, fees, and expenses of marshals for the fiscal year 1924, and thereafter, shall be available for advances to be made by United States marshals when authorized or approved by the Attorney General, the provisions of section 3648 of the Revised Statutes to the contrary notwithstanding.

Mr. KING. Mr. President, I should like to understand from the Senator the purpose of that.

Mr. LENROOT. This amendment was brought to the attention of the committee by the Attorney General; but, being legislative in its nature, the committee could not act upon it.

I will say to the Senator from Utah that the purpose of the amendment is this: The Comptroller General has recently held that the practice prevailing of marshals advancing funds to deputy marshals for long trips is not permitted under the law, and they are now compelled to advance their own funds. A deputy marshal getting $1,200 a year has not the money to to spend, and this is to take care of that situation and that is all.

Mr. McKELLAR. Mr. President, while this amendment is pending I have no objection to it, but I desire to call the attention of the Senate to two items in this bill—on page 55 an item of $3,600,000, appropriated for the administrative expenses of the World War adjusted compensation act, and on page 21 the sum of $1,188,500 for the administrative expenses of the Veterans' Bureau in carrying out the same act.

I call attention to the testimony of Gen. P. C. Harris, the former The Adjutant General of the Army, who said in his testimony that $1,250,000 was an adequate sum for the administration of this act. I have no doubt that the Budget has reported these two very large sums; and it seems, in view of that testimony, to be very, very much more than was at that time testified to as being necessary by The Adjutant General of the Army. In addition to that, General Lord, who is the head of the Budget Bureau, said at that time that it would not amount to more than $1 a head, and that included every expense of every kind or description.

I just want to call attention again to the extravagance of the Budget Bureau and the utter worthlessness of that bureau, as it seems to me. I do not believe that we ought to depend upon it.

In that connection, I desire at this time to offer a published interview with General Harris on the subject of the expense, and ask unanimous consent that it may be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

Commenting upon the magnitude of the task of furnishing information from the records of the War Department for the payment of the bonus, Maj. Gen. P. C. Harris, formerly The Adjutant General of the Army, who has recently returned from a two-year trip abroad, says the World War veterans may be thankful that the Army discarded the old bimonthly muster roll when it did.

If the use of the muster roll, which contained the records of the soldiers as reported to the War Department, had continued throughout the war and the period of demobilization, the records of the War Department, General Harris says, would have been in a worse state of confusion than after the Civil War, for there were twice as many American soldiers in the World War as there were in the Federal service during the Civil War, and the number of separate organizations that would have submitted muster rolls in the World War was approximately as large as the aggregate number in service during all the wars in which the United States has participated.

On July 8, 1889, 24 years after the close of the Civil War, there remained on hand in The Adjutant General's Office 40,654 unanswered requests from the Pension Office and other governmental agencies, and nearly 30 years after that war over 800 clerks were employed upon the records of the Civil War veterans.

To furnish the information needed for the payment of a bonus to Union Army veterans, such as Congress has provided for veterans of the World War, would have been practically impossible until 30 years after the close of the Civil War.

By substituting daily reports of changes for the old bimonthly muster roll, and by introducing other radical reforms in the record-keeping system of the Army General Harris was able to begin, a few months after the troops were demobilized, preparation of statements of service of the World War veterans for the adjutants general of the several States, something that was never even attempted after any previous war.

This undertaking was far greater in magnitude than that now confronting The Adjutant General's Office, as the individual records of the soldiers are now assembled in jackets or envelopes and considerably more information was furnished on the statements of service than will be needed for the payment of the bonus.

Anticipating that Congress would eventually pass a bonus law General Harris, while preparing the statements of service for the adjutants general of the States, copied on the outside of the jackets or envelopes containing the records of the soldiers all the information that will be needed in the normal case for the payment of the bonus. This forethought will greatly facilitate the work now and will save the Government millions of dollars.

Contrasting the World War records with the almost chaotic condition of the records of the Civil War for several years after the close of that war, General Harris called attention to the fact that on March 31, 1922, when he turned over The Adjutant General's Office to his successor, there was on hand, in that branch of the office which handles all requests for information from the records of soldiers of the World War, actually less than one day's output, and among the cases on hand was only one that had been received prior to March 21, or was more than 10 days old.

Mr. KING. Mr. President, I should like some explanation of these items by the committee, because the statement which was made before the Committee on Finance when the bonus bill was

before that committee was to the effect that the expenses would not exceed $1,000,000 and that the number of employees would not in any event exceed 2,000. Now, as the Senator from Tennessee indicates, the appropriations carried here for this purpose amount to three or four million dollars, and the Senator did not call attention to the fact that $450,000 additional is appropriated to the Navy Department for clerical services in the District of Columbia in connection with furnishing records in the administration of this act.

Mr. McKELLAR. I think there are also other items in the bill for this purpose; and I am quoting from the testimony of General Harris, as given on page 113 of the hearings of 1922. I have the greatest confidence in General Harris as a careful, prudent business man who directed that office. I really think that these appropriations that have been made by direction of the Bureau of the Budget are extravagant, and no doubt will bring great waste, and I felt that it was my duty to call the matter to the attention of the Senate at this time.

Mr. KING. It looks as if there has been a general assault upon the Treasury by thousands of persons seeking jobs, and that those in official position now seem determined to give jobs to everybody who applies.

Mr. McKELLAR. I do not know whether it was the difference between 1922 not being a presidential year and 1924 being a presidential year or not.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KING. I would like to inquire of the chairman of the committee the aggregate amount appropriated for the clerical expenses of administering this act for the coming year. If somebody can not explain it, I propose to strike out some of these items and get an explanation. In order that we may get some explanation, on page 21, line 18, I move to amend by striking out the figures "$1,188,500" and inserting in lieu thereof "$750,000."

Mr. REED of Pennsylvania. Will the Senator agree to suspend action on that amendment for a moment?

Mr. KING. Certainly.

Mr. REED of Pennsylvania. I offer the amendment which I send to the desk.

Mr. KING. I withdraw my amendment temporarily, to accommodate the Senator from Pennsylvania.

The PRESIDENT pro tempore. The Senator from Pennsylvania offers the following amendment, which the clerk will read.

The READING CLERK. On page 21, after line 24, the Senator from Pennsylvania moves to insert the following:

For additional hospital and out-patient dispensary facilities for patients of the United States Veterans' Bureau and facilities for a permanent national training school, at a cost not exceeding $350,000, for the blind who are beneficiaries of the United States Veterans' Bureau, by purchase and remodeling or extension of existing plants, and by construction on sites now owned by the Government or on sites to be acquired by purchase, condemnation, gift, or otherwise, such hospitals and out-patient dispensary facilities, to include the necessary buildings and auxiliary structures, mechanical equipment, approach work, roads, and trackage facilities leading thereto; and also to provide accommodation for officers, nurses, and attending personnel; and also to provide proper and suitable recreational centers, $6,850,000, to be immediately available and to remain available until expended. That not to exceed 8 per cent of this sum shall be available for the employment in the District of Columbia and in the field of necessary technical and clerical assistants at the customary rates of compensation, exclusively to aid in the preparation of the plans and specifications for the projects authorized herein and for the supervision of the execution thereof, and for traveling expenses and field-office equipment and supplies in connection therewith.

The amendment was agreed to.

Mr. CURTIS. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 37, at the end of line 2, the Senator from Kansas moves to add the following:

*Provided*, That said bridge shall be open to use by the public under such rules and regulations as prescribed by the Attorney General.

The amendment was agreed to.

Mr. REED of Pennsylvania. I offer the following amendment.

The PRESIDENT pro tempore. The Senator from Pennsylvania offers a further amendment, which the Secretary will state.

The READING CLERK. On page 38, after line 10, the Senator from Pennsylvania moves to insert the following:

The first proviso to section 24 of the act of February 5, 1917, entitled "An act to regulate the immigration of aliens to, and the residence of aliens in, the United States," is amended by inserting therein the sum "$200,000" for the sum "$100,000."

Mr. REED of Pennsylvania. Just a word in explanation of the pending amendment. This amendment does not call for the expenditure of one additional dollar. It merely authorizes the Secretary of Labor to spend a larger amount out of the appropriation which has been made to him for the purpose of apprehending immigrants who enter the country unlawfully. It does not tend to increase the appropriation which has already been made, but with the new policy of restriction of immigration there is more smuggling of immigrants, and the Secretary finds this necessary, and urges that he be allowed to spend a little more of his appropriation for that purpose.

Mr. KING. I would like to ask the Senator from Pennsylvania what relation his amendment has to the item of $100,000 carried in line 10 on this page of the bill, which has been changed from $50,000 to $100,000?

Mr. REED of Pennsylvania. In all candor, I have to admit that it has no relation, although it is related to the Bureau of Immigration, which is the beneficiary of the item to which the Senator refers.

Mr. KING. Does the Senator know why that item was increased from $50,000 to $100,000 by the committee?

Mr. REED of Pennsylvania. As to that I have no knowledge, but the chairman undoubtedly can explain it.

Mr. KING. I should like to have an explanation, after the explanation on the amendment I have already offered.

Mr. WARREN. I will ask that Senators having amendments wait until we can finish with the committee amendment that was laid aside so that the Senator from Nebraska [Mr. NORRIS] could offer an amendment to it.

Mr. REED of Pennsylvania. Will not the Senator withhold that request until the amendment I have offered, and which is pending, has been acted upon?

Mr. WARREN. Certainly I will withhold my suggestion.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Pennsylvania.

The amendment was agreed to.

Mr. LADD. Mr. President, I desire to offer an amendment, which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 3, after line 3, insert as a separate paragraph the following:

JOINT COMMITTEE TO INVESTIGATE NORTHERN PACIFIC LAND GRANTS

For expenses of the joint committee created by section 3 of public resolution of the Sixty-eighth Congress, entitled "Joint resolution directing the Secretary of the Interior to withhold his approval of the adjustment of the Northern Pacific land grants, and for other purposes," including personal services, printing and binding, traveling and subsistence expenses, fees of witnesses, and such other expenses in connection with the inquiry as the joint committee may deem necessary, $50,000, to remain available until June 30, 1925.

The amendment was agreed to.

Mr. WARREN. Now I desire to have the committee amendment which was laid aside acted upon.

Mr. NORRIS. Mr. President, to the committee amendment I want to offer two amendments that are agreeable to the chairman. On page 4, in line 16, of the committee amendment, after the word "project," I move to insert the words "hereafter approved."

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 4, line 15, the Senator from Nebraska moves to strike out the word "hereafter," and on line 16, after the word "project," where it appears the second time, he moves to insert the words "hereafter approved."

The amendment to the amendment was agreed to.

Mr. NORRIS. I offer another amendment to the same committee amendment. On page 13, line 7, after the word "arid," I move to insert the word "semiarid" and a comma.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment offered by the Senator from Wyoming as amended.

The amendment as amended was agreed to.

Mr. CAMERON. Mr. President, I offer the following amendment, which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. The Senator moves, on page 31, after line 20, to insert the following:

YUMA IRRIGATION PROJECT, ARIZONA

The sum of $200,000, for operation and maintenance and completion of construction of the irrigation system required to furnish water to all of the irrigable lands in part 1 of the Mesa division, otherwise known as the First Mesa Unit of the Yuma Auxiliary Project, authorized by the act of January 25, 1917 (39 Stat. p. 868), as amended by the act of February 11, 1918 (40 Stat. p. 437): *Provided*, That all moneys received by the United States in payment of land and water rights in said part 1 of the Mesa division, beginning one year from the date this act becomes effective, shall be covered into the reclamation fund until the sum advanced from said fund hereunder is fully paid: *Provided further*, That the purchase price of land and water rights hereafter sold in said part 1 of the Mesa division shall be paid to the United States in 10 equal installments, the first of which shall be due and payable at the date of the purchase, and the remaining installments annually thereafter, with interest on deferred installments at the rate of 6 per cent per annum, payable annually; and the Secretary of the Interior is authorized, at any time within one year from the date this act becomes effective, to amend any existing uncompleted contract for the purchase of land and water rights so that the aggregate amount of principal and interest remaining unpaid under such contract may be paid in 10 equal installments in accordance with the conditions of this proviso, beginning with the date of amendatory contract: *And provided further*, That land and water rights in said part 1 of the Mesa division heretofore or hereafter offered at public sale under said act of January 25, 1917, and not disposed of at such public sale may be sold later at private sale at not less than $25 per acre for the land and at $200 per acre for the water right, and a corporation may purchase land and water rights at any such sale, either public or private, and receive patent therefor.

That there is hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $597,088, or so much thereof as may be necessary, to reimburse landowners residing on the Yuma project, Arizona-California, for all moneys they have heretofore paid into the United States Reclamation Service for the operation and maintenance of the Colorado River front work and levee system of said project.

That there is also hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $100,000, or so much thereof as may be necessary, to be placed to the credit of the United States Reclamation Service and expended under the direction of the Secretary of the Interior for the purpose of paying the operation and maintenance costs of said Colorado River front work and levee system on said Yuma project, Arizona-California, for the fiscal year ending June 30, 1925, and an additional sum of $100,000 per annum, or so much thereof as may be necessary, for the operation and maintenance of said Colorado River front work and levee system, it being hereby declared to be the policy of the United States to assume the obligation of caring for said river front work and levee system on said Yuma project, Arizona-California, and not to have the same charged to said project as any part of constructing or maintaining the reclamation work of said Yuma project, Arizona-California.

Mr. CAMERON. Mr. President, the Yuma Mesa is a "division" of the Yuma (Ariz.-Calif.) reclamation project, authorized by special act of Congress approved on January 25, 1917.

Under the terms of this act the Secretary of the Interior was authorized to designate certain lands on the Yuma Mesa as an auxiliary to the Yuma (Ariz.-Calif.) reclamation project. Under this authority Secretary Lane set aside 6,400 acres for this auxiliary project. This acreage was then subdivided into "farm units" of from 5 to 20 acres each, and in accord with the special act these "farm units" were offered for sale at public auction on December 10, 1917. The terms of this auction sale were 10 per cent cash on day of sale, 15 per cent additional within 60 days thereafter if the sale was approved by the Secretary of the Interior, and the remaining 75 per cent divided into three equal annual payments of 25 per cent each, with 6 per cent interest on deferred payments.

By an order issued by Secretary Lane all these lands were appraised at $25 per acre, with an additional $200 per acre estimated for the construction costs, making the minimum bid on these lands $225 per acre. The lands sold at the public auction averaged $230 per acre, and the auction was considered such a success that the construction of the auxiliary project was begun in October, 1920.

The special act required that the project should be constructed wholly with funds derived from the sale of these lands and water-right appurtenances. Not one cent of Government funds has ever been used in the construction of this project. Up to the present time about $700,000 has been spent. My amendment provides for an appropriation, out of the reclamation funds, of $200,000 for the completion of this meritorious project, all of which is to be repaid into the Treasury within 10 years, with interest at 6 per cent.

When the lands were sold at public auction the country was in its most prosperous condition. It did not seem possible that any one of the purchasers of these Yuma Mesa lands could fail to meet his payments as they became due and payable. But, like all the balance of the country, the readjustment period struck Yuma, and the people who had purchased these lands found themselves sorely oppressed. Many of them were compelled to default in their payments. Some few of them surrendered their holdings after having made one or more payments. But the great bulk of the purchasers held their lands and have made such payments as circumstances permitted. Many of them are in arrears. Unless this legislation is enacted the Yuma Mesa auxiliary project is bound to be written down as a failure. The limited acreage that has been planted to grapefruit and oranges can not possibly pay the operation and maintenance charges of the entire project, but with my amendment in effect there is no doubt but that the Yuma Mesa auxiliary project will become one of the garden spots of the world.

Under the terms of this amendment the Secretary of the Interior is authorized to readjust the payments now due and extend these payments over a period of 10 years, with 6 per cent on deferred payments. This will give all those who now are in arrears a chance to pay for their lands, put them in a high state of cultivation, and repay the Government every cent advanced under the amendment.

This is the only reclamation project in the United States that has been inaugurated by the Government, consisting wholly of Government lands, that has never had even 1 cent advanced by the Government. It seems only fair and reasonable to these purchasers that they should be given this aid. It will enable them to complete the payments now due. It will enable them to hold their homes, many of whom have invested their last dollar in these frostless lands. It will instill in them new life, new hope, new ambitions, and in the last analysis make them happy and prosperous; but without the aid sought by this amendment, the Yuma Mesa auxiliary project must of necessity, as testified by the fact finders' report, prove a dismal failure.

For your further information I will say that:

| | |
|---|---|
| Purchasers owning 1,385 acres, have paid 100 per cent | 121 |
| Purchasers owning 740 acres, have paid 75 per cent | 59 |
| Purchasers owning 875 acres, have paid 50 per cent | 74 |
| Purchasers owning 1,645 acres, have paid 25 per cent | 120 |

The Government owns 1,755 acres within this project that were not sold at the public auction, or that have been turned back to the Government since the sale and are now subject to resale. The provision in my amendment permitting the Secretary of the Interior to sell these lands at either public or private sale is an excellent provision, and should by all means be retained in the amendment, as is also the provision permitting the Secretary to advertise these lands for sale.

Mr. WARREN. Mr. President, permit me to state the condition to the Senator from Arizona. The amendment he offers does not have the backing of the fact finding commission, and unfortunately the money is not in the fund to cover it.

Mr. CAMERON. I beg to differ with the Senator from Wyoming.

Mr. WARREN. Will the Senator allow me to finish what I have to say? If the Senator wishes to put the matter in and let it go to conference, it will surely meet with the opposition I have already spoken of, namely, they will claim that they could go only as far as the money they have warrants, and in accordance with the recommendations that have been made, although others will follow later on, of course.

Mr. CAMERON. Mr. President, on page 100 of the report of the fact finding commission I find the following:

> This division was constructed under the provisions of an act of Congress approved January 25, 1917, known as "An act to provide for an auxiliary reclamation project in connection with the Yuma project in Arizona" (39 Stat. 868). The drastic provisions of this act are impossible of fulfillment, and only a few of the settlers have been able to meet their contracts. They, too, will soon fail, as the charge for water will bankrupt them.
>
> The committee recommends that an early study be made by the Bureau of Reclamation of this division, with a view to making recommendations to Congress for financial relief or the disposal of the division if adequate relief is not feasible.

The PRESIDENT pro tempore. The question is upon agreeing to the amendment.

The amendment was agreed to.

Mr. TRAMMELL. Mr. President, I offer an amendment, which I send to the desk.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 23, after line 14, the Senator from Florida moves to add the following:

To enable the Secretary of Agriculture to provide means for the investigation, control, and eradication of the blight known as "nail head" rust, $10,000.

Mr. WARREN. Does the Senator from Florida offer that amendment?

Mr. TRAMMELL. That is an amendment I have proposed. I will very much appreciate it if the Senator will allow it to go to conference.

The amendment was agreed to.

Mr. PEPPER. Mr. President, I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. The Senator from Pennsylvania moves to insert on page 3, after line 3, the following:

For additional compensation to messenger at card door, $200.

The amendment was agreed to.

Mr. ODDIE. Mr. President, on page 31, lines 5, 6, and 7, the committee amendment as amended has been agreed to. My amendment was offered by me on May 20, providing for an appropriation of $800,000 for Spanish Springs, and was referred to the Committee on Irrigation and Reclamation and ordered to be printed, which was done. It was reported to the Senate by the Senator from Oregon [Mr. MCNARY], the chairman of that committee, on May 26. That amendment has already been agreed to as an amendment to the committee amendment. It was my intention to offer it when the committee amendments were disposed of. I present a statement regarding the project, which I hope will be considered by the conferees, and I ask that it may be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, it will be printed in the RECORD.

The statement is as follows:

A pressing emergency exists with respect to additional water storage on the Newlands project. Severe water shortage under the Truckee Canal has been suffered during the last 10 years, and is particularly acute this year, in consequence of which the settlers under this canal will lose, at the very lowest calculation, one-half of their entire crop of alfalfa, and where they have cantaloupes and potatoes will in many cases lose all. Where conditions so serious as this have obtained for many years, it is poor business and a waste of money to fail to go ahead with this development for the protection of the Government and the water users.

The Reclamation Service has been unable to secure storage in Lake Tahoe on account of the determined opposition of the State of California and landowners around the rim of Lake Tahoe. This opposition has made it utterly impossible to so adjust these property rights as to secure sufficient storage for lands under the Truckee Canal. When the Reclamation Service had exhausted its efforts to secure this storage and failed, it was then definitely decided to recommend the construction of the Spanish Springs Reservoir, and preliminary steps to that end were immediately begun.

From the foregoing it will be seen that there exists a definite obligation on the part of the United States Government to the water user. This obligation is strengthened by the further fact that before a definite decision had been reached with respect to locating a storage reservoir the Government had actually sold to the water users under the Truckee Canal 7,000 acres of water rights, for which insufficient water storage had been provided. Under these circumstances it is not reasonable for the Government to cause any further delay in providing this storage; neither is it practicable nor feasible to build a reservoir to take care of only 7,000 acres. Engineers are agreed that the only proper solution of this problem is to provide storage for irrigating the 7,000 acres of land already under cultivation, and to make provision for the irrigation of sufficient additional land to insure the reduction of the acre cost to the minimum.

Preliminary steps for the construction of the Spanish Springs Reservoir have already been taken. This action was the result of definite recommendations heretofore made by the Reclamation Service for the construction of this reservoir, and also the recommendation of engineers appointed by the Secretary of Agriculture. The above recommendations have also been greatly strengthened by the recent recommendation of the Fact Finding Commission, appointed by the Secretary of the Interior, which strongly recommended the building of a reservoir at Spanish Springs.

The argument has been recently advanced by some of the landowners receiving water from the Lahontan Reservoir that they would be deprived of water needed for that reservoir if a sufficient quantity were taken for the reservoir at Spanish Springs. When it is recalled that for years the Reclamation Service has been carefully studying and working up data on the flow of the Truckee River, it is obvious that the objections of the landowners above referred to are without weight, for the reason that the Reclamation Service would never have recommended the building of the Spanish Springs Reservoir if there has been the slightest doubt that the supply of water was ample to take care of the needs of both reservoirs.

The piecemeal method heretofore pursued should be discontinued. An appropriation of $800,000 can be used this year in this development and this amount should be made immediately available by legislation. This expenditure will be allocated as follows: $480,000 for rights of way for reservoir site and outlet canal, $60,000 for feeder canal, $15,000 for investigations remaining, and $225,000 to begin construction of feeder canal.

In all fairness to the water users, because of the money already invested, and in view of the recommendations of the Reclamation Service and the Department of Agriculture above referred to, there is no doubt that the construction of this reservoir should be commenced without further delay. If there were any uncertainty as to the feasibility of the proposed construction, the case would be altogether different; but all the facts go to prove that the Government should proceed to do its part forthwith.

Attention is especially called to the fact that these farmers went on these lands at the Government's invitation, with the expectation of receiving an adequate water supply for their farms from Lake Tahoe. They have spent their money and the best part of their lives in improving these farms and are now faced with an insufficient water supply, which, if not speedily furnished, will result in losing the work and savings of a lifetime.

Mr. EDGE. Mr. President, I desire to offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The READING CLERK. On page 42, after line 24, insert the following:

To reimburse the New York Shipbuilding Corporation for extra and unforeseen expenses incurred in the contract for the construction of the U. S. S. *Idaho* by reason of an increase of wages paid by said company pursuant to order of the Macy Board, $871,808.95.

Mr. EDGE. That item has already been recommended by the Navy Department, and in a report from Mr. BUTLER, chairman of the Naval Affairs Committee of the House, has been recommended and is included in a bill there which will probably not be reached. I would like very much to have the item go to conference.

Mr. WARREN. Mr. President, I make the point of order against the amendment. It is not estimated for. It is a claim that is presented by the party building the ship, who has fulfilled the contract, and now wants the amount of money in addition to the amount named in the contract. It may be right and may be proper at some time, but we have no proof before us. The gentleman who represents the concern had a talk with me twice within the last week, but he had nothing to offer except that they had lost the money and that we ought to pay this sum.

Mr. EDGE. The Senator will agree that the House Naval Committee, who have investigated the item, have recommended it?

The PRESIDENT pro tempore. The Chair does not desire to hear an argument upon the point of order, and the point of order is sustained.

Mr. MCKELLAR. Mr. President, a parliamentary inquiry. Under the unanimous-consent agreement does not the Senate automatically recess at 11 o'clock? It is now 11 o'clock.

The PRESIDENT pro tempore. The Chair is of the opinion that the Senate does not automatically recess at 11 o'clock under the unanimous-consent agreement.

Mr. WARREN. I wish to say to the Senator that we are almost through with the bill, and I hope there will be no objection to proceeding.

The PRESIDENT pro tempore. The Chair ought to observe as a reason for the ruling just made that in its opinion the unanimous-consent agreement was a limitation upon what should be done during the hours from 8 to 11 o'clock.

Mr. MCKELLAR. I am not satisfied that the Chair is wrong about it; I am rather inclined to think that he is right; but I hope that we may adjourn very soon.

Mr. HARRIS. Mr. President, on page 15, beginning with line 24, I move to amend by striking out lines 24 and 25, and on page 16 lines 1 to 11, inclusive.

The PRESIDENT pro tempore. The reading clerk will state the amendment offered by the Senator from Georgia.

The READING CLERK. On page 15, strike out lines 24 and 25, and on page 16, lines 1 to 11, inclusive, as follows:

For construction and development work in Potomac Park on the west shore of the tidal basin to provide public bathing facilities, and for the maintenance thereof, $50,000, to remain available until June 30, 1925: *Provided*, That the unexpended balance of the appropriation of $25,000 contained in the District of Columbia appropriation act for the fiscal year 1923 for the construction of a bathing beach and bathhouse for the colored population of the city, continued and made available during the fiscal year 1924 by the District of Columbia appropriation act for the fiscal year 1924, is further continued and made available during the fiscal year 1925 for the construction and maintenance of said bathing beach and bathhouse.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Georgia. [Putting the question.] The noes seem to have it. The amendment is rejected.

Mr. REED of Missouri. Mr. President, I call for the yeas and nays. I had the floor and was trying to get the attention of the Chair. I am not going to let this amendment go in that way. I ask for the yeas and nays.

The PRESIDENT pro tempore. The Senator from Missouri demands the yeas and nays.

The yeas and nays were ordered.

Mr. REED of Missouri. Mr. President, I think the Senate ought to know exactly what they are voting on. What I say is no warfare upon the colored people. I think if they need a bathing beach they ought to have it. I do not believe that there ought to be a beach of that kind in close proximity to the bathing beach that is now established, and I understand that to be the purpose of the appropriation. If it is not the purpose of the appropriation, then we do not need it at all, because there is already a bathing beach. I think the amendment of the Senator from Georgia ought to be adopted.

Mr. WARREN. I suppose the Senator understands that it is the House text that the Senator from Georgia is proposing to strike out? It is not an amendment presented by the Senate committee.

Mr. REED of Missouri. Yes; I understand it is not an amendment on the part of the Senate committee. I am willing to stand here and discuss it for some time.

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state the inquiry.

Mr. KING. As I interpret the unanimous-consent agreement under which we are operating to-night, automatically at 11 o'clock it is the duty of the Chair to announce a recess.

Mr. McKELLAR. The Chair has already ruled on that question.

Mr. KING. I know the Chair just indicated to the Senator from Tennessee a contrary view, but I submit, with all respect to the ruling of the distinguished occupant of the chair, that a different interpretation is the correct one. I ask in a parliamentary way for a parliamentary ruling.

Mr. CURTIS. Mr. President, I submitted the unanimous-consent request for the night session, as I did on the occasion two weeks ago. In the request previously submitted it was provided that at the hour of 11 o'clock the Senate should adjourn or recess. In the request for the present unanimous-consent agreement I left that out because it is so near the end of the session that I was afraid there might be some appropriation bills or conference reports which we could take up after 11 o'clock, and therefore I did not incorporate in the request the suggestion that we should recess or adjourn at 11 o'clock.

Mr. KING. If that is the way the unanimous-consent agreement reads, then I am in error. My understanding was that it was the same agreement that we entered into on the previous occasion.

The PRESIDENT pro tempore. The Chair is quite willing to explain his view with regard to the unanimous-consent agreement. It provides as follows:

That when the Senate concludes its business on Thursday afternoon, June 5, 1924, it take a recess until 8 o'clock p. m., and at the evening session from 8 to 11 p. m. the Senate shall consider only conference reports, appropriation bills, and unobjected bills on the calendar.

The Chair construes the agreement to mean that between the hours of 8 and 11 only such bills shall be considered, but it does not construe it as requiring either an adjournment or a recess at 11 o'clock, because neither an adjournment nor a recess is provided for at 11 o'clock.

The question is on the amendment offered by the Senator from Georgia. The Senator from Missouri [Mr. REED] has asked for the yeas and nays, and the yeas and nays have been ordered.

Mr. HEFLIN. Mr. President, I agree with what the Senator from Missouri [Mr. REED] has said. I am willing for the negroes to have a bathing place on the river, but I do not think that the Congress ought to have that place in the tidal basin, the same body of water where the white people go in swimming. If I understand the proposition, it is that the white people would bathe at a certain point in the tidal basin and the negroes across the little body of water, in sight of the other bathing beach. The Congress ought not to adopt such a provision as that. There ought not to be anything done to bring about friction between the races. If we permit the negroes to have a place somewhere else on the river to go in swimming, that would be better all around, but I am opposed to any such provision as this, and the Congress ought not to appropriate one cent to provide a place in sight of the other bathing place for such a purpose. I can not believe that a dozen Senators will vote for this proposition.

It is best for both races to have the two bathing places entirely separate and distinct—that is, out of sight of each other. Let the whites have their bathing beach at one place and let the negroes have theirs at another place some distance away. Such an arrangement will be to the best interest of both races.

Mr. NORRIS. Mr. President, as I understand it, these bathing beaches will not be close enough together to interfere. I have an idea that they will be from half a mile to a mile apart. I am told by Senators sitting near me that they are three-quarters of a mile apart. I know the basin down there very well, because the original plan for putting a bathing beach there came about to quite an extent through efforts that I made for two or three years in order to establish it.

I would not have the bathing beaches near each other where the people could perhaps intermingle. It is proposed, as I understand it, to put the bathing beach for the colored people on a different side even from the inlet to the tidal basin, where the present bathing beach is located, so that they will be on opposite sides of the coming in of the water. They will be in sight of each other because one can see across the tidal basin. I do not understand that that is necessarily an objection to having both located on the tidal basin.

Mr. HEFLIN. Mr. President, I would like to ask the Senator a question?

Mr. NORRIS. I yield to the Senator from Alabama.

Mr. HEFLIN. I ask the Senator if he does not know that the bathing beach for the white people at the tidal basin is located on the east side of the basin?

Mr. NORRIS. No; the beach for the white people is on the south side.

Mr. HEFLIN. It is the southeastern side, and it is proposed to put the colored bathing beach just across from it, in full view.

Mr. NORRIS. It will be three-quarters of a mile away, but you can look across the water and see the other bathing beach. It will be in sight, it is true, but at the distance they would be apart I doubt whether one could tell a colored man from a white man.

The PRESIDENT pro tempore. The yeas and nays have been ordered, and the Secretary will call the roll.

The reading clerk proceeded to call the roll.

Mr. LODGE (when his name was called.) I have a general pair with the Senator from Alabama [Mr. UNDERWOOD]. I transfer that pair to the Senator from Vermont [Mr. GREENE] and vote "nay."

Mr. PHIPPS (when his name was called). I have a pair with the junior Senator from South Carolina [Mr. DIAL], which I transfer to the senior Senator from Illinois [Mr. McCORMICK] and vote "nay."

Mr. TRAMMELL (when his name was called). I transfer my pair with the senior Senator from Rhode Island [Mr. COLT] to the senior Senator from Louisiana [Mr. RANSDELL] and vote "yea."

The roll call was concluded.

Mr. KING. I have a pair with the senior Senator from Maryland [Mr. WELLER]. Has that Senator voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. KING. Not knowing how he would vote if present, I withhold my vote.

Mr. SMITH. I transfer my pair with the Senator from South Dakota [Mr. STERLING] to the Senator from Arkansas [Mr. CARAWAY] and vote "yea."

Mr. SIMMONS. I transfer my pair with the junior Senator from Oklahoma [Mr. HARRELD] to the junior Senator from West Virginia [Mr. NEELY] and vote "yea."

Mr. GLASS. I transfer my pair with the junior Senator from Connecticut [Mr. MCLEAN] to the junior Senator from New Jersey [Mr. EDWARDS] and vote "yea."

Mr. BAYARD. I transfer my pair with the junior Senator from Pennsylvania [Mr. REED] to the junior Senator from Maryland [Mr. BRUCE] and vote "yea."

Mr. CURTIS. I am requested to announce the following pairs:

The junior Senator from Kentucky [Mr. ERNST] with the senior Senator from Kentucky [Mr. STANLEY];

The senior Senator from West Virginia [Mr. ELKINS] with the senior Senator from Oklahoma [Mr. OWEN]; and

The junior Senator from Maine [Mr. FERNALD] with the senior Senator from New Mexico [Mr. JONES].

The result was announced—yeas 18, nays 35, as follows:

YEAS—18

| | | | |
|---|---|---|---|
| Ashurst | Glass | Overman | Smith |
| Bayard | Harris | Reed, Mo. | Swanson |
| Broussard | Heflin | Robinson | Trammell |
| Fletcher | McKellar | Sheppard | |
| George | Mayfield | Simmons | |

NAYS—35

| | | | |
|---|---|---|---|
| Adams | Edge | Moses | Spencer |
| Ball | Gooding | Norbeck | Stanfield |
| Brookhart | Hale | Norris | Wadsworth |

| Dial | Harreld | McLean | Underwood |
| Dill | Harrison | Neely | Weller |
| Edwards | Johnson, Calif. | Owen | Wheeler |
| Elkins | Jones, N. Mex. | Pittman | |

So the amendment of Mr. HARRIS was rejected.

Mr. ASHURST. Mr. President, I will make my remarks on the amendment which I intend to offer as compact as possible. I will briefly state the amendment.

The Colorado River at times is the second largest river in the United States, and at all times it is the third largest river in the United States. It drains an area of 252,000 square miles. It flows through or touches seven States. Under the law of 1902 the United States Reclamation Service built the Yuma project, Arizona-California. The landowners on that are paying their assessments and payments to the Government. It is a worthy, practicable, and going project; but on the lower California side the Government treats the Colorado River as a navigable stream, and built at Government expense a levee on the west side of the river costing $1,000,000. That levee, of course, threw great volumes of water, with a cutting edge like a giant with steel claws cuts, onto the farms of the landowners on the east side of the river, as the Arizona line extends farther south than does the California line, and for a distance it is Mexico on the one side of the river and Arizona on the other side.

The Government having treated the river at that point as a navigable stream and having spent $1,000,000 in revetting the west bank and thereby throwing the waters against the land of these farmers they were obliged to pay several hundred thousand dollars in order to safeguard their own farms.

My distinguished former colleague, the late Senator Marcus A. Smith, whose memory we revere, called this matter to the attention of the Senate 10 years ago. The then Senator from New York, Mr. Root, who sat about where the Senator from New Jersey [Mr. EDGE] now sits, when my then colleague at that time had no more than finished stating his case, Mr. Root rose and said, "You may be assured that this Government understands the situation and will do justice, and I suggest to you, Senator Smith, that you postpone the proposition at this time, as it will be properly cared for later." Ten years have gone, the farmers there are paying to the Government the amount of the construction cost of the Yuma project, and it is unjust—it is atrociously unjust and unfair—to require them to pay the huge sum of money that was necessary to be immediately spent in order to revet the banks of the river, and had those farmers not paid this sum, $10,000,000 or $12,000,000 would have been lost to the Government.

This matter has been in abeyance for 10 years, waiting for a body of scientific men, fair men, to investigate it. The present Secretary of the Interior appointed a fact-finding commission. This fact-finding commission investigated it. The fact-finding commission was composed of men who are eminent in finance, eminent in science and other walks of life. They sat for months, investigated this matter, and came unanimously to the conclusion that such an item ought not to be charged against those farmers. The Secretary of the Interior also holds the view that those farmers ought not to be required to pay that item.

It would be as if when the mighty Mississippi defies the puny law of man and rushes over upon the adjacent farms we would require the farmers on the banks of the Mississippi to pay for the levees.

Now I ask that my amendment be adopted and go to conference, and that the conferees call on General Lord, the Director of the Budget, call upon the Secretary of the Interior; and if they or either of them object to this item, I have at least done my duty. I therefore ask my friend, the Senator from Wyoming [Mr. WARREN] to let my amendment, which I will now have read at the desk, go to conference; and I ask him, as I know he will, not only as a matter of courtesy but as a matter of duty, to call upon the Secretary of the Interior, call upon the Budget Director, call upon the fact-finding commission for the facts.

Now I ask that the amendment may be read. It is simply in conformity with the report of the fact-finding commission. On that fact-finding commission I think Mr. Elwood Mead, who is now the Director of the Bureau of Reclamation, served, and he investigated the matter. He and all of the other Interior Department officials are in favor of it. I think the Government should be honest with its citizens; and when a great injustice like this has been done it ought to be corrected at the earliest possible time. I ask that the amendment may now be read.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. At the proper place in the bill it is proposed to insert the following:

That there is hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $597,088, or so much thereof as may be necessary, to reimburse landowners residing on Yuma project, Arizona-California, for all moneys they have heretofore paid into the United States Reclamation Service for the operation and maintenance of the Colorado River front work and levee system of said project.

SEC. 2. That there is also hereby appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $100,000, or so much thereof as may be necessary, to be placed to the credit of the United States Reclamation Service and expended under the direction of the Secretary of the Interior for the purpose of paying the operation and maintenance costs of said Colorado River front work and levee system on said Yuma project, Arizona-California, for the fiscal year ending June 30, 1925, and an additional sum of $100,000 per annum, or so much thereof as may be necessary, for the operation and maintenance of said Colorado River front work and levee system, it being hereby declared to be the policy of the United States to assume the obligation of caring for said river front work and levee system on said Yuma project, Arizona-California, and not to have the same charged to said project as any part of constructing or maintaining the reclamation work of said Yuma project, Arizona-California.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Arizona.

Mr. WARREN. Mr. President, I wish to address myself to the amendment for a moment. I am so good a friend of the Senator from Arizona and he is so good a friend of mine that I am afraid it would put me in a position where I might lose his friendship if I should allow the amendment to go in the bill, because I do not think we would have a ghost of a show of getting it through the House of Representatives. I am sorry that is the situation; but I think it should be in a separate bill and be, perhaps, in somewhat different form. I am in sympathy with the Senator, but the fact-finding commission has not brought it to our attention, nor has the Bureau of the Budget.

Mr. ASHURST. Mr. President, if the Senator will indulge me one remark, I wish to say that as to losing my friendship the Senator can not do that, because what he would do would be what he believed to be his duty, and no man will ever suffer in my esteem when he does what he thinks is his duty; but I do suggest and urge that in order that this amendment may have more consideration that it be agreed to and go to conference. I am convinced that ultimately justice will be done; but it ought to be done speedily, for justice delayed is justice denied. Will not the Senator therefore permit it to go to conference, call for the Director of the Budget and call for the Secretary of the Interior and get their opinion on the same?

The fact-finding commission suggested that a tripartite agreement be made, under which the Federal Government would pay a third, the State of Arizona would pay a third, and possibly the State of California would pay a third of the levee work up to $100,000. I think it would be a just thing to do.

The amendment is subject to a point of order, in my judgment, but the Senator has generously withheld that point of order, and I think his generosity will preclude his making it. I hope that he will allow the amendment to go to conference.

Mr. WARREN. The amendment is subject to a point of order. If, however, the Senator wishes to have a vote of the Senate on it, I will not make the point of order but will let it go to a vote.

Mr. ASHURST. I thank the Senator.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

Mr. FLETCHER. Mr. President, I offer the amendment which I send to the desk.

Mr. KING. Mr. President, I move that the Senate take a recess until to-morrow at 12 o'clock.

Mr. FLETCHER. Mr. President, I have the floor, and have offered an amendment.

Mr. KING. I beg the Senator's pardon.

Mr. LODGE. Mr. President, I rise to a point of order. I think there was a misunderstanding about the last vote.

The PRESIDENT pro tempore. What is the point of order?

Mr. LODGE. I think there was a misunderstanding about the last vote which ought to be corrected, or else I misunderstood what the Chair said. I do not understand that that amendment was put in the bill. I refer to the Ashurst amendment.

Mr. ASHURST. Mr. President, I hope I shall not feel a dagger thrust from my learned friend from New England. I beg that the Senator withhold any suggestion along that line.

Mr. LODGE. Well, Mr. President, if the amendment has been put in I will not disturb it.

The PRESIDENT pro tempore. The Senator from Florida offers an amendment, which will be stated.

The READING CLERK. After line 24, on page 54, it is proposed to insert:

That the following sums be, and the same are hereby, appropriated for the objects hereinafter expressed, namely:

(a) For increase in the limit of cost of construction of those certain public buildings, heretofore authorized by Congress to be constructed and for which appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, $14,860,780, or so much thereof as may be necessary.

(b) For the construction of public buildings on those certain sites, heretofore acquired, for the construction of which buildings no appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, $23,557,500, or so much thereof as may be necessary.

Mr. WARREN. Mr. President, I shall be compelled to make a point of order against that amendment. It is new legislation.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. FLETCHER. I ask unanimous consent to have inserted in the RECORD a letter from the Secretary of the Treasury to the chairman of the committee, in which the bill containing this item is referred to.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

TREASURY DEPARTMENT,
*Washington, May 17, 1924.*

The CHAIRMAN, COMMITTEE ON APPROPRIATIONS,
*United States Senate.*

SIR: Reference is made to your recent request for a report on Senate bill 2882, for increase in the limit of cost of certain public buildings heretofore authorized, and for which appropriations were made, referred to in Senate Document No. 28, in total amount $15,130,780; and for construction of public buildings, on sites heretofore acquired, for which buildings no appropriations were made, referred to in said document, in amount $23,557,500.

Detailed information in regard to the projects in the two sections of the bill was transmitted to Congress in letter of January 24, 1924 (printed as S. Doc. No. 28), a copy of which is attached to this report and made a part thereof.

It has been found possible to award contracts for buildings at certain of the places of the type and construction described in the last paragraph of the said letter, and furnishing the minimum accommodations possible under the legislation. This reduces the total amount required under section (a) of the bill to $14,860,780.

The passage of this bill would permit the construction of those buildings authorized and limits of cost fixed under act of March 4, 1913, which, on account of the increased cost of labor and materials, can not now be erected within such limits. The completion of these projects and the erection of Federal buildings in many places where sites only have been authorized would be a substantial help in relieving the congestion in the Postal Service.

In connection with the foregoing you are advised that the department is informed that the appropriations contemplated by this bill are in conflict with the financial program of the President.

Respectfully,

A. W. MELLON,
*Secretary of the Treasury.*

Mr. JONES of Washington. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The Senator from Washington offers an amendment, which will be stated.

The READING CLERK. On page 52, after line 4, it is proposed to insert:

No money appropriated for the enforcement of the prohibition, narcotic, or customs laws shall be expended for the hire of automobiles, boats, or other similar conveyances in any locality whenever there are automobiles, boats, or similar conveyances in the custody of the law forfeited to the United States under the penal laws, which, in the judgment of the Secretary of the Treasury, are suitable for use in the enforcement of such laws, and the Secretary of the Treasury is hereby authorized to acquire upon payment of lien and costs as provided by law such forfeited automobiles, boats, or other conveyances as in his discretion may be suitable or requisite for such purposes, and to expend such sums from the appropriation made for the enforcement of such laws for the maintenance and operation for official use of such automobiles, boats, or other conveyances, and a report shall be submitted to Congress each year in the Budget of all sums thus expended.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Washington.

Mr. BROUSSARD. Mr. President, what is the amendment?

The PRESIDENT pro tempore. The Secretary has just read the amendment. Does the Senator desire it to be read again?

Mr. BROUSSARD. Yes; I do.

The PRESIDENT pro tempore. The Secretary will read the amendment again.

The reading clerk again read the amendment.

Mr. REED of Missouri. Mr. President, what is the object of the amendment?

Mr. JONES of Washington. The purpose is simply this, Mr. President: Under the law now automobiles found violating the narcotic laws, the drug laws, the prohibition laws, and so forth, are forfeited to the United States. This amendment simply makes those automobiles available for use, if the Secretary of the Treasury finds that they are necessary, instead of putting them up and selling them at public auction.

Mr. REED of Missouri. Does it not go further than that? Does it not only make them available but provides that they must be used to the exclusion of anything else?

Mr. JONES of Washington. No; only in the discretion of the Secretary of the Treasury whenever they are needed. In other words, he does not have to buy automobiles if there are any available.

Mr. REED of Missouri. That is all right, but I think the amendment goes further than that.

Mr. JONES of Washington. No; I think not. I have not the amendment before me.

Mr. BROUSSARD. Mr. President, I make the point of order that this is legislation on an appropriation bill.

Mr. JONES of Washington. It is a limitation on the appropriation. It provides that none of the moneys appropriated shall be used for certain purposes if these vehicles are available. It means saving money for the Government.

Mr. BROUSSARD. For what purpose?

Mr. JONES of Washington. For any purpose.

Mr. BROUSSARD. Do they not use that money to buy evidence?

Mr. JONES of Washington. Oh, no.

Mr. BROUSSARD. Did they not expend last year $255,000 to buy evidence?

Mr. JONES of Washington. I do not know. This amendment does not affect that.

Mr. BROUSSARD. For what purpose do you want to save the money?

Mr. JONES of Washington. None of the money will be used for buying automobiles if these others are available.

Mr. BROUSSARD. Well, let them buy automobiles.

The PRESIDENT pro tempore. What is the point of order made by the Senator from Louisiana?

Mr. BROUSSARD. That the amendment is legislation on an appropriation bill.

The PRESIDENT pro tempore. Plainly, the amendment is not germane to the present bill. In the opinion of the Chair it is also general legislation.

Mr. JONES of Washington. The question of germaneness, under the rules, should be submitted to the Senate. The rules so provide.

Mr. BROUSSARD. The Chair, I understood, ruled also that the amendment was out of order as being legislation.

The PRESIDENT pro tempore. The point of order was not made that the amendment was not germane. That was simply the observation of the Chair. The Chair sustains the point of order.

Mr. JONES of New Mexico. Mr. President, I did not know until this evening that any attempt would be made to make appropriations for reclamation projects upon this bill; and it is highly important, if anything of this sort is to be done at all, that something should be done for the Carlsbad project in New Mexico.

Mr. WARREN. Mr. President, if the Senator will permit me for a moment, those that have gone in are those that the fact-finding commission put before the Congress to have appropriated for, and some of them went before the Budget. Undoubtedly the project of which the Senator speaks was taken up for examination; but these were the most pressing ones and the ones most likely to respond quickly. Furthermore, they absorbed all of the funds that at that time or even up to the present time could be devoted to that purpose, because we have to take the funds that come into this reservoir, as it may be called, to provide all of these appropriations; but money is coming in now even faster than usual on account of the oil royalties, and this project no doubt will come in its time all right.

Mr. JONES of New Mexico. Mr. President, I desire, if I may, to have the attention of Senators for just a few moments.

The Fact Finding Commission has made a very exhaustive report regarding the Carlsbad project in New Mexico and makes the positive statement that additional storage must be provided or the project in a short time must be abandoned. The Fact Finding Commission recommends that an expert engineering survey shall be made in order to procure additional storage for that project. The recommendation is made, and I could give somewhat in detail the kind of an engineering survey that must be made in order to secure this storage.

I should like to ask for a very modest appropriation so that that engineering survey may proceed; and I hope there will be no objection to an appropriation of $100,000, or so much thereof as may be necessary, for doing that engineering work which the Fact Finding Commission recommends.

Mr. WARREN. Of course, $100,000 is a very large amount for a survey of that kind. There is already in the bill $25,000 or $50,000 in one case and $145,000 in another for the very surveys the Senator speaks of; and then the whole fund is open to that, anyway. I think the project will be provided for in that way.

Mr. JONES of New Mexico. Of course, that may be true. I think it is unfortunate that this matter should come up for consideration in the Senate at such a time as this.

Mr. WARREN. The Senator is an honored member of the Committee on Appropriations, and I am sorry that he was not able to be there.

Mr. JONES of New Mexico. This proposal, however, is entirely new to me.

Mr. WARREN. A great deal of this is new because it is the last clean-up, and many of these things came down under date of June 4 from the Budget Bureau. I hope the Senator will not undertake to put anything of that kind in the bill now.

Mr. JONES of New Mexico. May I ask the Senator to let this item go into the bill, and we can take it up in conference; and if it is not necessary, it can go out?

Mr. WARREN. Has the Senator an amendment prepared?

Mr. JONES of New Mexico. I have the amendment prepared. On page 31 of the bill I move to insert a new paragraph, as follows:

> Carlsbad project, New Mexico: For an expert engineering survey to secure additional feasible storage, $100,000, or so much thereof as may be necessary.

Mr. WARREN. If the Senator will reduce that to $50,000, I will not object to it.

Mr. JONES of New Mexico. I make the reduction to $50,000.

The PRESIDENT pro tempore. The Senator from New Mexico offers an amendment, which will be stated.

The READING CLERK. On page 31, after the amendment heretofore agreed to, it is proposed to insert the following words:

> Carlsbad project, New Mexico: For an expert engineering survey to secure additional feasible storage, $50,000, or so much thereof as may be necessary.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from New Mexico. [Putting the question.] By the sound the noes seem to have it.

Mr. JONES of New Mexico. I call for a division, Mr. President. I hope Senators will understand what has been going on. I realize that there has been a great deal of conversation in the Chamber. I ask for a division. The chairman of the committee has accepted the amendment.

On a division, the amendment was agreed to.

Mr. JONES of Washington. Mr. President, I appeal to the Senator from Louisiana to withdraw his point of order against the amendment which I offered, and to which he made a point of order a moment ago.

I know his views, but I also feel that he does not desire to put the Government to any unnecessary expense, and that he would be glad to have instruments that are taken in the violation of the law used to save the Government the expenditure of money.

The amendment which I propose simply does this. Under the law as it is now, automobiles taken in connection with violations of the law covering prohibition, trade in narcotics, and so forth, are forfeited to the Government. They can not be used by the Government, however, in law enforcement. We need many of these instruments of enforcement, but these automobiles must be put up and sold at public auction, and the result is that they are bought in by the violators of the law at a nominal sum.

Where the automobiles have been forfeited to the Government pursuant to law, the amendment would allow the Government to make use of them in the enforcement of the law.

Mr. KING. Mr. President, there is very much merit in the position of the Senator, but I suggest to him that he will encounter in this matter the same objection which has been encountered with respect to the distribution of war surplus supplies. The experience has been in many of the States that every little engineer and many of the employees in the road department have had cars and other material from the War Department where they did not need them.

If the provision could be surrounded by proper protection, so that the number used by the prohibition department would be limited to only those that were indispensably necessary, it would be one thing; but if all these cars are taken and turned over to the employees of the Government in the prohibition department, there will be hundreds of thousands of dollars of expense every year in repairs and in the purchase of gasoline and other accessories in connection with the operation of the cars.

Mr. JONES of Washington. Under the terms of the amendment, this would be entirely within the control and under the direction of the Secretary of the Treasury himself. He must make rules and regulations, and he must control. I do hope the Senator from Louisiana, in the interest of economy, in the interest of the Government, will withdraw his point of order.

Mr. BROUSSARD. May I ask the Senator from Washington what economy it would mean to the Government finally, at the end of the year?

Mr. JONES of Washington. A very great deal, because the Government now purchases automobiles to aid the officers in the enforcement of the law. They do not purchase nearly as many as they need, and we could save practically all that money by making use of these automobiles, which really belong to us, because they are confiscated under the law.

Mr. BROUSSARD. Will the Senator tell us how many automobiles the prohibition enforcement department of the United States owns now?

Mr. JONES of Washington. I do not know how many they own.

Mr. BROUSSARD. Do they not have enough?

Mr. JONES of Washington. No; they do not.

Mr. BROUSSARD. How does the Senator know that?

Mr. JONES of Washington. I know that in my own locality they have not. I do not know how many they own throughout the country, but I do know that in my locality they do not have anything like the number they should have.

Mr. BROUSSARD. Does the Senator from Washington know that last year the enforcement department spent $250,000 to buy evidence, and in many cases induced men to go into the liquor traffic in order to get evidence?

Mr. JONES of Washington. I do not know about that, but even granting it, for the sake of argument, that has nothing to do with the proposition.

Mr. BROUSSARD. If you saved all, it would be expended, would it not?

Mr. JONES of Washington. I think not.

Mr. BROUSSARD. I think so. I insist upon the point of order. When the Senator is through, I may say a word.

Mr. JONES of Washington. I am through. I made my appeal to the Senator in the interest of economy to the Government.

Mr. WARREN. Mr. President, just a moment. It is the custom in the House, in the case of election contests, to pay a certain sum to those engaged in the contests. It seems that one of the Members of the House who is entitled to $2,000 has not been provided for.

The PRESIDENT pro tempore. The Senator from Wyoming offers a further amendment, which will be read.

Mr. WARREN. I want to state what it is, because I have not authority from the chairman of the committee in the House, but one of the members of the committee who is acquainted with the matter has presented it, and I ask the indulgence of the Senate to accept it until we can see in the morning whether it is all right.

The PRESIDENT pro tempore. The Secretary will read the proposed amendment.

The READING CLERK. On page 3, after line 24, insert:

For payment to John Gorman for expenses incurred as contestant in contested-election case of Gorman against Buckley, $2,000.

The amendment was agreed to.

Mr. McNARY. I offer the following amendment.

The PRESIDENT pro tempore. The Secretary will state the amendment.

The READING CLERK. On page 3, after line 3, insert:

For additional salary of J. Mark Trice, stenographer in charge of furniture accounts and records, $250.

The amendment was agreed to.

The PRESIDENT pro tempore. If there be no further amendment as in Committee of the Whole the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

### PROMOTION OF VOCATIONAL REHABILITATION

Mr. KING. Mr. President, I enter a motion to reconsider the vote by which the conference report on House bill 5478, to amend sections 1, 3, and 6 of an act entitled "An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment," was agreed to, and I move that the President be requested to return the bill, which has been forwarded to him.

The PRESIDENT pro tempore. The motion to reconsider will be entered. The Senator from Utah moves that the President be requested to return the bill to the Senate.

The motion was agreed to.

### JAMES B. PORTER

Mr. REED of Missouri. Mr. President, I ask unanimous consent for the present consideration of House bill 3477, for the relief of James B. Porter. It involves $152. It has been passed on favorably by the Post Office Department, and is recommended for passage. It covers damage done through the operator of a Government truck.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $152.73, in full settlement against the Government, to James B. Porter, of Kansas City, Mo., for damage to his property by a United States mail truck.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### V. E. SCHERMERHORN AND OTHERS

Mr. CURTIS. I ask unanimous consent for the present consideration of House bill 6049, for the relief of V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to V. E. Schermerhorn, E. C. Caley, G. W. Campbell, and Philip Hudspeth, their heirs, executors, administrators, or assigns, the following sums: V. E. Schermerhorn, $2,767.45; E. C. Caley, $192; G. W. Campbell, $16; and Philip Hudspeth, $134, for the destruction on October 15, 1908, of their property by fire which occurred on the Fort Riley (Kans.) Military Reservation, while Battery A, Sixth Field Artillery, was engaged in target practice, near the northern boundary, and which spread to and caused serious damage to privately owned farms adjoining the reservation; and the sum of $3,109.45 is hereby appropriated for said purpose out of any money in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### ADJOURNMENT

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and the Senate (at 11 o'clock and 55 minutes p. m.) adjourned until to-morrow, Friday, June 6, 1924, at 12 o'clock meridian.

## NOMINATIONS

*Executive nominations received by the Senate June 5 (legislative day of June 3), 1924*

### COLLECTOR OF CUSTOMS

Thomas P. Gable, of Santa Fe, N. Mex., to be collector of customs for customs collection district No. 24, with headquarters at El Paso, Tex., to fill an existing vacancy.

### POSTMASTERS

#### ALASKA

Martin Conway to be postmaster at Skagway, Alaska, in place of Martin Conway. Incumbent's commission expired June 4, 1924.

Charles W. Carter to be postmaster at Juneau, Alaska, in place of Z. M. Bradford. Incumbent's commission expired June 4, 1924.

#### ARIZONA

Raymond W. Still to be postmaster at Tempe, Ariz., in place of H. E. Laird. Incumbent's commission expired June 5, 1924.

#### CONNECTICUT

George E. Dickinson to be postmaster at Rockville, Conn., in place of George Forster. Incumbent's commission expired June 5, 1924.

George L. Rockwell to be postmaster at Ridgefield, Conn., in place of W. S. Gilbert. Incumbent's commission expired June 5, 1924.

Robert D. Bristol to be postmaster at Guilford, Conn., in place of E. B. Sullivan. Incumbent's commission expired June 5, 1924.

#### IDAHO

Robert R. Coon to be postmaster at Emmett, Idaho, in place of S. D. Riggs. Incumbent's commission expired June 5, 1914.

#### ILLINOIS

Vera M. Carlson to be postmaster at Woodhull, Ill., in place of C. E. Carlson. Incumbent's commission expired June 5, 1924.

Fred Frazier to be postmaster at Viola, Ill., in place of Grove Harrison. Incumbent's commission expired June 5, 1924.

John Gukeisen to be postmaster at Kenilworth, Ill., in place of W. T. Robinson, deceased.

Charles Jackson to be postmaster at Joy, Ill., in place of R. L. Downing. Incumbent's commission expired June 4, 1924.

Rufus Denton to be postmaster at Carthage, Ill., in place of E. R. Boswell, deceased.

INDIANA

George P. Crabtree to be postmaster at Clay City, Ind., in place of G. C. Luther. Incumbent's commission expired June 5, 1924.

IOWA

Esther Y. Walster to be postmaster at Marble Rock, Iowa, in place of E. Y. Walster. Incumbent's commission expired August 5, 1923.

Gilbert Jones to be postmaster at Hawkeye, Iowa, in place of A. B. Peters. Incumbent's commission expired June 5, 1924.

Elizabeth Summers to be postmaster at Fort Atkinson, Iowa, in place of A. J. Schreiber. Incumbent's commission expired June 5, 1924.

Charles A. Norris to be postmaster at Eldora, Iowa, in place of E. S. Thompson. Incumbent's commission expired June 5, 1924.

Zene C. Thornburg to be postmaster at Des Moines, Iowa, in place of G. A. Huffman. Incumbent's commission expired April 28, 1924.

KANSAS

Clara G. McNulty to be postmaster at Stockton, Kans., in place of J. Q. Adams. Incumbent's commission expired June 4, 1924.

George H. Leisenring to be postmaster at Ellis, Kans., in place of Alexander Nierunberger. Incumbent's commission expired June 4, 1924.

KENTUCKY

William J. Deboe to be postmaster at Marion, Ky., in place of Jesse Olive, removed.

MAINE

Lawrence A. Brown to be postmaster at Brunswick, Me., in place of I. G. Elder. Incumbent's commission expired June 5, 1924.

MARYLAND

William B. Cutshall to be postmaster at Woodsboro, Md., in place of O. S. Barrick. Incumbent's commission expired June 4, 1924.

Grace Rowe to be postmaster at Emmitsburg, Md., in place of R. C. Foreman. Incumbent's commission expired June 4, 1924.

MINNESOTA

Zenas V. Johnston to be postmaster at Atwater, Minn., in place of Oliver Erickson. Incumbent's commission expired June 5, 1924.

MISSOURI

George R. Hendricks to be postmaster at Rutledge, Mo., in place of D. J. Buford. Incumbent's commission expired June 5, 1924.

Albert L. Brady to be postmaster at Oran, Mo., in place of L. P. Driskill. Incumbent's commission expired June 5, 1924.

NEBRASKA

George H. Holdeman to be postmaster at York, Nebr., in place of C. F. Gilbert. Incumbent's commission expired June 4, 1924.

Henry D. Grady to be postmaster at O'Neil, Nebr., in place of M. H. McCarthy. Incumbent's commission expired June 4, 1924.

Clarence J. Davis to be postmaster at Maxwell, Nebr., in place of C. H. Kuhns. Incumbent's commission expired April 9, 1924.

J. Lyndon Thornton to be postmaster at Fairbury, Nebr., in place of Daniel Kavanaugh. Incumbent's commission expired June 4, 1924.

William C. Coupland to be postmaster at Elgin, Nebr., in place of W. A. Nyrop. Incumbent's commission expired June 4, 1924.

NEW JERSEY

David Tumen to be postmaster at Atlantic Highlands, N. J., in place of C. R. Grover, resigned.

OREGON

Leila A. Phelps to be postmaster at Hermiston, Oreg., in place of C. H. Skinner. Incumbent's commission expired May 6, 1924.

PENNSYLVANIA

Boies M. Boyer to be postmaster at Weissport, Pa., in place of G. D. Arner. Incumbent's commission expires June 5, 1924.

Thomas M. Brown to be postmaster at Glen Rock, Pa., in place of H. A. Koller. Incumbent's commission expires June 5, 1924.

SOUTH CAROLINA

Annie H. Goblet to be postmaster at Mount Pleasant, S. C., in place of H. E. Dawson, resigned.

SOUTH DAKOTA

Leland K. Stoddard to be postmaster at Parker, S. Dak., in place of Frelen Riley. Incumbent's commission expired June 4, 1924.

TENNESSEE

Bessie P. Downing to be postmaster at South Pittsburg, Tenn., in place of B. P. Downing. Incumbent's commission expired May 28, 1924.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate June 5 (legislative day of June 3), 1924*

SPECIAL COUNSEL

William C. Morrow to be special counsel, employed to prosecute proceedings to assert and establish the title of the United States to sections 16 and 36, township 30 south, range 23 east, Mount Diablo meridian, within the exterior limits of naval reserve No. 1 in the State of California, and to prosecute any suit or suits ancillary thereto or necessary or desirable, under the provisions of Public Resolution No. 6, approved February 21, 1924, compensation to be paid from the appropriation provided by Public Resolution No. 8, approved February 27, 1924.

DIPLOMATIC SERVICE

SECRETARY OF EMBASSY OR LEGATION, CLASS 1

John Van A. MacMurray.

CONSULAR SERVICE

*To be consul general of class 2*

Julius G. Lay.

*To be consul generals of class 3*

Homer M. Byington.
Tracy Lay.
Clarence E. Gauss.
William Dawson.
Nelson T. Johnson.
Roger Culver Tredwell.

*To be consul generals of class 4*

W. Stanley Hollis.
George S. Messersmith.
Addison E. Southard.
Louis G. Dreyfus, jr.
Clarence Carrigan.
Theodore Jaeckel.
Edwin L. Neville.
Mahlon Fay Perkins.
John A. Gamon.
Philip Holland.
Thomas D. Bowman.
Henry P. Starrett.
Wesley Frost.
George E. Chamberlin.
Ezra M. Lawton.
Lewis W. Haskell.
Arminius T. Haeberle.
Ely E. Palmer.
Charles S. Winans.
Arthur C. Frost.

## HOUSE OF REPRESENTATIVES

THURSDAY, *June 5, 1924*

The House met at 12 o'clock noon.

Rev. William B. Waller, D. D., of Washington, D. C., offered the following prayer:

Almighty God, our Heavenly Father, look with favor upon us at this time, we humbly beseech Thee. We come in the name of the Man of Nazareth who spake as never man spake, revealing unto us God the all-wise, all-righteous, all-loving Father, and who says to us and to all men: "One is your Master and all ye are brethren." May Thy blessing rest richly upon our President and all with him in authority. We beseech Thee especially for Thy blessing upon Congress now assembled. May they be guided by the spirit of wisdom in all their deliberations. May they be workers together with God in building up His kingdom of justice and righteousness and brotherly kindness on the earth. So hasten the time when the kingdoms of this world may become the kingdom of our Lord and of His Christ and He shall reign forever and ever. In His name we pray. Amen.

The Journal of the proceedings of yesterday was read and approved.

PURCHASE OF SILVER UNDER THE PITTMAN ACT—REREFERENCE

Mr. McFADDEN. Mr. Speaker, by direction of the Committee on Banking and Currency, I move that the Committee on Coinage, Weights, and Measures be discharged from further consideration of the bill (S. 2917) directing the Secretary of the Treasury to complete purchases of silver under the act of April 23, 1918, commonly known as the Pittman Act.

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania, which the Clerk will report.

The Clerk will report the motion of Mr. McFADDEN.

Mr. VESTAL. Mr. Speaker, I rise to oppose the motion.

The SPEAKER. The Chair thinks the motion is not debatable.

Mr. VESTAL. Mr. Speaker, I ask unanimous consent that I may proceed for five minutes on this matter.

The SPEAKER. Would it not be fair to have five minutes on a side?

Mr. VESTAL. That is correct, and I make that request.

The SPEAKER. The gentleman from Indiana asks unanimous consent that there be five minutes of debate on a side. Is there objection?

There was no objection.

The SPEAKER. The Chair thinks the gentleman from Pennsylvania [Mr. McFADDEN], who makes the motion, is entitled to speak first.

Mr. McFADDEN. Mr. Speaker and gentlemen of the House, this is a bill directing the Secretary of the Treasury to carry out the terms of the so-called Pittman Act. The Pittman Act is an act that was passed during the war and was made to appear as necessary by a situation which developed in India, whereby silver was necessary to be sent by England, or by the United States to India, and in accordance with the act which was passed, the Treasury was authorized to sell to England the silver contained in some 350,000,000 silver dollars, at $1 per ounce, that were in the Public Treasury. Under the terms of the act, the Treasury was

also authorized to reimburse itself from time to time by the repurchase of a like amount of silver that was sold to England at $1 an ounce, which was the same price at which the silver dollars were sold, the purpose being to replenish what silver was taken from the Public Treasury. The Treasury proceeded under that law, but it is now claimed by the silver producers of the country that the Treasury under the repurchase clause of that law has not purchased some 14,000,000 ounces of silver which they should have purchased. The whole subject involved in this legislation is whether or not that purchase should be made, whether or not the Treasury has complied with the terms of the law. The particular matter before the House this morning is simply a rereference of that bill from the Committee on Coinage, Weights, and Measures to the Committee on Banking and Currency. I might say, for the benefit of the Members of the House, that the original Pittman Act was handled by the Committee on Banking and Currency.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. MADDEN. I do not care to which committee this bill goes, but if the bill passes, it will be paying a subsidy of $5,000,000 to the silver miners of the country, and that is all there is to it.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. In a moment. I might say to the gentleman that the whole question involved is whether or not the Treasury has complied with the law which was passed. If the Congress saw fit to pass a bill which is a subsidy to the silver miners, it is no reason why now the Congress should repudiate its action, and it will be the duty of the committee to look into the matter and determine whether or not that is the case.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. STEVENSON. As to the committee to which it should go, I call the attention of the gentleman to the fact that the bill deals with the currency directly, because as each dollar of silver is coined we retire a dollar of Federal reserve bank notes, which were issued in lieu of that, and there is this number of millions of dollars of Federal reserve bank notes left outstanding because of this depletion of the currency by the sale of this silver.

Mr. McFADDEN. The gentleman is correct.

Mr. STEVENSON. It deals directly with the question of the Federal reserve bank notes.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. SNELL. Does the gentleman expect that he will be able to get this out of the committee before the close of this session?

Mr. McFADDEN. That is a matter that is up to the leaders of the House.

Mr. SNELL. As far as the committee is concerned, they are going to act on this right away?

Mr. McFADDEN. Nothing has been decided about that.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. VESTAL. Mr. Speaker and gentlemen of the House, I do not know whether a mistake was made when the Pittman bill was enacted into law, and I do not know whether the reference of that bill to the Committee on Banking and Currency was a proper reference at that time or not, but this bill, S. 2917, which has been passed by the Senate, has been referred to the Committee on Coinage, Weights, and Measures and has to do entirely with the coinage of silver. If there is any committee that has jurisdiction of this bill, it is the Committee on Coinage, Weights, and Measures, and, in my judgment, it was rightfully referred to this committee, and the Committee on Coinage, Weights, and Measures objects to having this bill taken from it at this time and referred to the Committee on Banking and Currency.

The Committee on Banking and Currency is a large committee. The Committee on Coinage, Weights, and Measures is a small committee. It has jurisdiction of this matter and ought to have a right to consider this bill. I do not care to go into the merits of this bill at this time, but we have more than $501,919,769 worth of silver stored up in the Treasury and outstanding silver certificates of only $406,898,067. If this bill were passed at this time it would pay, as the gentleman from Illinois has well said, a bonus of something like $5,000,000 out of the Treasury of the United States to the mine owners of this country. That is what it means.

Mr. STENGLE. Will the gentleman yield?

Mr. VESTAL. I will be glad to do so.

Mr. STENGLE. I want to ask for information. Can the gentleman tell us what the market price of silver is to-day?

Mr. MADDEN. Fifty-three cents.

Mr. STENGLE. That is what I thought; and the difference between 53 cents and $1 would go to somebody?

Mr. VESTAL. Five million dollars over and above what it would cost to buy this silver to-day on the market. That is what it would mean by this bill, and I hope the Members of the House will vote down the motion and leave this bill in the committee, where it rightfully belongs, and we will go into the merits of this bill and report our action to the House. [Applause.]

The SPEAKER. The question is on the motion of the gentleman from Pennsylvania.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. HASTINGS. Mr. Speaker, I ask for a division.

The House divided; and there were—ayes 54, noes 79.

Mr. WINGO. Mr. Speaker, I object to the vote on the ground that no quorum voted, and I make the point of order that there is no quorum present.

The SPEAKER. The Chair thinks there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 237, nays 129, not voting 67, as follows:

Mr. Lehlbach with Mr. Geran.
Mr. Britten with Mr. Celler.
Mr. Knutson with Mr. Wefald.
Mr. Taylor of Tennessee with Mr. Berger.

The result of the vote was announced as above recorded.

THE WOMEN OF MISSISSIPPI

Mr. HILL of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by placing therein the address of the gentleman from Mississippi [Mr. RANKIN] on the women of Mississippi, delivered before the Mississippi Society of Washington, D. C., on Friday evening, May 9, 1924.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks by printing a speech delivered by Mr. RANKIN of Mississippi. Is there objection? [After a pause.] The Chair hears none.

Mr. HILL of Alabama. Mr. Speaker, under leave granted me I extend my remarks by placing in the RECORD the beautiful address of the eloquent and distinguished gentleman from Mississippi, Hon. JOHN E. RANKIN, on The Women of Mississippi, delivered to the Mississippi Society of Washington, D. C., on Friday evening, May 9, 1924:

THE WOMEN OF MISSISSIPPI

SPEECH OF HON. JOHN E. RANKIN, MEMBER OF CONGRESS FROM MISSISSIPPI, DELIVERED BEFORE THE MISSISSIPPI SOCIETY IN WASHINGTON, D. C., ON FRIDAY NIGHT, MAY 9, 1924

Mr. RANKIN. Ladies and gentlemen, the chairman admonishes me that my time is limited to five minutes, which I am sure will be as gratifying to you as it is to me. I am especially pleased to be placed under the "five-minute rule" just at this time, for the reason that I have no speech "cut and dried" for this occasion. However, I am sure that by the time I have finished you will all agree that it has been dry enough.

And as for the time, I fear some of you, at least, if not all of you, will think this the longest five minutes you have ever suffered. You may be like a certain Member of the House was on one occasion when an old hen-pecked Representative from the Middle West was making a speech in favor of taxing bachelors. He contended that we ought to tax them, if for no other reason, in order to make them marry, so they would live longer. He said married men lived longer than single ones. An old bachelor Member arose and said, "No; they don't live any longer; it just seems longer." So I fear my speech will seem to you much longer than it really is.

I have been asked, or rather directed, to talk on the "Women of Mississippi," the most fascinating subject that could be assigned to a man from that great State. I regret my inability to do justice to the subject, even if I had time for ample preparation, but if I had the ability to handle it properly and were thus suddenly called upon I would need the presence of mind once displayed by a certain ex-Congressman when he was confronted with an usual emergency. He said that back during the old days before national prohibition he attended a meeting of his friends "downtown," which lasted until 3 or 4 o'clock in the morning. After the meeting broke up he managed to get home the best he could, slipped off his shoes at the door, and thought he would get in bed without waking his wife up. She had a little dog, of which she was very fond, but which was always jumping up on the bed, the chairs, and the sofa, much to her annoyance. The ex-statesman said he got in bed and was just settling down and congratulating himself on his success when his wife roused up. She got about half awake, when she put her hand on his head and thought he was the little dog. She shook him and said, "Get out of here, Fido." In telling of the incident later, he said, "You know, I just did have presence of mind enough to lick her hand, and she dozed off to sleep."

It is always interesting to me to hear people talk about the great men from Mississippi. They tell of the eloquent Prentiss, of whom it was once said that he could speak the thought of poetry with the inspiration of oratory and in the tones of music. They refer with pride to the immortal Jefferson Davis, who, as Bishop Galloway once said, needs no monument save the indestructible substance of his own greatness to commend him to the consideration of all coming ages. They mention with reverence the names of L. Q. C. Lamar and James Z. George, who, with the assistance of other great leaders of the South, wrested that section from negro rule, and placed forever the standard of white supremacy above the capitol of every Southern State. They glory in the achievements of E. C. Walthall, whose fame will live as long as Lookout Mountain lifts its historic crest above the passing clouds. And other names, too numerous to be mentioned, occupy high places in the hearts and minds of the people of our State. But they have contributed no more to the greatness and glory of that proud Commonwealth than have the women of Mississippi.

When the early pioneer in that territory went forth to battle with the savages, and all the attending adversities of the new country, his wife shared in his dangers and his hardships, inspired him in the struggle, and kept alive the fires of religious fervor and patriotic devotion; and when the dark clouds of civil war hovered over our country, she responded to every patriotic call, and endured with uncomplaining loyalty all the hardships of the strife. Of all the valor manifested in all of the wars of all time, none surpasses that exhibited by the women of the South, who suffered all the sorrows, the anguish, and the outrages of modern warfare. And when the war was over, and the ragged Confederate veterans went back to their devastated homes, they found in the rich reward of Southern womanhood, unsullied by the blasts, a treasure greater than all the hordes of hostages or all the captured spoils of ruthless war.

Like the women of old, those of Mississippi were last at the foot of the Cross and first at the Resurrection. In 1867, when the country was yet rife with bitterness and hatred, the women of Columbus, in the district which I have the honor to represent, while decorating the graves of the Confederate dead, decorated also with impartial hands the graves of the Federal dead. This deed of unprecedented magnanimity, under the circumstances, challenged the admiration of the world, and brought from the pen of the Hon. Francis Miles Finch, a distinguished northern jurist and poet, a little poem called "The Blue and the Gray," that will live as long as the Stars and Stripes continue to float over a free people; as long as the sweet strains of old "Dixie" shall stir the Southern heart with its "sweet but melancholy pathos."

So great, indeed, has been the influence of the women of Mississippi upon her destiny and her progress that we have come to think of her as embodying their very characteristics. I love to imagine, that I can behold the genius of that proud State in the form of a beautiful woman as she moves on down the centuries, leaning, like a lovely maiden, upon the stalwart arm of the great Father of Waters; clothed in the richest raiment which the gifts of nature or the skill of man afford; crowned with a diadem of imperial victories, wherein glitter the glorious achievements of the historic past, or sparkle the names of her heroic men; smiling with a superabundance of agricultural productions; singing with a melody of thriving industries; gazing with steadfast contentment into the ever-promising future; and holding in her royal hand the olive branch of peace.

PROHIBITION

Mr. BUCKLEY. Mr. Speaker, I ask unanimous consent to extend my remarks on prohibition.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. BUCKLEY. Mr. Speaker and gentlemen, in the present state of public intelligence no Member of Congress is justified in arrogating to himself a greater wisdom than that which is contained in the people whom he was chosen to represent. As long as I continue to act for my people I shall always recognize prevailing public opinion in my district and aim to give it force whenever possible.

I need not resort to conjecture to ascertain how my people stand on this issue. On the 7th day of November, 1922, the voters of the State of Illinois passed officially upon the modification question. More than a million and one-half sovereign citizens of Illinois considered the question and subsequently recorded their preference through the ballot. The majority favoring a modification of the law was upward of 600,000. In my district—the sixth congressional of Illinois—the vote was 88,658 for modification as against 23,605 opposed. In the face of such definite instructions from the citizenry that I represent I would be derelict in my obligation if I neglected this opportunity to urge favorable action toward some form of modification of the Volstead law which will legalize the use of beer and light wines.

In urging modification of the Volstead law I am fully aware of the services Congress should render the cause of temperance, but a law which can produce such results as the Volstead law is producing is not a law to consider with reference to its even more strict enforcement, but a law calling for reconsideration, not for the destruction of practical temperance sentiment, but for the promotion of it.

Volsteadism is an utter mistake. It has resulted in the rather free and uncontrollable distribution of ardent spirits which always have been the common, if not the exclusive, source of intemperance. I am certain that if legislation were employed which would induce the people to abandon the use of ardent spirits, the use of light wines and other fermented beverages might be safely left to the private judgment and personal responsibility of every individual and that through such a policy the tide of drunkenness and lawlessness which is now threatening to engulf the nation would soon recede.

There can be none of us who have reached middle age who can not recall the memory of friends and acquaintances who have fallen victims to the dreadful appetite for strong drink. The national enforcement act was to correct all this, and yet as a result of its operation, whisky and high-proof alcoholic substitutes are more securely entrenched to-day than last year and will be more generally consumed next year than this year.

We know that enforcement of the Volstead law in large sections of the country is a farce and a failure. We know that Volsteadism has fostered widespread corruption and has bred general contempt for law. We know that it has put a premium on hypocrisy.

We know that while Volsteadism has outlawed beer, which was formerly the nourishing, harmless food and drink of millions, that it has had no efficacy at all in the suppression of vicious strong liquors. Shall we meet the situation intelligently by correcting the error that has been made, or shall we continue on, playing the part of a Nation of hypocrites, paying the price that sham and falsehood always exact from those who practice them.

Practically the only argument made by the opponents of the bills to modify the Volstead Act to legalize the sale of beverages containing as much as 2.75 per cent of alcohol by weight was that such modification would reestablish the brewing industry in the United States.

The brewing industry—or what formerly was the brewing industry—took no part in these hearings, either for or against the bills. A great number of citizens, who never have had, and never expect to have, any connection, direct or indirect, with the brewing industry appeared before the Judiciary Committee to urge the modification of the Volstead Act for the following reasons:

(1) To promote temperance—something the Volstead Act has failed to accomplish.

(2) To give to the people of the country a pure, mild stimulant, but nonintoxicating beverage, to alleviate discontent.

(3) To aid in the enforcement of legislation to carry out the spirit of the eighteenth amendment by satisfying the people and thereby encouraging them to uphold law enforcement.

(4) To check the great increase in alcoholic insanity and crimes of violence, resulting from the consumption of alcoholic beverages of impure and poisonous character.

(5) To restore respect for law and authority in the United States, almost completely broken down by the present Volstead Act.

(6) That the re-creation of a market for mild, nonintoxicating beer would demoralize the market for bootleg whisky and ardent spirits and thus contribute substantially to the eradication of the corruption of governmental agencies all too prevalent under existing conditions.

No one made an argument for or in defense of the brewery, because that was not, and should not have been, made an issue in the movement to modify the prohibition law. However, the opponents of these bills apparently endeavored to attribute all sorts of evils to the industry and credit it with no good whatsoever.

The first brewing plants in America were established for two principal purposes:

(1) To promote temperance by encouraging the use of very light alcoholic beverages generally considered by both manufacturers and the public as nonintoxicating.

(2) To create a market for the surplus grains produced on the farms.

Even the Puritans of Massachusetts encouraged the brewing industry by free grants of land, exemption from taxes, and cost bonuses for quantity production—see Brewing in America, American Encyclopedia. Many early American statesmen also encouraged the manufacture of light malt beverages to wean the country away from whisky, always plentiful and always easily made.

Since such an outcry was made against the brewing industry and so much evil attributed to it, it would seem to be an act of simple justice to state for this record that the world's most beneficent discovery to mankind, a discovery that has saved tens of millions of lives and untold suffering, and will go on down the ages saving lives and eventually eradicate disease, was brought about through experiments on beer authorized and paid for by brewers.

The discovery also made the surgeon's knife an instrument of mercy—a great life-saving agency—instead of a deadly instrument that sent 80 per cent of its victims to their graves.

The discovery brought forth by the brewers' efforts to find out what would make beer wholesome and beneficial has given the world these blessings of inestimable value:

(1) Good health; (2) pure food; (3) modern surgery and modern medical science; (4) knowledge of methods of sanitation that have eliminated many dangerous diseases and rendered immunity possible from practically all infectious disease.

During the Great War, when there was such an outcry against alcohol, Sir James Crichton Browne, M. D., LL. D., and F. R. S. (Fellow of the Royal Surgeons), wrote an elaborate treatise on "What we owe to alcohol."

With reference to the beneficent part that beer has played in developing the greatest of all blessings to the human race, Sir James Crichton Browne said in his treatise:

> In connection with evolution, as I have said, mankind owes much to alcohol, and in many subsidiary but still momentous matters it is under a deep debt of gratitude to it. Of the assistance it has given to the industrial arts I need say nothing, but it is well we should bear in mind that it is alcohol we have to thank for the triumphant application of life-saving knowledge in preventive medicine and aseptic and antiseptic surgery. These have been the direct outcome of Pasteur's studies on fermentation, undertaken at the instigation of brewers and distillers in France, who have thus proved to be, inadvertently, benefactors of the human race. It was his studies on beer that were the turning point in Pasteur's career and led him straight to that study of infectious diseases which has branched out so broadly and so beneficently. The conviction in Pasteur's mind had always been that there was more than analogy between the phenomena of fermentation and those of contagious and infectious diseases of men and animals, and proceeding with the utmost caution he succeeded in demonstrating the rôle of microorganisms in all of these.

It was Pasteur who proved the infectious character of the silkworm disease, which was wrecking the silk trade in France, and who was thus able to restore that trade to prosperity. It was Pasteur who, by his study of anthrax, revealed the infective nature of that disease and discovered the protective treatment which has safeguarded millions of sheep and cattle against it. It was Pasteur who, by his further studies on chicken pox and swine fever, by his great discoveries with regard to immunity from infectious disease, through the attenuation of virus, and finally, by his study of hydrophobia and its treatment, laid the foundation of all the amazing developments in preventive medicine and hygiene which we have witnessed during the last 40 years.

Aseptic and antiseptic surgery were the direct outcome of Pasteur's brewery work. In 1864 Lister, of immortal memory, became acquainted with Pasteur's early researches on the alcoholic lactic and butyric fermentations in which the phenomena of fermentation and putrefaction were definitely connected with the presence of microorganisms, and linking these with his own observations he was led to associate the inflammation and suppuration of open wounds with the action of microorganisms introduced from without. Thus inspired he entered upon these experiments and methods of treatment that have resulted in the triumphs of antiseptic surgery. It is impossible to exaggerate the boon and the blessings that this has conferred on mankind, that it is at this hour conferring on the wounded in the war, and this boon and blessing must be traced to the work done in M. Biol's brewery at Lille. Countless millions will have to thank that work for their lives and limbs and for exemption from suffering of an agonizing kind.

But to this work at Lille, undertaken with the object of introducing improved methods in brewing, distilling, vinegar, and wine making, we owe much more than the huge obligation that antiseptic surgery lays on us, for out of it have arisen directly or indirectly all the most important advances in modern medical science. To it must be ascribed the abolition of that dread scourge puerperal fever, the detection of the germs of tubercle, cholera, typhoid fever, lockjaw, and Malta fever, the discovery of diphtheria antitoxin and of the protective treatment against cholera, typhoid fever, and plague, the elucidation of the true nature and mosquito origin of malaria and yellow fever, and finally the production of a remedy for the hidden plague. Was there ever such a record? Have all the philanthrouists together done as much for poor human nature as this alcohol which is inveighed against as a diabolical invention? But for beer we might have been in a sorry pathological plight to-day, and yet the teetotalers would have us believe that in the invention of fermentation the Creator of the universe made a colossal mistake.

The temerarious may, of course, suggest that had Pasteur never lived the tremendous discoveries I have mentioned would have come in some other way, or that had Pasteur applied his chemical genius to the investigation of some other subject than brewing he would still ultimately have arrived at them. There was not a vestige of approach to those discoveries in any quarter until he studied fermentation. Most scientific discoverers have had their progenitors or forerunners, but Pasteur is a Melchizedek amongst them and had no pioneer. He made an absolutely new departure, and has himself traced back all his brilliant discoveries, step by step, to their starting point in his experimental inquiry into the maladies of beer in his laboratory at Lille. He smote the vat, and there flowed forth abundantly an ever broadening stream, not of beer but of knowledge, for the healing of the nations.

On Pasteur's tomb in the Pasteur Institute in Paris are inscribed in due chronological order all the links in the unbroken chain of his achievements, including the Etudes sur le vin (Studies on Wine) and the Etudes sur le Biere (Studies on Beer), which immediately precede the record of his work on infectious diseases, vaccines, and hydrophobia. "If this country," says Dr. Horace Brown, "had been fortunate enough to claim this illustrious man, can not we imagine the fanatical outcry which would have been raised had the words 'wine' and 'beer' appeared on this monument? Our allies on the other side of the channel take a more sane and philosophical view of such things."

The enormous and still-growing expansion of our knowledge of the causes of disease which Pasteur's discoveries have brought us has led to a revolution in treatment, but that has not displaced alcohol from its commanding position in the pharmacopoeia. It is still the most universally employed and the most trusted of remedies, and as regards its therapeutic uses there is, I believe, more unanimity of opinion in the medical profession than many persons suppose or than might be inferred from the perusal of the newspaper discussions on the subject. There are in the medical, as in all professions, free lances whose maneuvers attract more attention than the steady advance of the main body, and some of these have every now and then thrown discredit on alcohol as a drug. Fashion in this, as in other matters, has been responsible for ups and downs, and the temporary popularity of certain medical practitioners who were for or against alcohol has led to its greater or less prominence in the consulting room and sick room for a period. But most sober-minded medical men to-day, however much they may differ as to the use of alcohol in health and in certain states of ill health, will, I believe, admit they would feel lost, lamed, and impotent if deprived of its aid.

I have introduced the facts showing that the brewing industry, and beer inadvertently, gave the world its most beneficent scientific discovery merely in the interest of fairness. If the fact that some violations of the prohibition law are to be brought in here to prejudice you against the bills to legalize the manufacture, sale, and transportation of beverages containing as much as 2.75 per cent of alcohol by weight, then it is perfectly proper for you to consider the benefits to humanity that have accrued from the experiments initiated and paid for by the brewers, and also their contribution to temperance by substituting mild, healthful, and practically nonintoxicating beverages, even with the 4½ per cent of alcohol of former days, for the ardent spirits.

I have not attempted to answer all the extraneous arguments made against these bills but merely to answer some of the more important points brought up here to prejudice you and to influence public opinion. These bills should be considered strictly on their merits. You know that beverages containing as much as 2.75 per cent of alcohol by weight are not intoxicating, and are therefore legal under the Constitution. By enacting a law depriving the people of as much of their rights as possible under the eighteenth amendment instead of giving the people the benefit of all the doubt the Volstead law has brought upon the country a condition that has produced most serious results. Others have covered these points, and it is not necessary for me to repeat them.

## MEMORIAL DAY ADDRESS

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent to insert in the RECORD a speech delivered on May 30 by my colleague from Kentucky [Mr. VINSON], a Memorial Day speech.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to extend his remarks by printing a Memorial Day address by his colleague [Mr. VINSON.] Is there objection? [After a pause.] The Chair hears none.

Mr. BARKLEY. Mr. Speaker, pursuant to leave granted me I extend my remarks by inserting an address by Mr. VINSON of Kentucky, delivered at Ashland, Ky., May 30, 1924, in memorial for veterans of all wars.

The address is as follows:

### MEMORIAL DAY SPEECH OF MR. VINSON OF KENTUCKY

My friends and countrymen, to-day is a day dedicated to memory. It is a day set apart upon which we should pull aside the thin veil of the past and permit memory, that most cherished and hallowed possession of man, to hold full sway. It is a day set apart upon which a busy world shall pause and pay tribute to her honored dead.

Originally established by Gen. John A. Logan in 1868, for decorating the graves of the fallen heroes of the Civil War, it has for many years served this worthy purpose.

The war between the brothers lies in the dim historic past. There are few to gather at the graves of their comrades in that struggle and pay homage to their sacrifices and respect to their memory. The battle lines of both the blue and the gray grow thinner as time relentlessly presses on, but it is good for us of a younger generation to see the wearers of the blue and the wearers of the gray joining in this ceremonial. It is not for this occasion to question the purpose of that conflict. Suffice it to say, each, serving an ideal, was right then; and each is right now.

Recently I was privileged to view the room in which Robert E. Lee, then a wearer of the blue as a commissioned officer of high rank, wrestled with the problem which only he could solve, namely, whether he should bear arms for or against his mother State. Casting off the uniform of blue he clothed himself in the historic gray; and despite such action lived to find himself honored and respected by the Nation, which survived that conflict, as one of the first citizens of the land.

At this point, permit me to pay homage to all who participated in that struggle, both the living and the dead. May those who have gone on before realize with what honor and reverence we cherish their memory. May those who yet remain with us, be permitted many, many times to be the honor guests at similar ceremonials; and when the God of Destiny—the Commander in Chief of the universal forces—issuing final orders, bids you enlist in His army in the skies, may you advise your comrades, whom you rejoin, that a world power, made possible by your sacrifices, yet honors and reveres your memory. And, may that army of immortals never fail to hear in the heart beats of true Americans that truth spoken through the lips of Webster:

"Liberty and Union, now and forever, one and inseparable."

For 30 years this day was observed as a memorial for the heroes of the Civil War, and then an added meaning was given to it.

It is with the memory of a mere boy that I recall, in 1898, with what spirit "the boys" of our country responded to the call of the then President, Mr. McKinley. In that moment, the fast fading lines of color between blue and gray were forever erased and obliterated. "The boys" of the North, and "the boys" of the South were thrown together, and became "the boys" of America. They mixed, mingled, and fought the enemy side by side. The friendships, the kindnesses, the camaraderie of the camp, the loyalty for each other in battle, welded, as nothing else could, the various sections of our country into one harmonious whole.

For the first time in our history as a Nation, our Army waged battle off the continent; for the first time in the history of the world, so far as I can learn, did a mighty nation—without ulterior purpose—rescue a people from misery and oppression. Outnumbered 10 to 1, our soldiers quickly reduced to subjection the mighty army of the

Spanish King; in short meter, the Navy met the test, and placed our flag in glory in destroying and capturing the navy of that proud power. In point of time, it was of short duration; in the consequence of results it can not be estimated.

Many of America's best did not return; many of these heroes since have passed to the great beyond. So—for 25 years—a quarter of a century, our Nation has set apart this day as a memorial for those who served it well in those eventful days.

Honor to these veterans, be they living or dead. Ofttimes it occurs to me that the speed with which they performed, the calm manner in which they braved the dangers of disease and battle, the patience with which they have suffered and endured, the modesty which they exhibit in our every-day contact with them, has, in the minds of some, tended to minimize the accomplishments which crowned their military efforts.

While it is unnecessary I bespeak this concourse of friends and true Americans to keep ever fresh in your minds the patriotic impulses which actuated young America in our war with Spain, be it ever mindful that "the boys" to-day are not as youthful and as spry in body as they were when they marched away to uphold Old Glory upon foreign soil. Be ever mindful that the ranks of these defenders of the flag are thinning, and that taps, in their midst, is being heard more often. Forget not that they performed true service, and did the job well.

Remember, my countrymen, that from their sacrifices to the danger of battle and the ravage of disease our country was permitted to emerge from that conflict the victorious champion of the weak and the oppressed, triumphant over a world power; but, greater than all that, permitted to emerge from that struggle a Nation united, America, forevermore.

The sands of time run on; the pages of history are turned. And we find a peace-loving Nation looking aghast at the flood of war turned loose upon Europe by a war-mad King. In the advance of civilization it was thought that such a conflagration could never occur; that the enlightenment, education, and culture of this age would be sufficient safeguard against such a catastrophe. But the world did not reckon with the human nature of and the inordinate greed possessed by that militaristic Empire who for decades had nursed its children at the breast of war.

In 1914 the dogs of war were loosed. For three years the Kaiser respected our rights as a neutral, and we viewed from afar the horrors inflicted upon God-fearing people. The time came, however, in the warped brains directing the destiny of the German Empire to cast discretion to the winds and to draw us into the struggle at a time too late to permit of our powers upon the battle field being exerted against their victorious armies. They planned to have beaten the Allies into submission before our actual entry into battle, and then compelling us to bend the suppliant knee they would achieve their dream of years, and, in fact, be the conquerors of the world with all that such power would bring to them.

Thus America was forced to wage war upon foreign soil, more than 3,000 miles across deadly seas. Again America entered the lists upon the side of humanity in a war that rocked the world to its very foundation.

Immediately upon its entrance into the conflict our Government proceeded in a businesslike manner. The youth of the land, in accordance with law, was selected to form the armies that were to decide the future destiny of the world. How well the work was done, the world acclaims from the mountain tops. The unthought-of ability to marshal, train, equip, transport, present, and maintain soldiers upon the tired battle front in Europe in the short time required will ever remain the marvel of military preparation. American energy, spirit, and ingenuity surpassed the expectation of the Hun.

The effect of America's entry to the worn soldiery of the allied forces was as manna to the starving. Hope, ever present in the bosom of man, sprang up anew. The fire of patriotism, burned low because of physical exhaustion, flared into brighter flame. America, the land of the free and the home of the brave, was coming in their time of need.

As long as civilization lasts history will record the effect, both physical and psychical, that the appearance of the American soldiers played upon the German Army. As long as time endures history will record the achievements of the American boys at Chateau-Thierry, Belleau Woods, St. Mihiel, Meuse, and the Argonne. These are only a few of the bloody spots where American heroism turned defeat into glorious victory. Flesh and blood could not stand against the onslaught of the spirited soldiers of America.

But there was a price to pay. Sixty thousand of America's finest paid the supreme sacrifice in battle. Sixty thousand, equally heroic, gave up life for country in combat with disease. Every nook and corner of our vast country felt the touch of the reaper in its harvest of heroes. Every portion of America to-day grieves the loss of a hero son.

At this time it seems that the war was fought to no purpose, but, having implicit faith in the God of our Nation, I can not believe that the sacrifices of America's sons will have been in vain. Mere man, with all his sophistry, can not withstand the purpose of God. In His own time He will cause America to take her proper place in the councils of nations to the end that other such wars may be prevented.

My countrymen, this is a day of memory. Memory of the days that brought to death tens of thousands of our youths, that we might enjoy the blessings of freedom. Freedom was involved in the World War conflict just as much as it was involved in the War of 1776. The American soldier, whether he sleeps in Flanders Field or lies in honor under his native soil or daily passes you on the streets, provided you with liberty. The ex-service man of this country, offering himself, his all, to the service of his country, is your creditor. You are in his debt. It is such a debt that can never be liquidated. And I state, irrespective of the words of any person, though he may occupy position in high places, that America is not ungrateful to the men who served the flag in this struggle. Gratitude is part of my religion. Reverently do I say, "God forbid that this country for long should forget its obligations, its never-dying debt of gratitude to the boys who served the flag in the recent world conflict." To forget would be to the living a blow against patriotism and love of country; to forget would be unpardonable to those who laid down their lives that "government of the people, by the people, and for the people might not perish from the earth"; to forget would be a sacrilege to the most wonderful emotion emanating from God—mother love. This country must not forget that for each wound inflicted and death resulting to the soldiers in this war there was in each instance another casualty in the home here. These gold-star mothers are living exhibits of the awful reach of the toll of war. They have suffered; they have sacrificed; they must always mourn the absence of their boy. Only God Himself could measure the anguish in their hearts should this country for a moment forget.

Life is a strange process; death is a complete mystery. I only hope that in the silent realm of death they may know with what humble reverence we pay homage and tribute to them.

To-day is Decoration Day. It is fit that we adorn and bedeck the mounds that incased the mortal shape of our loved ones and keep forever green their memory; but likewise we owe the same duty to the living. To-day and every day we should decorate the lives of our soldiers, our parents, our family, our loved ones, in such manner as only love can show the way. We should never fail to express our love, our gratitude, and pay them tribute for the sacrifices they have made for us. We should never fail to do them honor, even as the word of God commands. We should do this to-day; to-morrow it may be a memory; and—

When the moving finger writes,
And having writ, moves on.
Nor all your piety and wit
Can lure it back to cancel half a line,
Nor all your tears wash out a word of it.

## ABANDONMENT OF PORTION OF PRESENT CHANNEL OF SOUTH BRANCH OF CHICAGO RIVER

Mr. DENISON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 3188 and consider it, a similar House bill having been reported.

The SPEAKER. The gentleman from Illinois calls up a Senate bill, a similar House bill being on the calendar. The Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 3188) for the abandonment of a portion of the present channel of the south branch of the Chicago River

Whereas the city of Chicago has requested a permit of the Secretary of War to straighten the south branch of the Chicago River between West Polk Street and West Nineteenth Street in the city of Chicago as a part of a project which comprises the construction of a new channel and the abandonment of the old channel between said West Polk Street and said West Nineteenth Street, as shown on drawings transmitted by the city of Chicago to the Secretary of War in connection with the aforesaid request for a permit and which are on file in the office of the Secretary of War; and

Whereas it is proposed to fill up and abandon a portion of the present channel of the south branch of the Chicago River between said streets as soon as said new channel shall have been constructed: Therefore

*Be it enacted, etc.*, That as soon as the city of Chicago, or any other governmental agency or any corporation thereunto duly authorized by the Secretary of War, shall have constructed a new channel for the south branch of the Chicago River between West Polk Street and West Nineteenth Street in said city of Chicago, then, and in that event, so much of the present channel of the south branch of the Chicago River as shall be superseded and replaced by said new channel in accordance with the permit of the Secretary of War shall be discontinued and abandoned.

Mr. LONGWORTH. Mr. Speaker, a parliamentary inquiry. Did I understand the Speaker to say that a similar bill was on the House calendar?

The SPEAKER. Yes.

The bill was ordered to be read the third time, was read the third time, and passed.

Mr. DENISON. I ask that a similar House bill lie upon the table.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

CELEBRATION OF THE CENTENNIAL OF THE FIRST MEETING OF THE LEGISLATIVE COUNCIL OF THE TERRITORY OF FLORIDA

Mr. SEARS of Florida. Mr. Speaker, I call from the Speaker's desk S. J. Res. 142, a similar resolution having been introduced by myself and reported out by the committee.

The SPEAKER. The gentleman from Florida calls up a Senate joint resolution, a similar resolution having been reported. The Clerk will report the resolution.

The Clerk read as follows:

Joint resolution (S. J. Res. 142) providing for the United States Government to have representation at the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida

Whereas the citizens of Tallahassee, Fla., the State capital, joined by the citizens of the entire State of Florida, are planning an appropriate celebration in November, 1924, of the centennial of the first meeting of the Legislative Council of the Territory of Florida, said celebration to be held at Tallahassee; and

Whereas it is desirable and fitting that the United States Government should be represented on the occasion of the said celebration: Therefore be it

*Resolved, etc.*, That the President be, and he is hereby, authorized and directed to name and appoint a representative of the United States Government to attend and participate in the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida, said celebration to be held at Tallahassee, Fla., the State capital, during the month of November, 1924.

The Senate joint resolution was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. SEARS of Florida, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

The SPEAKER. Without objection, a similar House bill will lie on the table.

There was no objection.

Mr. TAYLOR of Colorado. Mr. Speaker, I call up a House bill with Senate amendments.

The SPEAKER. The gentleman from Colorado calls up the House bill with Senate amendments. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 3104) granting 160 acres of land to the Western State College of Colorado at Gunnison, Colo., for the use of the Rocky Mountain biological station of said college.

The Senate amendments were read.

Mr. TAYLOR of Colorado. I move that the House concur in the Senate amendments.

The motion was agreed to.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes;

S. 3420. An act granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado; and

S. 3434. An act for the protection of the northern Pacific halibut fishery.

The message also announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 194. Joint resolution to print as a House document the proceedings of the national encampments of the Grand Army of the Republic, the United Spanish War Veterans, and the American Legion, for the use of the House and Senate.

The message also announced that the Senate had passed with amendments the bill (H. R. 6941) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, in which the concurrence of the House of Representatives was requested.

PRINTING REVISED ANNOTATED CONSTITUTION

Mr. KIESS. Mr. Speaker, I move to take from the Speaker's table Senate Concurrent Resolution No. 16 and agree to the same.

The SPEAKER. The gentleman from Pennsylvania calls up Senate Concurrent Resolution No 16, which the Clerk will report.

The Clerk read as follows:

Senate Concurrent Resolution 16

*Resolved by the Senate (the House of Representatives concurring)*, That 5,000 additional copies of the revised annotated Constitution be printed for the use of the Congress, 1,500 copies for the Senate and 3,500 copies for the House of Representatives, and that the Senate Committee on the Judiciary be, and it is hereby, authorized to employ a competent person to assist in bringing the same up to date, his compensation to be paid out of the contingent fund of the Senate: *Provided*, That the Public Printer shall print not more than 10,000 additional copies of said revised annotated Constitution and offer the same for sale at the cost of printing and binding plus 10 per cent to persons who agree not to resell or distribute the same for profit.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

STATUE OF SEQUOYAH

Mr. KIESS. Mr. Speaker, I present a privileged resolution from the Committee on Printing.

The SPEAKER. The gentleman from Pennsylvania presents a privileged resolution from the Committee on Printing, which the Clerk will report.

The Clerk read as follows:

House Concurrent Resolution 28

*Resolved by the House of Representatives (the Senate concurring)*, That there be printed and bound the proceedings in Congress, together with the proceedings at the unveiling in Statuary Hall, upon the acceptance of the statue of Sequoyah, presented by the State of Oklahoma, 5,000 copies, of which 1,000 shall be for the use of the Senate and 2,500 for the use of the House of Representatives, and the remaining 1,500 copies shall be for the use and distribution of the Senators and Representatives in Congress from the State of Oklahoma.

The Joint Committee on Printing is hereby authorized to have the copy prepared for the Public Printer, who shall provide suitable illustrations to be bound with the proceedings.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

TRAFFIC IN HABIT-FORMING DRUGS

Mr. KIESS. Mr. Speaker, I present another privileged resolution.

The SPEAKER. The gentleman from Pennsylvania presents another privileged resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 333

*Resolved*, That certain reports and data submitted to the Committee on Foreign Affairs of the House of Representatives relating to the traffic in habit-forming narcotic drugs be printed in the English and French languages on parallel pages as a House document; and that 2,300 additional copies be printed for the use of the Committee on Foreign Affairs of the House of Representatives.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

LEAVE TO EXTEND REMARKS

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for one minute in which to make a statement.

The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. MADDEN. It has been usual, Mr. Speaker, for the chairman of the Committee on Appropriations and the ranking minority member of the committee to make statements at the end of each session of Congress, reviewing the financial work of the Congress, and it is my purpose to do that at the close of this session. I ask unanimous consent that the gentleman from Tennessee [Mr. BYRNS] and myself have leave to file such statements as we may make after the close of the session.

Mr. BANKHEAD. Reserving the right to object, Mr. Speaker, does the gentleman yield?

Mr. LONGWORTH. Does not the gentleman think that unanimous consent might be asked now for general leave? For instance, in my own case——

Mr. MADDEN. Yes; we want general consent for 10 days; 10 days for the Members of the House, for the RECORD, and I ask that the gentleman from Tennessee [Mr. BYRNS] and myself may have unlimited time as long as the RECORD is being printed.

Mr. GARRETT of Tennessee. I would like the same privilege.

Mr. HASTINGS. When will be the last issue of the RECORD?

Mr. JOHNSON of Washington. In about 10 days.

Mr. MADDEN. The gentleman from Ohio [Mr. LONGWORTH] and the gentleman from Tennessee [Mr. GARRETT] also want opportunity to present their views on the work of the House under their leadership, and I ask that they be given that same privilege.

The SPEAKER. The gentleman from Illinois asks unanimous consent that all Members of the House may have 10 days after adjournment in which to extend their remarks in the RECORD, and that the gentleman from Illinois and the gentleman from Tennessee [Mr. BYRNS] and the gentleman from Ohio [Mr. LONGWORTH] and the gentleman from Tennessee [Mr. GARRETT] may have unlimited time. Is there objection?

There was no objection.

Mr. BANKHEAD. Mr. Speaker, does that permission include only the gentlemen's own remarks?

The SPEAKER. The gentlemen's own remarks.

Mr. BANKHEAD. And not outside propaganda and statements by other people?

The SPEAKER. Only the gentlemen's own remarks.

Mr. DICKINSON of Missouri. Does that give them the right to extend on any subject?

The SPEAKER. Yes; on any subject.

Mr. DYER. How many extensions can a Member put in?

The SPEAKER. The Chair would say one.

Mr. WARD of North Carolina. Mr. Speaker, I had intended extending remarks on the child labor amendment. Is that included?

The SPEAKER. Yes.

Mr. CHINDBLOM. Mr. Speaker, this is without reference to leave to print already granted?

The SPEAKER. Yes.

Mr. DEAL. Mr. Speaker, I would like to know if that would include appropriate tables in connection with remarks. I do not mean outside remarks, or anything of that kind.

The SPEAKER. The Chair can not judge as to that. Each gentleman will be the judge of his own remarks. Is there objection to the request of the gentleman from Illinois [Mr. MADDEN]?

There was no objection.

Mr. GARRETT of Tennessee. Mr. Speaker, I do not know whether anybody would care to do otherwise; but it has been stated that each Member would probably be limited to one speech. There might be gentlemen who would want to discuss different subjects in different ways. I should not think that that would be a matter that would be abused, and I did not understand that the gentleman from Illinois [Mr. MADDEN] limited his statement in that way.

The SPEAKER. It seems to the Chair that each Member ought to be allowed to insert a speech, and if on different subjects they might go in at once.

Mr. CHINDBLOM. Leave has already been granted for extensions, and if other Members want further extensions they can obtain permission?

The SPEAKER. Yes.

### BUREAU OF PROHIBITION IN THE TREASURY DEPARTMENT

Mr. CRAMTON. Mr. Speaker, I move to suspend the rules and pass the amended bill H. R. 6645, No. 276 on the Union Calendar, to amend the national prohibition act, to provide for a bureau of prohibition in the Treasury Department, and to define its powers and duties, and to place its personnel under the civil service act.

The SPEAKER. The gentleman from Michigan moves to suspend the rules and pass the bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 6645) to amend the natitonal prohibition act to provide for a bureau of prohibition in the Treasury Department, and to define its powers and duties, and to place its personnel under the civil service act.

*Be it enacted, etc.*, That subdivision (3) of section 1 of Title II of the national prohibition act, approved October 28, 1919, is hereby amended to read as follows:

"(3) The word 'commissioner' shall mean Commissioner of Prohibition. There is hereby established in the Department of the Treasury a bureau to be designated the bureau of prohibition. In charge of this bureau, under the supervision of the Secretary of the Treasury, shall be a commissioner of prohibition, who shall be appointed by the President and who shall receive a salary of not more than $10,000 per annum. In said bureau there shall be a solicitor of prohibition, who shall be appointed by the President, and who shall be the chief legal advisory officer of the bureau, and who shall receive a salary of not more than $7,500 per annum. To better effectuate the provisions of section 13, Title III, of this act, there shall also be in said bureau a division of industrial alcohol and chemistry, the chief of which shall be a graduate chemist and a person of knowledge and experience in the manufacture, distribution, and industrial uses of ethyl and denatured alcohol, who shall be appointed by the commissioner, with the approval of the Secretary of the Treasury, and receive a salary of not more than $7,500 per annum. Such division of industrial alcohol and chemistry shall administer the manufacture, distribution, sale, and use of ethyl and denatured alcohol for all nonbeverage purposes in such manner as to insure an ample supply and promote the use thereof in scientific research and the development of lawful industry."

SEC. 2. Section 2 of the said national prohibition act is hereby amended to read as follows:

"SEC. 2. The Commissioner of Prohibition, his assistants, agents, and inspectors, shall investigate and report violations of this act to the United States attorney for the district in which committed, who is hereby charged with the duty of prosecuting such offenders, subject to the direction of the Attorney General, as in the case of other offenses against the laws of the United States; and such Commissioner of Prohibition, his assistants, agents, and inspectors, may swear out warrants before United States commissioners or other officers or courts authorized to issue the same for the apprehension of such offenders, and may, subject to the control of the said United States attorney, conduct the prosecution at the committing trial for the purpose of having the offenders held for the action of a grand jury. Section 1014 of the Revised Statutes of the United States is hereby made applicable in the enforcement of this act. Officers mentioned in said section 1014 are authorized to issue search warrants under the limitations provided in Title XI of the act approved June 15, 1917."

SEC. 3. Section 38 of the said national prohibition act is hereby amended to read as follows:

"SEC. 38. The Commissioner of Prohibition and the Attorney General of the United States are hereby respectively authorized to appoint and employ such assistants, experts, clerks, and other employees in the District of Columbia or elsewhere, and to purchase such supplies and equipment as they may deem necessary for the enforcement of the provisions of this act, but such assistants, experts, clerks, and other employees in the Bureau of Prohibition shall be appointed under the rules and regulations prescribed by the civil service act: *Provided*, That after six months from the passage of this act the incumbents of positions hereby made subject to the competitive requirements of the civil service act may only be retained in their respective positions as the result of their names being reached for certification under the competitive requirements of the civil-service rules unless they have been already appointed in the manner prescribed by the civil-service rules."

SEC. 4. Title II of the national prohibition act is further amended by adding thereto new sections to stand as sections 40, 41, and 42, and to read as follows:

"SEC. 40. This bureau shall have charge of the enforcement of the national prohibition act approved October 28, 1919, the act supplemental to the national prohibition act, approved November 23, 1921, sections 238, 239, and 240 of the Criminal Code, the Reed amendment of March 3, 1917, chapter 162, section 5 (39 Stat. L., p. 1069); the act of January 17, 1914 (38 Stat. L., p. 277); the act of December 17, 1914 (38 Stat. L., p. 785), as amended by the revenue act of 1918, approved February 24, 1919, sections 1006, 1007, and 1008 of the act of February 24, 1919 (40 Stat. L., p. 1057), and any other statutes of the United States similarly relating to the internal traffic in narcotics; chapters 2, 3, 4, 5, and 11 of Title XXXV of the Revised Statutes and amendments thereto; and any other statutes or parts of statutes to the extent to which they similarly prohibit, tax, control, or regulate liquor and narcotics.

"The Commissioner of Prohibition shall exercise the same control over the establishment and conduct of industrial alcohol plants and bonded warehouses, distilleries, wineries, breweries, dealcoholizing plants, denaturing plants, cereal beverage factories, distillery warehouses, general bonded warehouses, special bonded warehouses, bonded wine storerooms, and any other place where intoxicating liquor or cereal beverages are manufactured, produced, or kept, and the appointment and control of gaugers, storekeepers, storekeeper-gaugers, and other officers charged with duties connected with such establishments as is conferred by law upon the Commissioner of Internal Revenue.

"The Bureau of Prohibition shall be charged with the duty of determining all administrative penalties, proposed assessments, compromises, and adjustments relating to intoxicating liquors and narcotics, and all statutes of the United States which shall hereafter be enacted relating thereto. All moneys arising from such penalties, assessment, compromises, and adjustments, and all taxes relating to the

liquor traffic or narcotics which are definitely fixed and regularly imposed, whether occupational taxes or taxes on narcotics, distilled spirits, wines, fermented liquors, malt liquors, cereal beverages, and other articles covered by the narcotic and prohibition laws, or assessments determined by the Commissioner of Prohibition and certified to the collectors of internal revenue by the Commissioner of Internal Revenue, shall be collected by such collectors of internal revenue, and the returns of such taxable articles or occupations shall be made to the collectors of internal revenue of the districts wherein they arise.

"SEC. 41. For the purpose of administration of such statutes the Commissioner of Prohibition shall have all the administrative authority, including the authority to submit proposed assessments through the Commissioner of Internal Revenue, to recommend abatements, refunds, and compromises, and to sue for penalties now conferred by existing law, including Chapter I of Title XXXV of the Revised Statutes, upon the Commissioner of Internal Revenue, for the purpose of administering such statutes, said authority to be exercised by the Commissioner of Prohibition with the approval of the Secretary of the Treasury. The Commissioner of Prohibition may issue such regulations as may be deemed necessary for the enforcement of the laws relating to intoxicating liquor, narcotics, and cereal beverages, subject to the approval of the Secretary of the Treasury. The officers appointed by the Commissioner of Prohibition shall exercise such functions as may now be exercised by collectors of internal revenue, internal-revenue agents, or field officers acting under the direction of the Commissioner of Internal Revenue for the administration of the statutes relating to the enforcement of the national prohibition act and all legislation passed for that purpose: *Provided, however,* That nothing herein shall be regarded as affecting the right of review in a court of equity, as provided in the national prohibition act, or as limiting the jurisdiction of the Attorney General of the United States or his subordinates under existing law: *Provided,* That the acceptance of all offers in compromise shall be subject to the approval of the Secretary of the Treasury.

"All collections resulting from offers in compromise, penalties, and assessments determined under the direction of the Commissioner of Prohibition shall be deposited to the credit of the Treasury of the United States through the Commissioner of Internal Revenue and accounted for under such rules as may be prescribed by the Secretary of the Treasury.

"SEC. 42. That there may be transferred to the control of the Commissioner of Prohibition, such employees, equipment, and quarters now under the control of the Treasury Department as may within 30 days after the passage of this act be designated by the Secretary of the Treasury.

"The appropriation for the enforcement of the narcotic and national prohibition acts, as provided in the act making appropriations for the Treasury Department for the fiscal years ending June 30, 1924 and 1925, and any unexpended balance from previous appropriations remaining available for such purposes are hereby made available for expenditures under the direction of the Commissioner of Prohibition.

"There shall be transferred from the appropriation for salaries and expenses of collectors of internal revenue, as provided in said Treasury Department appropriation act of 1924, such amount as in the judgment of the Secretary of the Treasury is deemed necessary for the payment of salaries and traveling expenses of storekeeper-gaugers and gaugers, and for the employment of clerks to fill positions similar to the places now held by employees in collectors' offices who are engaged upon distilled spirits and narcotic work, and from the appropriation for salaries, office of Commissioner of Internal Revenue, as provided in said Treasury Department appropriation act, 1924, such amount as in the judgment of the Secretary of the Treasury is deemed necessary for the employment of clerks paid from that appropriation who are now assigned to duties relating to the enforcement of laws with reference to intoxicating liquors, narcotics, and cereal beverages."

Mr. O'SULLIVAN. Mr. Speaker, I demand a second.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Michigan asks unanimous consent that a second be considered as ordered. Is there objection? [After a pause.] The Chair hears none. The gentleman from Michigan [Mr. CRAMTON] is recognized for 20 minutes and the gentleman from Connecticut [Mr. O'SULLIVAN] will be recognized for 20 minutes.

COMMITTEE ASSIGNMENT

Mr. GARNER of Texas. I ask the gentleman from Michigan to accommodate me by permitting me to introduce a resolution for a committee assignment.

Mr. CRAMTON. I shall be glad to do so if I do not lose any of my rights.

The SPEAKER. The gentleman from Texas may ask unanimous consent.

Mr. GARNER of Texas. Mr. Speaker, I ask unanimous consent to present a resolution and have the same considered.

The SPEAKER. The gentleman from Texas asks unanimous consent to present a resolution and have the same considered. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the resolution, as follows:

*Resolved*, That CHARLES BROWNE of New Jersey be, and he is hereby, elected a member of the standing Committee of the House on Naval Affairs.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

BUREAU OF PROHIBITION IN THE TREASURY DEPARTMENT

Mr. CRAMTON. Mr. Speaker, I yield myself seven minutes.

The SPEAKER. The gentleman from Michigan is recognized for seven minutes.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, how is the time on this bill divided?

The SPEAKER. The Chair stated that the gentleman from Michigan [Mr. CRAMTON] would be recognized for 20 minutes and the gentleman from Connecticut [Mr. O'SULLIVAN], who made the demand for a second, would also be recognized for 20 minutes.

Mr. CRAMTON. Mr. Speaker, I will ask that I be permitted to proceed for about five minutes without interruption, so that I may give the Members, in as condensed form as possible, a general outline of the situation, and then questions which I may not have covered I will be glad to answer if I can.

The purposes of this bill are threefold. First, to relieve the Bureau of Internal Revenue from the task of enforcing national prohibition; second, placing the entire jurisdiction of prohibition enforcement as a Federal proposition in a new bureau, to be created in the Department of the Treasury, known as the Bureau of Prohibition; and third, to place the personnel of that new bureau under the civil service.

The first thing accomplished, then, is the relief of the Bureau of Internal Revenue from a task that is interfering with the proper performance of its normal functions in connection with the tax laws. Second, to secure through this new bureau more effective enforcement of prohibition. The bill proposes that the new bureau shall have entire jurisdiction over the enforcement of the Federal laws with reference to liquor, both permitted uses and prohibited uses, except the collection of certain taxes, which is left in the Bureau of Internal Revenue. The bureau so created will be coordinated with other bureaus in the department; it will be subject to exactly the same regulation and supervision by the Secretary of the Treasury that the Commissioner of Internal Revenue is now subject to in these matters, and it will be subject to exactly the same appeals to the courts that are now provided as to the Bureau of Internal Revenue.

There have been various propositions suggested looking to improved enforcement. There have been some suggestions of taking it to the Department of Justice, and there have been some suggestions to make it an independent bureau directly under the President. But leaving aside other matters which might be urged as against those, I agree entirely with the Secretary of the Treasury in this: That especially since we have given the Coast Guard so large a part in protecting our coasts against smuggling and since the Customs Service in the Treasury Department is also protecting against smuggling, that the place for this bureau is in the Treasury Department, where close coordination can be secured between it, the Coast Guard, the Customs Service, and the Internal Revenue Bureau.

I came here last fall before the session opened and I made a special study of it, and I came to the conclusion that this was the best thing to do. Then I went to Secretary Mellon, as the head of the department which has the work in charge, and in my first interview with him he indorsed the principle of it. He said that personally he would be glad to be relieved of the burden that is now on his department, but that from his experience he was bound to say he felt that in that department was the best place for it and that it should be in a separate bureau. He has maintained that position. I did not introduce the bill until I got the indorsement of the department of its terms, and there is in the report a statement by the Secretary, under date of February 20, outlining the purposes of the bill and saying, "I hope the bill may speedily become a law."

It has been before the Committee on the Judiciary, 250 pages of hearings have been held, and it comes out with the unanimous report of that committee. However, I should be frank and say this: That the report of the committee carried an amendment that I have not been able in full to accept, although

I have gone just as far as I could in my desire to get together with what is known as the industrial alcohol interests.

The amendment on page 2, which you will see in your bills, was intended to relieve the fears of some industrial users of alcohol, but I have been afraid it went so far that it would, in fact, defeat the purpose of the bill. The purpose of the bill is to have one bureau and a close coordination, and I have been afraid the amendment went so far as to take this divison of industrial alcohol in effect, possibly, out of the bureau.

To guard against that I have simply suggested this amendment to the committee amendment, that the chief of that division of industrial alcohol, instead of being appointed by the Secretary of the Treasury, should be appointed by the Commissioner of Prohibition, with the approval of the Secretary of the Treasury. That gives the Secretary full control of the situation, but makes it clear that that division is not independent of the bureau. But I am frank to say that that provision was not in the bill as reported from the committee, and I do not want the committee to be held responsible for that particular amendment to this amendment.

The SPEAKER pro tempore (Mr. SANDERS of Indiana). The gentleman has used seven minutes.

Mr. CRAMTON. I will have to yield myself two more minutes. The committee amendment, with the change I have made as to appointment of the chief of this division, reads:

> To better effectuate the provisions of section 13, Title III, of this act, there shall also be in said bureau a division of industrial alcohol and chemistry, the chief of which shall be a graduate chemist and a person of knowledge and experience in the manufacture, distribution, and industrial uses of ethyl and denatured alcohol, who shall be appointed by the Commissioner of Prohibition with the approval of the Secretary of the Treasury and receive a salary of not more than $7,500 per annum. Such division of industrial alcohol and chemistry shall administer the manufacture, distribution, sale, and use of ethyl and denatured alcohol for all nonbeverage purposes in such manner as to insure an ample supply and promote the use thereof in scientific research and the development of lawful industry.

Mr. VARE. Will the gentleman yield?

Mr. CRAMTON. In just a moment.

As to the civil-service features, the bill as reported has the indorsement of the National Civil Service Reform League and the Civil Service Commission. In connection with that, some of you may not agree entirely with civil service as a policy, but I want to submit to you that whatever you may think of it as a general policy it is of the utmost importance in this work that the employment of men as directors and employees in this service should not be on the political indorsement of Senators and Congressmen, who may not be entirely in harmony with the purposes of the law. [Applause.] I consider it a very important feature of the bill.

Mr. BEEDY. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BEEDY. Is there anything in this bill that gives the Commisioner of Prohibition any more discretion than is now reposed in the Commissioner of Internal Revenue?

Mr. CRAMTON. Certainly no more; and I have been so careful at every step in the bill to provide for supervision by the Secretary to meet possible objections that maybe he is subject to more supervision than the Commissioner of Internal Revenue.

Mr. VARE. Will the gentleman yield?

Mr. CRAMTON. For a brief question.

Mr. VARE. May I ask whether there are any salary raises in the bill?

Mr. CRAMTON. The bill provides that the commissioner shall receive not more than $10,000 a year. My impression is he does not get quite that now, but that is the salary of the Commissioner of Internal Revenue, and we are proposing to make it uniform.

The SPEAKER pro tempore. The time of the gentleman from Michigan has expired.

Mr. CRAMTON. I reserve the balance of my time, Mr. Speaker.

Mr. BOYLAN. Will the gentleman yield for a question?

Mr. CRAMTON. I yield myself one minute more in order to yield to the gentleman.

Mr. BOYLAN. I just wanted the gentleman to kindly advise us whether or not the bill has the approval of the Republican National Committee.

Mr. CRAMTON. I do not want to talk of partisan matters, but I know the Republican National Committee and the Republican organization are fully behind law enforcement.

Mr. HASTINGS. Does this bill change existing law in any way?

Mr. CRAMTON. Only as to administration.

Mr. HASTINGS. Only as to administration?

Mr. CRAMTON. That is all.

Mr. HASTINGS. So it continues in force all laws of every kind and character?

Mr. CRAMTON. Yes.

Mr. O'CONNELL of New York. Except at an increased price.

Mr. SABATH. And places the bureau under civil service.

Mr. O'SULLIVAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this does not come before the House as a unanimous report from the Committee on the Judiciary, in spite of the assertion to the contrary. I have been opposed to its theory, not in a spirit of antagonism to the enforcement of the prohibition laws—for I have consistently voted for all appropriations and other legislation asked by our dry friends to enforce the laws—but my opposition arises because of the danger to American legitimate industry and because of other kindred reasons I shall endeavor to unfold later on.

At present there is in the Bureau of Internal Revenue a division known as the Prohibition Unit, the function of which is to enforce the provisions of the prohibitory laws. It is under the control of a commissioner of prohibition, responsible to his direct superior, the Commissioner of Internal Revenue. Any appeal taken from a decision, rule, or regulation of the present commissioner of prohibition is to the Commissioner of Internal Revenue. There is in existence no civil-service status affecting the employees of this unit.

This bill has for its objects two main purposes: The first, to place employees under civil service, and the second, to divorce the unit from the authority and guidance of the Commissioner of Internal Revenue through the creation and establishment of a new bureau, whose standing would be on a parity with the existing three bureaus in the Treasury Department, to wit: The Bureau of Internal Revenue, the Coast Guard, and the customs service. The head of this department would have equal standing with, for example, the Commissioner of Internal Revenue. His direct superior will be the Secretary of the Treasury, so that to the latter will go any appeal from a ruling of the commissioner of prohibition.

As far as the civil-service provision is concerned, there is no need to create a new bureau to effect such a result. For that object could readily be attained by a separate bill covering that specific object. To be sure, Mr. Britt, who is counselor for the present prohibition unit, says that in his opinion the most valuable feature of the measure is the provision to place the bureau under a civil-service status. But it must, of course, be manifest that the creation of a new bureau is unnecessary to accomplish this important feature.

No; it is the second object of the bill that merits the attention of this House. As far as power is concerned, which is necessary to enforce the Volstead Act, there is not an iota of authority granted under this bill which has not been vested in the prohibition commissioner under the existing law. It is patent that the sole objective sought to be attained lies in the elimination of the Commissioner of Internal Revenue, and thereby to deny a right of appeal to that individual from the decisions of the prohibition commissioner, many of which in the past, because of their arbitrary and unwarranted nature, have promptly been overruled by the Commissioner of Internal Revenue.

But probably the best method of analyzing the provisions of this bill can be followed by listening to the objections raised against it before the committee by those whose dealings in business will bring them in contact with this new bureau.

In the first place, and this seems to me a rather trivial objection, it increases salaries. I have no objection whatever for men employed by the Government to receive salaries commensurate with the duties imposed upon them. Therefore the objection, although it has been raised, is not serious. However, a forceful objection lies in the fact that this is to create a new bureau. I have enough old-fashioned notions, although I do not boast a great many years of experience, to believe the time passed years ago for the creation of more bureaus for this Government. [Applause.] So weighted down is this Government with bureaus and commissions running into the hundreds in numbers that it is just as proper to label this a bureaucratic as a republican form of government. I am extremely reluctant to cast my lot with those who seek the cure-all of modern ills in the establishment of a new bureau.

Yet, mark you, under this bill the birth of a new bureau is expected to make further inroads on the form of government handed down to us from the fathers.

Mr. WATKINS. Will the gentleman yield?

Mr. O'SULLIVAN. Yes.

Mr. WATKINS. What does the testimony disclose, and what is the opinion of the committee as to whether or not this new feature will increase enforcement or lessen it?

Mr. O'SULLIVAN. The impression seems to be it would increase the enforcement. And there is no good reason why this should not be the case. For by the same token, if we declare martial law and order out the Army to assist in the enforcement of the eighteenth amendment, such action will necessarily speak for better enforcement. But who would suggest such a remedy? Or we might prohibit the people of California from growing grapes and the people of Oregon from raising apples on the theory that better enforcement would result from the lack of grapes to make wine and of apples to make cider. There are many ways in which enforcement may be made more nearly perfect, but the employment of such means would mean the overthrow of all those rights which most of us have always believed were safeguarded by the Constitution.

Of course, the centralization of power in the hands of this new commissioner of prohibition, a veritable czar at the head of this new bureau with unlimited authority and most limited circumscription, will accomplish better enforcement. But what a penalty we must pay to bring this about!

We seem at times to have overlooked what the Volstead Act promised with reference to the use of alcohol in certain industries. The Volstead Act not only permits the use of alcohol for industrial, scientific, mechanical, and medicinal purposes, but it actually encourages its use in such industrial pursuits. Therefore, unless the spirit of that act is to be grossly overlooked, the Congress, in the furtherance of the generally understood policy with reference to the lawful industries, should place no obstacles in the way of those great numbers of legitimate users of such alcohol.

Mr. DYER. Will the gentleman yield?

Mr. O'SULLIVAN. Yes.

Mr. DYER. This bill, offered by the gentleman from Michigan, in connection with this motion, proposes to place within the enforcement of prohibition the users and manufacturers of industrial alcohol, as well as those engaged in illegitimate manufacture and sale. That is the result of this motion, to put them in all together?

Mr. O'SULLIVAN. Yes.

Mr. DYER. Men trying to build up a great industry are put in with bootleggers and crooks under prohibition?

Mr. O'SULLIVAN. The gentleman is right.

Mr. BEEDY. Will the gentleman yield?

Mr. O'SULLIVAN. I will.

Mr. BEEDY. Is it a fact that the commissioner under this bill will be given added power over and above that which he now possesses; and if so, how is it accomplished?

Mr. O'SULLIVAN. He has no added power, but there is a limitation under the present scheme that will be lost if this bill becomes a law. That is the right of appeal, the right of the manufacturer or user of industrial alcohol to go to some person who is not so fanatical with reference to the enforcement of laws that he can not see that a man using industrial alcohol is not a bootlegger.

Mr. DYER. Will the gentleman yield?

Mr. O'SULLIVAN. I have such a limited time that it is with regret that I can not.

Now, to revert temporarily. I have stated that the Volstead Act contemplates the encouragement of industrial alcohol. It would astonish you to learn of the vast industries scattered throughout the country that make use of such a product. The great chemical companies, with millions of dollars invested in their plants; the dye industry, if we still have one, no thanks to the present drastic regulations; the manufacturers of artificial silk, one of which uses over three and one-half million gallons of alcohol a year; the manufacturer of toilet articles, of glass, of tooth pastes, and of hundreds of other articles, literally flooded the Committee on the Judiciary with letters of condemnation against this bill. Why? They summarized their reasons as follows:

First. The passage of the bill would deprive legitimate users and dealers of the right of appeal to the Commissioner of Internal Revenue from unnecessary rulings and regulations promulgated by the Commissioner of Prohibition. They base their predictions of the future on the actions of that individual in the past, when, in his desire to enforce the law, he surrounded the legitimate users with regulations so unwarranted and unreasonable as to call for an immediate reversal on the part of his superior.

Second. It would give a free hand to officials whose chief concern is the pursuit of the law violator, and who, as demonstrated by experience, would give little consideration or attention to the needs of the manufacturers employing alcohol as a raw product.

Third. It would take the administration of the law away from the Commissioner of Internal Revenue, who has acquired vast knowledge and experience in the industrial and commercial use of alcohol, and place the matter in inexperienced hands.

Fourth. In the past drastic, unnecessary, and arduous rulings of the prohibition commissioner have been modified or eliminated in a number of instances only through appeal to the Commissioner of Internal Revenue. This remedy would be lost and no appeal would lie except to the Secretary of the Treasury, an individual so far removed from the operation of the machinery of enforcement as to serve only as a rubber stamp for the contemplated new official.

Fifth. The administration of the Bureau of Internal Revenue has been most competent, affords ample protection to the Government, and through the technical knowledge and experience gained in years of handling such matters that department is able to administer the law justly to all trades.

Sixth. It would place the administration of the law solely within the hands of one man, and no man should sit in judgment on matters which concern the legitimate business life of innumerable industries.

Seventh. Business men now know where they stand with reference to the regulations necessarily following in their lines of industry. This new bureau would serve only as an obstacle and meddler in legitimate industry.

Eighth. Denatured alcohol is poisonous, can not be used as a beverage, and should not be treated as such.

Such is a summary of some of the objections to this bill strongly advocated by those men, who represent billions of capital. Perhaps you are aware of a convention held this spring at Washington on behalf of the American Chemical Society. Let me quote from their reports:

The chemists are not opposed to the creation of a commissioner of prohibition if his duties are confined to the enforcement of prohibition. The prohibition act itself recognized the right to use alcohol in legitimate industries when it states that in addition to being an act to prohibit intoxicating beverages, it says it shall insure an ample supply of alcohol and promote its use in scientific research and in the development of fuel, dye, and other lawful industries. Virtually every industry dependent on the use of alcohol has been compelled time and again to appeal to the Commissioner of Internal Revenue for relief from unwarranted conditions imposed upon them by the prohibition commissioner.

Take the case of the Standard Oil Co. of New Jersey, when it applied for 5 gallons of pure alcohol for the use of its works at Eagle Works, N. J. It took over six weeks to get it. But it has not only been because of delays in procuring tax-paid pure alcohol that the prohibition commissioner has harassed legitimate industry, but in exacting vexatious and unreasonable bonds, requiring complicated records to be kept, subjecting plants to uncalled-for inspections by ignorant and prejudiced policemen, and generally treating law-abiding manufacturers as potential bootleggers.

Prohibition, with all the wealth of good its advocates proclaim it possesses, must not be the monkey wrench to ruin the gears of industry. You will not find anyone more anxious to assist in the enforcement of law than the splendid body of men who are engaged in their lawful enterprises. But if you persist in weaving about their necks ropes of regulations and rules which can result in no other effect than the strangulation of their businesses, you will regret the day when you started those men into an organized effort to abolish all prohibition in order to save for themselves the property which our laws ought to respect.

Mr. YATES. Will the gentleman yield?

Mr. O'SULLIVAN. I will.

Mr. YATES. I am not sure that I understood the gentleman. I understood the gentleman to say he thought that under the new arrangement there would be better enforcement.

Mr. O'SULLIVAN. I did.

Mr. O'CONNOR of New York. Will the gentleman yield?

Mr. O'SULLIVAN. I will.

Mr. O'CONNOR of New York. I heard the gentleman from Michigan state several times that this bill came from the Committee on the Judiciary as a unanimous report.

Mr. O'SULLIVAN. I stated at the outset that this was not a unanimous report. I yield to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. HASTINGS. Before the gentleman yields I would like to ask him a question. As I understand it, this changes the bureau that enforces the prohibition act, but it does not amend the provisions of that act in any particular.

Mr. O'SULLIVAN. No; we will have the same old Volstead law on the books.

Mr. SABATH. It increases the salaries and puts them under the civil service?

Mr. O'SULLIVAN. Yes.

Mr. HASTINGS. The Supreme Court upheld an amendment to the act amended in 1918, as applied to Oklahoma and the Indian country. This would not amend that or change it at all?

Mr. O'SULLIVAN. Oh, not in any way. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GRAHAM of Pennsylvania. Mr. Chairman and Members of the House, I stand before you occupying what is to me an embarrassing position. I took up this bill for the purpose of aiding in having it carried out. I wanted in every way to bring about a union so that our Judiciary Committee might support the bill as a unit. That was when this bill lacked the penciled amendments, which the gentleman from Michigan proposes to introduce and which touch the vital question considered by us and which is not in accordance with the understanding that was reached in the Committee on the Judiciary enabling them to make a report without filing minority views. You gentlemen may not know, and in this method of passing a bill you have no chance to know, of the terrific contests before our committee waged by the enormous interests on this question. There were millions and millions of dollars representing interests, no bootleggers, no men defiant of the Volstead Act, no men seeking to escape the full enforcement of the law, but striving to relieve themselves of being compelled to go to the department headed by prosecutors and not by those who want to preserve the business of the country.

For that reason, by and with the consent of the Secretary of the Treasury, who was consulted at every step in the preparation of this bill, it was agreed that a department in this new bureau should be created, headed by a chemist acquainted with the business side of affairs, and in order to remove fear from the minds of the business world and create confidence it was provided that the head of that division should be appointed by the Secretary of the Treasury himself, so that the atmosphere of prosecution should be removed from the administration of honest and fair and square business. [Applause.]

That was done, and that enabled this committee to do what otherwise would not have been done, and that is to report this bill out, giving to the gentleman from Michigan [Mr. CRAMTON] full credit for his skill and ability in preparing this division in the Treasury, which, I think, is along the line of right and good legislation itself, in order to concentrate these powers in this department and at the same time preserve for this vast business world the sense of protection, in that they were not to be treated as criminals, having their business attacked and handled as if they were bootleggers and thieves. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. GRAHAM of Pennsylvania. Under these circumstances I must say that as the bill comes before us with the gentleman's amendment in it we can only either vote it up or vote it down, and I propose, with due regard to my sense of honor, to vote it down. [Applause.]

Mr. CRAMTON. Mr. Speaker, I yield one minute to the gentleman from Oklahoma [Mr. CARTER].

Mr. CARTER. Mr. Speaker, I want to use this short time to call the attention of the House to some petitions and letters that have come to my desk from the State of Oklahoma against legislation authorizing the sale of light wines and beer. This has resulted from the introduction of 60 bills by 60 Members of the House, thinking, I presume, to create some sentiment for breaking down the eighteenth amendment and the prohibition laws. The full strength of this movement for light wines and beer is perhaps fully represented by these 60 Members who have introduced the bills, and I doubt if there is another of the 435 Members of this House who would support such a proposition. The only effect the introduction of these bills has had in my section of the country is to hearten and strengthen the true friends of prohibition, and they are letting it be known in no uncertain terms. One of the petitions alone from my home town, Ardmore, Okla., contains the names of 983 good, law-abiding citizens, all favoring the enforcement of the Constitution and laws of our country and opposed to any such subterfuge as light wines and beer. I ask unanimous consent to extend my remarks in the RECORD by offering some of these letters and petitions without all the names.

The SPEAKER pro tempore. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. LONGWORTH. Is this a bulky document?

Mr. CARTER. No, no; these are just little short letters and a petition. I would not expect to put all the names in.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The letters are as follows:

ARDMORE, OKLA., *March 21, 1924.*

Since 60 Members of the House of Representatives have introduced 60 identical bills to so amend the Federal prohibition act as to legalize 2.75 per cent beer we know that the liquor interests have marshaled all their forces to break down the greatest of moral legislation the world has ever seen. We are aware that they will use all their strategies to deceive and discourage you, even though we know that you are for the eighteenth amendment and its enforcement, so we as citizens who believe in law enforcement and in government by a majority, wish to reaffirm to you our belief that the eighteenth amendment is the expressed will of a very large majority of the American people, and that you, our representative in Congress, will use all influence you have to prevent this or any similar legislation.

Rev. THOS. CAREY, *Pastor.*
ASHBURN WILLIAMS, *Clerk of Session.*
H. T. HUNT.

(And 980 additional names.)

---

HUGO, OKLA., *March 26, 1924.*

Hon. CHAS. D. CARTER,

ESTEEMED CONGRESSMAN: As our faithful Representative in Washington we are looking to you to look well to the prayers and wishes of the women of Oklahoma, and ask you to use every effort possible to stop the manufacture of wine and beer. With faith in you still, we know you will for our dear beloved State of Oklahoma, who wants to stay dry.

Mrs. C. J. MILES,
*Secretary Woman's Christian*
*Temperance Union of Hugo, Okla.*
*403 Laurel Avenue, Hugo, Okla.*

---

BRISTOW, OKLA., *April 7, 1924.*

Hon. CHARLES D. CARTER,
*Washington, D. C.*

DEAR SIR: It has been brought to our attention that a great number of bills are being introduced to weaken the Volstead Act, and we are writing you to let you know how our community stands on the matter. Our organization, composed of 140 of our best citizens, is heartily in favor of the strengthening rather than the weakening of this act.

Respectfully,

BRISTOW WOMAN'S CHRISTIAN TEMPERANCE UNION,
MRS. DAISY LOVE, *President.*
INEZ M. RILEY, *Secretary.*

---

OKLAHOMA WOMAN'S CHRISTIAN TEMPERANCE UNION,
OFFICE OF PRESIDENT,
*Bartlesville, Okla., March 25, 1924.*

Hon. CHARLES D. CARTER, M. C.,
*Washington, D. C.*

DEAR SIR: The Oklahoma Woman's Christian Temperance Union in executive meeting assembled in Bartlesville, Okla., this 25th day of March, 1924, beg to submit the following resolution:

"*Resolved*, That we earnestly protest against any modification of the Volstead Act to legalize the sale of wine and beer, and that we urge the Senators and Representatives of our Commonwealth to use their best influence and vote toward the strengthening of the Volstead Act and the eighteenth amendment to the Constitution of the United States."

This resolution is the expression of a membership of 7,000 patriotic, loyal men and women of Oklahoma.

Thanking you for the prohibition victories which you have given us in the past and depending upon you for future victories, we are,

Yours sincerely,

ELIZABETH HOUSE,
*Corresponding Secretary.*
JOSEPHINE M. BUHL,
*President.*

Mr. CRAMTON. Mr. Speaker, I yield three minutes to the gentleman from Virginia [Mr. MOORE].

Mr. MOORE of Virginia. Mr. Speaker, this bill raises no question in respect to the policy of prohibition. It assumes the policy that, whether we are for or against, it is fixed by the Constitution. It assumes further that we must do one of two things, either ignore that policy or endeavor to enforce it as vigorously as possible. It is admitted that methods of enforcement are now inadequate. I happen to belong to the Joint Committee on Reorganization, which has just filed its report. Witnesses appeared before that committee from

the Department of Justice who said in substance that the prohibition unit as now constituted is inefficient. Others appeared who said that the unit is at present saturated with party politics. The purpose of this bill, as I understand, is to disassociate the enforcement of the law from party politics, to an extent at least, and to substitute more efficiency for the present woeful lack of efficiency.

When the statement is made by my friend from Connecticut [Mr. O'SULLIVAN], who is opposed to the measure, that in spite of objectionable details in the bill—and there may be such details which the rule prevents the House from correcting—it will accomplish those results in his opinion, the bill as a whole seems desirable.

In order to accomplish more than this measure will accomplish, I would take another step as suggested in the supplemental report filed by Senator HARRISON of Mississippi and myself, who are the minority members of the Reorganization Committee. In that report we said:

> Those who are anxious for an orderly and vigorous administration of existing law, whether they approve or disapprove the policy of prohibition, may well consider whether it would not be desirable to make the prohibition unit an independent establishment under the immediate control of the President.

That the conditions which now prevail can not continue without real peril to society and to the Government itself will hardly be questioned. That they might be improved and to a greater extent than will result from the enactment of this bill, by placing the administration of the law under the direction of the President, with the full responsibility which would be implied, can likewise hardly be questioned.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. CRAMTON. Mr. Speaker, I yield one minute to the gentleman from Georgia [Mr. UPSHAW].

Mr. UPSHAW. Mr. Speaker, when the eighteenth amendment was passed, the friends of prohibition knew that it would take something like a generation of aggressive activity to battle against the appetite that was begotten by the old saloon régime. There has been great improvement since the law was passed, and where the failures have occurred they have occurred largely as a result of trying to enforce a dry law by wet appointments of wet politicians. I would stand by this bill especially because it proposes to put prohibition enforcement officers under civil service and to take Members of Congress out of the necessity or the privilege of influencing appointments.

Mr. PERLMAN. Mr. Speaker, will the gentleman yield?

Mr. UPSHAW. Excuse me. No time.

Mr. PERLMAN. What about taking the Anti-Saloon League out of it, too?

Mr. UPSHAW. The gentleman says let the Anti-Saloon League be taken out of the business too. I say amen to that, if at the same time you take these defiant wet associations out of the privilege of putting their finger into the pie [applause], or perhaps I should say into the bottle [laughter]. This "wet" criticism of the Anti-Saloon League is the cheap resort of the enemies of prohibition who can not defend liquor with all of its blighting debauchery and its sickening stench of personal and political corruption, and therefore they lose no opportunity to traduce and malign the Anti-Saloon League and its leaders—for what? Simply because that patriotic organization with its high, unselfish ideals came into being 30 years ago for the express purpose of combining Republicans and Democrats, Protestants and Catholics, Jews and Gentiles into one solid phalanx against the legalized liquor traffic; and because this sacred compact was rewarded with glorious success, and because the Anti-Saloon League proposes to continue in business in order to keep the devilish saloon from coming back into business, "wet" political leaders and a largely hostile press continue to single out the Anti-Saloon League as the object of their anathemas—a company of legislative lobbyists, they say, that has no place in the American Republic. And yet, gentlemen of the House, you remember that I recently held before your eyes the actual letter of the Association Against the Prohibition Amendment (Inc.), addressed to a member of the press gallery, revealing the plan of this one wet organization to raise from the people $20,000,000 with which to dynamite our Constitution and defy our stainless flag.

And we have the names of 40 other "wet" organizations scattered widely over America that have come into being since our prohibition law was passed for the express purpose of nullifying and repealing this law. They say it is all right for these apostles of "wetness" to organize and raise money to elect liquor leaders to office, but that it is high treason for God-fearing "dry" patriots to try to block this liquor scheme. Whatever the men do, the millions of women citizens in America will smash this liquor plan.

The political emancipation of woman was not only the tardy crown which winsome virtue wears—it is, in my honest judgment, at once a prophecy and a guarantee of the early and ultimate triumph of every phase and form of moral and humanitarian legislation. And because many millions of women citizens, independent in their thinking and their voting, are going to wrap a regnant conscience around a spotless ballot, "ward heelers" will be relegated to the political scrap heap, and more political slates will be smashed from a strictly partisan standpoint than John ever saw—even John Barleycorn. This cheering fact makes me know that national constitutional prohibition is as much a permanent part of the Constitution as the Constitution is a part of the very citadel of our national life.

It is highly significant and timely that patriotic women everywhere have banded themselves together to lay stress upon the constitutionality of our national prohibition law, and therefore the mandatory call of that law to every patriotic American citizen. It is a part of their mission—a sacred, essential part—to teach the great Empire State, which recently seceded from the constitutional Union, that there can be no such thing as individual interpretation and elective obedience to the laws of a Republic like ours—for such individual interpretation and election must be the beginning of practical anarchy and ultimate national decay.

COWARDLY TACTICS OF LIQUOR LEADERS

Because the opponents of prohibition can not attack the validity and constitutionality of this law, they are seeking to muddy the waters and to compass the nullification and repeal of the law by indulging in ridiculous and irrelevant personalities, and by attacking the leaders of our cause whom they have been unable to either buy or destroy. It is the favorite theme and scheme of wet editors and wet politicians to hurl their shafts of criticism at the chief counsel of the Anti-Saloon League of America—that keen, clean, inspiring crusader in the cause of righteousness, Wayne B. Wheeler, and because the rules of the House will not allow the personalities nor the language which a very provoking situation called for, I recently took myself to New York, where, at a law-enforcement dinner of the Women's Constitution League, I tried to find language to do the subject justice. In other words, it seems that I am estopped from calling a certain offending official in Washington the "short and ugly word," with specifications such as his crime of outrageous slander demands. This vicious slander was uttered under official immunity against Wayne B. Wheeler, under the Dome of the Capitol, and was a disgrace to the sheltering protection of the Government building in which it was uttered.

The first language to which I object in the name of the sober decency of America is found in the following paragraph in the CONGRESSIONAL RECORD:

> Far be it from me to say a word of criticism touching any of the persons whose names appear at the bottom of this instrument as its sponsors save and except Hon. Wayne B. Wheeler, hired lobbyist, professional legislative agent, who I have no doubt could be hired for the other side for an advance in salary just as soon as he was assured he would get his pay.

The next specification is found in the following liquorized indictment of this stainless servant of humanity:

> It is time to get rid of this legislative pest, Wayne B. Wheeler. He never had any law business in his life except as he hired himself out, and has been willing to do any kind of service to deceive the good men and good women who pay him a salary.

Ladies and gentlemen, this cowardly assassination of the character of a fearless leader in the cause of righteousness who, like William J. Bryan, has been 30 years before the American people without a fleck upon his name has gone far enough. No man who knows the facts will make such a statement who does not love a lie better than the truth. I defy these booze-laden slanderers of a good and great man, whether politicians or editors, to point their finger to a single instance of moral turpitude on the part of Wayne B. Wheeler. I know him as few men know him, and I declare here and now that he has a personal history of unselfish dedication to the cause of God and humanity which should be a moral inspiration to every young man in America.

HOW WHEELER BEGAN—A FASCINATING STORY

What are the facts? Dr. Howard H. Russell, the venerable and beloved founder of the Anti-Saloon League of America, told me recently in his own home in Westerville, Ohio, how, having

practiced law for seven years, he felt the call of God to enter the ministry, and how soon after this sacred decision on his part he was so stirred as he witnessed the reign and ruin wrought by the licensed saloon in Ohio that he determined to give his life to an organized effort to destroy that long-protected cancer on the social and political body of our American life. Conferring with the president of Oberlin College, he asked to be directed to some young man of outstanding ability whom he might induce to join him in this stupendous undertaking. The college president named Wayne Wheeler as a young man soon to leave college with bright prospects as an attorney at law. Doctor Russell sought out the young man and laid before him his plan, which would call for unspeakable hardship and great personal privations. Wheeler promised to give him an answer after due deliberation. Finally he went to the young student's room and found him on his knees in prayer, and when he arose from his knees there was a light upon his face "that was never seen on land nor sea." It was the light that comes from self-immolation and heroic dedication to the cause of a crusader for the right. Doctor Russell and the student shook hands in an unselfish compact that meant more to the cause of sobriety and righteousness than any handclasp that ever took place, perhaps, in the history of America for the emancipation of suffering humanity.

Wayne Wheeler began his work at $100 a month, which he must raise himself, as the young lawyer and patriot fought the highly paid attorneys of the liquor interests almost single-handed and alone. Doctor Russell told me that many times during those early and trying days Wheeler's salary, meager as it was, often went unpaid for weeks at a time, while the heroic young crusader was barely able to keep body and soul together as he fought his way from town to town and met the millions of the brewery, distillery, and saloon interests, with that twin accompaniment, the gambling den and the bawdy house, in mortal combat. Thus Wayne Wheeler began the great work in which he is now engaged with the searchlight of the enemies of prohibition thrown about his every step and the hounds of calumny barking daily at his heels.

I fought side by side with him when he was superintendent of the Anti-Saloon League of Ohio, making the closing address in the first great state-wide fight at Memorial Hall in Columbus, and I saw with unmixed admiration the grip that Wayne Wheeler had upon the forces of righteousness in his native State, where he had labored since boyhood and where, amid the kindling glories of his brilliant and promising young manhood, he made the superb sacrifice of personal ambition on the altar of human redemption. And when he came to the Nation's Capital, at the earnest solicitation of his comrades, who knew him best and loved him best, I rejoiced as a director of the Anti-Saloon League of Georgia and former vice president of the Anti-Saloon League of America, to welcome him to the Capital of our country, as he came to his titanic battle with the greatest lawyers that liquor money could buy. Just think for a moment, ladies and gentlemen: Suppose Wayne B. Wheeler, with an ability that even his enemies acknowledge and with a character which these enemies have never been able to successfully assail, had chosen to stay in Ohio to pursue his chosen profession of the law and, naturally, to enter into the political life of that great pivotal State. He could have easily been Governor of or Senator from Ohio, and you know what they often make of governors and Senators from Ohio. He is as able, as stalwart, and as stainless as any man who ever occupied the President's chair from the springboard of Ohio leadership. It is such a man, the pride of his friends and the despair of his enemies, who has been charged with being a "legislative pest, ready, no doubt, to be hired by the other side for an advance in salary, just as soon as he was assured he would get his pay." May God blast this slander and forgive the slanderers before they stand at the judgment bar of eternity! Oh, that the rules of the House would allow me to tell the whole truth about this horrible thing that is not the truth! Anyway, Wayne Wheeler's picture will be framed in white in millions of happy homes and his name loved and shrined in millions of grateful human hearts when the name of the wet Senator who made this shameful charge is forever forgotten.

The fact is that Wayne B. Wheeler's salary is just about the same as a Congressman's, and nobody doubts that in the tremendous draft that is made upon his legal ability and dynamic energy he earns his salary as well as any Congressman on the floor of this House. And I happen to know that he was recently offered a partnership in a great law firm that would more than double his present income. But what if his income as an attorney were twice as large as it is? It is none of the "blooming" business of the liquor crowd, who do not pay any of his salary. That salary is paid as a joyous contribution from the organized forces of righteousness which came into militant being 30 years ago for the sake of putting the legalized liquor interests out of business and who propose to keep up their organization for the express purpose of preventing these same defiant liquor interests from returning to constitutional power from now until Judgment Day.

I shall not stain the pages of the CONGRESSIONAL RECORD by reciting the names of the liquor lobbyists who are now declaratively engaged in raising money with which to influence legislation and who are indicting the leaders of the friends of prohibition for the legislative activities which these liquor lobbyists claim for themselves. They buy full pages in metropolitan dailies, charging that the eighteenth amendment was "put over by an unscrupulous minority." With money stained with human tears and human debauchery they lay this lying charge at the door of the noblest God-fearing men and women that America ever saw, and, as I showed Congress in a three-minute speech a few days ago, they invade the precincts of the immortal dead like modern ghouls of darkness to besmirch the name of Abraham Lincoln and defend their campaign of anarchy and nullification by a forgery that smells to heaven, declaring Lincoln to be against prohibition. They have used the picture of the great Emancipator above their devilish forgery, hoping thus to deceive the multitudes who honor Lincoln's name. It was bad enough, God knows, for the assassination of Abraham Lincoln to be planned in a saloon just across the line in Prince Georges County, Md., but the shocking limit of human indecency is reached by this shameful effort on the part of the nullifiers of our Constitution to forge the words and prostitute the name of Lincoln to bolster their discredited cause—this, I remind you, in the face of the fact that Lincoln wrote and signed a pledge of total abstinence and declared that the liquor interests, with all their depraved and degrading methods, constituted the blackest cloud on the sky of America's future. And I remind you that these full-page ads of wet propaganda, prostituting the picture and name of Lincoln, carry the slogan "See your Congressman to-day." Thus liquor would lobby Congress, but the "drys" must "hands off." Nothing doing; we will fight as long as the "wets" force us to fight.

UNFORTUNATE BRAINSTORM OF NICHOLAS MURRAY BUTLER

My colleagues and fellow citizens of America, I am moved with commendable compassion for the future of the Republican Party. It has all come about because of that unfortunate brainstorm on the part of Nicholas Murray Butler, president of Columbia University. We are told in the press that this otherwise well-meaning educator and statesman is basking in the aftermath of his recent performance before the Missouri Society in New York, and is receiving a daily shower bath of congratulations from a perverse-minded element in America, who, like the two frogs in the mill pond, made so much noise that the owner thereof sold 500 to a hotel keeper on the strength of the noise he had heard, but alas, could deliver only two. What if Columbia's president has received several thousand letters and telegrams? What are they compared with the patriotic, sober millions of America who have paid no attention to his tragic folly? Many of my congressional colleagues have seen from day to day a truck out near the Capitol loaded with petitions and bearing the placard in letters of appropriate red: "Seven million citizens call for beer and wine." Nobody doubts it; but what about the 103,000,000 who do not put their appetites above the Constitution of their country and who have made no noise at all? The congratulations that are coming to Doctor Butler because he has taken his place beside the outlawed liquor interests of this country, who are practicing nullification and demanding repeal, must be weighed in the same balance with these beer and wine petitions and that delectable bunch of "57 varieties" of modification bills which have been making so much noise in the papers through the medium of the hearings courteously granted by the Judiciary Committee, a courtesy that will never be strained—mark my words—by reporting out one of these bills for congressional action.

With pardonable pride the president of Columbia has allowed some excerpts from his congratulatory letters and telegrams to be published in the papers, and in one of these pieces of boozy exuberance we find the basis for the compassion that moves our souls concerning the future of the Republican Party. Hear him:

> With such courageous leadership as yours the party can be restored to its former position of public respect and power.

What a pathetic confession as to the present abject position and condition of the party whose nominee President Butler dreamed of being four years ago—the party which he declared in the papers will lose 11 wet Northern States unless the platform

carries an antiprohibition plank. Fellow Americans who honestly wear the Republican brand, in all good humor I commend to your platform committee this rare morsel of Nicholian wisdom and Butlerian sagacity. If I might stoop so low and backslide so far in the realm of conscience as to think only of my own party success, I would adjure you by all the gods that be to hurry up your Cleveland convention and take President Butler's advice.

But hear again the words of this educator-statesman in a pitiful surrender to the forces of immorality:

> The reason why the prohibition law is not enforced is that it can not be enforced. The reason why it can not be enforced is that it ought not to have been passed. In its attempted forcible interference with the food and drink and medicine of the people, it is a form of oppression to which a free people will never submit in silence.

According to this untenable concept, my fellow citizens, every law of God and man that would restrain the hurtful habits of the individual is an unwarranted assumption of divine and human authority. Under the Butler ideal the narcotic law would fall, the pure food law would fall, the law against carrying concealed weapons would be wiped out, the man who spits on the sidewalk should not be restrained, while the woman who persists in wearing a big hat that obscures the vision of her neighbors in the theater should be crowned as a benefactress and canonized as an angel of light, and the officer of the law-making entity seeking thus to abridge human freedom should be thrown out of the house. Doctor Butler plants his feet side by side with every reeking saloon that ever cursed America in declaring that this law should never have been passed. He forgets the praying wives and mothers of that first chapter of the Woman's Christian Temperance Union in that saloon-ridden Ohio town, who begged on their knees that the liquor sellers would stop ruining the men of their homes, and who were told "to go back home and look after your business and we will look after our business that has been made legal by the State." And these women—God bless their white-ribbon souls—fell on their knees afresh and declared that if the men who were their rightful protectors would not defend the children they had borne to them they would rear a generation of men and women who would. It is this generation who have led the principles of prohibition to victorious coronation who are outraged to-day by President Butler's un-American travesty on educational leadership.

FOR THE STUDENTS OF AMERICA

In the name of nearly 4,000,000 students in America whom I have tried to inspire with lofty purpose, in the name of the many millions more whom having not seen I love, I indict the president of Columbia University as an educational menace to the youth of America and the student life of the world. If Doctor Butler believes all he has said concerning the mistakes of prohibition and the necessity for wiping out the eighteenth amendment, which would bring back the old saloon régime, then I indict him for a glaring dereliction of duty toward the students of Columbia University. If our prohibition law produces drunkards and causes wldespread disrespect for all law, then why did he not move to have beer and liquor saloons on the campus of Columbia 20 years ago—the regulation saloon, mind you, with its twin companions of crime and shame? This conclusion can not be tossed away with the self-satisfied laugh of the "scholar in politics." It is an inescapable conclusion. If the eighteenth amendment is to be wiped out in five years, as he says, then he ought to start hundreds of students to studying in the university as to the best way of handling the new industry that was outlawed by the passage of the eighteenth amendment—a national remedy for a national evil. These campus saloons, according to his concept, would breed a general respect for constitutional law and would exert a great character-building influence—the kind of influence that makes youth strong in the face of temptation. That is the incontestable logic of his position.

WOMEN CITIZENS AND THE CONSTITUTION

I reminded these women citizens of Brooklyn who are students of the Constitution that that once famous educator in their midst has picked a quarrel with the Constitution of your country and mine, and I further reminded them, if willing to take a brother citizen's advice, that they have a wonderful opportunity at their door to make a fight, as gallant as it will be winsome, against the destructive methods of this Gotham intellectual. He must be reminded for the sake of "the good of the order" that the eighteenth amendment was put into the Constitution in no spasm of sentimental hysteria, as the liquor intellectuals claim. It fought its way into the Constitution by due governmental process. This victory was won by the enemies of the saloon and the friends of sobriety after actual generations of education and agitation. It was passed by the Sixty-first Congress, which was selected—the lower House at least—with that as the great, burning issue. With this mandate from the American people—a mandate given, I remind you, five months before a single soldier went to France, this amendment received a constitutional majority; and then, according to constitutional process, it was referred in broad, open daylight to the legislatures of all the States, and fifteen-sixteenths of the States of the Union overwhelmingly indorsed this prohibition amendment. And then, with the brightest brains that liquor money could employ fighting the constitutionality of this new law before the Supreme Court of the United States, that great tribunal handed down the high decision that every step in the process had been according to the Constitution of our fathers. It is yours, I declared to the loyal members of the Woman's Constitutional League, to remind the president of Columbia University, who is supposed to be the conveyer, the purveyor, and inoculator of intelligent patriotism, that this is the way we pass our laws in America, and that if he does not want to fall in and give a square deal to a new amendment to our Constitution, deliberately, fairly, and constitutionally enacted, then he might set sail for some foreign land and make application for a professorship in something besides a strictly American institution. He might, for instance, fill the chair of "presidential misfits and American travesties" in the University of Moscow, or Irkutz, Mandalay, or Calcutta—just any old place, where he will not dazzle the eyes and dwarf the sober patriotism of the student life of America. Alas and alack, Germany went down under the ponderous weight of her self-centered intellectuals. May God save the schools and colleges of our land from such a tragic fate.

BUCKWHEAT CAKES AND LIQUOR

But if President Butler goes abroad or stays at home, the mothers and fathers and teachers and preachers of America devoutly hope that he will reverse himself on the unspeakable position that "it is no more moral or immoral to drink or to refrain from drinking alcoholic liquor than it is to eat or refrain from eating roast beef or buckwheat cakes."

We marvel that any teacher of youth could thus fly into the face of the wisdom of God and the experience of man. Wonder if Doctor Butler ever knew a breakfast of buckwheat cakes or a dinner of roast beef to make a man shoot up the town or go home and beat his wife and children? Wonder if he ever knew a food stall where roast beef and buckwheat cakes were sold to carry as their natural allies a house of shame above and a gambling den beneath? Wonder how long the people of America will tolerate in high educational positions men who do not know the difference between a shop where buckwheat cakes are made and eaten and a gilded saloon protected by law that is the trysting place of anarchy, the companion of the brothel, and the gateway to hell? Ah, voters of America, this new outbreak from a man in President Butler's position constitutes a new challenge to the friends of constitutional righteousness and national sobriety, and makes us know more than ever that neither of the old parties will dare to nominate any man on either ticket who is not politically and personally "dry."

Because you and I patriotically take such an uncringing, aggressive position the nullifiers of the Constitution brand us as radical and "extreme," but we proudly answer that we are only as extreme as "that righteousness which exalteth a nation" and as conservative as the Constitution of our country. [Applause.]

Mr. O'SULLIVAN. Mr. Speaker, I yield three minutes to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Speaker and gentlemen of the House, the sole controversy as to this legislation and the sole controversy that has been in the committee has been with reference to the chemical and industrial alcohol questions. There has been no desire upon the part of any member of the committee to interfere with or to do anything except to increase the efficient enforcement of the prohibition law, but the industrial alcohol and the chemical people all over this country appeared before the committee and for days gave testimony in opposition to this bill, and the hearings consist of a very large pamphlet. It is unfair to ask the House to pass such an important bill as this without the Members having an opportunity to even read the bill, much less know what is contained in the hearings, which covered a space of several days. The chemical people and the manufacturers who use industrial alcohol in manufacture came from all over the United States. One manufacturer came from Virginia, represented in part by the distinguished gentleman, Mr. MOORE, who just took his seat after speaking for this bill, and in whose business are invested millions of dollars. That concern uses millions of gallons each year. Others in all parts of the country are using untold amounts of industrial alcohol for manufacturing and business purposes. They are the ones

who protest against having their permits or interests placed under the prohibition commissioner. They said that they desire to remain under the Commissioner of Internal Revenue, as at the present time. We finally compromised and agreed to put a special bureau in the prohibition unit under a man trained and experienced in this work, to be appointed by the Secretary of the Treasury. The gentleman from Michigan now offers a motion not to pass the bill as it was reported by the committee, but he offers a motion to pass the bill with an amendment striking out the Secretary of the Treasury as the one who shall appoint this man in charge of the industrial alcohol and chemical department, and permitting him to be appointed by the prohibition commissioner, doing exactly what the industrial alcohol and chemical people had protested against all along, and which will injure their business and industries.

Mr. Speaker, as further evidence that we should not consider so important legislation under suspension of the rules and without opportunity for discussion of its provisions, I call attention to some of those who gave testimony in the Judiciary Committee in opposition to the provisions of the bill that had to do with lawful uses of liquors, pure and denatured alcohol. Among them were:

Mr. W. L. Crounse, representing the National Wholesale Druggists' Association and American Manufacturers of Toilet Articles;

Mr. H. S. Chatfield, chairman industrial alcohol committee, National Paint, Oil, and Varnish Association;

Dr. Charles L. Reese, chemical director E. I. du Pont de Nemours & Co.;

Mr. John J. Tierney, secretary Manufacturing Chemists' Association;

Mr. Martin H. Ittner, chairman committee on industrial alcohol of the American Chemical Society, chief chemist Colgate & Co.;

Dr. M. C. Whitaker, president United States Industrial Chemical Co.;

Mr. Eugene C. Brokmeyer, general counsel National Association of Retail Druggists;

Hon. Meyer Jacobstein, Member of Congress from the State of New York;

Dr. W. J. Schiefselin, of the National Wholesale Druggists' Association;

Mr. W. W. Gibson, president Gibson-Snow Co., representing drug jobbers;

Mr. Samuel Rigney, representing Synthetic Organic Chemical Manufacturers' Association of the United States;

Mr. A. M. Spieler, representing Toilet Article Industry;

Mr. C. M. Kline, of the Smith, Kline & French Co.;

Mr. John G. Paine, of the Victor Talking Machine Co.;

Mr. Roland L. Taylor, of the Tubize Artificial Silk Co.;

Mr. Richard H. Bond, vice president McCormick & Co., flavoring extracts; vice president Flavoring Extract Manufacturers' Association of the United States; and

Mr. Samuel F. Irving, of H. L. Parke & Co.

All these gentlemen, representing large business interests, stated that to couple up the legitimate uses of alcohol with the illegitimate under the direct head of the Prohibition Commissioner would bring to them untold injury. Their statements are contained in the hearings had by the committee under dates of March 13, 21, 27, and April 2. Mr. James P. McGovern, attorney for the chemical manufacturers, very clearly pointed out some of the evils that will come from the enactment of this legislation into law. His statement is found in the hearings referred to on pages 123 to 127, inclusive. I include these in my remarks in order that the Members of the House may have some information touching this question which affects millions of dollars of honest and legitimate business.

ANALYSIS OF THE CRAMTON BILL (H. R. 6645), PROVIDING, AMONG OTHER THINGS, FOR THE TRANSFER FROM THE COMMISSIONER OF INTERNAL REVENUE TO A COMMISSIONER OF PROHIBITION OF CONTROL OVER THE SCIENTIFIC, MEDICINAL, AND INDUSTRIAL USES OF ALCOHOL—PURE AND DENATURED

[By James P. McGovern, of the District of Columbia bar]

In its scope and subtleties the Cramton bill (H. R. 6645) presents an even greater menace to American chemical industry than that contained in the Ernst-Wood bill (H. R. 12035 and S. 3713, 67th Cong., 2d sess.), which, as a result of the nation-wide opposition of scientific societies and commercial organizations, failed of passage; in fact, its draftsman obviously followed closely the lines and, to some extent, the very language of the latter measure, but added provisions, couched in ingenious phraseology, the practical effect of which are to enlarge the jurisdiction of the new Prohibition Commissioner by transferring to him the time-honored powers exercised by the Commissioner of Internal Revenue under nearly 250 statutes. And to make certain that the new bureaucrat would be clothed with authority without limitation, the bill includes under his rule "any other statutes, or parts of statutes, to the extent to which they similarly prohibit, tax, control, or regulate" liquors and narcotics.

However repugnant to our system of Government was the scheme contained in the Wood-Ernst bill of a lone officer responsible for his acts only to the President of the United States, it would nevertheless be preferable, from the standpoint of public interest and welfare, to the deplorable emasculation of the Internal Revenue Bureau embraced within the provisions of the Cramton bill. The average citizen could better deal with an absolute bureaucrat possessing clearly defined powers and responsibilities than with the commissioner whose authority would be so divided or interwoven with those of the tax and other divisions of the same department that irresponsibility in the conduct of the governmental business would be inevitable and the morale of the service destroyed.

Succinctly stated, the Cramton bill, in its present form, is unworkable from an administrative point of view, and this opinion is shared by well-informed attachés of the existing Prohibition Unit of the Internal Revenue Bureau, who have the courage of their convictions and are not currying favor with the Anti-Saloon League.

Although the Cramton bill would place the proposed prohibition bureau in the Treasury Department under the supervision of the Secretary of the Treasury, instead of its being answerable only to the President, as provided in the defunct Ernst-Wood measure, that feature manifestly furnishes no comfort to those who lawfully manufacture, handle, and use liquors and alcohol for scientific, medicinal, and industrial purposes and who visualize conditions from a practical standpoint. It is particularly without consolation to the innumerable users, in every branch of chemical industry, of denatured alcohol, which product, for 17 years, has been obtainable through competent collectors of internal revenue and their trained deputies, under regulations prepared by commissioners of internal revenue. Untainted with prejudice, such commissioners of internal revenue have given full force and effect to the letter and spirit of the denatured alcohol acts of June 7, 1906, March 2, 1907, and October 3, 1913, and section 13, Title III, of the national prohibition act.

Under the Cramton bill the administration of all denatured alcohol laws would be removed from the Internal Revenue Bureau, placed under the domination of a prohibition commissioner and his police force, and the supplies of all formula of that chemical raw material would have to be procured from inexperienced prohibition directors and inspectors who think in terms of "booze" and hip-pocket-size packages, and this despite the provisions of section 4, Title II, of the national prohibition act, that "denatured alcohol or denatured rum produced and used as provided by laws and regulations now or hereafter in force * * * shall not, after having been manufactured and prepared for the market, be subjected to the provisions" of that act. It has taken nearly a score of years for the Bureau of Internal Revenue and its collectors to systematize the work of ministering to the denatured alcohol requirements of chemical industry and reach its present state of efficiency. All this effort will be lost if the Cramton bill becomes a law. How long will it take a prohibition commissioner, charged as well with the duty of policing the law, to perfect a new organization for the purpose? And in the interim what about the lawful rights of permittees who had been led to place faith in the congressional mandate that "the nonbeverage alcohol industry and other industries using such alcohol as a chemical raw material or for other lawful purpose" shall be placed "upon the highest possible plane of scientific and commercial efficiency"?

In this connection sight should not be lost of the fact that hospitals, universities, laboratories engaged in scientific research, and governmental agencies have from time immemorial expeditiously obtained their lawful needs and requirements of pure alcohol through collectors of internal revenue. If the Cramton bill becomes a law, prohibition crews, untrained in those important fields, will control the source of supply for such uses, with what dire results to the public health and well-being of the Nation no one can possibly foretell.

However well intentioned may be a Secretary of the Treasury, or any Assistant Secretary assigned to the work, he could not possibly give the necessary time, study, and attention incidental to the supervision of lawful operations which are now devoted to them by the Bureau of Internal Revenue.

Generally speaking, the existing Prohibition Unit of the Internal Revenue Bureau, the Coast Guard, and other agencies available for the more effective enforcement of the prohibition laws are already in the Treasury Department and the reason for the creation of a new bureau of government, under the Cramton bill, is wholly unexplainable, except upon the theory that the present Commissioner of Internal Revenue, having dutifully exercised his statutory right in granting relief from intolerable restrictions imposed by the Prohibition Commissioner upon lawful industry, has incurred the displeasure of professional prohibition organizations, and is to be sacrificed upon the altar of political expediency by having taken from him powers exercised for ages by the Bureau of Internal Revenue in connection with the manufacture, withdrawal, sale, and use of distilled spirits, etc., for lawful purposes.

The approval, by the Secretary of the Treasury, of the substance of the Cramton bill (communicated to the Committee on the Judiciary of the House of Representatives in a letter which it is understood was prepared by counsel of the Prohibition Unit) can only be interpreted as the price of peace—the means of bringing to an end vicious, unwarranted, and long-sustained attacks upon the Commissioner of Internal Revenue which have been inspired by frenzied "drys" with the object of fooling the public into believing that what is required is more drastic laws instead of such efficient enforcement of existing statutes by the Prohibition Commissioner (now clothed with ample authority) as would eliminate criminal activities and protect citizens in their lawful pursuits.

What a price to pay—the crippling of American chemical industry with resultant benefits to European competitors. Strenuous efforts are now being made to set Europe, particularly Germany, on a sound business basis. It must be conceded that the very foundation of past German chemical supremacy has been industrial alcohol, and that it furnished the backbone of its defense in the World War. In the forthcoming struggle for the world's market, why should our own chemical industry be unnecessarily burdened with additional handicaps when everyone knows that Germany will follow the course which she has persistently pursued of encouraging, by every means in the power of its Government, the production and use of industrial alcohol?

In its social experiments surely our Government has not become totally indifferent to ligitimate trade development, which makes for the prosperity and happiness of a nation. In a most comprehensive article, entitled "Republic or bureaucracy," published in the Saturday Evening Post March 15, 1924, ex-United States Senator Albert J. Beveridge quotes Prof. Roscoe Pound, dean of the Harvard Law School, as follows:

"To-day in the wake of ambitious social programs calling for more and more interference with every relation of life dissatisfaction with law becomes universal. * * * The causes of nonenforcement of law * * * for the most part grow out of overambitious plans to regulate every phase of human action by law; they are involved in continual resort to law to supply deficiencies of other agencies of social control; they spring from attempts to govern by means of law things which in their nature do not admit of objective treatment and external coercion."

The former Senator then adds:

"There is the root of the evil, is it not, the attempt to put all human activities into statutory strait-jackets, and these strait-jackets constructed, too, by those who know little or nothing of the industry or business they would thus incase?"

ANALYSIS BY SECTION

Digesting the Cramton bill, section by section, we find the following:

Section 1: This section amends the national prohibition act by substituting for the Commissioner of Internal Revenue a "Commissioner of Prohibition." It also provides for the office of "solicitor of prohibition." Such officers are to be appointed by the President and are to receive salaries of $10,000 and $7,500, respectively. It furthermore creates a new division in the Treasury Department, to be known as the bureau of prohibition.

Everything that is contemplated by this section is now an accomplished fact, except the increase in salaries. There is at present, and has been since the enactment of the national prohibition act, a unit in the Treasury Department, designated as the Prohibition Unit, with an officer in charge called the Prohibition Commissioner. That unit was created by the Commissioner of Internal Revenue, and the Prohibition Commissioner was appointed by him under authority of section 38 of the national prohibition act. Under his appointive power, the Commissioner of Internal Revenue also employed a solicitor of prohibition, known as counsel of the Prohibition Unit. The Cmmissioner of Internal Revenue delegated to his Prohibition Commissioner the actual enforcement of the national prohibition act and other liquor and narcotic laws, vesting in him adequate authority for the purpose, and reserved to himself only the statutory right of supervision and control. The Prohibition Unit now functions as an integral part of the Bureau of Internal Revenue and is within the Treasury Department. In truth and in fact there is no necessity whatsoever, nor advantage to the public service, in the elevation of the present Prohibition Unit to the status of a bureau of prohibition. Surely one title sounds as pretty as the other. The Commissioner of Internal Revenue needed no legislative sanction to call the prohibition enforcement officer a Prohibition Commissioner or to otherwise appropriately classify him.

"What's in a name? That which we call a rose
By any other name would smell as sweet."

Expressed differently, there is sufficient law on the statute books relative to the subject matter, and the only effect of enactment of the Cramton bill would be to cut off absolutely and forever the guiding hands of the Commissioner of Internal Revenue and his trained deputies, collectors, etc. Under existing law (sec. 3248, R. S.) the lien of the Government for internal-revenue taxes attaches to alcohol and every other type of alcoholic liquors "as soon as it is in existence as such," and continues until the spirits are either tax paid or withdrawn tax free for governmental use, hospitals, denaturation, export, etc. Therefore, until the Government abandons its tax interest in such liquors for nonbeverage purposes, the logical place for the enforcement of all laws having to do with those products is the Bureau of Internal Revenue.

Section 2: This section is identical with the similarly numbered section of the national prohibition act, except that the Commissioner of Prohibition is substituted for the Commissioner of Internal Revenue. Obviously the only reason it was spelled out in the Cramton bill was to "sweeten" the measure by appealing to advocates of true law enforcement and to convey the impression that such powers are not in the existing law.

Section 3: This section specifically empowers the newly created Commissioner of Prohibition to appoint assistants, experts, and employees necessary for the enforcement of the act, all of whom, with the exception of a favored group, are to be appointed under the rules and regulations of the civil service act. Practically speaking, the civil-service feature of the Cramton bill suggests the only reason for possible new legislation and, of course, that could be accomplished by a separate bill for the purpose without disrupting the Bureau of Internal Revenue and hog tieing legitimate chemical industry.

Section 4: This section adds three new sections to the national prohibition act—40, 41, and 42. The new section 40 would vest in the Commissioner of Prohibition all of the duties and powers heretofore exercised by the Commissioner of Internal Revenue under the entire group of laws—punitive and taxing—relative to narcotic drugs, liquors, and alcohol (pure and denatured)—scientific, medicinal, and industrial—and cereal beverages—without let or hindrance, save as he may be under the supervision of the Secretary of the Treasury—the busiest man in the Cabinet. These laws may be summarized as follows:

National prohibition act, approved October 28, 1919.

Act supplemental to the national prohibition act, approved November 23, 1921.

Sections 238, 239, and 240, Criminal Code, covering interstate shipments of intoxicating liquors.

The Reed amendment of March 3, 1917, prohibiting shipments of intoxicating liquors into "dry" territory.

Act of January 17, 1914, regulating manufacture of opium.

Act of December 17, 1914 (the Harrison narcotic law).

Sections 1006, 1007, and 1008 of the act of February 24, 1919, amending the Harrison Narcotic Act.

All other statutes of the United States relating to traffic in narcotics.

Chapters 2, 3, 4, 5, and 11, of Title XXXV, Revised Statutes, and amendments thereto, comprising over 240 sections of the Revised Statutes dealing with multifarious subjects, the handling of which between the new Prohibition Bureau and the Internal Revenue Bureau could not but fail to produce chaotic conditions in the public service.

Then follows omnibus provisions whereby the Commissioner of Prohibition is given all the powers now conferred upon the Commissioner of Internal Revenue under "any other statutes or parts of statutes" dealing with the subject matter, including, of course, the denatured alcohol laws above referred to.

The proposed additional section 41 to the national prohibition act gives to the Commissioner of Prohibition the broadest possible powers in connection with assessments, abatements, refunds, and compromises, and the right to sue for penalties. It also gives the Commissioner of Prohibition authority to issue "such regulations as may be deemed necessary for the enforcement of laws relating to intoxicating liquor, narcotics, and cereal beverages," subject only to the vague approval of the Secretary of the Treasury. It also specifically states that the officers appointed by the Commissioner of Prohibition "shall exercise such functions as may now be exercised by collectors of internal revenue, internal-revenue agents, or field officers acting under the direction of the Commissioner of Internal Revenue for the administration of the statutes relating to the enforcement of the national prohibition act and all legislation passed for that purpose."

To any lawyer or business agent who has practiced before the Bureau of Internal Revenue in connection with the lawful manufacture, tax payment, withdrawal, transportation, sale, exportation, or use of industrial alcohol, the very contemplation of the confusion which would follow enactment into law of the Cramton bill is terrifying. The last paragraph of said section provides that all moneys collected by the Commissioner of Prohibition shall be deposited to the credit of the Treasurer of the United States. Are such funds not now so credited?

The remaining section (42) sought by the Cramton bill to be added to the national prohibition act provides for the transfer to the Commissioner of Prohibition of certain employees, equipment, and quarters, and, of course, gives to the Commissioner of Prohibition all appropriations made for prohibition enforcement, and in addition takes from the Treasury Department an amount "deemed necessary for the

payment of salaries and traveling expenses of storekeeper-gaugers and gaugers and for the employment of clerks to fill positions similar to the places now held by employees in collectors' offices who are engaged upon distilled spirits and narcotic work. It finally gives to the Commissioner of Prohibition such part of the appropriation for salaries of the office of Commissioner of Internal Revenue as are "deemed necessary for the employment of clerks paid from that appropriation who are now assigned to duties relating to the enforcement of laws with reference to intoxicating liquors, narcotics, and cereal beverages." In other words, the Prohibition Commissioner is given all the power and money which the taxpayers have bestowed upon the Secretary of the Treasury and the Commissioner of Internal Revenue for the enforcement of both the prohibitory and permissive features of the liquor, narcotic, and industrial alcohol laws, and he is to attempt to replace—overnight—smooth-running machinery of Government with new facilities and personnel without interfering with lawful activities of citizens. May God pity those who will have to do business with the Prohibition Bureau should the Cramton bill in its present form become law.

Unless so amended as to leave the administration of the lawful uses of all liquors and alcohol—pure and denatured—in the hands of the Commissioner of Internal Revenue, the Cramton bill should be defeated in the interests of nationally important chemical industries and orderly procedure of government.

WASHINGTON, D. C., *March 20, 1924*.

The SPEAKER. The time of the gentleman from Missouri has expired.

Mr. CRAMTON. Mr. Speaker, I said before the Committee on the Judiciary that the prohibition act could never have been put over in this country except that it was deemed to be in the interest of legitimate industry. Nobody wants to hurt legitimate industry. It will be protected. Gentlemen here have challenged my statement that the committee unanimously reported the bill. The gentleman from Pennsylvania [Mr. GRAHAM], the chairman of the committee, repeated the statement that the bill was unanimously reported.

At any rate, there was no minority report. The gentleman says, and I agree with him, it is my understanding it is a unanimous report. But I have availed myself of my right under the rules of the House to move to suspend the rules and pass the bill with a slight amendment to the committee amendment in reference to this subject. I accept nearly all of the committee amendments. I accept the provision for the creation of this division, the qualifications of its chief, and the directions as to what they shall do to encourage the development of lawful industry. But they said the chief should be appointed by the Secretary. I ask that he be appointed by the commissioner with the approval of the Secretary. [Applause.] Nobody can be named whom the Secretary does not want. I do not want my bill destroyed by taking the supervision over the lawful use of alcohol out from this bill. Here is what they think they get. Here is the N. A. R. D. Journal, which says the provision I am objecting to "deprives the national prohibition commissioner of unlimited or absolute authority over industrial alcohol. The amendment places this authority in the hands of the chief of a division of chemical and industrial alcohol, subject to the Secretary of the Treasury only." I want to keep together in the bill in this bureau the complete administration of the law as to both prohibited and permitted liquors, and hence want this chief under the commissioner, but his appointment is subject to the approval of the Secretary.

I never agreed to the committee amendment; I was never asked to; but I tried hard to come as close as I could to it, because I want legitimate industry to be reassured. The American Drug Manufacturers' Association indorses this bill and says there is nothing to be alarmed about and says the bill should not be opposed. Here is the thing we want to reach. Sixty million gallons of alcohol were permitted in legitimate industry last year, of which at least 6,000,000 gallons went into unlawful uses, were diverted. There are only two big sources of violation. One is smuggling from abroad, and the other is the diversion from the lawful use to unlawful purposes.

I want the commissioner who issues the permit to have the authority and the responsibility to see that the permit is not used for unlawful purposes. By a closer organization and wiping out of red tape and delays and buck passing lawful industry will get a better administration, and the fellow who is using the permit for unlawful purposes is going to find the proposition more dangerous.

Mr. WATKINS. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. WATKINS. The virtue of this legislation lies in the fact that the wets admit that it means better enforcement?

Mr. CRAMTON. I will not say that all wets are against this. I will say we had good consideration by the Committee on the Judiciary. There is a chance for argument about this industrial alcohol feature, because lawful industry has been alarmed, but unnecessarily alarmed, I am sure. The only argument they make is that the commissioner of prohibition is pledged to enforcement; he is interested in enforcement and may not have enough sympathy with legitimate industry. The converse would be that one who had sympathy with lawful industry would not have sympathy for enforcement. The problem is big enough to deserve and demand a bureau to handle it all. If we are to succeed in enforcing national prohibition, we must have effective organization. The Nation wants better enforcement, but does not want to interfere with legitimate industry and will not permit legitimate industry to suffer.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MICHENER. Mr. Speaker, I ask unanimous consent to proceed for two minutes, to make a statement.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to proceed for two minutes. Is there objection?

Mr. CRAMTON. I would like one minute to answer.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. MICHENER. Mr. Speaker, I am a member of the committee reporting this bill and I am just as dry as is my friend from Michigan, and without taking any particular credit for getting this bill out of committee, I am here to say the bill would not have come out of the committee had it not been for my efforts and the efforts of other dry Members, unless brought out by petition. But we tried, as has been stated here, to agree upon a bill. We did agree in the committee upon this bill. We got a unanimous report from all those present. I did not know whether our friend from Connecticut [Mr. O'SULLIVAN] voted or not, but I am in a position where I do not want to vote against this bill, because I believe the bill is fundamentally right. I do not believe that this particular amendment makes any material change in the operation of the law, but I am placed in a position here brought about by the parliamentary situation where I must either vote against the bill—vote against the thing I believe in—or I must vote against an agreement which I made in committee, acting in good faith and after I had consulted with my friend Mr. CRAMTON, and so to-day I do not want to betray any faith. I want to vote for the bill, and I asked the gentleman from Michigan [Mr. CRAMTON] a few minutes ago to give me three minutes to explain my position, and I was unable to get it. I am just as much interested in the enforcement of the law as is my friend from Michigan [Mr. CRAMTON]. I say, viewing this matter in a reasonable, in a practical, and in a common-sense way, it is my judgment and it was the judgment of the dry members of that committee, that this amendment will not change in the least the force or the effect, if you please, of this bill, but we should have an opportunity to vote separately on this amendment; but as a matter of procedure we must either vote the bill down or we must accept the amendment, which the committee agreed not to accept. And is there not some parliamentary situation, Mr. Speaker, whereby we can have an opportunity to vote for the bill as agreed and also vote against the amendment? The vote of the House should control, but we should not be put in this position.

Mr. STEVENSON. Will the gentleman yield?

Mr. MICHENER. I will.

Mr. STEVENSON. I suggest to the gentleman I am as dry as he is and I agree with him entirely, and the way to do is to vote down this motion and bring the bill up for consideration under the regular rules of the House. I have voted for all prohibition legislation proposed here in seven years, but will not vote to pass this bill in this shape, unless given an opportunity to amend it.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent for one-half a minute.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I object.

Mr. CRAMTON. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER pro tempore. The gentleman from Pennsylvania objects. The gentleman from Michigan will state his question of personal privilege.

Mr. CRAMTON. I fear that the statement of my colleague [Mr. MICHENER] may impute bad faith to me, and if there is

anything in it to do that, I simply want to say that, while the gentleman from Michigan rendered great service in getting the bill out, yet I never agreed to accept this committee amendment. [Cries of "Vote!"]

The SPEAKER pro tempore. The question is on the motion of the gentleman from Michigan [Mr. CRAMTON] to suspend the rules and pass the bill as amended.

The question was taken, and the Speaker pro tempore expressed himself as in doubt.

Mr. CRAMTON. Mr. Speaker, I demand the yeas and nays.

The SPEAKER pro tempore. As many as favor taking this vote by yeas and nays will rise and stand until they are counted. [After counting.] Not a sufficient number have arisen. The yeas and nays are refused.

Mr. CRAMTON. I ask that the Speaker count the other side.

The SPEAKER pro tempore. The gentleman from Michigan demands a count of the other side. [After counting.] Two hundred and twenty-seven gentlemen, a sufficient number, have arisen, and the yeas and nays are ordered. As many as favor the suspension of the rules will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 274, nays 86, not voting 73, as follows:

| Darrow | Langley | Reed, W. Va. | |
| Dickinson, Mo. | Lilly | Rogers, N. H. | |
| Dominick | Little | Rosenbloom | |

So, two-thirds having voted in the affirmative, the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Drane and Mr. Byrnes of South Carolina (for) with Mr. Quayle (against).
Mr. Little and Mr. White of Maine (for) with Mr. Curry (against).
Mr. Darrow and Mr. Dominick (for) with Mr. Celler (against).
Mr. Hudspeth and Mr. Elliott (for) with Mr. Sullivan (against).

Until further notice:

Mr. Cole of Ohio with Mr. Howard of Oklahoma.
Mr. Free with Mr. Lilly.
Mr. Zihlman with Mr. Lyon.
Mr. Britten with Mr. Hammer.
Mr. William E. Hull with Mr. Geran.
Mr. Taylor of Tennessee with Mr. Wilson of Louisiana.
Mr. Aldrich with Mr. Dickinson of Missouri.
Mr. Burton with Mr. Humphreys.
Mr. Patterson with Mr. Martin.
Mr. Mills with Mr. Salmon.
Mr. Sweet with Mr. Tydings.
Mr. Snell with Mr. Sherwood.

Mr. HUMPHREYS. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. HUMPHREYS. No.

The SPEAKER. Then the gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

COMMITTEE TO INVESTIGATE NORTHERN PACIFIC LAND GRANTS

The SPEAKER. The Chair appoints as the committee authorized by the bill passed to investigate the Northern Pacific land grants Mr. SINNOTT, Mr. VAILE, Mr. WILLIAMS of Michigan, Mr. RAKER, and Mr. DRIVER.

RURAL POST ROADS

Mr. DOWELL. Mr. Speaker, I move to suspend the rules and pass H. R. 4971 as amended by the Committee on Roads.

The SPEAKER. The gentleman from Iowa moves to suspend the rules and pass a bill as amended by the Committee on Roads, which the Clerk will report.

The Clerk read the bill, as follows:

A bill to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes

*Be it enacted, etc.*, That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be expended according to the provisions of such act as amended:

The sum of $75,000,000 for the fiscal year ending June 30, 1926.

The sum of $75,000,000 for the fiscal year ending June 30, 1927.

Not later than January 1, 1925, the Secretary of Agriculture is authorized to apportion among the several States, as provided in section

21 of the Federal highway act, approved November 9, 1921, the $75,000,000 herein authorized to be appropriated for the fiscal year ending June 30, 1926, and on or before January 1 next preceding the commencement of each succeeding fiscal year he shall make like apportionment of the appropriation herein authorized, or which may hereafter be authorized, for each fiscal year: *Provided*, That the Secretary of Agriculture shall act upon projects submitted to him under his apportionment of this authorization, and his approval of any such project within three years shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto.

SEC. 2. For carrying out the provisions of section 23 of the Federal highway act, approved November 9, 1921, there is hereby authorized to be appropriated for forest roads and trails, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be available until expended in accordance with the provisions of said section 23:

The sum of $7,500,000 for the fiscal year ending June 30, 1926.

The sum of $7,500,000 for the fiscal year ending June 30, 1927.

SEC. 3. That the Secretary of Agriculture may exchange deteriorated explosives or explosive components, obtained by transfer from the Secretary of War for distribution among the States and for use in the improvement of roads under his direct supervision, for explosives or explosive products in condition for immediate use. The Secretary of Agriculture is further authorized, by contract or otherwise, to reclaim by reworking, reconditioning, cartridging, or otherwise converting into usable form such deteriorated explosives or explosive components as can not be so exchanged, and to pay the cost thereof out of available administrative funds authorized by the Federal highway act, approved November 9, 1921, and acts amendatory thereof or supplementary thereto. The Secretary of Agriculture, in his discretion, may transfer to any department or agency of the Federal Government such of the materials acquired from such exchanges, and also such of the explosives or explosive components as may be reworked, reconditioned, cartridged, or otherwise converted hereunder, as may be required by any such department or agency for use in its authorized activities: *Provided*, That the charges incident to the storage, handling, protection, exchange, reworking, reconditioning, cartridging, or conversion of such explosives or explosive components as may be certified by the Secretary of Agriculture to have been incurred against said administrative funds shall be reimbursed said funds pro rata by the department or agency of the Federal Government, the State, or other agency receiving such explosives or explosive products.

SEC. 4. That section 11 of the Federal highway act approved November 9, 1921, as amended and approved by the acts of June 19, 1922, and June 30, 1923, is further amended by inserting after each place where the words "unappropriated public lands" occur the words "and nontaxable Indian lands, individual and tribal."

SEC. 5. All acts or parts of acts in any way inconsistent with the provisions of this act are hereby repealed and this act shall take effect on its passage.

Mr. DOUGHTON. Mr. Speaker, I demand a second.

Mr. DOWELL. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Iowa asks unanimous consent that a second may be considered as ordered. Is there objection? [After a pause.] The Chair hears none.

Mr. DOWELL. Mr. Speaker, I ask unanimous consent that all Members may have three legislative days in which to extend their remarks on this bill.

The SPEAKER. The gentleman from Iowa asks unanimous consent that all Members may have three legislative days in which to extend their remarks on this bill. Is there objection? [After a pause.] The Chair hears none.

Mr. DOWELL. Mr. Speaker, I yield myself five minutes.

The SPEAKER. The gentleman from Iowa is recognized for five minutes.

Mr. DOWELL. Mr. Speaker and gentlemen of the House, the bill under consideration is the general authorization for appropriations under the general legislation of Congress enacted on the 9th of September, 1921.

First, I want to briefly call the attention of the House to the history of this legislation. The first legislation enacted which had for its purpose Federal aid for good roads was enacted in 1916, and an appropriation of $75,000,000 was made at that time to cover a period of five years. Five million dollars was appropriated for the first year, $10,000,000 for the second year, $15,000,000 for the third year, $20,000,000 for the fourth year, and $25,000,000 for the fifth year. This was the initiation of Federal aid for the construction of roads in the United States. After this had been utilized, in February of 1919, in an appropriation bill $200,000,000 was appropriated to cover a period of three years, after which it was determined by Congress that it should be the policy of our Government to carry on Federal aid for the construction of roads, and on the 9th of September, 1921, a very carefully prepared revision of the laws up to that date was enacted by Congress and $75,000,000 was appropriated. For the next three years the following appropriations have been made: $50,000,000 for the first year, $65,000,000 for the second year, and $75,000,000 for the present year, ending July 1, 1925.

The present bill authorizes a two-year program of $75,000,000 for each year, beginning in 1925 and ending on the 30th of June, 1927.

This bill further provides, in section 2, for the authorization for building roads in forests of $7,500,000 each year for the two years specified.

The third section of the bill provides for the transfer by the Agricultural Department of the explosives which were turned over to the Agricultural Department by Congress a few years ago from the War Department, being the surplus after the war. The Agricultural Department now finds itself with a large surplus on hand. Other departments of the Government desire this surplus, and the department has asked—and it has been granted in this bill—authority to transfer these explosives to other departments of the Government that may need them.

The SPEAKER. The time of the gentleman has expired.

Mr. DOWELL. I yield myself three more minutes.

Mr. SHERWOOD. Will the gentleman state when this authorization begins?

Mr. DOWELL. In answer to the gentleman from Ohio I will state that this authorization begins with the fiscal year 1926 and makes an authorization for 1926 and 1927.

Mr. SCHNEIDER. Will the gentleman yield?

Mr. DOWELL. Yes.

Mr. SCHNEIDER. With reference to the surplus explosives mentioned in the bill, is it not possible for the farmers who are in need of explosives to get them from the Agricultural Department under this provision?

Mr. DOWELL. This provision merely authorizes the transfer of surplus explosives to departments of the Government.

Mr. SCHNEIDER. For what?

Mr. DOWELL. For any purpose for which they may have need of explosives.

Mr. SCHNEIDER. But farmers could not get them?

Mr. DOWELL. Not directly, under this authorization.

Mr. LARSEN of Georgia. Will the gentleman yield for a question at this point?

Mr. DOWELL. Yes.

Mr. LARSEN of Georgia. This bill does not prohibit the Department of Agriculture from turning them over to the farmers?

Mr. DOWELL. No; this does not have anything to do with the question asked by the gentleman, but merely authorizes the Department of Agriculture to transfer explosives to other departments of the Government which may have use for such explosives.

Mr. SCHNEIDER. Has the Department of Agriculture no use for them?

Mr. DOWELL. It has no use for the surplus. They are using a great amount of explosives in the construction of roads, but there is a large amount that has been transferred to the department that is not needed by the department.

Mr. SCHNEIDER. Does the chairman of the committee know that the Department of Agriculture has been giving to the farm people in new farming countries these explosives?

Mr. DOWELL. I assume that is true.

Mr. SCHNEIDER. And that has been discontinued?

Mr. DOWELL. I know nothing of that.

Mr. SCHNEIDER. The information I get is that the surplus of explosives that had been given to the farmers is not now being given because of the surplus having been exhausted.

Mr. DOWELL. The information before the committee is that the Department of Agriculture has a surplus and that other departments are asking for a part of this surplus and therefore this authority is granted under the bill.

Mr. MORTON D. HULL. Will the gentleman yield?

Mr. DOWELL. Yes.

Mr. MORTON D. HULL. Presumably, the committee has given a study to the whole problem of Federal aid for roads. How long does the committee anticipate this policy of Federal appropriations for roads will be continued?

Mr. DOWELL. I am unable to answer the question further than to say to the gentleman it has been established as the

policy, and until the policy is changed, I assume the Government will continue in this work.

Mr. MORTON D. HULL. Was not the policy originally a policy to stimulate the building of roads rather than to continue the subsidizing of the building of roads?

Mr. DOWELL. I am unable to answer that further than to say the first proposition is correct. I do not know what may be the policy of the Congress after it has been in operation for some time.

The SPEAKER. The time of the gentleman has again expired.

Mr. DOWELL. I yield myself two minutes more, Mr. Speaker.

Mr. BRIGGS. Will the gentleman yield?

Mr. DOWELL. In just a moment when I get through with this statement. I will then be glad to yield to the gentleman.

The third section of the bill provides for the placing of untaxable Indian lands in the United States the same as unappropriated public lands. In other words, in the States where there are Indian lands untaxable under the law they are given the same status with reference to the roads as unappropriated public lands.

I yield now to the gentleman from Texas.

Mr. BRIGGS. I simply wanted to ask the gentleman if the amount authorized in this bill is adequate to provide the necessary funds to match the amounts which the States are appropriating?

Mr. DOWELL. According to the testimony before the committee there was a controversy with reference to the amount of this authorization. The department asked for $85,000,000, and according to the testimony that was conceded by the Budget, but the Budget shows that in this last year $72,000,000 was actually used in the construction of roads, and this bill authorizes $75,000,000, which is $3,000,000 more than was actually used this year.

Mr. BRIGGS. Is road building increasing or is it on the decrease?

Mr. DOWELL. It has been increasing.

Mr. BRIGGS. Each year.

Mr. DOWELL. It has been increasing as the testimony before the committee shows.

Mr. MANLOVE. Will the gentleman yield?

Mr. DOWELL. Yes.

Mr. MANLOVE. Did not the evidence before the committee show that certain States which are voting bond issues and putting over a big program——

Mr. DOWELL. Yes; they can utilize much more than is authorized in this bill.

Mr. MANLOVE. But after their program is put over——

The SPEAKER. The time of the gentleman has again expired.

Mr. DOWELL. I yield myself one more minute in order to answer the gentleman.

Mr. MANLOVE. In the States that have a big program, such as the State of Missouri, which is putting over a $60,000,000 program, after their program of road building is completed, they will not be asking the Federal Government for as much money as they are wanting at the present time.

Mr. DOWELL. That may be true, and it may be possible that eventually this is going to solve itself.

Mr. BRIGGS. But your idea is that the authorization here is ample to provide the funds necessary for the next two years?

Mr. DOWELL. There was some difference of opinion in the committee about that. Some wanted $85,000,000. This is a unanimous report from the committee, although some members of the committee desired a greater authorization. My view is that every dollar should be cut from the expenditures of the Government that is possible, and I believe that the $75,000,000 authorized in this bill is sufficient to reasonably carry on the construction of roads as that work has been carried on in the past.

### ENROLLED BILLS SIGNED

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 5478. An act to amend sections 1, 3, and 6 of an act entitled "An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment";

H. R. 7877. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8143. An act for the protection of the fisheries of Alaska, and for other purposes;

H. J. Res. 194. A joint resolution to print as a House document the proceedings of the national encampments of the Grand Army of the Republic, the United Spanish War Veterans, and the American Legion, for the use of the House and Senate; and

S. 3181. An act to authorize an appropriation to enable the Director of the United States Veterans' Bureau to provide additional hospital facilities.

### SENATE BILL REFERRED

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 2694. An act to enable the trustees of Howard University to develop an athletic field and gymnasium project, and for other purposes; to the Committee on the District of Columbia.

### RURAL POST ROADS

Mr. DOUGHTON. Mr. Speaker, I yield two minutes to the gentleman from Virginia [Mr. PEERY].

Mr. PEERY. Mr. Speaker, amid the cross currents of partisan controversy that sometimes arise here it is refreshing to come now and then to the consideration of a measure upon which most if not all of us on both sides the aisle are in substantial accord.

Such is the bill now before us for consideration. It deals with the subject of good roads. Its object is to provide that the National Government shall "carry on" under the program of Federal aid to road building heretofore enacted into law by the Congress. While there may have been those in times past who were opposed to good roads, their number has now reached the vanishing point.

Roads are the arteries through which the trade of the Nation pulsates. They are the avenues which promote friendly intercourse and helpful relationships. They afford access to schools for the country children. They help to bring the town and the country together. They promote trade and friendship between people, communities, and States. They are the agents of a progressive and better civilization. When Rome was great one of the elements contributing to her greatness was good roads. We are told that in the height of her greatness and power all roads led to Rome. Radiating from the Imperial City as a center, her traders, her soldiers, and later her missionaries went forth as messengers of an advanced civilization to all the world.

France likewise builded good roads. They were a splendid contribution to her civilization. And when the emergency of war came and the despot's heel was on her soil the roads played no small part in stopping the advance of the invader and achieving victory over her foes. Competent critics tell us that Chateau-Thierry would not have been won for the Allies but for the splendid roads built many years before, over which American troops were rushed in time to turn the tide and save the day for France and her allies. Good roads are necessary in times of war. They are necessary to a progressive and enlightened civilization in times of peace.

All are agreed that we should have good roads. Disagreement arises only as to the means and methods of achieving the desired end. And fortunately these matters of disagreement as to methods are being ironed out and solved in a constructive way.

Prior to July 11, 1916, the matter of road building in this country was left entirely to the individual States. Then a larger vision began to dawn. Long before that time, in the course of our economic and industrial development, we had advanced from the idea that the regulation of the railroads of our country was a matter solely of State concern. By common consent it became a matter of national concern. And so with the interdependence of the States one upon the other with the wonderful advance in the development of motor transport and travel, and with the thought and vision of a Nation solidified and united together by a system of national highways, the matter of good roads emerged from a policy of mere State concern to one of national concern. The first Federal aid highway act was approved July 11, 1916. The second Federal road act was approved February 28, 1919.

Thereafter a movement was agitated looking to a change in the basic principle of Federal aid to the States and providing for a system of national highways to be built and maintained entirely by the Federal Government.

The movement, however, was not adopted. The basic principle of Federal aid to the States was adhered to, and the Federal highway act of November 9, 1921, was enacted. Under

this act a constructive plan of Federal aid road building is established. Under the act the highway departments of the individual States are required to select or designate systems of highways not to exceed 7 per cent of the total highway mileage of such State upon which Federal-aid apportionments shall be expended. These Federal-aid highways are to be divided into two classes, known as primary or interstate highways, and the other correlated therewith, known as secondard or intercounty highways. Primary highways shall not exceed three-sevenths of the total mileage which may receive Federal aid, and the secondary or intercounty highways shall comprise the remainder that may receive Federal aid. The expenses of administration are limited to 2½ per cent of all moneys appropriated thereunder. The remainder of funds appropriated are apportioned to the States in the following manner:

One-third in the ratio in which the area of each State bears to the total area of all States; one-third in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census; and one-third in the ratio which the mileage of rural delivery and star routes bears to the total mileage of rural delivery and star routes in all the States at the close of the next preceding fiscal year. The Federal aid on each project shall not exceed 50 per cent of the total estimated cost thereof. Exception is made in the case of States containing unappropriated public lands exceeding 5 per cent of the total area of all lands in the State. In such States the share of the United States shall not exceed 50 per cent of the total estimated cost thereof plus a percentage of such estimatel cost equal to one-half of the percentage which the area of the unappropriated public lands in such States bears to the total aren of such State. The contribution of the Federal Government to each project on the 50-50 basis was limited to $20,000 per mile, but a later amendment has limited the allotment to $15,000 per mile. The act itself contemplates a system of highways interstate and national in character. It provides that in approving projects to receive Federal aid the Secretary of Agriculture, to whom is committed the administration of the act—

shall give preference to such projects as will expedite the completion of an adequate and connected system of highways interstate in character.

The act contemplates a permanent system of national highways permanent in character. It recognizes the two essential principles in any system of highways, namely, construction and maintenance. In the matter of construction it provides that only such durable types of surface and kinds of material shall be adopted for the construction and reconstruction of any highway which is a part of the primary or interstate and secondary or intercounty systems as will adequately meet the existing and probable future traffic needs and conditions thereon.

In the matter of maintenance it provides that—

should any State fail to maintain any highway within its boundaries after construction or reconstruction under the provisions of this act, the Secretary of Agriculture shall then serve notice upon the State highway department of that fact, and if, within 90 days after receipt of such notice said highway has not been placed in proper condition of maintenance, the Secretary of Agriculture shall proceed immediately to have such highway placed in a proper condition of maintenance and charge the cost thereof against the Federal funds allotted to such State, and shall refuse to approve any other project in such State, except as hereinafter provided.

Under this law the Department of Roads has been established. It has proceeded with efficiency in the establishment and carrying out of a constructive highway plan. Acting in conjunction with the highway departments of the 48 individual States it has adopted a system of Federal aid highways comprising 168,181 miles in extent. This system so adopted presents a connected and interstate highway system national in character and extent. Of the Federal aid highway system, 30,036 miles had been completed up to March 1, this year, and 13,800 miles were under construction and reported 50 per cent complete.

The announced plan of the department contemplates a construction program of approximately 11,000 miles per year, and contemplates completion of the entire system within the next 10-year period.

The appropriations for roads authorized for the respective years since the enactment of the first Federal highway act have been as follows:

| | |
|---|---|
| 1917 | $35,000,000 |
| 1918 | 10,000,000 |
| 1919 | 65,000,000 |
| 1920 | 95,000,000 |
| 1921 | $100,000,000 |
| 1923 | 50,000,000 |
| 1924 | 65,000,000 |
| 1925 | 75,000,000 |

During the war period conditions were such as to make it inadvisable to enter upon an extensive road-building program, and the work was practically suspended. The actual withdrawals of funds from the Treasury have been as follows:

| | |
|---|---|
| 1917 | 34,338 |
| 1918 | 574,816 |
| 1919 | 2,915,283 |
| 1920 | 20,340,774 |
| 1921 | 57,462,768 |
| 1922 | $89,798,404 |
| 1923 | 71,429,297 |
| 1924 (estimated) | 85,000,000 |
| 1925 (estimated) | 90,000,000 |

By way of illustration as to how the matter of allotments of Federal aid to the respective States has worked out, the State of Virginia, which I have the honor in part to represent, has been credited with total allotments amounting to $9,144,390.45. There has been actually paid on these allotments to the State of Virginia up to January 1, 1924, the sum of $6,082,966.85. In addition thereto, a number of projects were under construction as of that date, which will receive Federal aid in the sum of approximately $2,500,000. This indicates that the State of Virginia, in accordance with the provisions of the Federal law, has complied with the provisions thereof, and is absorbing with reasonable promptness the amount of Federal funds allotted to her. The same observation is, for the most part, true as to the other 47 States. A small number of States owing to individual conditions have not been able to meet and absorb their share of Federal allotments. The cost of the completed road work in Virginia upon which Federal aid was expended from July 1, 1916, to November 30, 1923, was $7,430,055.63, and the number of miles of completed road thereunder was 429.6.

The statement of authorizations and actual withdrawals above set forth discloses the fact that for a number of years after the Federal Government entered upon a policy of Federal aid construction, the balance carried over in the succeeding years was greater than the annual authorization. This was due to the fact that but little road work was done during the war period and the funds authorized by Congress were allowed to accumulate. The Sixty-seventh Congress provided for authorizations which extended to the close of the fiscal year ending June 30, 1925.

The Bureau of Roads advises that the estimated balance of authorized funds that will remain unexpended at that time will amount to approximately $20,000,000. It is necessary that a balance be maintained to care for contingencies that can not be provided for in advance. The situation, therefore, that confronts this Congress is this: In order to carry on a constructive program of Federal-aid construction it is necessary that appropriations be authorized by this Congress for the fiscal year ending June 30, 1926, and it is highly advisable that the authorization also extend to the succeeding year. A real program of constructive road building must be planned in advance, and the Bureau of Public Roads can not function efficiently unless it is assured of appropriations far enough in advance of actual expenditures so as to enable the department to plan with certainty the work that is to be done. The highway-construction program for 1926 depends upon what the present Congress does in the way of authorization. The Committee on Roads is in unanimous accord upon the proposition that a substantial and constructive program of Federal-aid road building should be continued. Friendly disagreement arose only upon the question as to the amount of authorization for the two next succeeding years which this Congress should make, a number of us advocating that a sound public policy consistent with real economy would justify a larger authorization than that finally reported by the committee. The bill unanimously reported by the committee provides for an authorization of $75,000,000 annually for the two next fiscal years ending, respectively, June 30, 1926, and June 30, 1927. In addition thereto the bill carries an annual authorization of $7,500,000 for two years for the construction of forest roads and trails. It is confidently submitted that the sentiment of the entire country will approve the passage of a bill carrying these amounts.

The bill also authorizes the Secretary of Agriculture to exchange explosives obtained by transfer from the Secretary of War for distribution among the States for use in the improvement of roads.

The bill carries an amendment which places the States containing nontaxable Indian lands upon the same footing as States containing unappropriated public lands in the matter of allotment of funds.

The bill is brought to the House carrying the unanimous indorsement of the Committee on Roads. It is therefore free from partisan controversy and represents the sentiment of the various representatives upon this committee who come from various sections of the Nation. We confidently expect its passage.

In connection with the consideration of this measure I desire to commend to the House the record of efficiency and splendid achievement accomplished under the Bureau of Public Roads. The bureau has approached highway problems arising in the different sections of the country with fine spirit and has brought them to successful conclusion. The relations between the department and the various highway departments of the individual States have been conducted in a way to inspire mutual confidence and esteem. The department has conducted research work and investigations in the matter of materials and plans for road construction with a view to arriving at the soundest, most practical, and best methods suited to the respective sections of the country. It has also conducted surveys of motor transport and travel showing how the same reflects the business and social life of the respective communities. It is a matter of importance and interest to know that about 40 per cent of the milk supply of the city of Baltimore goes to the city by motor transport.

In connection with the administration of the Bureau of Roads, I desire to voice a protest to a change recently proposed.

The Bureau of Public Roads is now attached to the Department of Agriculture. The matter has large agricultural aspects and the bureau has functioned most satisfactorily. In the report of the Joint Committee on Reorganization, filed a few days ago, the four Republican members of the committee favor the transfer of the bureau to the Department of the Interior. This undesirable action, which might prove highly injurious, is opposed by the two Democratic members of the Committee on Reorganization, Senator HARRISON, of Mississippi, and Representative MOORE, of Virginia, and it should not be taken.

Another factor in this road problem of outstanding importance is the part which the roads of our country may play in the matter of national defense. This question has been studied by the Bureau of Roads in connection with the War Department and the result has been the preparation of a map showing that 53,800 miles of public highway are absolutely essential to our national defense. While all of us hope that the roads of the country may be devoted solely to peace-time pursuits, yet we must not forget the fact that if a war emergency should again arise at any time in the future we should so plan that our roads may efficiently contribute in the matter of our national defense. The 53,800 miles reported by the War Department as necessary in the matter of our national defense in the main are included in the system of national highways already adopted and the whole of said mileage, with minor exceptions, will be taken care of in the future in the Federal-aid highway system.

The progressive growth of the road building program is shown by the progressive increases in the mileage completed from year to year. The mileage completed for the respective years is as follows:

| | Miles |
|---|---|
| 1918 | 12.5 |
| 1919 | 177 |
| 1920 | 1,493 |
| 1921 | 5,787 |
| 1922 | 10,247 |
| 1923 | 8,820 |

And for the first eight months of the fiscal year 1924 there have been completed 6,500 miles of Federal-aid highway.

A statement as to the matter of income for road purposes may be of interest. In 1904 the total income for all rural purposes amounted to about $79,500,000. This included an estimated value of about $20,000,000 in statute labor. In 1914 the total had risen to $240,250,000, of which the statute labor was negligible. The income continued to rise in the years that followed until it reached $1,150,000,000 in 1921.

This indicates that the people of our country are alive to the situation and that the sentiment of the country strongly supports a constructive road-building program throughout the country as a whole. The people realize the necessity and advantages of good roads. They are looking forward to the completion of a national highway system.

The builders of Rome erected in the forum in the Imperial City a golden milestone. From it as a center radiated a splendid system of highways throughout the Roman Empire. They were a potent factor in the civilization of that country.

On June 4, last year, there was dedicated with appropriate ceremony here in this our Capital City the zero milestone. It marks the beginning point of our system of national highways. It stands within the shadow of the imposing shaft erected by a grateful people to the memory of Washington. From it one may look with reverent vision upon the memorial to Lincoln, the preserver of the Union, and then turning to the West may behold the home of Lee, the idol of the South.

From it extending to the north and through the west on to the slopes of the Pacific runs the Lincoln Highway, while to the south and through the cotton fields of Dixie on again to the waters of the Pacific runs the Lee Highway.

The vision of the builders is that the year 1934 may witness a completed system of paved highways radiating from the heart of our beloved Republic to the east and to the west and to the north and to the south, linking together the remotest corners of our land, and contributing to the happiness of our people and to the greatness of our Republic.

Mr. DOUGHTON. Mr. Speaker, I yield one minute to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Speaker, I wish to congratulate the committee on bringing out a bill appropriating this large sum for good roads. I am one of the city men who voted for the original good roads bill. I think what has been accomplished in building good roads has shown the wisdom of this legislation throughout the entire period. I wish to congratulate the country on the fact that we are by this bill appropriating $75,000,000 for each of the fiscal years ending June 30, 1926 and 1927, a total of $150,000,000. It seems to me it is conclusive proof that the income tax bill we passed recently is so well thought of that we can not only look forward one year but we can look forward with certainty to the year 1927. I think the action of Congress to-day in passing this good roads bill indicates the wisdom of Congress in the passage of the tax bill with the Democratic schedule of taxation. [Applause.]

I feel highly gratified with the splendid tax bill which has been enacted by this Congress in spite of all kinds of propaganda through the public press, by letters and telegrams, cartoons, and so forth. The Congress of the United States has had the temerity and backbone to stand for the rights of the great mass of taxpayers as against any partiality in favor of the immensely wealthy of the country.

I have nothing to say against our citizens of large means, but I do feel that they should be just as capable and willing to pay their just proportion of the expenses of the Government as the smaller taxpayer. The Mellon bill set 25 per cent as the maximum surtax, being a 50 per cent reduction of the present law, and around that definite stand taken by Mr. Mellon was formulated what is known as the Mellon tax plan, which gave scant relief to the small taxpayer and a very great relief to those of large means.

There are several special features in the law just enacted; the allowance of 25 per cent reduction upon all incomes for the year 1923 has been a very substantial relief to all taxpayers. For the first half of this calendar year the 25 per cent reduction in the income taxes will take off more than half of the $232,000,000 for the full calendar year. If we add to this the $361,000,000 for the fiscal year ending June 30, 1925, we have a total reduction in 18 months of $480,000,000, and some of the papers are still stating that Congress refused to reduce taxes and the President claims that the reduction is not scientific. Yet in these 18 months Congress reduced taxes $250,000,000 more than what the Mellon plan proposed. It will be noted that under the new law all taxpayers having incomes of $10,000 or less will have their income tax reduced some 60 per cent, and where they are earned incomes the taxpayer receives 25 per cent additional, which is a wise and just provision.

Ever since I studied under Dr. Richard T. Ely, of the Johns Hopkins University, I have always thought that an earned income should not be taxed in the same proportion as that received from investments. When the man who has an earned income is no longer able to work or passes to the great beyond, his income ceases, while the man having an income from investments, becoming incapacited or dying, the income still continues.

In addition to these heavy reductions, the excise and other taxes are repealed or reduced to the extent of $136,000,620, so that we not only have the vast sum reduced as income taxes but to that could well be added this excise and other tax reduction, which consists of telephone and telegraph tax, theater admissions under 50 cents, auto trucks and bodies, tires, tubes and parts, carpets and rugs, and jewelry, all of which articles and many others have had a very substantial reduction. I am inserting here certain tables to show the reductions under the new tax bill.

SHOWING NORMAL TAXES ONLY FOR BRACKETS OF $20,000 OR LESS AND TAKING INTO ACCOUNT THE NEW EARNED-INCOME PROVISIONS

| Net income | Single person | | Man and wife | | Man, wife, and child | | Man, wife, and 2 children | | Man, wife, and 3 children | |

The estimates given below are based upon the collections for the fiscal year ended June 30, 1923:

*Articles and amount saved to taxpayer*

| | |
|---|---|
| Repeals tax on— | |
| Telephone and telegraph messages | $34,000,000 |
| Beverages and constituent parts thereof | 10,000,000 |
| Admissions of 50 cents and under | 33,000,000 |

| | |
|---|---|
| EXCISE TAXES | |
| Auto trucks and bodies, chassis costing $1,000 and body $200 exempt from 3 per cent tax | 5,000,000 |
| Tires, tubes, parts, and accessories, tax reduced from 5 per cent to 2½ per cent | 20,000,000 |
| Smokers' articles, 10 per cent tax on humidors and smoking stands repealed | 1,000 |
| Candy, 3 per cent tax repealed | 13,000,000 |
| Slot device weighing machines, tax reduced from 10 per cent to 5 per cent | |
| Knives, dirks, daggers, etc., tax is repealed | 30,000 |
| Liveries and livery boots and hats, 10 per cent tax repealed | 140,000 |
| Hunting and shooting garments and riding habits, 10 per cent tax repealed | 180,000 |
| Yachts and motor boats and pleasure boats and canoes if sold for more than $100, 10 per cent tax repealed | 319,000 |
| Carpets and rugs (square yard tax); trunks, sold in excess of $35; valises, traveling bags, suitcases, etc., if sold in excess of $25; purses, pocketbooks, shopping or hand bags, sold in excess of $5; portable lighting fixtures, lamps, and lamp shades, sold in excess of $10; fans, sold in excess of $1; 5 per cent tax on all the foregoing repealed | 1,800,000 |
| Jewelry; 5 per cent tax does not apply on articles sold for $30 or less; on watches sold for $60 or less; on church goods, musical instruments, and silver-plated flat tableware, irrespective of price. (Eyeglasses and spectacles and surgical instruments are exempt) | 11,000,000 |
| STAMP TAXES | |
| Sales of produce on exchange, cut from 2 cents to 1 cent per $100 | 4,000,000 |
| Promissory notes, drafts, or checks, payable otherwise than at sight or demand, tax of 2 cents per $100 or fraction thereof repealed | 2,150,000 |
| OCCUPATIONAL TAXES | |
| Brokers exclusively negotiating sales of produce or merchandise, exempt from $50 tax | 400,000 |
| Theater seat tax, etc., repealed | 1,600,000 |
| Total reduction | 136,620,000 |
| MISCELLANEOUS ITEMS | |
| Adds tax— | |
| While the bill reduces the tax on slot-weighing machines from 10 per cent to 5 per cent, it now applies the 5 per cent tax to all classes of coin-operated machines, which will increase the revenue from this source about | $150,000 |
| Playing cards: Rate increased from 8 cents to 10 cents per pack | $700,000 |
| Mah jongg, pung chow, and similar tile sets taxed at 10 per cent | 1,000,000 |
| Total increase | 1,850,000 |
| Total taxes eliminated | 136,620,000 |
| Total taxes added | 1,850,000 |
| Net total reduction | 134,770,000 |

ADDITIONAL EXEMPTIONS

Tax on pool tables and bowling alleys of $10 per table or alley does not apply if no charge is made for use of same.

Seat tax on automobiles for hire does not apply in respect of automobiles used exclusively for conveying school children to and from school.

The following statement was prepared by the Actuary of the Treasury on May 23, 1924. It shows a net reduction in income taxes of $250,000,000 and in excise taxes of $111,000,000, making a total reduction of $361,000,000 for the fiscal year ending June 30, 1925:

*Estimated revenue of the revenue act of 1924 for the fiscal year ending June 30, 1925*

| Source | Present law | Revenue act of 1924 | Amount of reductions |
|---|---|---|---|
| Customs | $500,000,000 | $500,000,000 | |
| Internal revenue: | | | |
| Individual income and corporation tax | 1,906,000,000 | 1,656,000,000 | $250,000,000 |
| Miscellaneous taxes | 925,000,000 | 814,000,000 | 111,000,000 |
| Total internal-revenue taxes | 2,825,000,000 | 2,464,000,000 | 361,000,000 |
| Miscellaneous receipts | 473,000,000 | 473,000,000 | |
| Total ordinary receipts | 3,798,000,000 | 3,437,000,000 | |
| Expenditures chargeable against ordinary receipts (Budget estimate of Dec. 3, 1923, not including additional expenditures authorized or to be authorized since that date) | 3,298,100,000 | 3,298,100,000 | |
| Excess of ordinary receipts over total expenditures chargeable against ordinary receipts | 499,900,000 | 138,900,000 | |

*Estate tax*

[Comparison of the rates under the revenue acts of 1921 and 1924]

| Net estate (gross estate less certain deductions and specific exemption of $50,000) | | Rates | |

THE M'NARY-HAUGEN BILL

Congress should not alone be judged by what measures it has passed, but it should likewise be judged by certain measures which it has defeated. I refer particularly to the McNary-Haugen bill, which would have taken from the Treasury of the United States $200,000,000 as an initial appropriation, and it is difficult to say what this doubtful enterprise would have eventually cost the Government. It was an entire departure from any legislation we have ever passed; it was freely admitted by advocates of the bill that the real cause of the farmer's present bankrupt condition was the fact that he had to buy in a closed market under the Fordney-McCumber tariff bill, which is certainly one of the most iniquitous tariff bills ever passed, and which enables the trusts, combines, and monopolies to dictate prices, so that to-day the American people are paying more than $3,000,000,000 increased prices to benefit these great interests. The farmer, having bought in such market, paying prices which are double what he paid in 1914, is compelled to sell in an open market to meet world competition and procures no greater price for his grain than he did in 1914.

The advocates of the bill, admitting that the tariff is the cause of the farmers' perplexity, proposed to relieve this condition by taxing the American people under this McNary-Haugen bill to the extent of $160,000,000 annually, to be taken from the pockets of the consumer for the advantage of the wheat-growing section of this country, which section, incidentally speaking, would pay only $5,000,000 of this $160,000,000 exaction. It is an "inland tariff," plain and simple. Take, for instance, my own district, comprising some 240,000 people. By the hearings before the Agricultural Committee, page 32, it was testified by an expert that this exaction would amount to some $2 for each person in the United States. That may be a little high, but if his calculation is correct it would mean some $480,000 to be taken out of the pockets of the consumers of my district of Baltimore city as a contribution to the farming interests.

We might not feel the effects of this so keenly if it really helped the farmer, but I do not believe it would. After he meandered through the ramifications of the McNary-Haugen bill, with its overhead charges, deductions, and so forth, I fear he would find himself in a worse plight than at present. Moreover, suppose you take $160,000,000 or more from the pockets of the industrial classes; will they not be required to ask for more salaries, and will this salary not be reflected in the articles produced by them, and when the farmer comes to purchase will not his high price exacted from the consumer under this bill be absorbed through an increased cost of those things which he requires for his comfort and convenience as well as for the cultivation of his land? It was, in my opinion, a bad bill, and I am glad to have opposed it.

There are many other measures confronting Congress which are perhaps not as dangerous as this; but, collectively, they would bankrupt the Treasury or further inject more government into business, which would be most deplorable.

Talking of more government in business reminds me of the campaign slogan of our late President Harding—"More business in government and less government in business." How little his party followed this slogan. The tendency throughout this Congress of the Republican Party, and, I regret to say, some of my own party, has continued to inject Govern-

ment supervision, regulation, or inspection into the affairs of individuals and corporations. This tendency has likewise continued to centralize government at Washington, and the bureaucratic system is constantly being extended. When you realize that of the 500,000 or more officials and employees only 531, the Congress, are elected by the people, we observe this bureaucracy. The old slogan of Jefferson, "The least governed is the best governed," seems largely forgotten, and State rights ignored. I believe the proper solution of many of our ills is to restore to the States, as far as possible, those inherent rights which were reserved by the Constitution. I believe a government close to the people and under close observation of the public is most likely to be the best government. "The eye of the master fattens the ox," and "The scrutinizing eye of the public develops good government."

The SPEAKER. The time of the gentleman has expired.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Maryland asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HASTINGS. Mr. Speaker, the pending bill authorizes an appropriation of $75,000,000 for the fiscal year ending June 30, 1926, and $75,000,000 for the next fiscal year ending June 30, 1927, as Federal aid to highway construction.

I assisted in the enactment of the first good-roads law, approved July 11, 1916, and made a speech in its behalf while the same was being considered in the House. At that time I called attention to the benefits that good roads were to all classes of people, those who live in the cities and towns, and those who live on the farms. In fact, everyone is benefited by road construction.

There are in the United States about 2,250,000 miles of roads and, of course, to improve them all would be a gigantic task. The primary roads are being improved very rapidly, and under the stimulus of the Federal highway act of 1916 and subsequent supplemental acts the various counties and States throughout the country are spending large sums of money derived from taxes and bond issues in the building of roads.

It is estimated that about 70 per cent of all commerce is carried over roads, yet the Government of the United States has spent in the aggregate to date only about $400,000,000 on roads.

I regard appropriations for agriculture and for roads as investments or as productive appropriations. These appropriations bring good returns. Hence I very greatly favor more appropriations for roads and for agriculture and for rural mail delivery than I do for the nonproductive purposes—the maintenance of a great standing army and a navy.

Immediately upon my return to Congress in December, 1923, I introduced a bill, H. R. 8885, amending the Federal highway law, by placing "nontaxable Indian lands, individual and tribal," in the same class with unappropriated public lands.

The bill which I introduced was an amendment to section 11 of the act of November 9, 1921. The bill under consideration contains the following:

SEC. 4. That section 11 of the Federal highway act approved November 9, 1921, as amended and approved by the acts of June 19, 1922, and June 30, 1923, is further amended by inserting after each place where the words "unappropriated public lands" occur the words "and nontaxable Indian lands, individual and tribal."

Nontaxable Indian lands are placed in a class with unappropriated public lands. This is a just provision and is of great benefit to the Western States, where there are large areas of nontaxable Indian lands, some of which have been individualized but will be nontaxable for a number of years. Under existing law the Federal highway department is authorized to pay upon a 50 per cent basis for road construction in various States up to the amount to which any State is entitled. This provision will permit the Federal Government to pay a higher per cent than 50 per cent of the cost for road construction. To illustrate: Suppose there are 20 per cent of the lands in any State that are nontaxable Indian lands or unappropriated public lands, and therefore nontaxable. The Government would under this law be authorized to add one-half of this percentage to the 50 per cent which it already pays. In other words, one-half of the 20 per cent would be 10 per cent, which, added to the 50 per cent, would make 60 per cent. If there are 20 per cent of unappropriated public lands or nontaxable Indian lands, or both, in any State, then the Government from its Federal highway fund would pay 60 per cent and the State or county 40 per cent for the construction of public roads.

We in Oklahoma have a large amount of Indian lands. In the eastern part of the State alone there were 19,500,000 acres. Some of these lands have been made taxable. All have been allotted, but a great part of them remain nontaxable. This is true with reference to lands allotted to Indian tribes in western Oklahoma.

The chief of the Bureau of Public Roads indorsed this provision and recognized that it was fair to place nontaxable Indian lands in the same class with unappropriated public lands.

Nothing will more greatly aid in the development of the country or add more value to farm lands than the building of good roads. Over these small arteries of commerce will flow the products from the farm to market, and over them the mail service will be carried to the door of each farmer throughout the country. Good roads will bring more comforts and conveniences to the rural population and will encourage district schools and greatly aid in the development of the rural population and have a tendency to keep the rural population from concentrating in cities and towns.

Mr. DOUGHTON. Mr. Speaker, I yield three minutes to the gentleman from Alabama [Mr. ALMON].

Mr. ALMON. Mr. Speaker, there is no one subject of more real interest to all the people than the subject of roads. In May, 1916, when I made my maiden speech in this House in support of the first bill passed by Congress providing Federal aid to the States in the construction of rural post roads, I did not realize, or even hope that so much would have been accomplished in road building by this time. I said at that time, and many times before, that it was the duty of Congress to aid the States and counties in the building of public roads and that if Congress would begin making an appropriation for this purpose it would do more to create sentiment and interest in good roads than anything else, and that it would result in the building of all of the principal public roads in this country in 20 or 25 years.

Congress made the beginning at that time, and my prediction is being vindicated by what has happened in road construction.

The total appropriations by Congress since 1916 to this time amount to $452,000,000, and this bill reported by the Committee on Roads, of which I have had the honor to be a member for the past 10 years, makes provision for an additional $165,000,000 for the two-year period beginning July 1, 1925.

To give some idea of the increase in amount expended for road construction of recent years, I call your attention to the fact that in 1904 only $79,500,000 was expended. In 1914 it had risen to $240,250,000, and in 1921 it rose to $1,150,000,000. This is but a reflection of the increased sentiment for better roads.

At the present rate of appropriations by Congress and the States, all of the principal highways will have been completed within 10 years' time.

The amount of appropriation by Congress which has been allotted to the State of Alabama since 1916 is more than $10,000,000. The State and counties have matched this amount dollar for dollar, and have expended large amounts on other roads than the Federal aid roads. The people of Alabama have voted a bond issue of $25,000,000 for road construction. By the time this amount has been expended, and the amount appropriated by Congress, together with all other sources of revenue, all of the principal rural roads in every county in the State should be completed, and we would then have good roads that would start somewhere and go somewhere.

The coming of automobiles and trucks has done much to create a better sentiment for good roads. Ten billion dollars were expended in 1923 in the United States for automobiles and trucks, being one-half the value of all our railroads, and only $1,000,000,000 less than all the gold in the world. There were 15,000,000 cars and trucks in use in the United States in 1923, according to the motor vehicle registration in the various States. Four States, namely, New York, Ohio, Pennsylvania, and California, each registered more than a million cars and trucks in 1923. There were 126,642 registered in Alabama, the State which I have the honor to represent in part.

One of the best pieces of road legislation in existence is the law passed by Congress in 1921, requiring the States to maintain and keep in good order all of the Federal-aid roads; this will be the means of preserving the roads, which have heretofore been allowed to go to waste for the want of constant and prompt repairs.

The Federal-aid road law and Federal highway appropriations have contributed more to the development of the highway system in the United States than all previous efforts combined, in that a definite nation-wide, coordinated highway system has been established. [Applause.]

Mr. DOUGHTON. Mr. Speaker, no subject that comes before Congress is of greater interest and importance to the

people of the United States than the subject of roads. In 1913 when the Rules of the House were amended so as to provide for forming a Committee on Roads, the most optimistic advocate of good roads did not foresee and even dare to hope for the great things that have been accomplished since that first effective step was taken. To keep history straight, it must not be forgotten that this legislation was enacted by a Democratic Congress and signed by a Democratic President. Since that first step was taken there has been appropriated and authorized for the building of public highways by the Federal Government, some total of $452,000,000. At the present time every State in the Union is cooperating with the Federal Government in this work and receiving aid from the Federal Treasury.

Now, what is our situation in Congress to-day with respect to this important matter and what is the embarrassment of your Committee on Roads? Early in the present Congress many bills relating to roads were introduced and on March 10 last, the committee began hearings on road matters with a view to drafting and presenting to Congress such measures as the committee deemed wise and adequate to meet present needs.

First to appear and testify before that committee was Mr. F. R. White, president of the American Association of Highway Officials. This association held its annual meeting at New Orleans last December and every State in the Union was represented. In this meeting the following resolutions were passed, to wit:

> The Federal aid road law and Federal highway appropriations have contributed more to the development of the highway system in the United States than all previous efforts combined, in that a definite, nation-wide, coordinated highway system has been established.

Highway construction by the Federal Government, States, and other political subdivisions has been stimulated to a degree far in excess of the actual Federal funds appropriated. The resolution further declared that for the fiscal years 1925, 1926, and 1927, $100,000,000 will be authorized to be appropriated for the carrying forward of this work. In January last the chairman of the Committee on Roads [Mr. DOWELL] introduced in Congress a bill providing for the authorization of $100,000,000 per annum for the fiscal years 1925, 1926, and 1927. Also the gentleman from Kentucky [Mr. ROUSION], who is a member of the committee, introduced a bill authorizing $100,000,000 for the three years of 1926, 1927, and 1928. I myself introduced a bill in January last calling for a three-year program, fiscal years of 1925, 1926, and 1927, inclusive, of $100,000,000 per annum. Other bills along the same lines were introduced by Representative ALMON and other members of the committee. The Chief of the Bureau of Roads, Mr. McDowell, representing the Agriculture Department, which is charged with the carrying out of the highway act, appeared also before our committee and testified that the Secretary of Agriculture and himself had discussed the matter with the Director of the Budget, and after very careful consideration they came to the conclusion that $85,000,000 per year fairly represents the amount necessary to carry forward the present program without expansion. We thought certainly that Congress would authorize sums not smaller than the ones recommended by the Secretary of Agriculture, Chief of the Bureau of Roads, and the Director of the Budget, this being $15,000,000 per annum below the amount recommended and urged by the American Association of Highway Officials and $15,000,000 below the amounts expressed by the members of the committee that had heard all of the evidence and had given this matter long and careful consideration.

Now, what happened? By the time the committee were ready to draft the bill it was informed in some way by those in charge of this Congress—the steering committee, I suppose—that unless the committee would agree to bring in a bill of $75,000,000 per annum nothing whatever would be done by this Congress. We were arbitrarily given to understand that we could take this or take nothing, and if we reported a bill carrying a larger amount it would not get consideration. So we are here to-day under a suspension of the rules, with no opportunity to amend and with only 40 minutes for debate and consideration of one of the most important measures that has been before this body. If this bill had been brought in and opportunity given for debate and amendment, there is no question in my mind but what this Congress would authorize at least eighty-five or one hundred million dollars per annum for this great work. The last appropriation made for the good roads by a Democratic Congress was the year of 1921 and the amount was $100,000,000. When the Republican Congress came in the appropriation was cut for the fiscal year 1922 to $75,000,000, in 1923 to $50,000,000, which was just one-half the amount authorized by the Democrats the last year before the matter was turned over to a Republican Congress. So this is one thing, I suppose, where the Republicans can claim that they have done one-half as well for the farmers and the people of the country as the Democrats. There is certainly no other action or other part, so far as I know, where they have done one-half as well.

The Democratic Party gave to the country the first law guaranteeing Federal aid for the construction of public roads, as I have before stated, and the entire country, every State, every county, and every community has received great benefits from this legislation. Encouraged by this Federal aid, all the States have taken on new life in road building, have formed highway departments, have provided for raising funds to match, and in many cases, as in my own State, have gone far beyond the amount provided for by the National Government. About $10,500,000 in all have been alloted to North Carolina by the Federal Government, and the State has provided a fund of $65,000,000 to use along with the Federal money, and North Carolina is going forward with one of the finest highway systems in America. To-day, in fact, at this very hour, there is being held in North Carolina, under the auspices of our State highway commission, the greatest road-building and road-maintenance demonstration ever held in any country. The Pan American Highway Commission from seven South American countries are in attendance, studying our road-building and road-construction methods. Secretary Hoover selected North Carolina from all the States of the Union to hold this demonstration on account of the wonderful highway developments and our matchless highway organization, headed by Hon. Frank Page, who is a wizard in road building.

With the wonderful benefits that have come to the country from the aid that has been given by the Federal Government it is a shame, yea, it is a crime, to cripple this great work at this time by failing to provide sufficient funds to carry on the present program.

The farmers of the country to-day are in distress, and in the West and Northwest they are in poverty and bankruptcy, and still this session of the present Republican Congress is drawing to a close without affording any adequate relief.

The President and his Secretary of the Treasury sent to Congress a tax measure which they said was the essence of all financial wisdom, though neither Congress nor the Republican Party leaders seem to think so, as the tax bill proposed by the President could not receive one-half the Republican strength in Congress. When it comes to a matter of relief for the farmer it seems that neither the President and his Cabinet nor this Republican Congress can agree on anything. They had the McNary-Haugen bill, which was an unworkable and impracticable and crazy measure, and, that failing, they have nothing else to suggest. The condition of the farmer is so appalling that, of course, it is difficult by legislation to give him prompt and effective relief. He has been fooled and deceived so long by the Republican Party and been fed up on so many quack remedies that nothing can be done that will immediately restore his former prosperous condition. However, much could have been done for him if this Congress had begun at the proper time. The high-tariff tax which has burdened him under this administration could and should have been reduced, and freight rates could and should have been reduced. A cooperative system of marketing could and should have been provided, and we could and should make increased appropriations for building public roads which benefit primarily the farmer and rural sections and incidentally the dwellers in the cities and towns as well. However, it is perfectly manifest that nothing helpful to the farmer will come from this administration. The Democrats, while in power, gave the farmer the rural credit law, good roads law, parcel post law, farm demonstration law, and, above all, the greatest prosperity ever witnessed by any country. This prosperity was enjoyed by not only the farmer but by every class of our people. More banks have failed in the last 12 months under this Republican administration than failed under the entire eight years of the Wilson administration. More farmers have lost their homes, more distress, and more suffering than has ever been known before in the history of this Republic. The remedy is to change doctors. Restore the country to the hands of the Democratic Party, the party of honesty, the party of prosperity, the party of high ideals, the party of all the people. Then, and not until then, can the country expect any permanent relief.

Mr. ALMON. Mr. Speaker, will the gentleman yield?

Mr. DOUGHTON. Yes.

Mr. ALMON. Were we not told, members of the Roads Committee, that we would have to take the $75,000,000 or that we would not get anything at this session of Congress?

Mr. DOUGHTON. That is the information that came to us, but I do not believe the members of the Roads Committee were in favor of that. They were all enthusiastic, and if they had their way we would have had $100,000,000, because they introduced bills for that amount.

The SPEAKER. The time of the gentleman from North Carolina has expired.

Mr. DOWELL. Mr. Chairman, I yield the remainder of my time to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION of Kentucky. Mr. Speaker and gentlemen of the House, the act of 1922 provides for $75,000,000 of Federal aid for roads for the fiscal year beginning July 1, 1924. The bill now before us carries $150,000,000 for Federal aid to the States in building highways for the two years beginning July 1, 1925. I strongly favored $200,000,000 instead of $150,000,000. Good roads are of great economic value. I think it wise to build our system of highways as soon as possible so that we may reap the benefit. A few years ago a majority of our population was on the farm. To-day a substantial majority of our people live in the cities and industrial centers. One of the very great problems of to-day is to provide for the distribution of food, clothing, fuel, and shelter for our rapidly increasing millions of population. This problem will grow more pressing as the years come and go. The producers and consumers of the Nation must be brought into more intimate and closer relation. Our rail and water lines and highways bear the same relation to the commerce of the country that the circulatory system—veins and arteries—bear to the human body. We have spent perhaps $25,000,000,000 in developing our rail and water transportation lines. These are very essential to the welfare of the Nation and must be extended and perfected. But we have neglected the most important means of transportation. I refer to the highways. Perhaps 75 per cent of the commerce of this country is carried over the highways, and practically all of our commerce uses the highways for some part of its journey. It was found only a few years ago that over one-half of the perishable products, such as fruit and vegetables, was lost because of bad roads. The highways must be brought to the store, factory, and shop and at the same time be in intimate touch with the forest, mine, and farm. The Nation's problem is to work out and construct the finest and best system of highways in the world and to coordinate rail, water, and highway transportation to the end that we may have more adequate, more economical, and more efficient means of transportation. [Applause.]

RAIL AND HIGHWAY DEVELOPMENT

It is interesting to note the difference in the development of the highways and railroads in European countries and the United States. European countries were slowly built up by the gradual spreading of the industries and culture of the people from a single center or a relatively small number of centers. Their highways were the framework on which their national industries were built. These highway systems for the most part came many years before the invention of the steam locomotive. The steam locomotive made possible the extension of the local road system by the construction of correlated rail lines for the longer haul. Their national development has progressed from the center outward. European growth has been intensive and ours has been extensive. European countries expanded outward from the center; our development has taken place from the outward toward the center. This difference was brought about entirely through the difference of the development of our transportation facilities. By the accident of invention the railroad came to this country at the early beginning of our history, instead of after long centuries of slow growth. Up to the time the steam locomotive came to our country we were building our roads westward from the eastern settlements. Settlements and highways mile by mile forged westward. The railroad changed the course of this development. Instead of a slow westward migration, the railroad made possible a development from numerous widely separated centers. We became a railroad country; a country of magnificent distances; a vast territory continent wide. It would have taken us centuries perhaps to reach our present stage of growth and development had it not been for the invention of the railroad. By means of the railroad we control this great continent. No wonder the railroad should captivate the imagination of the people. No wonder we should come to think of it as America's principal servant in the transportation field. I survey with pride our wonderful rail and water lines of transportation. They should be enlarged and perfected. We need them as much as ever to take care of the long haul. [Applause.]

GROWTH OF HIGHWAY TRANSPORTATION

Our railroads cross the country east, west, north, and south. Our population and commerce have expanded by leaps and bounds. With this has come a phenomenal growth in the use of highways for commerce. According to a survey made by the United States Bureau of Public Roads the use of the highway has increased fully 50 per cent in the last three years. They found in their investigation the transportation of freight by highway in the State of Connecticut alone during 1922 amounted to 150,000,000 ton-miles. To do this amount of hauling, a train of one hundred 5-ton trucks would have to circuit the earth twelve times. Other States, such as New York, Massachusetts, New Jersey, Pennsylvania, and Ohio, have outstripped this remarkable record. It may reasonably be assumed that the motor vehicle is now handling 60,000,000,000 ton-miles of passenger and freight traffic each year. They are doing it more quickly, more economically, and with less breakage than rail and water lines. In fact, in the great commercial sections of this country, while we have the greatest and finest rail and water systems of transportation in the world, they can not begin to handle the commerce of the country, and at certain seasons of the year they must place an embargo on certain products and commodities. Just at the time the country was becoming thickly settled and the country needed a quick and economical short-haul means of transportation the motor vehicle makes its appearance.

THREE HUNDRED TO TWENTY MILLIONS

In 1895 there were only 300 autos in the United States and no motor trucks. By 1900 this number had increased to 14,000; in 1905 to 78,000; in 1910 they had increased to 468,000; in 1912 we reached the million mark; in 1915 we had 2,500,000; in 1920 we had jumped to 9,000,000; and to-day 16,000,000 motor vehicles are on the highways of this country, and it is conservatively estimated before the end of 1925 we will have 20,000,000 motor vehicles. We now have about 85 per cent of all the motor vehicles of the world, representing an investment to the American people of at least $10,000,000,000.

DEVELOPMENT OF FEDERAL HIGHWAY SYSTEM

With the coming of the motor vehicle some farseeing men in Congress and out began to visualize a revolution in our means of transportation and the necessity for improved highways. Among the real leaders of these pioneers were Mr. M. O. Eldridge, now with the American Automobile Association, and Congressman Brownlow, of Tennessee.

Transportation by motor vehicle had so developed by the year of 1910 that we began to realize that the motor vehicle was literally destroying the old-fashioned macadam roads faster than they could be built, and we had practically no other kind of roads at that time. We had very few miles of good roads judged by present standards. Congress appropriated a small sum of money to build a few miles in various sections of the country to show the States how to build roads. At that time the construction of roads was considered the problem of each individual county, but the county did not and could not solve the problem. The many friends of good roads turned to the States for the solution of this problem, but the States did not and could not solve it. Finally the advocates of this great movement began to see it as a combined county, State, and national problem, and they turned to Congress, and Congress between 1917 and 1921 appropriated $275,000,000 to aid the States in the construction of highways. This action on the part of Congress accomplished at least two great purposes. It greatly stimulated activity and sentiment for good roads throughout the Nation and led to the creation of highway departments in each of the 48 States; but the Federal plan was found to be inherently weak in at least three very important particulars. The Federal road act did not provide for a connected and coordinated system of highways. It did not provide for the standardization of the highways as to width, material, and construction. It failed to provide for the upkeep and maintenance of the roads when once constructed.

Roads were being built everywhere and billions were being spent without any regard to a connected system and without any regard to a standard of width, material, or construction, and no provision was made for their maintenance and upkeep. Roads started nowhere and ended nowhere. It was found that roads were not repaired and maintained and were going to pieces as fast as they were being built. During this period of Federal participation of highway construction the Federal road bureau and the State highway departments, under the able leadership of Director Thomas McDonald and the road committees of Congress, made extensive studies of this subject. The

result of these studies, investigations, and experiments was crystallized in the Federal highway act of November 9, 1921. I had charge of this bill in the House. I know of the great contributions made to this splendid and constructive measure by the persons and agencies that I have mentioned.

INTERSTATE AND INTERCOUNTY

There were some who wanted this great system to be interstate only. That is, one or two great highways running through each State. Others of us desired this to be intercounty and interstate. We wanted all of the county seats and all sections of the Nation united and brought together in this fine system, and this law contemplates just such a system. The counties and States are now and will continue to build lateral roads leading into this system and extending to the forest, farm, shop, factory, and store; in other words, brings the consumers and producers of the Nation together. When this system is completed 85 per cent of the people of the Nation will live on a good road or within 2 miles of this great system, and in time the lateral roads will bring a good road to practically all of our people. [Applause.]

170,000 MILES IN SYSTEM

The act of November 9, 1921, provides for a great coordinated system of highways, intercounty and interstate in character, embracing a total of 170,000 miles. This system, when it is completed, will penetrate every city, industrial center, and practically every section of the Nation, and will be the finest, greatest, and best system of highways in the world. Prior to 1921 the counties, States, and Federal Government had built and surfaced about 400,000 miles of road. These were like the railroads of this country in the beginning. They were disjointed and disconnected. A few years ago we had all of the railroads made standard gauge and tied together so that to-day a car or engine placed on any railroad can be shifted to every part of the country. It was the thought of the friends of this road measure to provide a means whereby all of the highways in the country would be joined together so that a person getting on a good road in one part of the country could travel to all parts of the country on a good road. This Federal highway system is the key to the highway development of the whole country. We have already completed about 60,000 miles of this great Federal system. We are building at the rate of about 10,000 miles per year. If we keep up our present program, we will finish the system in about 10 years. I might say that the States are also building about 10,000 miles of other roads each year. The States and Nation are completing about 20,000 miles of hard-surfaced roads annually. Under this Federal highway act all of these roads will be united together. They will be of that width and character of material suitable for the traffic, and when these roads are once constructed the States must maintain them and keep them in good order constantly. Another great advantage about this Federal highway act is that the Government puts up one-half of the cost and the State must put up the other one-half. Under the old law the counties matched the Federal aid. Of course this meant that good roads could not be built through poor counties. Under the present law this great system will go forward through the poor counties as well as the rich counties.

Mr. ALMON. Does the gentleman mean to convey the idea that an appropriation of $75,000,000 a year will complete it in 10 years, in face of the evidence of all of the highway officials that it would take $100,000,000 per year for 10 years?

Mr. ROBSION of Kentucky. I have always and I still strongly favor the $100,000,000 per year program.

Mr. ALMON. But we are not getting it in this bill.

Mr. ROBSION of Kentucky. This bill provides for $150,000,000 for two years. To carry forward the present program at the rate we are going would require about $85,000,000 per year, and with this we could complete the system in about 10 years. As I have stated heretofore, I strongly favor the $100,000,000 per year program. I want this system completed as soon as possible. Build them now and get the benefits from them. [Applause.]

NATIONAL DEFENSE

This great Federal highway system contemplates another thing. The Nation in looking to its safety in the future must have in mind roads that can be used for military purposes for moving men and materials in time of war. About 60,000 miles of this 170,000-mile system have been mapped out as military roads and will in the event of war be used to mobilize the man power and resources of the Nation. In my judgment the building of this system of highways means more to the permanent national defense of this country than any sum we put in a great standing army, yet the standing Army costs this country about $300,000,000 a year, and a like sum is necessary for the Navy.

GOOD ROADS PAY

There are those who would obstruct the road program. They complain of the cost. This can only be due to lack of knowledge of the facts. You can not find any group of people in the North or East where they have built good roads saying that they can not afford them. They are enlarging their road programs. The fact is, the people who are using the roads are paying for the roads. Motor vehicles paid in war-excise taxes alone up to June 30, 1923, a total of $589,012,021. Up to June 30, 1923, Federal aid for roads amounted to less than $400,000,000. Motor vehicles contributed to State and the Federal Governments in license fees and other taxes in the year of 1923 about $450,000,000, and the amount will be even greater this year. We can see that the motor vehicles are contributing their full share and more for the construction of highways. Instead of tollgates, we have set up gasoline stations and sold license tags. I am happy to say that the owners of motor vehicles do not object to paying taxes and license fees, but they do insist on having this money economically spent for good roads. They want good roads because of comfort, and for the reason it costs only about one-half as much to operate and maintain a motor vehicle on a good road as it does on a dirt road. It has also been found, after actual investigation on the Boston Post Road, that the saving in gasoline alone in 11 years would pay the cost and interest for the construction of that hard-surfaced road. In other words, the motor users will save enough on the average road in gasoline and repairs to pay the cost of the road and interest in 11 years. We must either do away with the motor vehicle or build the roads. Neither the sensible farmer, the merchant, the stockman, the factory owner, or the wholesaler desires the road-building program stopped or curtailed.

BUREAU OF ROADS GOOD RECORD

Congress and the States have faith in the integrity and ability of Director McDonald. His bureau has administered the largest fund at the least overhead expense of perhaps any other branch of the Government. The leadership of himself and associates has been of very great value to the road builders of the States and the Nation. Director McDonald, among other things, urges:

1. That there be a classification of all highways and a clear definition of the Federal, State, and local responsibility. The designation of a Federal-aid system upon which the joint funds of the National and State Governments are to be expended is mandatory under the Federal highway act. The State system and local roads should, and no doubt will, coincide and fit in with the Federal-aid system. In this way we will have one great unified system of highways.

2. The next requirement is the establishment of a truly adequate State highway department in every State—a State agency free to function independently of county support, empowered with full authority over the roads of the Federal-aid and State systems, and equipped with personnel and material resources consistent with the responsibility imposed upon it. This can not be done in a single year; it is a long-time job. It is therefore highly important that there be maintained that continuity of well-considered policy which will insure the attainment of the end in the shortest possible time. Permanence of employment for capable and efficient officers without political interference is a first essential. Road building is a developing science. The experience of the capable specialist is too valuable to be lightly discarded with every change of the political complexion of the State administration.

3. The third Federal requirement and the third guiding principle is the provision of ample funds for State road construction and maintenance and the expenditure of such funds by the State highway department without dictation from local interests. All the experience of the past points to the positive necessity of such a provision for the successful completion of a connected State road system.

With these principles adopted, the State will be equipped to proceed with the development of the main roads. The county, free of the burden of providing for the expensive roads, which are the concern of the entire State, can apply their resources to the improvement of the lateral or local roads and the assistance of the Federal Government will insure the building of the main State roads and the interstate connections.

LESS WAR, MORE ROADS

Our Nation excels all others in man power, in natural resources, and wealth. The building of good roads is of great

economic necessity as well as great value to the Nation. Let us build them now and reap the benefit. Let us bring the producers and consumers together. Let us conserve the investment of billions in motor vehicles. Let us complete for the greatest and finest nation in the world the greatest and finest system of highways in the world. Good roads mean real preparedness. Let us have less war and more of improved highways. This means more and better farms and farmers, better prices for the farmer and less cost to the consumer, cheaper and more adequate transportation facilities, better schools, better churches, better homes, and a more contented and prosperous, united, and powerful nation. [Applause.]

The SPEAKER. The time of the gentleman from Kentucky has expired. All time has expired.

Mr. ALMON. Mr. Speaker, a parliamentary inquiry. Would it be in order now or at any stage in the proceedings to submit a unanimous-consent request to amend the bill by changing the amount?

The SPEAKER. It would not. The question is on the motion of the gentleman from Iowa to suspend the rules and pass the bill as amended.

The question was taken; and in the opinion of the Chair, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8233) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 5078. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1925, and for other purposes;

H. R. 8961. An act for the relief of Frank Stinchcomb.

H. R. 5325. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes;

H. R. 2607. An act for the relief of Jesse L. Meeks;

H. R. 4985. An act to repeal the first proviso of section 4 of an act to establish a national park in the Territory of Hawaii, approved August 1, 1916; and

H. R. 905. An act for the relief of Gerard E. Bess.

EVENING SESSION

Mr. LONGWORTH. Mr. Speaker, it seems very evident that if we are to have any further consideration of the Consent Calendar it will have to be to-night.

Mr. GARRETT of Tennessee. The Consent Calendar or the Private Calendar?

Mr. LONGWORTH. The Consent Calendar. The consideration of the Private Calendar, of course, will depend upon the completion of the Consent Calendar.

Mr. LINTHICUM. Why take up the Consent Calendar to-night, when we considered it last night?

Mr. LONGWORTH. Because the Consent Calendar is in order. I hope that opportunity may arrive to-morrow, to take up, by unanimous consent, the Private Calendar. Of course, it can not be done otherwise.

Mr. LINTHICUM. To-morrow, or to-morrow evening?

Mr. LONGWORTH. I can not tell. No one knows what the situation will be. I think it will be necessary, even if we conclude the consideration of the Consent Calendar to-night, to preserve an attendance here to-night. Some important business may have to be transacted which may come over from the Senate, although I have no definite assurance on that. I ask unanimous consent that the House stand in recess between 6.30 o'clock to-night and 8 o'clock to-night, with the expectation of going on with the Consent Calendar at 8 o'clock, interrupted, possibly, by other business.

Mr. HOWARD of Nebraska. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Ohio, Will the session to-night be for the consideration of matters now on the Consent Calendar only?

Mr. LONGWORTH. I do not know what the gentleman means. It will be on the Consent Calendar and possibly be interrupted by business coming over from the Senate.

The SPEAKER. The Chair will suggest this evening he certainly would not recognize any suspensions and there would not be any business of that kind. The Chair would suggest it might be open to include messages from the Senate and action upon them.

Mr. LONGWORTH. That was my suggestion, Mr. Speaker.

Mr. HOWARD of Nebraska. Mr. Speaker, for information, these things coming over from the Senate under unanimous consent would be still subject to objection?

Mr. LONGWORTH. This would not be a unanimous-consent session. The Consent Calendar is in order, just as any business is in order.

The SPEAKER. Is there objection?

Mr. BLANTON. Mr. Speaker, would not the gentleman from Ohio make it from 6 to 8 o'clock and give Members a chance to get a breathing spell between working hours? If he will give us between 6 and 8, we can come back feeling fresh.

Mr. LONGWORTH. I never saw the gentleman from Texas when he did not feel that way.

Mr. BLANTON. I am working hard now, I will tell the gentleman.

Mr. LONGWORTH. If it is the desire of the House to have two hours for a recess, very well.

Mr. BLANTON. That would give us a chance to get a breathing space.

Mr. WINGO. Some might be too fresh.

Mr. LONGWORTH. At the request of the gentleman from Texas I modify my request and put it that the House shall stand in recess between 6 and 8 o'clock.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. LONGWORTH. I trust gentlemen will preserve a full attendance this evening.

DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. DAVIS of Minnesota. Mr. Speaker, I call up the conference report on the District of Columbia appropriation bill.

The SPEAKER. The Clerk will report the conference report.

The Clerk read as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8839) making appropriations for the Government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have been unable to agree.

C. R. DAVIS,
FRANK H. FUNK,
W. A. AYRES,
*Managers on the part of the House.*

LAWRENCE C. PHIPPS,
W. L. JONES,
L. HEISLER BALL,
CARTER GLASS,
E. I. EDWARDS,
*Managers on the part of the Senate.*

Mr. DAVIS of Minnesota. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. Is it a complete disagreement; if so, it does not require action.

Mr. DAVIS of Minnesota. Mr. Speaker, I desire to call up a matter here to section No. 1 of the bill, which is a section that we have had an absolute disagreement upon. The House voted upon that the other day, and I would——

Mr. BLANTON. I want it to be understood that all points of order are reserved.

The SPEAKER. Of course.

Mr. DAVIS of Minnesota. There will be plenty of time to reserve points of order when I get through, when I submit this motion. After meeting the Senate conferees yesterday afternoon a suggestion was made by the Senate conferees. The House conferees did not agree upon it at all, and I for one proposed, and I think my other conferees agreed with me, that we would submit the proposition made by the Senate conferees to the House at this time and ask the House in substance what they though of it. I will say, furthermore, after we got a little further, which I did not agree upon and neither did my conferees, we now wish to submit the following for the consideration of the House at the request of the Senate conferees.

The SPEAKER. The gentleman from Minnesota submits a motion, which the Clerk will report.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves to amend the amendment of the House to the amendment of the Senate No. 1, as follows: In lieu of the matter inserted by the amendment of the House insert the following:

"Thirty per cent of each of the following sums, except those herein directed to be paid otherwise," and on page 1 of the bill, after the enacting clause, insert the following:

"That a committee to be composed of three Senators, to be appointed by the President of the Senate, and three Representatives, to be appointed by the Speaker of the House of Representatives, and three residents of the District of Columbia, to be appointed by the President of the United States, is created and is authorized and directed to inquire into the present fiscal relations between the United States and the District of Columbia, with a view of ascertaining and reporting to Congress whether the United States should contribute a fixed or lump-sum amount annually as its share of appropriations for the District of Columbia or continue upon a percentage proportion basis, and, if so, what the proportion should be.

"The committee is further authorized and directed to inquire into the relations of the government of the District of Columbia with departments and branches of the Government of the United States with a view of ascertaining and reporting whether there should be vested in municipal officers certain duties and responsibilities in connection with estimates, appropriations, and expenditures of the District of Columbia now vested in the Federal officers.

"The committee is further authorized and directed to make a survey of the administrative services of the government of the District of Columbia and report what changes, if any, may be desirable or expedient and necessary in the present municipal organization, particularly should it find, and recommend, the Federal Government should contribute a fixed lump sum annually as its share of appropriation for the District of Columbia in lieu of the present percentage basis.

"That the officers and employees of all administrative services of the government of the District of Columbia shall furnish to the committee such information regarding powers, duties, activities, organizations, and methods of business as the committee may from time to time require, and the committee, or any of its employees, when duly authorized by the committee, shall have access to and the right to examine any books, documents, papers, or records of any administrative service for the purpose of securing information needed by the committee in the prosecution of its work.

"The committee shall report its findings and recommendations relative to all matters herein contained to the Senate and House, respectively, on or before the first Monday in January, 1925.

"For the payment of salaries of employees, for printing and binding, and other necessary expenses of the committee, there is appropriated 30 per cent out of the Treasury of the United States and 70 per cent out of the revenues of the District of Columbia, the sum of $5,000, to be paid out upon vouchers approved by the chairman or acting chairman of the committee."

Mr. SANDERS of Indiana. I think sufficient has been read to show it is subject to the point of order, and I make the point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. SANDERS of Indiana. The point of order—I am not at all sure whether at the present stage the amendment could be made at all, but certainly this amendment is not proper, because it is not germane to either the House bill or the House amendment to the Senate amendment. The amendment just offered must be germane to the bill and it must be germane to the Senate amendment just the same as if we were considering an original amendment, and this is an appropriation bill——

The SPEAKER. The Chair thinks it is very clear that this is subject to a point of order, that it is not germane to the amendment, and moreover it seems to the Chair it is additional legislation on an appropriation bill, and the Chair sustains the point of order.

Mr. ZIHLMAN. Will the gentleman from Minnesota yield?

Mr. DAVIS of Minnesota. The Chair sustained the point of order.

Mr. BLANTON. Regular order.

Mr. ZIHLMAN. Will not the gentleman submit the first part of the proposition, which is not subject to a point of order?

Mr. DAVIS of Minnesota. I want to make a motion right now. Mr. Speaker, I move that the House further insist upon its amendment to the amendment of the Senate No. 1 and further insist on its disagreement to all the remaining amendments of the Senate.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. DAVIS of Minnesota moves to further insist upon the amendment to the amendment of the Senate No. 1, and that it further insists upon the disagreement to all the remaining amendments of the Senate.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. BLANTON. I ask for a division, so that the gentleman may know how many of us are with him.

The House divided; and there were—ayes 98, noes 3.

So the motion was agreed to.

## FOREIGN COMMERCE SERVICE OF THE UNITED STATES

Mr. WINSLOW. Mr. Speaker, I move to suspend the rules and pass the bill H. R. 7034 as amended.

The SPEAKER. The Clerk will report the bill.

The Clerk began the reading of the bill.

Mr. GARRETT of Tennessee. Mr. Speaker, it is difficult to follow the reading very well. Is the Clerk reading the bill exactly as reported from the committee?

Mr. WINSLOW. He is not. There are amendments there for the purpose of clarifying the language of the bill and to make the language conform to the nomenclature of the language of the other departments.

Mr. GARRETT of Tennessee. Has the gentleman an extra copy of the bill there?

Mr. WINSLOW. Yes.

The Clerk read as follows:

A bill (H. R. 7034) to establish in the Bureau of Foreign and Domestic Commerce of the Department of Commerce a foreign commerce service of the United States, and for other purposes

*Be it enacted, etc.*, That there is hereby established in the Bureau of Foreign and Domestic Commerce of the Department of Commerce the foreign commerce service of the United States (hereinafter referred to as the "foreign commerce service"), consisting of officers to be graded in the following order and to be known as commercial attachés (senior grade), commercial attachés (junior grade), assistant commercial attachés, trade commissioners, and assistant trade commissioners.

SEC. 2. Under the direction of the Secretary of Commerce (hereinafter referred to as the "Secretary"), the officers of the foreign commerce service shall—

(a) Promote the foreign commerce of the United States;

(b) Investigate and report upon economic, commercial, and industrial conditions and activities in foreign countries, and economic and commercial aspects of agriculture, manufacturing, mining, forestry, shipping, transportation, finance, labor, and legislation, and of all other activities in foreign countries which may be of economic, commercial, or industrial interest to the United States; but this subdivision shall not be construed as affecting the functions of any other officers of the United States in respect to the collection and reporting of crop and livestock production statistics, the promotion of American standards for agricultural products, and exclusively scientific investigations.

(c) Perform such other duties as the Secretary may direct in connection with the promotion of the industries, trade, or commerce of the United States;

(d) Collect, under regulations promulgated by the President, from the heads of all regularly established offices of the United States in foreign countries and from special investigators (other than confidential agents) such information as may be essential to the performance, without unnecessary duplication, of the functions described in subdivision (d);

(e) Make such inspections of the foreign commerce service as the Secretary may direct.

SEC. 3. (a) The Secretary is authorized to appoint officers of the foreign commerce service, but only after eligibility has been determined by examinations held by the Civil Service Commission and the Department of Commerce in coordination, except that the Secretary may, with the approval of the Civil Service Commission, appoint without such examination any person who, prior to the date on which this act takes effect, has served, or has passed an examination for appointment, as commercial attaché, assistant commercial attaché, trade commissioner, division head, assistant trade commissioner, commercial agent, or special agent in the Bureau of Foreign and Domestic Commerce.

(b) The Secretary shall appoint each officer of the foreign commerce service to a grade specified in section 1, and to one of the following classes, and shall fix his compensation within the salary range specified for such class: Class 1, $8,000 to $10,000; class 2, $7,000 to $9,000; class 3, $6,000 to $8,000; class 4, $5,000 to $7,000; class 5, $4,000 to $6,000; class 6, $3,000 to $5,000; class 7, below $3,000. In making appointments to a grade and class and in fixing compensation the Secretary shall take into consideration the examination and record of the officer and the post to which assigned.

(c) The Secretary is authorized to promote or demote in grade or class, to increase or decrease within the salary range fixed for the class the compensation of, and to separate from the service officers of

the foreign commerce service, but in so doing the Secretary shall take into consideration records of efficiency maintained under his direction.

(d) Any officer of the foreign commerce service may be assigned for duty in the United States for a period of not more than three years without change in grade, class, or salary, or with such change as the Secretary may direct.

SEC. 4. (a) Subject to the requirements of the civil service laws and rules, the Secretary is authorized to appoint, fix the compensation of, promote, demote, and separate from the service such clerks and other assistants for officers of the foreign commerce service as he may deem necessary.

(b) When authorized by the Secretary and in accordance with the regulations of the Civil Service Commission, officers of the foreign commerce service may employ in a foreign country, from time to time, fix the compensation of, and separate from the service such clerical and subclerical assistants as may be necessary.

SEC. 5. (a) Any officer of the foreign commerce service designated by the Secretary of Commerce shall, through the Department of State, be regularly and officially attached to the diplomatic mission of the United States in the country in which he is to be stationed. If any such officer is to be stationed in a country in which there is no diplomatic mission of the United States, proper recognition and standing, with full facilities for discharging his official duties, shall be arranged by the Department of State. The Secretary of State may reject the name of any such officer if in his judgment the assignment of such officer to the post designated would be prejudicial to the public policy of the United States.

(b) No officer of the foreign commerce service shall be considered as having the character of a public minister.

SEC. 6. (a) Any officer, clerk, employee, or assistant of the Bureau of Foreign and Domestic Commerce, while on duty outside the continental limits of the United States and away from the post to which he is assigned, shall be entitled to receive his necessary traveling expenses and his actual expenses, in an amount not exceeding $10 per day fixed by the Secretary, incurred for subsistence, including, at the discretion of the Secretary, expenses for subsistence for the entire period while attending a trade gathering, congress, or conference, and, in any other case, for the entire period (but not exceeding 60 days) while remaining continuously in any one place, except that the Secretary is authorized to prescribe a per diem allowance not exceeding $8 in lieu of subsistence.

(b) The Secretary may authorize any officer of the foreign commerce service to fix, in an amount not exceeding the allowance fixed for such officer, an allowance for actual subsistence, or a per diem allowance in lieu thereof, for any clerical or subclerical assistant employed by such officer under subdivision (b) of section 4.

(c) Any such officer, clerk, employee, or assistant, while on duty within the continental limits of the United States, shall be entitled to receive the traveling expenses and actual expenses incurred for subsistence, or per diem allowance in lieu thereof, authorized by law.

SEC. 7. Any appropriation available during the fiscal year ending June 30, 1925, for the Department of Commerce for commercial attachés, or for promoting commerce in Europe and other areas, South or Central America, or the Far East, shall be available for carrying out the provisions of this act, including the payment of salaries and compensation for personal services, in the District of Columbia or elsewhere, necessary janitor and messenger service, traveling and subsistence expenses and per diem allowances, the purchase of necessary furniture and equipment, stationery, and supplies, typewriting, adding, and computing machines, accessories and repairs, the purchase of books of reference and periodicals, newspapers, reports, documents, plans, specifications, manuscripts, and all other necessary publications, the payment of rent outside the District of Columbia, and all other necessary incidental expenses. With the approval of the Secretary, an officer of the foreign commerce service may enter into leases for office quarters and may pay rent in advance in a foreign country where custom or practice requires payment in advance.

SEC. 8. This act shall take effect on July 1, 1924.

Mr. LINTHICUM. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore (Mr. SANDERS of Indiana). The gentleman from Maryland makes the point of order that there is no quorum present. It is clear that there is no quorum present.

Mr. LONGWORTH. Why should the gentleman make that point?

Mr. LINTHICUM. Because I think a bill of this kind ought to have a quorum for its consideration.

Mr. LONGWORTH. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. The gentleman from Ohio moves a call of the House.

A call of the House was ordered.

The SPEAKER pro tempore. The Doorkeeper will close the doors, the Sergeant at Arms will bring in the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

| | | | |
|---|---|---|---|
| Abernethy | Drane | Lilly | Rogers, N. H. |
| Aldrich | Driver | Little | Rosenbloom |
| Anderson | Fairfield | Logan | Sabath |
| Beck | Faust | Lyon | Schall |
| Berger | Fish | McClintic | Sherwood |
| Boies | Freeman | McNulty | Sullivan |
| Brand, Ohio | Funk | McSwain | Summers, Wash. |
| Britten | Gallivan | Magee, Pa. | Taylor, Colo. |
| Bulwinkle | Geran | Miller, Ill. | Taylor, Tenn. |
| Burdick | Hammer | Mills | Thomas, Ky. |
| Butler | Hardy | Morin | Timberlake |
| Byrnes, S. C. | Haugen | Mudd | Tydings |
| Casey | Howard, Okla. | Newton, Mo. | Vare |
| Celler | Hudspeth | Nolan | Vincent |
| Clark, Fla. | Hull, Tenn. | O'Brien | Voigt |
| Cole, Ohio | Jones | O'Connor, La. | Ward, N. Y. |
| Collins | Jost | Patterson | Watson |
| Connolly, Pa. | Kahn | Peavey | Weller |
| Corning | Kendall | Phillips | Wertz |
| Curry | Kent | Porter | White, Me. |
| Darrow | Knutson | Purnell | Wilson, Miss. |
| Davis, Minn. | Kunz | Quayle | Winter |
| Dominick | Langley | Ransley | |
| Doyle | Larson, Minn. | Reed, W. Va. | |

The SPEAKER pro tempore. Three hundred and thirty-nine gentlemen are present—a quorum. The Doorkeeper will open the doors.

The doors were opened.

Mr. LONGWORTH. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

EXAMINATION OF THE BANKRUPTCY LAWS

Mr. SNELL. Mr. Speaker, I present a privileged report from the Committee on Rules.

The SPEAKER pro tempore. The gentleman from New York presents a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

A resolution (H. Res. 350—Report No. 975) to appoint a subcommittee of the Committee on the Judiciary to examine into the bankruptcy laws of the United States.

FOREIGN COMMERCE SERVICE OF THE UNITED STATES

Mr. KETCHAM. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Is there anybody on the Interstate and Foreign Service Committee opposed to the bill to demand a second?

Mr. LINTHICUM. I am opposed to the bill H. R. 7034.

The SPEAKER pro tempore. The gentleman is opposed to the bill?

Mr. LINTHICUM. I am.

The SPEAKER pro tempore. The Chair thinks under the circumstances he must give recognition to the gentleman from Maryland.

Mr. LINTHICUM. I demand a second.

The SPEAKER pro tempore. The gentleman from Maryland demands a second.

Mr. WINSLOW. I ask unanimous consent, Mr. Speaker, that a second be considered as ordered.

The SPEAKER pro tempore. The gentleman from Massachusetts asks unanimous consent that a second be considered as ordered. Is there objection?

Mr. LINTHICUM. I object.

The SPEAKER pro tempore. Automatically the gentleman from Massachusetts [Mr. WINSLOW] and the gentleman from Maryland [Mr. LINTHICUM] will take their places as tellers. As many as are in favor of a second being ordered will pass between the tellers and be counted.

The House divided; and the tellers reported—ayes 93, noes 32.

So a second was ordered.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. WINSLOW] is entitled to 20 minutes, and the gentleman from Maryland [Mr. LINTHICUM] to 20 minutes.

Mr. LINTHICUM. Mr. Speaker, it is evident by the vote that there is no quorum present. I make the point of order that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Maryland makes the point of order that there is no quorum present. The Chair will count. [After counting.] Two hundred and twenty gentlemen are present—a quorum. The gentleman from Massachusetts [Mr. WINSLOW] is recognized.

Mr. WINSLOW. Mr. Speaker and gentlemen of the House, the bill before you was presented to and considered by the Committee on Interstate and Foreign Commerce early in this session. The purpose of it is to give a statutory existence to the Foreign Bureau of the Commerce Department, which has been working for a number of years without having a recog-

nized statutory position, and further to make some regulations and laws affecting the bureau. A purpose also of the bill is to provide laws defining its functions in relation to other departments working in the foreign field.

We had no sooner got under way with the bill in hearings and preparation of the bill than there appeared on the horizon an objection to the bill from a quarter of which we had no previous knowledge and with respect of features which we had no intimation would become subjects of discussion.

I refer to agricultural elements. No sooner had we found out that there was difficulty in the Agricultural Department in respect of some of the purposes of the bill, as they understood them, or as they saw fit to interpret them, than we undertook to get in touch with them and with other departments of the Government, particularly the consular departments of the State Department, because we might be running into their field also.

To make a long story short, after we had voted to report out the bill favorably, we held many meetings, particularly the chairman of our committee, with representatives of the State Department and later on with the Agricultural Department. We brought out, after 8 or 10 meetings, the bill which is before you to-day, but in respect of which a few amendments to clarify have been suggested and such are under discussion. Those amendments are not very important, but they have been offered in order to meet some of the desires of the Departments of State and Agriculture.

Mr. CLARKE of New York. Will the gentleman permit a question?

Mr. WINSLOW. Yes.

Mr. CLARKE of New York. Do I understand that this bill has the approval of Secretary Wallace?

Mr. WINSLOW. The gentleman may understand it, but I do not. [Laughter.]

Mr. CLARKE of New York. That is what I wanted to know.

Mr. WINSLOW. But, boiling this all down, a bill is before us, with suggested amendments, which meets the entire approval of the State Department, the President of the United States, the Army, the Navy, the Tariff Commission, and every other Government organization which works in foreign fields, with the exception of the Department of Agriculture. We may as well understand that at the outset, because that will be the discussion to-day.

We worked with the Secretary of Agriculture in order to get a bill which would suit him and his associates. We finally eliminated all elements of discussion except one, namely, that with reference to that part of the bill which gives this foreign bureau of the Commerce Department an opportunity to investigate and report on agricultural and forestry matters. The Secretary of Agriculture demanded, insisted, and finally gave an ultimatum as affecting his judgment of the bill and his approval that we cut out of the bill all references to forestry and agriculture in so far as the Department of Commerce might have a right to investigate these subjects and report thereon. Now, as it happens, 47 per cent of their total business——

Mr. BROWNE of Wisconsin. Will the gentleman yield?

Mr. WINSLOW. I will yield once more, but can not yield further.

Mr. BROWNE of Wisconsin. Are these appointees under the civil service like those in the State Department?

Mr. WINSLOW. They are under the civil service; yes.

Mr. BROWNE of Wisconsin. I notice the salaries are somewhat higher.

Mr. WINSLOW. That is an interesting and important subject, but for the moment we want to get at what the bill is all about. Now, the query is just this: Is a duplication likely to occur under the provisions of this bill which will interfere with the proper functions of the Agricultural Department? If there are, our committee does not want it. We went over and over it and met the objections of the Agricultural Department time after time. We changed this paragraph and that paragraph in order to make them satisfied, but we have declined up to now to cut out references to the right of the Commerce Bureau to investigate and report on agricultural matters and forestry matters as affecting trade movements in the interest of our country's business.

We have in our possession a letter from General Lord, of the Budget, in which he says that the President of the United States sees no objection to comprehending these references to agriculture in the commerce bill; and the President of the United States, in order to get these foreign departments working together as they ought to work, each occupying its own field and each doing its proper work, promulgated an Executive order, which was issued from the White House on the 4th of April, 1924, and since that time the Departments of Agriculture and of Commerce, the State Department, and all other departments which have representation in the foreign field have been working under that Executive order, and it remains alone for the Agricultural Department to find any considerable or harmful duplication or to find any trouble whatever.

There is not time for me to give you all the facts. I can furnish you many facts which show that the Commerce Department is rendering a great service to the business of this country, a greater service than is rendered by any other department. I do not know exactly where to begin to give you these suggestions, but as the discussion here—as indicated by those interested in the Agricultural Department—is to fail on that feature, I am obliged to use the little time I have and devote it to that feature. I say to you that every line of business in the country has appealed to various Members of this House to approve this bill and put it through.

I have never observed so much miscellaneous correspondence devoid of the propaganda taint, coming to the office of the committee as has come in from individuals here, there, and everywhere in support of this bill. The Department of Commerce has had a perfectly wonderful growth. They have developed at a rate which would pass anyone's belief if they did not investigate it.

Just to show you—and I state these facts without any suggestion of logic, because time will not permit—in 19 years this department has issued, exclusive of special reports, 870 of these pamphlet documents. Here is one which is to be released on the 9th of June, absolutely given up to the European economic conditions which affect agricultural products. It is merely suggestive of a regular issue to business men. In the year 1921 there were 505,000 written inquiries poured into this bureau for consideration. In 1924, estimated on the time which has already expired during this present year, that record has grown up to twice the number—1,003,000. It is a shame that this matter has to be rushed over in this way, but here is a large, comprehensive commerce report and 26 per cent of it is devoted to agricultural subjects of a very miscellaneous nature.

Mr. BLACK of Texas. Does the gentleman think the thicker the document the better it is?

Mr. WINSLOW. Maybe. This volume is distributed to six hundred and odd publishers of newspapers in order that they may get the news in reference to the work of the department.

I wish now to go back to the Executive order of the President which requires that in every field where there is a diplomatic head there shall be meetings every month, under the direction of the representatives of the State Department, of all representatives of the Government who are in the zone in question, and there they are to get together and compare notes and assist one another in order to avoid useless duplication of service and give the best results to the country.

This is an interesting document, but it is too long to read.

Just giving you the high spots, representatives of farm organizations, with memberships reported by their representatives to be 489,000, producing crops valued at $392,000,000 in 1903, supported the bill, and they come here as representatives of the farming element, and we have it of easy reference here in the hearings.

Cotton was represented by the president of the American Cotton Growers' Exchange, who favored this bill as affecting his agricultural trade interests. Likewise the head of the Association of California Rice Growers, a representative of the Tobacco Growers' Association, and so we might go on with reference to the agricultural interests supporting this bill.

Mr. JACOBSTEIN. Will the gentleman yield for a brief question?

Mr. WINSLOW. Make it sharp.

Mr. JACOBSTEIN. Is there any difference in the character of the work done by the agricultural men abroad and the commerce men?

Mr. WINSLOW. Yes; there is. That question is helpful to me. The character, generally speaking, is, or is supposed to be, entirely different. First of all, we expect the Agricultural Department to investigate all the scientific features relating to agriculture, the quality of seed, the sort of stuff we can grow here, and all that sort of thing; and, in addition to that, we expect them to give out their conclusions that will be helpful to the trade of this country.

The Commerce Department, speaking in a kind of casual way, has not any business interest in the kind of seed or the color of cotton or anything else, except in so far as it will be helpful to trade movements, to the sale, and they do not undertake to report on the strictly scientific end of the business at

all; and in one of the amendments which we have proposed we provide that the Foreign and Domestic Commerce Bureau of the Department of Agriculture shall not indulge in these scientific propositions and that they shall be left to other departments. We do not want any authority for the Commerce Department except to help the trade of the country.

We have here a report showing some very interesting matter. Last year we had shipped from this country abroad—and all of the work in connection with this was tabulated and spread about for the benefit of the business people of this country—$1,084,000,000 worth of merchandise. The State of New York shipped out $183,000,000, the State of Texas $147,000,000, and then we dropped down to $74,000,000 for Pennsylvania and on down to $61,000,000 for Nevada, taking in the various States and Territories.

Every one of these States has had business in foreign countries, and every State which has entered into that business has had correspondence with the Foreign and Domestic Commerce Bureau.

This bureau has 89 representatives around the world picking up information to help agriculture, and to help all trade. If it does help agriculture, so much the better, but not in a scientific way. It is solely to help the trade movements of agriculture.

Mr. LINTHICUM. Mr. Speaker, I yield two minutes to the gentleman from Louisiana [Mr. ASWELL].

Mr. ASWELL. Mr. Speaker, the organic act creating the Department of Commerce takes certain functions from other departments and turns them over to the Department of Commerce, but that organic act does not mention the Department of Agriculture, clearly showing that Congress did not intend to have the Department of Commerce usurp any of the functions of the Department of Agriculture. My distinguished friend [Mr. WINSLOW] made a fine speech boosting the Department of Commerce. I, too, want the Department of Commerce to expand; but he says that 26 per cent of the work of the Commerce Department was in agriculture. This should be stopped now. The second section of this bill provides that the Department of Commerce shall make a report on the economical and commercial activities of agriculture and on all other subjects in foreign countries.

Gentlemen, I want to call attention to this fact: The Department of Commerce under the present Secretary has specifically and continually encroached upon and usurped the authority of the Department of Agriculture until we have an inexcusable and indefensible duplication of work and an appalling waste of funds by letting Mr. Hoover and his associates usurp the functions of the Department of Agriculture. The Department of Commerce has no right to touch an agricultural product until after it goes into commerce. I believe that every friend of agriculture who is concerned with the activity of this great department will vote against this bill, because you have just passed a bill in the House to give authority in this matter where it belongs—to the Department of Agriculture. I am in sympathy with the Department of Commerce, but I want its activities confined to commerce and not to usurp or duplicate work in agriculture. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LINTHICUM. Mr. Speaker, I yield two minutes to the gentleman from Tennessee [Mr. BYRNS].

Mr. BYRNS of Tennessee. Mr. Speaker, I have nothing but admiration for the work being done by the highly efficient Bureau of Domestic and Foreign Commerce under its splendid and capable head, Docton Klein, and I have always done what I could to promote the activities of that department. From its establishment the bureau and its valuable work has had no more ardent supporter than I have been; but I do not think we ought to bring up here at practically the eleventh hour of this session of Congress a bill which, it is charged, takes from the Department of Agriculture some of its activities.

I might support this bill if we had an opportunity to discuss it under the regular rules of the House, subject to amendment.

Mr. MAPES. Will the gentleman yield?

Mr. BYRNS of Tennessee. I can not; I have but two minutes. This bill proposes to take from the Department of Agriculture the authority to make investigation and report as to agriculture and market conditions in foreign countries and place it in the Department of Commerce. If it does not do that, then it clearly will bring about duplication, for it gives to the Department of Commerce certain jurisdiction over purely agricultural matters not contemplated when that department was organized.

Mr. MAPES. Will the gentleman yield?

Mr. BYRNS of Tennessee. I can not; I have not the time.

Mr. MAPES. I want to ask the gentleman——

Mr. BYRNS of Tennessee. The gentleman from Michigan knows the rules of the House, and when I courteously decline, he ought to respect my attitude and not continually interrupt. [Applause.]

Now, if it does not result in duplication, if it does not do what I said, if it does not take from the Department of Agriculture some of its present power, it is clearly a case where there will be duplication, and Congress ought not at this hour, without an opportunity to discuss the bill, without an opportunity to offer amendment, undertake to pass an important bill like this, which, it is charged, will result in duplication and additional expense to the Government. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Tennessee has expired.

Mr. LINTHICUM. Mr. Speaker, I yield three minutes to the gentleman from Michigan [Mr. KETCHAM].

Mr. KETCHAM. Mr. Speaker and gentlemen of the House, some four or five weeks ago by a very substantial majority we passed a bill, H. R. 7111, clearly defining the field of activity of the Department of Agriculture so far as collecting statistics and extending the markets in agricultural products in cooperation with various farm organizations. The vote was 33 yeas and 221 nays against recommittal. In common with those who have preceded me in opposition to this bill in its present form I am pleased to state that if it restricted the activities of the Department of Commerce to the fields where the law creating it designed it should operate I would give my hearty support to it, but because I believe it contravenes the provisions of H. R. 7111 passed by this House and puts in the Department of Commerce duties which ought to be assigned to the Department of Agriculture I am against the bill unless it could be amended in that particular, and there is no opportunity under the rules of the House to do that. If you go into the history of the developments of the Department of Commerce you will find a clearly defined latitude of work for this department, and specifically agriculture is left out in defining such duties. No less a parliamentarian than the late James R. Mann made that declaration, and his word ought to be final with most of us. One feature of the bill we have entirely overlooked. From the beginning of the Department of Agriculture the foreign work in the extension of markets and the gathering of farm statistics has been specifically confined therein, and has been developed until it is a remarkably fine service, which is made available to the Department of Commerce and all other departments of the Government in the finest spirit of cooperation. Until only within the last year has the Department of Commerce begun to build up a skeleton organization and go into the foreign field, with an idea, it seems to me, of taking over the very heart of the agricultural work, the direction of marketing of farm products, and we want that retained within the Department of Agriculture.

The SPEAKER pro tempore. The time of the gentleman from Michigan has expired.

Mr. LINTHICUM. Mr. Speaker, I yield three minutes to the gentleman from Texas [Mr. BLACK].

Mr. BLACK of Texas. Mr. Speaker, I am going to discuss one feature of this bill that has not yet been mentioned. I call attention to the fact that in the Deparment of Commerce we have the Bureau of Foreign and Domestic Commerce and that it is presided over by Docton Klein. He is the chief of the bureau and he will receive a salary under the classification act of $7,500 a year. This bill seeks to set up another bureau within the Bureau of Foreign and Domestic Commerce to be known as the Foreign Commerce Service, and it will pay the subordinates of Doctor Klein the following salaries:

Class 1, $8,000 to $10,000 per year; class 2, $7,000 to $9,000 per year; class 3, $6,000 to $8,000 per year, and so on.

Bear in mind these employees will be under the direction of Doctor Klein, the head of the bureau, who receives a salary of $7,500 a year.

Mr. NEWTON of Minnesota. Mr. Speaker, will the gentleman yield?

Mr. BLACK of Texas. No.

Mr. NEWTON of Minnesota. But——

Mr. BLACK of Texas. Yes; I yield to the gentleman if he wants to dispute the accuracy of what I have said.

Mr. NEWTON of Minnesota. I simply wanted to say that in the State Department the Director of the Consular Service receives less than the consuls general.

Mr. BLACK of Texas. Oh, yes. Congress recently passed the Rogers bill, which makes a new and separate classification of the Diplomatic and Consular Service and pays some rather extravagant salaries, but I did not vote for the bill. I voted against it. I call attention to the fact, whether you pay

heed to it or not, that the one purpose of these bills is to begin making exceptions to the reclassification act which we passed here during the Sixty-eighth Congress. In that bill we provided for the classification of all of the employees of the Government service, and the maximum salary under the act is $7,500 per year. The reason we passed that bill was because there was so much lack of uniformity in the Government salaries. The whole purpose of this bill we are now considering is to cut around the reclassification act and set up independent salaries far in excess of those provided in the law. I am strictly opposed to doing any such thing, and will vote against this bill. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. LINTHICUM. Mr. Speaker, I yield three minutes to the gentleman from Iowa [Mr. DICKINSON].

Mr. DICKINSON of Iowa. Mr. Speaker, under date of April 5 of this year I put into the RECORD a statement of the legislation that has led up to this conflict of control. Ninety per cent of the information that the Department of Commerce is getting for the Department of Agriculture is absolutely worthless, and yet they come in here now and want you to expand their authority under this bill to do the very thing that the Department of Agriculture is doing more efficiently and more effectively. As farmers we do not want this Congress to turn over to another department the right to collect information that is valuable to the farming interests of this country and not to the commercial interests. Let me show you what the Department of Commerce did under the investigation of crude rubber, the law that was put through here under the deficiency appropriation act. That law contained this sentence:

> And to investigate related problems in the development of the foreign trade of the United States in agriculture and manufactured products, including personal services in the District of Columbia, etc.

Under that provision they devoted nearly all of their investigations and spent practically all of their money provided for crude rubber investigation in gathering information with reference to statistics on agriculture in foreign countries. Under that wording the Department of Commerce claims that it is authorized to undertake a complete direction of the agricultural service throughout the world and that the Department of Agriculture should obtain consent of the Department of Commerce before undertaking investigations of agriculture in foreign countries. I say to you that if there are any friends of the farmer in this House to-day, they should vote against this bill.

Mr. WINSLOW. Mr. Speaker, will the gentleman yield?

Mr. DICKINSON of Iowa. No; I can not yield. The gentleman has 15 minutes and I have only 3.

The SPEAKER pro tempore. The time of the gentleman from Iowa has expired.

Mr. WINSLOW. Mr. Speaker, I yield one minute to the gentleman from North Dakota [Mr. YOUNG].

Mr. YOUNG. Mr. Speaker, this is an age of specialists. The officials of the Department of Agriculture are specialists in production. They make two blades grow where before only one grew. But I ask this question seriously of every man here who claims to be a friend of the farmer: Do you know of anything that the Department of Agriculture has ever done to sell anything excepting to furnish bear news? There are no sales experts connected with the Department of Agriculture. The whole department is saturated with the idea of production, and it is perhaps unreasonable to expert that salesmanship could be developed in such an atmosphere.

Mr. DICKINSON of Iowa. What is the Bureau of Markets?

Mr. YOUNG. About all the Department of Agriculture has ever done now or during past administrations to sell anything is to give out inflated or exaggerated estimates in respect to the yield of crops and report it at precisely the wrong time. I think it is pretty nearly time for us to wake up to the fact that there is something to do other than to produce. A wholly unnecessary report was volunteered by the Department of Agriculture last fall regarding the amount of turkeys in cold storage which cost the farmers in one State, North Dakota, more than a million dollars.

The officials of the Department of Commerce are sales specialists. They think it while awake and asleep. It is the dominating thought of the department. What we need to do for the farmer is to get better markets, to have better salesmanship, and the natural place to find salesmanship is in the Department of Commerce, where there are sales experts who think about nothing else.

The SPEAKER pro tempore. The time of the gentleman from North Dakota has expired.

Mr. WINSLOW. Mr. Speaker, does anyone have the parliamentary right to ask as a matter of personal privilege to correct a statement?

The SPEAKER pro tempore. The gentleman can rise to a question of personal privilege.

Mr. WINSLOW. I rise to a question of personal privilege.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WINSLOW. The gentleman from Michigan just said that when the Ketcham bill was before the House I opposed it. I did not oppose it. I did offer an amendment to perfect it and I voted for it.

The SPEAKER pro tempore. The Chair will state that is not a matter of personal privilege. Does the gentleman from Massachusetts desire to yield more time?

Mr. WINSLOW. Only at the finish.

Mr. LINTHICUM. Mr. Speaker, I yield myself three minutes. [Applause.]

Gentlemen of the committee, you will realize very little can be said in the short space of time at my disposal. It is difficult to touch more than the high spots, but those high spots should demonstrate the unwisdom of the passage of this bill in its present form.

I am not opposed to the principle involved in this bill; in fact, I am in favor of the proper and systematic establishment of the foreign commerce service instead of the present method followed by the Department of Commerce, but I am opposed to taking up a measure of this vast importance under suspension of rules, with slight debate and without any opportunity to amend the bill.

The Interstate and Foreign Commerce Committee have offered certain amendments to the bill and asked that it be passed with these amendments under suspension of rules. It is impossible to procure a copy of the bill with the suggested amendments, and there is not a Member on the floor of this House who knows what the real bill is, unless it be the gentleman from Massachusetts [Mr. WINSLOW] or the gentleman from Kentucky [Mr. BARKLEY], and yet we are asked to pass this bill, which means so much to the commerce of our country, without an opportunity to know its provisions.

The bill does not limit the number of appointees which can be made by the Secretary of Commerce. The salaries range from $10,000 per year down. In addition to this these employees are to receive as much as $10 per day for subsistence and travel expenses, the amount to be paid to be regulated by the Secretary of Commerce. That is not all. In paragraph B of section 3 you will find that the Secretary of Commerce has the power to appoint these officers, and, there being no limit, he can naturally appoint as many as he can obtain an appropriation to pay.

The Secretary may promote or demote any official in grade or class; he may increase or decrease the salary, or if disposed he may separate him from the service entirely, and the only restraint or restriction, if it be one, is that he shall take into consideration the appointee's efficiency, and he, the Secretary, is sole judge of his efficiency. I contend that this unlimited power over an unlimited number of employees is too great, and while I have every confidence in the present Secretary of Commerce, yet it must be understood that this is a permanent bill, which may be in existence for a great many years.

Then again, under paragraph B of section 6, the Secretary may authorize any officer of the foreign commerce service to fix, in an amount not exceeding the allowance fixed for such officer, an allowance for actual subsistence or a per diem allowance in lieu thereof for any clerical or subclerical assistance employed by such officer; in other words, the Secretary can not only exercise these powers himself, but he may delegate other officers to fix the actual subsistence or per diem for those employees under him.

I can not believe this committee desires to authorize the fixing of expenditures to subordinate officers in the foreign commerce service. Another strong objection to this bill is that it enables employees of the Government by special enactment to receive salaries in excess of that authorized by Congress under a general act recently passed limiting salaries to $7,500. If you pass this bill without restriction as to number of employees, with but little restriction as to subsistence and traveling expenses, it is impossible to say what appropriation may be necessary to carry out the provisions of this bill.

I am not one to quibble as to proper salaries for good men, but I do think when you are granting these large salaries we should know how many are to receive them and what class of men are to be appointed.

Under the foreign service act recently passed by Congress, consuls were limited to $8,000 per annum, except as to the

consul in London, whose salary was allowed to remain at $9,000 during the occupancy thereof by the present incumbent. No one can gainsay the fact that we have the best Consular Service in the world, and our men are satisfied and contented. Out of this salary allowance they are compelled to pay into the retirement fund for the State Department 5 per cent of their salary annually, while the men appointed under this bill would only be compelled to pay the general retirement fund assessment.

Now, gentlemen, as I have said, I am not opposed to the principle embodied in this bill, but I can see no reason why it should not go over until the next session, at which time we shall have abundant opportunity to debate and amend the bill, and to pass one which will be a credit not alone to the Department of Commerce but likewise to the commercial life of our country. I therefore plead with you to vote against this bill and defer action until the next session in December. [Applause.]

The SPEAKER pro tempore. The gentleman from Maryland has one minute remaining.

Mr. LINTHICUM. I yield that to the gentleman from New York [Mr. GRIFFIN].

Mr. GRIFFIN. Mr. Speaker and gentlemen of the House, I confess that it seems to me like an affront to this body and somewhat of a slight to another committee of this House that this bill should be brought out by the Committee on Interstate and Foreign Commerce at this time. There is at present a joint committee of the Committee on Appropriations of this House, consisting of its standing subcommittees on the Departments of State, Commerce, Labor, and Agriculture, engaged in making a study of this precise question as to what shall be done to coordinate the work of the various consular, commercial, and agricultural agents of the United States. At the present time there is a conflict and overlapping of authority and a duplication of expense.

The object of this joint committee is to ascertain and suggest appropriate legislation to coordinate the work of these several departments. That joint committee has not yet completed its labors. I hold in my hand a volume representing the hearings up to date, and it is only fair that we should be permitted to complete our investigation and make a report.

I ask you, gentlemen, to vote against this bill and allow us to take up the subject later on, when we can give it proper deliberation. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. WINSLOW. Mr. Speaker, I yield the remainder of my time, four minutes, to the gentleman from Kentucky [Mr. BARKLEY].

The SPEAKER pro tempore. The gentleman from Kentucky is recognized for four minutes.

Mr. BARKLEY. Mr. Speaker, in reply to the remarks of the gentleman from Maryland [Mr. LINTHICUM] and other gentlemen who have suggested the matter of the number of employees and their salaries, I want to say this: This bill does not add a single employee to the pay roll of the United States. It does not form a new service. It simply gives a legal status to a service that already exists and is in operation in foreign countries, undertaking to develop the foreign commerce of the United States. The bill does not increase salaries. The only difference is that the salaries are at present paid out of lump sums.

Mr. BLACK of Texas. Mr. Speaker, will the gentleman yield?

Mr. BARKLEY. No; I regret I can not yield.

The salaries, I say, are paid at present out of lump sums by the Department of Commerce, and we fix a limit to the salaries that may be paid. It is a very simple problem. The State Department and the Department of Commerce and the Department of Agriculture, all three, have agents in foreign countries, and they have for some years been duplicating the work. This is an effort to simplify the foreign service of the United States so that the Bureau of Foreign and Domestic Commerce may have a corps of men who have a recognized legal status in foreign countries, whose duty it shall be to advance the trade of the United States. The Secretary of State agrees to this bill, and the Secretary of Agriculture disagrees to it simply because in one place we mention "agriculture" and "forestry."

Let us see what this bill does. I hope those gentlemen who represent agricultural districts will give attention to this, while I read one of the provisions of the bill. The bill provides that "The officers of the foreign commerce service shall (a) promote the foreign commerce of the United States," and "(b) investigate and report upon economic, commercial, and industrial conditions and activities of foreign countries, and economic and commercial aspects of agriculture, manufacturing, mining, forestry, shipping, transportation, finance, labor, and legislation, and of all other activities in foreign countries which may be of economic, commercial, or industrial interest to the United States." Representatives of nearly every farmers' marketing association that deals with farm products sold to foreign nations came before our committee or sent letters there urging the passage of this bill. [Applause.]

Subsection (d) provides that under the direction of the Secretary of Commerce the officers of the foreign commerce service "shall, within their respective jurisdictions, and under the supervision of the chief or acting chief diplomatic officer of the United States for such jurisdiction," direct "the economic and commercial investigations and reporting, and the trade promotion and commercial intelligence activities of all other officers or employees of the United States."

You will notice that the foreign commerce service is directed to report, among other things, upon the economic and commercial aspects of agriculture, manufacturing, and forestry. In other words, if we strike out the words "agriculture" and "forestry," the Department of Agriculture would be in favor of this bill. All we do is to authorize this service to investigate and report upon economic, commercial, and industrial conditions and activities in foreign countries, and economic and commercial aspects of agriculture, manufacturing, mining, forestry, and so on; and we do not in any way interfere with the authority of the Department of Agriculture.

The passage of this bill will not do away with a single representative of the Department of Agriculture in a foreign country who is already there or interfere with their activities in any way.

There are two kinds of investigations involved here. One is the scientific investigation, and the Department of Agriculture is now engaged, and it ought to be engaged, in the investigation of agriculture from the scientific viewpoint, in order to determine the agricultural conditions in foreign countries and obtain general scientific knowledge. They do that now, and they will continue to do that and make their reports; and our agents in the Commerce Bureau will use that information. There is no duplication, or if there is it will be very slight. But in any event it will not in any way interfere with the functions of the Department of Agriculture, and any man who votes against this bill because the words "agriculture" and "forestry" are in it, and whose constituents are interested in the commercial and economic aspect of agriculture, which it is proposed to investigate, will vote to cripple and hamper our development in agriculture and our foreign trade in agricultural products and all other products of our country. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Kentucky has expired. The question is on the motion of the gentleman from Massachusetts [Mr. WINSLOW] to suspend the rules and pass the bill as amended.

The question was taken, and the Speaker pro tempore announced that in his judgment, two-thirds having voted in the affirmative, the rules were suspended and the bill was passed.

Mr. LINTHICUM. Mr. Speaker, I demand a division.

The SPEAKER pro tempore. The gentleman from Maryland demands a division.

The House divided; and there were—ayes 121, noes 71.

The SPEAKER pro tempore. Two-thirds not having voted in the affirmative the motion to suspend the rules and pass the bill is lost.

Mr. MAPES. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The Clerk will call the roll. Those in favor of the motion to suspend the rules and pass the bill as amended will, when their names are called, answer "yea," those opposed will answer "nay."

The question was taken; and there were—yeas 169, nays 158, not voting 106, as follows:

Mr. Mills with Mr. Hammer.
Mr. Butler with Mr. Kindred.
Mr. Madden with Mr. Woodrum.
Mr. Vare with Mr. Carter.
Mr. Aldrich with Mr. Tydings.
Mr. Welsh with Mr. Doughton.
Mr. Burton with Mr. Bulwinkle.
Mr. Manlove with Mr. Thomas of Kentucky.
Mr. Dyer with Mr. Celler.
Mr. Fredericks with Mr. Doyle.
Mr. Newton of Missouri with Mr. Geran.
Mr. MacGregor with Mr. Collins.
Mr. Morgan with Mr. Davey.
Mr. Freeman with Mr. Drewry.
Mr. Greene of Massachusetts with Mr. Howard of Oklahoma.
Mr. Kendall with Mr. Hudspeth.
Mr. Magee of Pennsylvania with Mr. Jones.
Mr. Kiess with Mr. Kent.
Mr. Johnson of Washington with Mr. Harrison.
Mr. Gifford with Mr. Kvale.
Mr. Johnson of South Dakota with Mr. Hull of Tennessee.
Mr. Phillips with Mr. Lyon.
Mr. Michener with Mr. Berger.

Mr. COOPER of Wisconsin. Mr. Speaker, I desire to vote.

The SPEAKER pro tempore. Was the gentleman present and listening when his name was called?

Mr. COOPER of Wisconsin. I was in my office downstairs and did not hear the bell ring.

The SPEAKER pro tempore. Then the gentleman does not come within the rule.

The result of the vote was announced as above recorded.

## CONFERENCE REPORT—EXECUTIVE OFFICE AND SUNDRY INDEPENDENT BUREAUS, ETC.

Mr. WOOD. Mr. Speaker, I desire to call up conference report on H. R. 8233, making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes.

Mr. BLACK of New York. Mr. Speaker, I reserve all points of order on this conference report.

The SPEAKER pro tempore. The gentleman from Indiana calls up a conference report, which the Clerk will report.

The Clerk read as follows:

### CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8233) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 5, 6, 7, and 15.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 8, 9, 12, and 14, and agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "No part of the moneys appropriated or made available by this act for the United States Shipping Board or the United States Shipping Board Emergency Fleet Corporation shall, unless the President shall otherwise direct, be used or expended for the repair or reconditioning of any vessel owned or controlled by the Government, if the expense of such repair or reconditioning is in excess of $50,000, until a reasonable opportunity has been given to the available Government navy yards to estimate upon the cost of such repair or reconditioning, if performed by such navy yards within the limit of time within which the work is to be done: *Provided*, That this limitation shall only apply to vessels while in the harbors of the United States, and all expenditures in connection with such work are to be considered in estimating the cost"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: "$10,000 except the following: One at not to exceed $25,000

and five at not to exceed $18,000 each"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 4 and 10.

WILL R. WOOD,
J. W. SUMMERS,
JOHN N. SANDLIN,
*Managers on the part of the House.*
F. E. WARREN,
W. L. JONES,
LEE S. OVERMAN,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House at the further conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8233) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year 1925, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

On Nos. 1, 2, and 3, relating to the American Battle Monuments Commission: Strikes out the limitation of $20,000 proposed by the House for personal services, and provides, as proposed by the Senate, for the reimbursement of actual travel expenses of the members of the commission at not to exceed $8 per day, or per diem in lieu of subsistence at not to exceed $7 per day.

On Nos. 5 and 6, relating to the Employees' Compensation Commission: Appropriates $136,600, as proposed by the House, instead of $138,040, as proposed by the Senate, for salaries, and $10,000, as proposed by the House, instead of $12,000, as proposed by the Senate, for contingent expenses.

On No. 7: Appropriates $300,000, as proposed by the House, instead of $390,000, as proposed by the Senate, for contingent expenses of the General Accounting Office.

On Nos. 8 and 9, relating to the Smithsonian Institution: Appropriates $49,550, as proposed by the Senate, instead of $40,000, as proposed by the House, for the system of international exchanges, and appropriates $2,000, as proposed by the Senate, instead of $1,500, as proposed by the House, for the purchase of books, pamphlets, and periodicals.

On Nos. 11, 12, 13, and 14, relating to the United States Shipping Board: Strikes out the language proposed by the Senate and inserts a substitute paragraph which provides that no part of the moneys appropriated for the use of the Shipping Board or the Fleet Corporation shall be expended for the repair or reconditioning of any ship where the cost of the repairs or reconditioning is in excess of $50,000 until the available Government navy yards have been given reasonable opportunity to estimate upon the cost of performing the work; and provides further that the limitation shall apply only to vessels while in the harbors of the United States; corrects a typographical error in the bill; provides a general limitation of $10,000, as proposed by the House, instead of $11,000, as proposed by the Senate, for salaries of officers of the Fleet Corporation, and provides for salaries in excess of this limit as follows: One at not to exceed $25,000, as proposed by the Senate, instead of one at not to exceed $20,000, as proposed by the House, and five at not to exceed $18,000 each, instead of six, as proposed by the Senate, and instead of four at not to exceed $15,000 each, as proposed by the House; and strikes out, as proposed by the Senate, the limitation upon the appropriation to permit the payment of judgments and awards in suits in admiralty.

On No. 15: Strikes out the language proposed by the Senate authorizing the sale of a guidebook in the Washington Monument.

The committee of conference have been unable to agree upon the following amendments of the Senate:

No. 4, which provides for the detail of one part-time employee to the Civil Service Commission in the district office at New York City; and

No. 10, which provides for the expenditure of certain unexpended balances of appropriations under the office of the superintendent of the State, War, and Navy Department buildings in the erection of a temporary boiler plant for the heating of the Navy and Munitions Buildings and other Government buildings in the vicinity thereof.

WILLIAM R. WOOD,
JOHN W. SUMMERS,
JOHN N. SANDLIN,
*Managers on the part of the House.*

Mr. BLACK of New York. Mr. Speaker, I raise a point of order against that portion of the conference report setting forth that the Shipping Board can not expend any part of the appropriation in excess of $50,000 before giving an opportunity to available navy yards to estimate. I make the point of order on the ground that the conferees have exceeded their authority. The House has taken a position, as well as the Senate, for a mandatory provision in this portion of the bill. The conferees, in violation of their instructions from the House, have receded on two occasions and have agreed to a conference report setting forth a permissive proposition.

Mr. BEGG. Will the gentleman yield right there?

Mr. BLACK of New York. Yes; certainly.

Mr. BEGG. Is this the same point of order that was raised yesterday?

Mr. BLACK of New York. It is practically the same point of order.

The SPEAKER pro tempore (Mr. SANDERS of Indiana). Does the gentleman from New York differentiate this point from the ruling made by the Speaker on the former occasion?

Mr. BLACK of New York. It is impossible for me to differentiate this point and the ruling made by the Speaker on the 3d of June, but I wish to say to the Chair that the ruling made by the Speaker on the 3d of June was based on a precedent offered by the gentleman from Indiana [Mr. SANDERS], and I wish to call the attention of the Chair at this time to that precedent and the effect it should here have if read closely and given that deliberation that an important proposition of this kind is entitled to.

In the Sixty-seventh Congress when this question arose the House adopted an amendment that was mandatory in its provisions as to the expenditure of money by the Shipping Board. The Senate, on the other hand, adopted a permissive proposition. So that the point at issue between the two Houses in the Sixty-seventh Congress was whether or not it should be mandatory or permissive, and the compromise effected by the conference was between those two points, requiring that it be a permissive proposition if the amount should be in excess of $100,000. The situation that confronts this conference is entirely different. The situation that confronted this conference was a very certain set of instructions that the amendment should provide that something of a mandatory nature should be done. There was no question between the two Houses as to whether it should be mandatory or permissive. The only question between House and the Senate was how far the mandatory provision should go. The difference this year, as presented by the last conference report on this question, was a difference between both Houses of Congress and the conferees. There was no difference at all between the Houses as to whether this should be mandatory or permissive, and I submit it is something like this proposition, if I may put a parliamentary proposition in a popular way: A woman is having trouble with her husband. He says he will pay her $500. She says she wants $1,000, and her lawyer and his lawyer meet, and her lawyer agrees that instead of taking the $1,000 she insists on or the $500 that her husband is willing to give her, she will take nothing. I respectfully submit that the conferees have violated most outrageously the instructions of this House given to the conferees on at least two occasions by a very substantial vote.

The SPEAKER pro tempore. The Chair is ready to rule. The gentleman from New York makes the point of order that the conferees have exceeded their authority. The question presented by the gentleman from New York is precisely the same question which the Speaker of the House ruled upon with reference to this conference report when it was before the House on a former occasion. The rule is well settled that when a certain portion is stricken out and a new amendment is written that that gives the conferees entire authority to deal with the subject matter of what was stricken out and what was put in its place, and they may strike out the subsequent amendment and agree to any germane proposition. The Chair is of the opinion that this is germane, and following the precedent the Chair has referred to, the Chair overrules the point of order.

Mr. LAGUARDIA. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. LAGUARDIA. What force or significance, then, has the vote of the House?

The SPEAKER pro tempore. The Chair will state that is not a parliamentary inquiry.

Mr. LAGUARDIA. I wanted to be guided as to what is before the House.

Mr. WOOD. Mr. Speaker and gentlemen of the House, I wish to state very briefly what this conference report contains. There are but two questions that were in dispute, one with reference to the salaries paid the officers of the Shipping Board

and the other with reference to repairs upon ships belonging to the United States requiring them to be made in the arsenals or navy yards of the Government. This report modifies the former report with reference to salaries paid Shipping Board officials and reduces all $11,000 salaries to $10,000. It eliminates one $18,000 man, so that there are no salaries now of the $11,000 class and there are but five of the $18,000 class. With reference to the matter of repairs, we have changed the limitation from $100,000 to $50,000, so that in the event the repairs amount to $50,000 or more an opportunity must be given to the various navy yards.

These are the only two changes. I think we are in as substantial an agreement as it is possible for us to get, and the language now in the bill is substantially the same as that for the current year, which has proven satisfactory not only to the navy yards throughout the country but likewise satisfactory to the Shipping Board.

Mr. SCHAFER. Will the gentleman yield?

Mr. WOOD. I yield.

Mr. SCHAFER. You state an opportunity has been given to the navy yards; what opportunity has been given them—just an opportunity to go through the form of submitting a bid?

Mr. WOOD. No; there have been several large jobs done by the various navy yards.

I yield five minutes to the gentleman from Iowa [Mr. HULL].

Mr. HULL of Iowa. Mr. Speaker and Members of the House, twice has this House spoken on this matter. The Senate has spoken twice, and the conferees have flouted both the House and the Senate twice. [Applause.]

What you are trying to do is to put a limit on the profiteering that is going on in the Shipping Board.

You have spoken, and yet the conferees defy you and bring back to this House something that means nothing. There is only one thing for you to do, and that is to reject the conference report and move to recede and concur with the Senate amendment and then you will finish this matter at once. You have a right to do it; yea, more than that, if you are men you will do it. [Applause.] These conferees have no right to defy both Houses when you are trying to save the people's money. That is your right and it is your duty. No one wants to drive the shipyards out of business. They can compete with the navy yards and they do compete with them, but let the navy yards have an opportunity to find out how much money these rich corporations are making off the Government through the Shipping Board. If they are making too much, do as you said you would do—have the work done in the navy yard.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. HULL of Iowa. Yes.

Mr. COOPER of Wisconsin. I had not the opportunity yesterday or the day before to add a bit more to the report of the testimony given by Admiral Plunkett before the committee inquiring into the Shipping Board affairs. He testified that there were some repairs to be done, and bids were brought in. Morse & Co. bid four thousand nine hundred and a fraction dollars. The Brooklyn Navy Yard bid $1,500, and then Morse & Co. agreed to do it for $1,500.

Mr. HULL of Iowa. That is only one of many instances where the profiteers get the people's money.

Mr. BEGG. Will the gentleman yield?

Mr. HULL of Iowa. Yes.

Mr. BEGG. Suppose it was mandatory to go to the Government shipyards and they submitted a bid that was lower and then could not build it for that—the Government would have to pay the higher bid, would it not?

Mr. HULL of Iowa. The Government of the United States can afford to make bids and carry out their bids as well as Morse & Co. The gentleman knows very well that under the naval bill we wrote the same provision, and then it is written in the Army bill permanently. It is only the Shipping Board that objects to having a limit placed on the profiteers.

Mr. BEGG. Will the gentleman yield?

Mr. HULL of Iowa. No; I refuse to yield.

Mr. BEGG. I want to say to the gentleman——

Mr. HULL of Iowa. The gentleman knows the rules of the House, and he can sit down.

Mr. BEGG. I will. [Laughter.]

Mr. HULL of Iowa. It is only the Shipping Board that objects to having a limit put on the profiteering that goes on in their department. We wrote the same provisions into the naval bill. I hope you will reject the conference report and then recede and concur in the Senate amendment. [Applause.]

Mr. MADDEN. Mr. Speaker and gentlemen, I think we may just as well realize that the House of Representatives is not the only body that makes up the Congress and that we have done everything we could within our power and within reason to reach a fair conclusion. We have limited the number of places at $18,000 to five instead of six. The Shipping Board activities are enormous. They could not function without men of great experience and supreme ability. This report should meet the reasonable expectation of everybody. There is no reason in the world why it should not be adopted. It is fair, it is clean, and it is just. More than that, this report provides that on all repairs or improvements of Shipping Board vessels, if the cost of the work exceeds $50,000 the Shipping Board shall receive estimates from the navy yards and can give them the work if they are low.

Mr. HULL of Iowa. No; there is not a word in the conference report about that.

Mr. TAGUE. That is just what it does not do.

Mr. MADDEN. It gives the right when the cost exceeds $50,000 to make estimates. Of course these gentlemen who have been standing around prating about the Shipping Board, not having any rights and the navy yards having all the rights will not listen to reason no matter what one says. The time has come to close this question, and I hope the membership of the House will believe that what we have done is right and fair and that you will approve of what the conferees have reported to you.

Mr. WOOD. Mr. Speaker, it is now quarter of 6, and I do not think any more light can be thrown on the subject by further debate, and I move the previous question.

The question was taken; and on a division (demanded by Mr. TAGUE) there were 102 ayes and 52 noes.

Mr. TAGUE. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER pro tempore. The gentleman from Massachusetts asks for the yeas and nays. All those in favor of taking the question by yeas and nays will rise. [After counting.] Twenty-two have risen, not a sufficient number, and the yeas and nays are refused.

Mr. TAGUE. Mr. Speaker, I doubt the vote and make the point of no quorum.

The SPEAKER pro tempore. The gentleman from Massachusetts makes the point of no quorum. The Chair will count. [After counting.] Two hundred and twenty-one Members are present, a quorum. The previous question is ordered, and the question is on agreeing to the conference report.

The question was taken; and on a division (demanded by Mr. TAGUE) there were 121 ayes and 52 noes.

Mr. HULL of Iowa. Mr. Speaker, I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman from Iowa demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Thirty-six Members have risen, not a sufficient number, and the yeas and nays are refused.

The SPEAKER resumed the chair.

Mr. SCHAFER. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The Chair counted a quorum here just a moment ago.

Mr. SCHAFER. Since that time several Members have retired.

The SPEAKER. It is very clear that there is a quorum present. On the division there were—ayes 169, noes 62.

So the conference report was agreed to.

Mr. WOOD. Mr. Speaker, I move that the House recede and concur in the Senate amendment No. 4.

The SPEAKER. The Clerk will report the Senate amendment.

The Clerk read as follows:

Page 6, line 25, insert a new paragraph as follows:

Except for one person detailed for part-time duty in the district office at New York City, no details from any executive department or independent establishment in the District of Columbia or elsewhere to the commission's central office in Washington or to any of its district offices shall be made during the fiscal year ending June 30, 1925; but this shall not affect the making of details for service as members of boards of examiners outside the immediate offices of the district secretaries. The Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees herein provided for to or from its office or field force.

Mr. WOOD. Mr. Speaker, all this does is to permit the Civil Service to detail from one of the other departments some employee for a part of the time for duty in New York when business is pressing there.

The SPEAKER. The question is on the motion of the gentleman from Indiana to recede and concur.

The question was taken; and on a division (demanded by Mr. SCHAFER) there were—ayes 125, nays 25.

So the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Page 22, after line 10, insert the following:

Of the unexpended balances of the appropriations provided for in the executive and independent offices appropriation act for the fiscal year 1924, approved February 13, 1923, for salaries and for fuel, lights, and miscellaneous items for the office of the Superintendent State, War, and Navy Department Buildings, there shall be immediately available and remain available during the fiscal year 1925 a sum from said appropriations not exceeding $125,000, for the erection of a temporary boiler plant for the heating of the Navy and Munitions Buildings and other Government buildings in the vicinity thereof, including all expenses incident to the setting of boilers, the procurement of all necessary equipment, laying of steam lines, etc.

For all printing and binding for the State, War, and Navy Department Buildings, $2,750.

Mr. WOOD. Mr. Speaker, this amendment permits the custodian of public buildings and grounds to use the unexpended balance in constructing a power house from which power and electricity will be furnished to certain of the Government buildings, which power is now being purchased from the outside. It will result in an estimated saving of between seventy-five and one hundred thousand dollars a year to the Government, at an expenditure of about $125,000. I move that the House recede and concur in the Senate amendment.

The SPEAKER. The question is on the motion of the gentleman from Indiana that the House recede and concur.

The motion was agreed to.

Mr. WOOD. Mr. Speaker, I move to reconsider the votes by which the conference report was agreed to and by which the motions to recede and concur in Senate amendments 4 and 10 were agreed to.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 7877. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1925, and for other purposes.

H. R. 5478. An act to amend sections 1, 3, and 6 of an act entitled "An act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment."

H. J. Res. 194. Joint resolution to print as a House document the proceedings of the national encampments of the Grand Army of the Republic, the United Spanish War Veterans, and the American Legion, for the use of the House and Senate.

H. R. 526. An act authorizing the Secretary of War to enter into an arrangement, on behalf of the United States, with the Alexandria Light & Power Co., whereby civilians may obtain electric current from a Government-owned transmission line extending from Alexandria to Fort Humphreys, Va.

H. R. 8143. An act for the protection of the fisheries of Alaska, and for other purposes.

POLLUTION OF COASTAL NAVIGABLE WATERS

Mr. DEMPSEY. Mr. Speaker, I move to suspend the rules and pass the bill S. 1942, to protect navigation from obstruction and injury by preventing the discharge of oil into the coastal navigable waters of the United States, as amended.

The SPEAKER. The gentleman from New York moves to suspend the rules and pass the bill which the Clerk will report.

The Clerk read as follows:

*Be it enacted, etc.*, That this act may be cited as the "oil pollution act, 1924."

SEC. 2. When used in this act, unless the context otherwise requires—

(a) The term "oil" means oil of any kind or in any form, including fuel oil, oil sludge, and oil refuse;

(b) The term "person" means an individual, partnership, corporation, or association; any owner, master, officer or employee of a vessel; and any officer, agent, or employee of the United States;

(c) The term "coastal navigable waters of the United States" means all portions of the sea within the territorial jurisdiction of the United States, and all inland waters navigable in fact in which the tide ebbs and flows;

(d) The term "Secretary" means the Secretary of War.

SEC. 3. That, except in case of emergency imperiling life or property, or unavoidable accident, collision, or stranding, and except as otherwise permitted by regulations prescribed by the Secretary as hereinafter authorized, it shall be unlawful for any person to discharge, or suffer, or permit the discharge of oil by any method, means, or manner into or upon the coastal navigable waters of the United States from any vessel using oil as fuel for the generation of propulsion power, or any vessel carrying or having oil thereon in excess of that necessary for its lubricating requirements and such as may be required under the laws of the United States and the rules and regulations prescribed thereunder. The Secretary is authorized and empowered to prescribe regulations permitting the discharge of oil from vessels in such quantities, under such conditions, and at such times and places as in his opinion will not be deleterious to health or sea food, or a menace to navigation, or dangerous to persons or property engaged in commerce on such waters, and for the loading, handling, and unloading of oil.

SEC. 4. That any person who violates section 3 of this act, or any regulation prescribed in pursuance thereof, is guilty of a misdemeanor, and upon conviction shall be punished by a fine not exceeding $2,500 nor less than $500, or by imprisonment not exceeding one year nor less than 30 days, or by both such fine and imprisonment, for each offense. And any vessel (other than a vessel owned and operated by the United States) from which oil is discharged in violation of section 3 of this act, or any regulation prescribed in pursuance thereof, shall be liable for the pecuniary penalty specified in this section, and clearance of such vessel from a port of the United States may be withheld until the penalty is paid, and said penalty shall constitute a lien on such vessel which may be recovered in proceedings by libel in rem in the district court of the United States for any district within which the vessel may be.

SEC. 5. A board of local inspectors of vessels may, subject to the provisions of section 4450 of the Revised Statutes, and of the act entitled "An act to provide for appeals from decisions of local inspectors of vessels, and for other purposes," approved June 10, 1918, suspend or revoke a license issued by any such board to the master or other licensed officer of any vessel found violating the provisions of section 3 of this act.

SEC. 6. That no penalty, or the withholding of clearance, or the suspension or revocation of licenses, provided for herein, shall be enforced for any violation of this act occurring within three months after its passage.

SEC. 7. That in the administration of this act the Secretary may make use of the organization, equipment, and agencies, including engineering, clerical, and other personnel, employed under his direction in the improvement of rivers and harbors, and in the enforcement of existing laws for the preservation and protection of navigable waters. And for the better enforcement of the provisions of this act, the officers and agents of the United States in charge of river and harbor improvements, and the assistant engineers and inspectors employed under them by authority of the Secretary, and officers of the Customs and Coast Guard Service of the United States, shall have power and authority and it shall be their duty to swear out process and to arrest and take into custody, with or without process, any person who may violate any of said provisions: *Provided*, That no person shall be arrested without process for a violation not committed in the presence of some one of the aforesaid officials: *And provided further*, That whenever any arrest is made under the provisions of this act the person so arrested shall be brought forthwith before a commissioner, judge, or court of the United States for examination of the offenses alleged against him; and such commissioner, judge, or court shall proceed in respect thereto as authorized by law in cases of crimes against the United States.

SEC. 8. That this act shall be in addition to the existing laws for the preservation and protection of navigable waters and shall not be construed as repealing, modifying, or in any manner affecting the provisions of those laws.

SEC. 9. That the Secretary is authorized and directed to make such investigation as may be necessary to ascertain what polluting substances are being deposited into the navigable waters of the United States, or into nonnavigable waters connecting with navigable waters, to such an extent as to endanger or interfere with navigation or commerce upon such navigable waters or the fisheries therein; and with a view to ascertaining the sources of such pollutions and by what means they are deposited; and the Secretary shall report the results of his investigation to the Congress not later than two years after the passage of this act, together with such recommendations for remedial legislation as he deems advisable: *Provided*, That funds appropriated for examinations, surveys, and contingencies of rivers and harbors may be applied to paying the cost of this investigation, and, to adequately provide therefor, the additional sum of not to exceed $50,000 is hereby authorized to be appropriated for examinations, surveys, and contingencies of rivers and harbors.

The SPEAKER. The question is on the motion of the gentleman from New York to suspend the rules and pass the bill.

The question was taken; and, in the opinion of the Chair, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

THE CONSTITUTION

Mr. COOK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by including therein the oration of Ruth Greenwood, the daughter of the Representative from Indiana, on the Constitution of the United States.

The SPEAKER. Is there objection?

There was no objection.

Mr. COOK. Mr. Speaker, a number of metropolitan newspapers, including the Washington Evening Star, inaugurated a contest among the high-school students of the United States for the best oration on the Constitution of the United States, and divided the country into seven zones, and the District of Columbia was one zone. In the contest in this zone there were eight high schools entered, and at the Eastern High School the contest was won by Miss Ruth Greenwood, the 16-year-old daughter of Representative ARTHUR H. GREENWOOD, of the second district of Indiana; and in the zone contest Miss Greenwood was given second place, or alternate for the District in the final hearing to be held at Continental Memorial Hall Friday, June 6, 1924, and under the consent granted I insert the oration of Miss Greenwood, which is as follows:

THE CONSTITUTION

(By Miss Ruth Greenwood, Eastern High School Star oratorical contest.)

If an American citizen as a pilgrim to the Capital City seeks a shrine at which to pay deep patriotic devotion, it may be found in the upper corridor of the Congressional Library, where are preserved and displayed in their original form our great twin charters of democracy—the Declaration of Independence and the Constitution of the United States.

Democracy is not a natural endowment in human affairs, but has slowly matured through a long series of struggles against primitive force, the selfish arrogance of feudalism, and the tyranny of the divine right of kings.

Nurtured by the traditions of an English ancestry who loved liberty, enriched by the experience of town meetings and assemblies of the Colonies, separated from monarchy by wide expanse of ocean, and inspired by the unhampered environment of a new world, our fathers boldly challenged the ancient creed that human rights descend from some exalted prince and substituted a new doctrine—that all men are created equal, and just government receives its power from the consent of the governed.

The original States possessed colonial self-government under written charters granted by the king, but lacked a binding union providing a common defense and able to promote a general welfare. To establish this dual relationship, to adjust the control and define without conflict the respective powers between State and Nation was the supreme task of our Constitution builders. The product of their labors was a covenant comparable unto the bond of marriage, wherein State and Nation are joined in wedlock and each loves, cherishes, and protects the other.

The powers of the Federal Government are enumerated and specified, while the reserve powers remain in the States; and if denied to the States, reside with the people. Under this adjustment the Nation directs its force in channels Federal in character, and the States are likewise preserved in full integrity over affairs entirely local. Both sovereignties have developed a line of implied or necessary powers and have commanded the respect and obedience of a free people, whose hearts are loyal to both State and Nation.

On a sacred tripod in the Temple of Apollo at Delphi sat a Pythian priestess, giving responses to those consulting the oracle; likewise our Constitution is the oracle of law, order, and civic conduct, and is supported by a sacred tripod. The oracle speaks and Congress enacts our laws; the oracle speaks again and the judiciary interprets our laws; the oracle speaks a third time and the Executive administers our laws. While working in ordered harmony, each of these three departments is a check and balance for the others, a novel but effective arrangement as provided in the Constitution. Each House of Congress is a check upon the haste, bias, or error of the other.

The Senate, the assembly of the States, checks the Executive in appointments and confirmation of treaties. The House, the popular representative body, holds the power to propose revenue measures, and, with the Senate concurring, to declare war and provide the ways and means for its successful prosecution. The Executive has a veto power over legislation, but both Houses concurring may override his denial by a two-thirds majority, and by a similar vote may propose amendments which, when ratified by three-fourths of the States, may modify the Constitution. To impeach the President, the House prosecutes and the Senate sits as a tribunal to decide the case. All such action must harmonize with the Constitution according to the interpretation of the judiciary.

The judiciary is the balance wheel of the machinery of our Government. The authority of last resort, the court is the voice of the Constitution. If war is to be avoided when States disagree, there must be a forum where conflicts may be settled. The President commands with the Army and Navy; Congress controls with the purse strings; but the court speaks with the still, small voice of justice and issues are adjudicated. Holding for life, not controlled by the tides of superficial sentiment, with hand on the wheel and eye on the compass, the court has piloted the old ship of state past many sunken reefs and bars. Let us stand unmoved, with confidence in the integrity and necessity for the courts, the guardians of the Constitution.

This triune system of government has a wonderful balanced adjustment, but final control remains in the political decision through the suffrage of the people. Under this practical scheme of limitation the President can not become a monarch, Congress can not assume despotism, and the courts dare not exercise tyranny.

Blazing a new trail for government, our Constitution makers foresaw the necessity for changes and wisely prescribed therein methods for amendment. The Bill of Rights, added as the first 10 amendments, is the protecting roof to the walls of the temple, in preservation of the freedom of speech, of religion, of petition and assembly, of trial by jury, and prevention of unlawful invasion of the home. From Runnymede's Magna Charta until Jefferson urged their incorporation into our Constitution these ancient common-law demands have proved to be the bulwark of Anglo-American liberty.

Amendments following the Civil War contributed to a broader democracy. Slavery was forever abolished and citizenship defined. The Bill of Rights was supplemented by preventing the States from abridging the privileges and immunities of citizens, of depriving them of life, liberty, or porperty without due process or by the unequal protection of the law. The individual, surrounded by the amended Constitution, can not become the victim of the arbitrary discrimination or prejudice of any State.

Taxation of incomes from whatever source derived is a departure from former Federal methods, based upon apportionment to the States according to enumeration. The scheme of a graduated income tax places the burden upon those best able to bear it.

In their respective realms both State and Nation possess inherent police powers to protect the health, morals, and safety of the body politic. Based upon this accepted authority, the eighteenth amendment outlaws that archenemy of humanity, in destruction of life second only to war—the traffic in alcoholic liquor. The States have ratified; the majority has spoken; our plain duty is to obey.

Suffrage is not an inalienable right of citizenship, but is controlled by the States, subject only to the limitations of the fifteenth and nineteenth amendments, which prohibit discriminations on account of race, color, servitude, or sex. When we have granted suffrage to the Territories and the District of Columbia equality will uniformly prevail and our country will be entirely democratic.

What makes our Nation great?

What it does for its people and what it contributes to the progress of the world. The Jewish people gave the world a religion; Greece contributed learning and art; England united the world with its commerce; but America's distinct contribution is in the science of government. There is something more than imagination and sentiment about this 130-year-old Constitution. It is grounded upon virtue, wisdom, sacred theories, and phenomenal principles. If it has lived triumphant through civil war, industrial upheavals, and foreign conflicts, why is it not worthy of our reverence? Why is it not a marvelous document? Why should not every person cling to it and desire no other? The Constitution is the one supreme law of this Nation and its people, our country's only hope. Let us love it as the Bible, cheerfully obey its mandates, and diligently seek its enforcement. Then and only then may each of us rightfully boast, "I am an American citizen."

MINUTE MEN'S CONSTITUTIONAL AMENDMENT

Mr. UPSHAW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the prohibition amendment bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. UPSHAW. Mr. Speaker and gentlemen, under leave granted me by the House I am giving here a brief statement on a vital question of legislation. At the request of Frank J. Batcheller, chairman of the national committee of the American Minute Men, of which organization I have the honor to be a member, I have presented to the House of Representatives in support of the Minute Men's constitutional amendment to prohibit sectarian appropriations, resolutions from religious and patriotic organizations whose total membership considerably exceeds 10,000,000 citizens. It is not my intention to discuss this amendment at length at the present time; I expect to do that when Congress convenes for its regular session next December, at which time a determined and, I trust, a successful

effort will be made to secure the passage of the measure. But now I wish merely to say a few explanatory words concerning the amendment and the great, unselfish organization which came into being for the express purpose of helping to place this amendment in the Constitution.

This measure, House Joint Resolution 159, if added to the National Constitution, would absolutely prohibit appropriations of public money for sectarian schools and other religious institutions and would terminate all controversy over the matter. In the minds of thinking men, it would forever remove any real cause of religious controversy from American politics. The measure is in every way eminently just and fair. It treats every religious body exactly alike. The Government, remember, must be the protector of all churches, but it must not be the patron of any.

There is a very real need for the amendment. In several States large amounts of public money are appropriated regularly for sectarian institutions. In several other States frequent attempts are made to secure such grants, many of the efforts being successful. Open demands have been made for State support of sectarian schools in different parts of the country, and actual attempts have been made to secure such appropriations in Rhode Island, Maine, and Illinois, the effort being successful in the last-named State, and hundreds of thousands of dollars being given to the religious schools of one denomination. There is no provision in the National Constitution to prevent sectarian appropriations by Congress whenever the element favoring such grants can secure the necessary votes in this body. These facts have convinced thinking citizens that this great issue must be met by the American people, and I believe that the statesmanlike way to settle the question is by the adoption of the Minute Men amendment.

The American Minute Men, the movement which originated the amendment and which is leading the fight in its behalf, is in no way connected with any other society or organization. It aims to prohibit sectarian appropriations; that and nothing else. It is in no sense of the word narrow, bigoted, or intolerant. It stands for broad American principles in a broad American way.

Its present membership is at least 5,000,000, and that membership is composed of men and women of the highest possible standing. I am well acquainted with the membership of the movement in my own State, and I have met large numbers of its leaders in other sections of the country, and I have no hesitation in saying that there are few organizations in the entire country that equal, and none that excel, the American Minute Men in the moral and mental caliber of their membership.

Every member of this body will, I think, soon be convinced of the truth of this statement, for before Congress reconvenes each of you will receive a communication from the committee on national legislation of the Minute Men, urging the speedy passage of the amendment, and signed by 1,000 citizens who are proud to acknowledge their membership in the organization. Included among the signers are many bishops, many college presidents, leading clergymen of almost every religious denomination, and laymen of the highest standing.

Cooperating with the honored Speaker of this House in filing these resolutions, we bring to you the militant sentiment of 10,000,000 citizens—the first public display of the strong national sentiment in support of the proposed constitutional amendment. This does not mean, however, that the work for the measure has just commenced. Far from it. For several years quiet, systematic, educational work has been going on all over the country, until to-day in every city and town there are large numbers of patriotic, unselfish men and women who are prepared to devote their time, their thought, their energy, and their votes to the permanent settlement of this question of sectarian appropriations. And the work that has built up this great movement has been entirely a labor of love and of patriotism, for no officer of the Minute Men receives any salary or substantial recompense of any kind for his services. There are no dues of any kind connected with the organization, the necessary expenses being met entirely by voluntary contributions.

This amendment, which has been indorsed by civic, religious, and patriotic organizations all over America, is necessary to correct widespread abuses as natural as human nature itself. Of course, no man can object to such a law, except somebody who wants to get his hand in the Public Treasury for his own particular creed. Such an amendment is as fundamental as the very spirit of our Constitution—a spirit, alas, which has often been abused for lack of this specific provision.

If Roger Williams was right in teaching that the State has no right to coerce any person's conscience in the realm of religion, then this constitutional amendment is right in demanding that no man's purse shall be coerced for the sake of promoting another person's sectarian views. Its enactment into law will be the tardy triumph of the very essence of real Americanism.

### SHALL COOLIDGE AND PROSPERITY BE UPHELD

Mr. BACON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. BACON. Mr. Speaker, in this campaign of 1924 we as a people are to determine whether we are to uphold the sane and sound achievements for national and world advancement wrought under the administration of Presidents Harding and Coolidge and stand by a man who personifies the highest American ideals of simplicity of life, loftiness of character, and unquestioned ability, or turn the Government over to the party of negation and disaster.

No matter what specious attempt may be made by the Democratic Party to divert the public mind, there is but one issue and that is whether Calvin Coolidge shall be permitted to remain at the head of our Government during the next four years. The party of Lincoln and McKinley and Roosevelt and Hughes has a record of unparalleled accomplishments. Its leadership and its principles were never of a higher standard than now. Yet the Republican Party is content this year to present to the country a man. It invites opposition and criticism. It defies any to find a flaw in a President whose singular fitness for his office has appealed to every American.

Calvin Coolidge was born on a farm in Vermont and reared in the very atmosphere of old New England traditions of all that is best in Americanism. As a boy he breathed the spirit of a Puritan ancestry, of sincere regard for the Constitution and the independence of our fathers, of reverence for God and the right as his conscience taught him to see the right. So that when he was graduated from Amherst College and the law he was in character already prepared for that high place to which destiny was to call him. And then for 30 years he devoted himself unstintedly to the Commonwealth of Massachusetts, doing his simple duty day by day and still living, even when governor of the State, in one side of a double house at Northampton, for which he paid a rental of $32 per month. He and Mrs. Coolidge had no servants. They reared their two boys as they themselves had been reared—he as a farmer's boy and she as a school-teacher—and these boys are now in college. In the Boston police strike he did not flinch, but with characteristic determination and vigor quelled disorder in an hour. When the stage was set for the nomination of another in the convention his name and his exploit captured the delegates, and he was named Vice President. When the tragic moment of the death of Warren G. Harding came, while a Nation mourned as the body was carried across the continent, he had been raking hay on his father's farm in Vermont. In the night he was awakened from that sound sleep which the tiller of the soil always earns and by the light of the kerosene lamp and the old family Bible was sworn in by his aged father. Born on the Fourth of July and the very expression of all that a Vermont fireside may mean, he thus became President of the United States, the most exalted office in the world.

With quiet courage he faced the problems of government. More like Lincoln in the simplicity of his origin and of his life and character than any other President we have had, he at once made the country feel safe in his hands. He seemed like a breath of air from the Vermont hills. In his annual message Congress became aware that a new voice was speaking for America and that he had the certainty of mind to grasp and hold leadership. Directly for or against every proposal, none doubted where he stood or on what grounds. This impression was later augmented by his Lincoln Day and other addresses. With marvelous grasp of our problems, he expressed them with a terseness and a clarity which convinced and captivated everybody.

In the primaries of his party he swept every State, including that of his leading opponent. Even those in Congress who clamored for the bonus and passed it over his veto could not but admit his manly courage and his withholding no objection he could think of. Some differed with him and amended the perfection of the suggestions he had made, but the great measures for the restriction of immigration and the reduction of taxation which were enacted during the present year, he urged and demanded in the interests of the people and to him the credit is due for them. When he found that the retention in office of some of his associates in the Government was no longer compatible with the public interest, he did not shield them as

men of his own party, but courageously and immediately demanded their retirement. And thus in a few short months of power as Chief Executive he stands forth as a typical and great American, expressive of all the simple honesty, courage, capability, and experience in public affairs which the man who occupies that high office ought to possess. Proving himself so worthy of continuance in power, I have no doubt that he will be triumphantly elected in November.

Calvin Coolidge stands, and honestly stands, for sound and right principles of government. He does not believe in class rule. He does not favor pandering to the selfish interests of any section or group. He does not like blocs. He is for a government of all of the people. Consistently he has let it be known that he is not a demagogue and that he would not seek to gain votes for himself at the expense of the taxpayers. Since he was sworn into office he has been charged with all the responsibility of the executive branch of the Government, and has had behind him only an ostensible Republican majority in the legislative branch. A small minority under the label of the Republican majority has voted with the Democratic Party for semisocialistic measures. Always under some specious pretense of helping the ills of some in the community, these demagogues have let it be known in a very modest way that they are really the only patriots left in the country and the only ones who defend the interests of the people!

The great body of Republicans in the House and Senate have supported the President. Both he and they have had to confess to a Republican minority in the Congress, to a lack of support to carry through their program of the last few months, to partisan efforts of the Wisconsin brand of Republicanism to destroy the great party whose name it bore. Nevertheless, the President has secured the main objects he has sought—tax reduction and restriction of immigration—and at the close of the Congress he stands forth as not only a great leader of his party but of the independent thought of the country. That independent thought believes in the honesty of his purposes and his convictions and in a maelstrom of charges, counter charges, badinage, and epithet surrounding the many investigations conducted for partisan purposes believes his is the still small voice speaking for sanity and common sense and good government.

With Calvin Coolidge in the White House the people have confidence in their President. And as the result of a large Republican majority in Congress when the tariff act was passed we have a prosperity which can not be assailed by the Democratic Party and which the people will vote in November to sustain, because a Republican Congress has assured prosperity by a protective tariff, has limited immigration and labor competition until American wage earners could find work, and has caused such industrial rehabilitation as to reduce the number of unemployed in this country from 5,000,000 at the close of the Wilson administration to practically none except the normally inactive at the present time. It is certainly advisable to again choose a large Republican majority in Congress in order that those benefits may be continued.

We can not but recall the fact that the Democratic Party failed to prepare us for peace just as it had previously failed to prepare us for war. Thus in the 15 months between the inauguration of President Wilson and the outbreak of the European war the lack of tariff protection threw 1,000,000 workers out of employment. After the armistice and the removal of the barrier against imports caused by the war the lack of this protection again resulted in unemployment. The Democratic administration remained inert and apathetic in the face of growing economic depression. On December 7, 1918, the United States Employment Service of the Department of Labor, then under Democratic control, reported 16 cities showing a labor surplus of 22,000.

This number grew until on March 8, 1919, it reported 373,175 out of work. While the Democratic administration was watchfully waiting to see when this trend toward hardship and want would cease, it did nothing to prevent it, and the surplus continued to grow at the rate of 5,000 and then 10,000 per week until a total of 5,550,000 was reached less than 12 weeks after Mr. Wilson retired, following upon the defeat of his candidate by a majority of 7,000,000 of votes.

The Republican Congress remedied this condition when it came into power by stopping the immigration of foreign labor, used to cheaper standards of living, and by enacting a tariff sufficiently high to protect American industry, and therefore American wage earners, from an inundation of goods made in countries where lower wages and standards prevail. President Harding also called a conference on unemployment, which devised ways and means of checking the downward economic trend. This conference, which was impartially selected, adopted progressive remedies, such as the stimulation of building activity.

The results of these Republican measures are proven by the figures gathered from reports by the United States Employment Service. On October 31, 1921, a total of 1,560,155 were employed by 1,428 industrial concerns in 65 cities. Each of these concerns usually employed 500 or more and altogether maintained a normal pay roll of 1,600,000 workers. A year later these same plants employed 1,766,599, an increase of 18.3 per cent. To-day the same employment service reports that industry has recuperated from Democratic bad times to such an extent that the Nation has not enough labor for the building trades and has for two years suffered a severe shortage of common labor.

It is true that there is usually a falling off in the spring and summer of a presidential year, due to the uncertainty among business men as to whether a Republican protective tariff will be continued, but this year it can not be denied that there is widespread prosperity throughout the country. It seems to me inevitable, then, that a Congress will be chosen which will vote for such protective measures as will keep our mills going, give employment and high wages to our labor, and further enhance a great business revival. American prosperity and an American protective tariff are synonymous. Grover Cleveland and Woodrow Wilson, the only two Democratic Presidents since the United States became a manufacturing nation after the Civil War, brought hard times and unemployment as a consequence of their tariff-for-revenue-only policy. Republican Presidents, sustained by Republican Congresses capable of enacting a protective tariff, have brought such good times as to make this the first industrial nation in the world. It should be apparent to every manufacturer and every wage earner that facts are better than promises and that their welfare will best be subserved by the reelection of a Republican administration.

Confidence in the President and the prevalence of prosperity are worth voting to maintain. These objects appeal to every American. But when he feels in his pocket the musical jingle of more coin than would be there if the Republican administration had not reduced expenditures and taxation, he has an added incentive to vote for Republican candidates this fall. When President Harding took over the reins of government by a vote in the Electoral College which would have been unanimous had it not been that some of the southern brethren are still voting for Andrew Jackson, the state of the country was deplorable indeed. In spite of much talk, there was no Budget system. The Democratic administration had been wasteful and extravagant. Two billions of dollars had been wasted in an attempt at Government operation of the railroads. Another billion was wasted in aircraft materials which were never used. Still another billion was thrown away in Government management of the telephone and telegraph systems. Three billions were bartered upon the experiment of operation of shipping lines by the incompetent administration. In the last year controlled by a Democratic majority in both branches of Congress the total appropriations were $6,455,000,000. Everybody remembers the general breakdown of the Postal Service, the demoralization in the War Risk Bureau, the lending of hundreds of millions to foreign governments after the war had been successfully concluded, and the granting after the armistice of immense contracts for materials which never could be used.

Contrast with this the wonders in Government finance wrought by a Republican Congress and a Republican administration. In the first session of the new Congress appropriations were cut down to $4,780,000,000. This total has been steadily reduced until this year it is approximately $3,780,000,000. Of the public debt $4,500,000,000 has been paid off, with a consequent reduction of $200,000,000 in the annual interest. The debt is being further reduced at the rate of $500,000,000 a year. An arrangement has been made with Great Britain whereby that Empire pays on her debt to us $160,000,000 a year during the next 62 years. The protective tariff has not only yielded $550,000,000 annually in revenue but has stimulated the purchasing power of all of the people and made it much more possible for them to bear their burdens. Liberty bonds have so reacted to this governmental financing as to increase in value from 85 to par. A saving of $5,000,000,000 to the taxpayers of the United States during the following 10 years was made possible by the conference on limitation of armaments.

The number of unnecessary employees placed on the Federal pay rolls by a Democratic administration was reduced by 47,780 in the District of Columbia and by 356,897 in the entire country. The personnel of the Army was reduced from 284,000

to 125,000 and of the Navy from 193,000 to 86,000. A budget system was inaugurated, with resultant unification of bureaus and agencies. In the United States Senate 41 useless committees were eliminated.

This would not have meant so much to the taxpayer if the Republican Party, responsible for these splendid accomplishments in economy, had not at the earliest moment possible reduced taxes. Thus with the enormous work in economy done by the first of the Republican Congresses following upon the repudiation of the Democratic administration a revenue law was enacted which reduced taxes by $819,000,000 a year. Thereafter further economies were continued by the enthusiasm of President Harding and then of President Coolidge, with the result that last year the National Treasury reported a surplus of $300,000,000. Hence it became possible to further reduce the tax burdens of the people. And so President Coolidge urged upon the Congress that there be a reduction of all taxable incomes by approximately 25 per cent. He proposed also that the surtaxes on large incomes be reduced to 25 per cent in order that the revenue which would otherwise go to the Government might enter into new enterprise and stimulate industry. Because of the Wisconsin minority acting with the Democrats this was refused, though the very high taxes were somewhat reduced. But the President was responsible for the tax reductions, which are a source of gratification to every American, first because tax bills are less, and second, because with declining taxes must come declining prices. It is estimated that the total reduction per annum will vary but in three years will total $400,000,000 a year.

Prosperity has by this tax measure been made more secure. It has been further augmented by the policy of the Republican administration toward immigration. Immediately after the war when a tide of foreign labor seeking easier living conditions began to enter our ports, in spite of the fact that millions of our wage earners were facing unemployment, it became apparent that if that tide continued our workers would be unable to compete with them and both would seriously suffer. It was therefore determined by the Republican majority in Congress that the number of those permitted to come should be restricted to 3 per cent of the nationals in the country in 1910. That law was for five years and was to expire July 1, 1924. It therefore became imperative at the present session of Congress that a decision be made as to whether such restriction be continued, whether all restriction should be done away with as in the past, or whether a new method should be arrived at. In the meantime it had become apparent that with the intensive development of the country and consequent concentration of population a policy of future unrestricted immigration would be suicidal to our labor and to our industrial structure generally. It was also felt that our Americanism should be further protected by such restriction as would not only be fair to all races and promote the assimilation of those already here, but would also be fair to the United States. It was therefore suggested in Congress, and I actively supported the suggestion, that future immigration should be confined to a small percentage of those who have made America what it is; that is, of the descendants of all who have come to our shores from other lands, from the time of the founding of our country to the present day. This suggestion was enacted into a law restricting the entire immigration every year to 150,000, to be apportioned according to the national origins of all now in the United States, American-born as well as foreign-born. In other words, English, Scotch, Irish, Germans, Italians, Swedes, Norwegians, Poles, and all other races will be permitted to make up their share of the 150,000 to be admitted annually in exact proportion to those of their race now in the country. Thus, restriction has become a national policy and on such a fair basis and for such patriotic reasons that none can complain. The President had urged further restriction in his annual message and said, "America must be kept American. For this purpose it is necessary to continue a policy of restricted immigration;" and again, "Those who do not want to partake of the American spirit ought not to settle in America." He is therefore largely responsible for a measure which safeguards America for Americans in the years and perhaps the generations to come.

For the farmer many measures were enacted to better his condition. During the war he had had his wheat price held down to $2.26 a bushel by a southern-controlled Democratic Congress while cotton was permitted to soar beyond reason. Under a Republican Congress he found immediate relief. An emergency tariff act was passed to protect our agricultural products from competition with cheaper foreign staples and this at a time of rapid decline in agricultural prices. When the more permanent tariff act was not enacted into law these highly beneficial emergency rates were continued. Grain exchanges were regulated so as to prevent gambling in the price of such staples. Through the War Finance Corporation $500,000,000 was extended in relief credits to the farmer to help him over his period of readjustment.

Cooperative marketing was legalized. The Government took over control of the packing industry and guaranteed the farmer an open market for the sale of his livestock. A real farmer was made a member of the Federal Reserve Board. The rate of interest on farm-loan bonds was increased in order to make them more marketable. In the present Congress it was proposed that the Government enter the business of farming on a vast scale. This could not be done without diminution of that spirit of initiative which has made America the first industrial nation in the world. Under the McNary-Haugen bill it was proposed to create an agricultural export commission through which there might be organized a corporation to engage in buying and exporting farm commodities; that this commission might establish a price ratio to be paid for them; that the sale within the United States of similar commodities be limited through the purchase of the surplus and the prevention of foreign imports; that cash and credit be extended by the Government to cover losses incurred by the corporation; and that all buyers use credit receipts for these farm staples and redeem them at the end of the year out of the export surplus disposed of by the Government. This measure was a mixture of the methods of the United States Grain Corporation adopted during the war strictly as a war measure and those of pure socialism. Fortunately it was voted down by a majority intent on keeping the Government out of the direct conduct of business and especially on preventing it from embarking upon the field of socialism on so vast a scale. It was well meant, but not for the advantage of the farmer in the long run. When the great measures enacted by a Republican Congress for the benefit of the farmer since the Democratic Party was swept out of power by a landslide, it must be conceded, in view of the nature of the McNary-Haugen bill, that the farmer has been assisted within sound lines and together with other measures enacted for his relief is well on the way to recovery from the decided slump in prices following upon the tremendous inflation of the war days when the rest of the world was not producing and yet was buying prodigiously of all that America could raise to feed and clothe vast armies. From 1921 our imports of all commodities increased from $3,761,000,000 to $5,353,000,000, and our exports from $5,353,000,000 to $6,025,000,000 in 1924. These figures are the highest in our history.

In addition to the stupendous achievements wrought by a Republican administration for the prosperity and welfare of our people at home, it must be said that at no time in our history has there been such a record achieved by us in foreign affairs as under the direct guidance of Charles E. Hughes, our masterly Secretary of State. During the war the votes of the Democrats in Congress were 67 per cent in favor of the war measures which were adopted, and the votes of the Republicans were 72 per cent in favor of those measures. Immediately after the war, when it was suggested by President Wilson that the United States enter the League of Nations, this same patriotic Republican membership in Congress opposed him on the ground that it would be unpatriotic to impair our sovereignty and integrity as a nation in order to do so. They held that this course would utilize the vitality of the American people to uphold in perpetuity the suzerainty of some peoples over other peoples. President Wilson called for a great and solemn referendum, which, as a Democratic Senator afterwards expressed it, was great for the Republicans and solemn for the Democrats. President Harding obeyed the 7,000,000 mandate of the people and consistently opposed the league. President Coolidge as consistently has opposed it. But both recommended a policy of extending the peace of the world through a world court for the settlement of international disputes, through conferences for better understanding among the nations, through helpfulness in the distribution of necessary aid to starving peoples, and through the settlement of the vexed reparations question upon a just and therefore lasting basis which would assure European recuperation. In the last three years 50 treaties have been signed by the United States. Secretary Hughes is authority for the statement that billions of American money have been put into investments abroad for the aid of economic recovery. The limitation of naval armament alone will stand forth in history as a great event which marked the beginning of a new era. The United States was made the equal of Great Britain in naval strength, and the total construction of all of the great nations was reduced to such an extent as to greatly relieve the tax-burdened peoples of those countries. Even more important than that, if possible, was the establishment of a new understanding in the Far East, whereby

the Anglo-Japanese pact of so many years was brought to an end and a four-power treaty between the United States, Great Britain, Japan, and China was adopted and the "open door" in the Orient assured for the future. Even more harmonious relations with Latin America were fostered. In Mexico the stable government of Obregón was upheld and another ruinous and perhaps prolonged revolution prevented.

In opposition to the solid achievements of the Republican administration and its appeal to the youth of the country we have the vain promises and futile appeals to demagogism of the Democratic Party. In 1910 it was the Democratic Party that declared with great solemnity that it would reduce the cost of living and bring it down to the market basket of the average housewife. No sooner had it entered into power, following upon the Republican split into two factions, than prices went soaring. It had declared that a market basket containing 15 articles had risen in price from $8.28 in 1896 to $15.59 in 1910, and that therefore the Republican Party ought to be turned out of power. It was. The Wilson administration came in, and then the price of the same articles mounted until in 1918 they totaled $30.87. It was all bunk. Not content with this, the Democratic Party said in 1916, when Charles E. Hughes was the opposing candidate, that it would keep the country out of the war, for which leading Republicans had been pleading preparation. On that issue it won the election, and the country entered the war which a Democratic President on August 19, 1919, admitted to have been inevitable. In 1920, unabashed by this record, it declared that it would keep us out of all further wars by entrance into a League of Nations. This was too much for the country to believe, and the Democratic Party was repudiated. This year it returns again, trusting that the memories of the people are short and that it can convince them that the Republican record of achievement of the last three years as contrasted with the previous eight Democratic years of demoralization is not fact but fable, and that the Teapot Dome revelations reveal a corruption of the entire Republican administration which should meet with the stern disapproval of the people and the turning over to the Democratic Party, the true servants of the people, of all branches of the Federal Government.

It is true that one or two in very high places in the Republican administration were accused of crookedness. I shall not attempt to deny that. A crook was found in the Cabinet during the administration of General Grant, but that did not prove General Grant to be one, nor did it undermine the faith of the American people in their Government or cause the country to go Democratic. I do not minimize any offense. It would be idle for me to do so. But I do say that the honesty and integrity of Calvin Coolidge have never been questioned, and that he has been as unswerving in his determination to get at the facts and punish the guilty as any Democratic Member of Congress could possibly be. The offense of Albert Fall is not minimized by the fact that on Doheny's pay roll were four former members of the Cabinet of President Wilson; but that fact makes at once exceedingly hypocritical all of the scandal mongering from the lips of irresponsible criminals in an effort to besmirch an entire administration which has wrought achievements for the common good which can not be properly measured for another generation.

When President Coolidge appointed counsel of both parties and instructed them to proceed to see that justice was done, no matter who might be hit, and that the rights of the Government be protected, no matter whether Democrats as well as Republicans voted in Congress for the oil leases, he inspired the country with confidence and left the way clear for a correct appraisal of the true worth of the puerile and partisan investigations which have been carried on for months with the sole purpose of attaining Democratic campaign advantage.

Surely no one will attack the name or the fame of President Harding. His kindliness of personality and true Americanism can not be assailed. He was beloved by all the people, and so is his memory. None will contend that he was responsible for the character of Albert B. Fall. President Harding's abilities and achievements were great, and the respect in which he is held by his countrymen is not lessened by scandal bearers nor by the fact that a member of his Cabinet did that which Warren G. Harding never would have done. Neither can anyone say that Calvin Coolidge is less honored because he was Vice President in an administration in which a Cabinet officer was found to have taken some money he should not have taken. Coolidge and not Fall is responsible for the Government—thank God! And Coolidge is the kind of man who will carry it past any crook who may for a time hold high place in it, and carry it safely on its way to grander and greater things.

We are entering upon a new era of development and a new generation in America. The old leaders are passing away and new ones are coming to the front. The radio and a thousand means of communication between man and man are awakening us to the new possibilities of life in our time. We must tie to the forces which make for all the best in the American spirit and the American ideal. The Republican Party is the party of Lincoln, of the abolition of slavery, of the preservation of the Union, of the development of the country, of peace and progress and prosperity and respect for our institutions and our law. We must uphold it in this campaign as the basis of our prosperity and the hope of the youth of our land. Calvin Coolidge best represents to-day the manly bravery and simple honesty of Lincoln. The country has turned to him. It will be vindicated in his election to the highest office in the gift of the people.

### THE BARKLEY BILL

Mr. CROSSER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the Barkley bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. CROSSER. Mr. Speaker, there is always, of course, a great difference of opinion as to whether or not propsed laws would, to speak in the language of the Constitution, "promote the general welfare," but I am firmly convinced that the proposed railway labor act would serve that end.

Everyone would say that it is desirable to have harmonious relations between the management and employees and consequently, therefore, uninterrupted operation of the railroads.

If, therefore, we wish to have industrial peace, established by agreements made by men representing the opposing sides of disputes, by men who make such agreements free from the threat of economic pressure and free from the feeling of being at a disadvantage before the law, then the Barkley bill, proposing the railway labor act, will secure that result more fully than any law yet enacted by Congress.

The bill requires, first, that the parties confer with each other in their own way in an effort to settle their disputes. If they fail to agree in this way, then their disputes must be submitted to the adjustment boards.

The provision for the adjustment boards, which is in my opinion the most valuable feature of the plan proposed by the bill, requires the parties to a dispute to meet each other through representatives of equal number and with authority to make public the facts concerning the dispute. Such representatives constitute the adjustment boards proposed in the bill. They are to be appointed by the President and paid by the Government. The bill provides for four such boards. Upon each adjustment board is imposed the duty of investigating and considering disputes between the companies and the workmen embraced within the classification of employees, jurisdiction of whose disputes with their employers is given to such board. The employee membership of such boards comprises, as far as practicable, representatives of all the classes of employees, jurisdiction of whose disputes with the managers is conferred upon such board. These adjustment boards, therefore, make certain of having on each side of disputes men who understand the railroad business and the methods of operation.

If the boards of adjustment fail to decide any dispute which may have been referred to them, the parties to the dispute may then put their case before the board of mediation and conciliation which is provided for in the bill. This board consists of five men, appointed by the President, and are not to be nominated by either the companies or the workmen. It is, therefore, a nonpartisan body as far as possible, and differs in that respect from the adjustment boards, which are equipartisan. If the board of mediation and conciliation fails to settle a dispute, it is required to induce the men and the companies, if possible, to agree to arbitration. If the parties agree to such arbitration, they may have a board of arbitration consisting of either three or six members.

If the parties agree upon a board of three members, then each party names one arbitrator, and the two arbitrators so named select the third arbitrator.

If the parties decide to have a board of six members, then each party chooses two members, and the four thus chosen select the remaining two. If the arbitrators appointed by the parties, either to the board of three or to the board of six, fail to select the remaining arbitrators as authorized, the Board of Mediation and Conciliation is required to name them.

A majority of the adjustment board shall be sufficient to render a decision. The same is true in regard to the boards of arbitration.

Mr. Speaker, I contend that the provisions of the bill are reasonably calculated to supply means whereby the parties, man to man, without any advantage by one over the other, may frankly and fairly state their side of a dispute and endeavor to settle their trouble.

Why, then, the bitter opposition which has been directed against the bill? If we will study the situation a little we shall see that the real objection is not what is expressly stated by the opponents of the bill. Read the history of railroad labor disputes since the enactment of the transportation act. Read the hearings before the committee of the United States Senate, examine the documents introduced in evidence before the Senate committee, and if you are impartially seeking the truth, you will see that the real objection is to dealing with employees collectively through their representatives. Oh, I know that if we were to accept fully the statements of the railroads we might reasonably suppose that they had decided to join with their employees in a society of brotherly love, but if you study the facts carefully, their real purpose becomes clear.

They do not, of course, begin by telling their workmen that they do not believe in labor unions and that they do not want to settle labor conditions with organizations of workmen. The representatives of the railroads are far too clever to start in that way. They understand the human mind too well to speak so bluntly. Oh, no; they usually assure their men that they believe them to be first-rate fellows and that organizations of such men as they are good things with which the companies would be only too glad to deal. They therefore encourage their men to form organizations of their own so that they can cooperate with the management, as they tell us, like "one large family." Their plan is to encourage this process until other groups and the men of other companies have been induced to separate from the national organizations, until the national organizations shall have been completely destroyed. Then comes the change of attitude on the part of the manager members of the society of brotherly love.

The workmen can be told then that business is business and that if they do not like the terms of employment proposed to them the employer can get other experienced men from other parts of the country, from other roads. The men then must either accept the terms, however objectionable or unfair, or beg the men who offer to take their places to join a national defensive organization, and it is generally too late to do that effectively.

In short, the men who may have been induced to divide into small organizations upon the plea that the companies are anxious to have independent unions of their own employees, and that they would be glad to deal with them, are, after the small organizations have taken the place of the big ones, told by the companies that every man must deal with the companies separately because the managers do not believe in collective bargaining. I do not charge that the managers are actuated by evil motives.

Their environment and the mental atmosphere of the employers cause them to believe that because they, by chance, have come into control of the material things which the workman must use in order to make his skill of value, they, the managers, have a right to dictate absolutely the terms and conditions of the workman's service. I do not say that the men who are induced to separate from their established organizations and persuaded to enter organizations nursed by their employers—I do not claim that these men are governed by evil motives. I know that they are doing what is easiest for the immediate moment and I realize that they have not seen the end from the beginning. They have simply failed to see that they have been victims of a process of separating them first into small groups and that finally they will be told that the employers insist upon the right to deal with them in the smallest possible "group" and that is "a group" consisting, so to speak, of one.

These confiding fellows have simply forgotten the old saying: "If we don't hang together, we shall hang separately."

Now, my friends, that explains the real objection to the bill. That explains the constant tirade of the railroads' representatives against the clause of the bill providing that nominations shall be made by the nationally organized crafts.

I realize that there are men who sincerely believe in a compulsory method of fixing wages and working conditions, and they can not appreciate the idea of settlement by negotiation. If, however, they will consider the matter carefully, they will see that any plan which involves arbitrary means of fixing the rates of compensation and working conditions, constitutes slavery, and I am sure that few, if any, wish to admit that they now believe in that doctrine.

The representatives of the railroads insist, however, that there are no company-created unions, and that we are unjust in saying that there are such. Let me call your attention to some evidence on that point produced at the hearings before the Senate committee. First of all let me read from the opinion of the Railway Labor Board in case 2130. I quote the following language:

> The employees had the right to select their organization, the Order of Railroad Telegraphers, to represent them in all negotiations with the carrier, but the carrier by absolute compulsion prevented the exercise of this right.
>
> The carrier assumed charge and control of the employees' election, formulated the ballot and the accompanying instructions over the protest of the employees' representatives, and proceeded to hold the election in accordance with its own arbitrary policy.

On pages 209 and 210 of the Senate hearings will be found a list of some 20 carriers who maintain organizations which the companies mentioned require their employees to join, and in many cases the company deducts the men's dues from their wages. For example, the Santa Fe road deducts from the pay of the men the dues which they owe to their company-created associations. The Rock Island system requires its men to join company unions and deducts their dues from their pay, and so it is with many other companies.

On page 211 of the hearings appears a letter from the general manager of the Missouri Pacific system to the chief master mechanics, superintendents, and other superior servants. I quote from the opinion this language:

> Explain to and urge upon any new employees or men who went out on strike and returned to work the plan of the association and the advantages of being in a position to deal with the management without regard to outside influence. * * *
>
> To accomplish the above and maintain interest in the association, please arrange for superintendents, shop superintendents, and master mechanics and their subordinate officers to keep in close touch with chairmen, committeemen, other association officers, and the men themselves. * * *
>
> Master mechanics will assist chairmen in maintaining lists of employees of each craft who are and are not members of the association; * * * * * * *
>
> The division and local mechanical department supervisory officers will arrange to be invited to attend association meetings of the men whom they supervise and should avail themselves of the opportunity. * * *
>
> Superintendents will talk regularly to master mechanics, foremen, committeemen, and other craftsmen with a view to keeping up interest in this association, knowing the number of members, and those eligible for membership, and ascertain the reason eligible employees are not members of the association.

In the case which arose between the Pennsylvania Railroad Co. and the Shop Craft Association, the testimony of the general manager of the Pennsylvania Railroad in regard to the employee associations promoted by the company, showed that the company had paid the salaries of the representatives, whom the men had elected as officers of the union, that they helped write their constitution, printed their constitution and by-laws, furnished them with officers and leaves of absence, and arranged conventions at which they were entertained.

Even the statements of representatives of so-called independent labor organizations who appeared at the hearing, apparently had been prepared by the management. For example, Mr. C. E. Anderson, who claimed to represent many independent organizations, said in his testimony concerning the preparation of his statement: "Suggestions came from different ones on the management side." This statement appears on page 282 of the Senate hearings. I could cite many more instances similar to those which I have just mentioned, but to those who are open-minded the facts already given will be sufficient to convince them as to the frequent adoption of such methods. Those who are not open-minded and not open to conviction, would not be persuaded if we were to produce tons of evidence uncontradicted.

Mr. Speaker, no one more than myself desires a cessation of industrial strife. To me it is not a fundamental remedy for the unjust distribution of wealth. I believe more could be accomplished in that respect by giving free play to the natural laws by destroying the monopoly of the earth and its resources exercised by the few to the disadvantage of the many, and by this means removing the cause which drives unreasonable numbers of men into competition for the same job and thus enables the man who has the employment to offer an exceedingly unfair advantage in the matter of determining the compensation to be paid.

I realize, however, the difficulty in getting men to consider fundemental remedies for any of the ills which beset society. For that reason, I consider it proper to support the best methods of collective dealing. It is the only way at present generally understood by which reasonable justice can be enforced. We must have independence and self-respect developed among the people of this country in general. That is more important to me than the particular wage which may be paid at this time, for when men are freed from fear and a feeling that they may be penalized if they offend their employers, they will then secure a reasonable return for their service. In short, it will establish a race of men who are really freemen, and that is far more important than the question as to how many dollars any member of society happens to have. There is not a man, whether or not he be the possessor of a vast amount of property and opposed to labor organizations, or, on the other hand, is a so-called workingman himself, who will not see that it is much more important that they leave to their posterity a society established on principles of justice, where every man has moral courage and self-respect to such an extent that he cringes before no man. It is far better, I say, that we leave that sort of legacy to our children than that we bequeath them material wealth equal to that of Crœsus. It is therefore for the benefit not only of the men who are members of the organization but ultimately for the benefit of the whole Nation that autocracy in the industrial world be opposed as much as we oppose it in the political world.

Mr. HOWARD of Nebraska. Mr. Speaker, I ask unanimous consent to address the House for one minute, and to extend my remarks in the RECORD upon the subject of one Gary, and one Nicholas Murray Butler.

The SPEAKER. Is there objection?

Mr. HILL of Maryland. Mr. Speaker, reserving the right to object, I shall not object if the House will grant me the privilege of printing the speech of Nicholas Murray Butler in the RECORD.

Mr. HOWARD of Nebraska. But these are my own remarks.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOWARD of Nebraska. Mr. Speaker, it is high time for the American people to get awake to the danger of the violent propaganda now being uttered by the great financial captains of the country—propaganda which clearly has for its object the subordinating of the power of the United States Congress to the will of the Chief Executive.

The chiefest promoter of this propaganda has been the United States Chamber of Commerce, an organization controlled as absolutely by the predatory interests as a schoolboy controls his own aggie. Recently the Literary Digest, the most dangerous agent of near-criminal wealth in all the world, specially presented the violent views of certain captains of industry who believe Congress has served its day, and that it is now time to either do away with the Congress altogether, or permit the Congress to consider only such legislative program as might meet the advance approval of the President.

In seeming effort to be absolutely fair and impartial in presentation of public opinions, the Literary Digest now requests several Congressmen to write their impressions regarding the sentiments uttered by Judge Gary, grand master of Steel Trust, and Nicholas Murray Butler, master of the predatory kennels, in which are confined the literary hounds of big business. I am one of the Congressmen selected by the Literary Digest to give my view of Gary, Butler, and other spokesmen for that element of our citizenship which is so desperately trying to pave the way for the subordination of the Congress to the will of the President. Accepting the invitation extended by the editor of the Literary Digest, I have made the following statement:

I am so very new in the Congress, in no sense a large figure here. But, while walking my quiet way among the Representatives and Senators of the people, I have not neglected to take measure of the men and their merits. Since boyhood days I have studied the lives and works of the men of mark in the Congress of the Nation, and instantly now, based upon that study in other days and upon my personal touch in these days, I am bold to express belief that at no time in our history has the Congress held upon its rolls the names of more true and faithful legislators than appear upon the rolls of the two Houses of the Congress now in session.

In capacity as a juror I have been frequently commanded by the court to be the judge of the credibility of witnesses and the weight of their evidence. Under such an instruction, while passing upon the testimony of Judge Gary, who has consigned the American Congress to the hottest corner of tradition's hottest hell, I fear I should feel it my duty to utterly reject the testimony of Judge Gary for two good reasons: First, that he is an overly interested party to the litigation now before the Digest court, and second, because his competency to testify on the subject of the merits of the Congress has in no sense been established.

Suppose I might now say that "the most un-American association of men in any legitimate American industry is the association of steel magnates." Well, perhaps the better thought of America might instantly accept that declaration as true, upon the theory that Judge Gary is a type of the average man among the magnates in the steel industry. But I hopefully deny that Judge Gary is a fair type of the average steel magnate. My own estimate of him beholds him as the most dangerous of all enemies of our American institutions. I regard him as an honest man, doubly dangerous because of his honesty. He honestly believes, as do all professional and profiteering patriots, that the hour is ripe for a change in our system of government. If he and his type might have their way they would instantly dissolve the Congress and confer exclusive and original jurisdiction upon the Chief Executive in all matters of legislation. Viewed from his standpoint as a nonbeliever in the plan of the fathers for three separate but coordinate branches of government, Judge Gary will be justified in saying that the present Congress is an evil body.

Only to-day a Member of the Congress told me a recent dream. In the dream he clearly beheld Madam Defarge. She was knitting. He dreamed again. She was unraveling her knitting and revealing the names of the enemies of our dear Republic. He dreamed again, and in the honor place among those enemy names he beheld the name of a professional patriot. He dreamed again. Now he saw the tumbrils rolling through the street, and in one of the tumbrils he saw and recognized the faces of many whose names had appeared in the unraveled knitting. The streets through which the tumbrils passed were lined with multitudes of the better part of American manhood and womanhood. Vast was the silence. Not a voice of protest was heard, not a cry for mercy raised in behalf of those who had presumed too far in their efforts to destroy the Republic by demanding that the Congress shall surrender its inalienable rights and privileges to the executive branch of the Government.

Suppose any average American citizen should to-day write or speak as viciously of the Supreme Court as Gary and Butler write and speak about the Congress. What would happen? Why, instantly such citizen would be branded by the big-business press as a dangerous radical, an I. W. W., and possibly an anarchist, and all the machinery of the law would quickly get in action to throw such a citizen into a Federal prison.

But why should the judicial arm of the Republic be regarded as more sacred than the legislative arm of our Government? The fathers built the Republic upon a foundation composed of three different stones—the legislative, the executive, and the judicial. In those building days each of those three separate and distinct branches of the Government was declared to be equal and all three coordinate. What has happened to lead to the assumption that the legislative branch of the Government should no longer perform its own functions, but should permit the executive and the judicial branches to perform the duties and exercise the prerogatives of that legislative branch which the fathers of the Republic so wisely provided? If it be a mark of bad citizenship to criticize the judicial or the executive branch of our Government, why shall it not be a mark of evil citizenship to criticize the legislative branch of Government?

For my part, I favor granting to every citizen full right of free speech in criticizing all three branches of our Government. In my capacity as a Member of the greatest legislative body in the world, acting specially for the people of my home district and generally for all the people of the Republic, I crave approval of my course when it shall meet approval of my fellow citizens, and I shall not fear criticism of my course. If it shall be a good course, criticism will not harm. If it be a bad course, then it ought to be criticized and condemned.

Once again referring to the scientific propaganda now being uttered by the predatory interests in their effort to subordinate the Congress to the will of the President, let me plead with all citizens upon whom my pleading may fall to awake to the danger of the hour. That danger lies in the possible success of the propagandists. And if their efforts shall succeed, and if the plan of the fathers of the Republic for three separate and distinct branches of government—separate, but always coordinate—shall be so changed as to remove the right of separate and distinct prerogatives in the legislative branch alone—

well, if that shall be accomplished, then the day of a dictator in Washington will dawn as certainly as ever dawned a dictator's day in Mexico.

Men who love the Republic ought to awake to the danger. It is not as difficult to keep a governmental dictator out of power as it is to throw him out after he shall have established himself in power.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its Chief Clerk, announced that the Senate had passed the following concurrent resolutions:

Senate Concurrent Resolution 21

*Resolved by the Senate (the House of Representatives concurring)*, That the President of the United States be requested to return to the House of Representatives the enrolled bill (H. R. 5325) conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes.

Senate Concurrent Resolution 3

*Resolved by the Senate (the House of Representatives concurring)*, That the report of the United States Coal Commission relative to the anthracite and bituminous coal industry, with accompanying papers, charts, diagrams, and illustrations (including not to exceed one supplemental volume), be printed as a Senate document, with contents and index, and that 5,000 additional copies be printed, of which 1,100 copies shall be for the use of the Senate Document Room, 100 copies for the use of the Committee on Mines and Mining of the Senate, 3,500 copies for the use of the House Document Room, and 300 copies for the use of the House Committee on Interstate and Foreign Commerce.

The message also announced that the Senate had further insisted upon its amendments to the bill (H. R. 8839) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and for other purposes, had requested a further conference with the House thereon, and had appointed Mr. PHIPPS, Mr. JONES of Washington, and Mr. BALL as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill (S. 1898) reclassifying the salaries of postmasters and employees of the Postal Service and readjusting their salaries and compensation on an equitable basis, and for other purposes.

WHAT POLITICAL PARTY SHOULD THE WOMEN CHOOSE

Mr. McKEOWN. Mr. Speaker, I ask unanimous consent to

The SPEAKER. Is there objection?

There was no objection.

Mr. McKEOWN. Mr. Speaker, through political parties is the only way a citizen can render service to one's country. This is the readiest and most effective means. The people do their political work through the agency of political parties; then it follows that political parties are the potent factors in developing political career.

Men, as a rule, inherit to a large measure their politics from their father or grandfather, but not so with the women of to-day. The voting job was suddenly awarded her, and the first thing that women desire to know when permitted to enter the political arena is "how to vote right."

Therefore the women of the Nation should affiliate with the party of their choice and exercise their political activity in and through some political party. An understanding of what the differences are between the political parties should determine with which one to be aligned with and support.

The Democratic Party should appeal to the women of the country on account of its unwavering stand for the rights of humanity. Every great humanitarian law written upon the statute books of the United States has been first championed by the Democratic Party and in nearly every instance written into the law by the hands of its lawmakers.

The great task of the Democratic Party is to develop and maintain a high quality of citizenship, and in this task it appeals to the women of America, who have always been strenuous and constant champions of good morals and good government.

Women, who are broad and unselfish in their love for the human race, are more susceptible to the attractions of the principles of the Democratic Party.

The Democratic Party appeals to the women of America because it stands for those things in public life which require unselfishness, courage, vision, and cleanness on the part of its public officers. It is opposed to special privileges; it is opposed to extravagant expenditures of money; it favors all those beneficent laws for the uplift and the betterment of unfortunate human beings and for the education and well-being of the whole of the American people.

Of course Adam blamed all his troubles on Eve, but it is some consolation to the women of the world that Eve did not eat the apple because it was good to look upon and pleasant to the eye but because it would make her wise. It evidently did make her wise, and she has transmitted that wisdom on down to her daughters through the ages, because ever since that time Adam has performed with great docility and uncomplainingly whatever task she has set him at, and no doubt this was one of the reasons that man postponed so long the granting of political rights to the women of the country.

One of the characteristics of the woman in politics is that she believes that political officeholders and political parties ought to stand for what they say they stand for, and for that reason women should require that the political party of her choice should show a history of unchanging principles and faithful discharge of public duties.

Therefore the women of our country, who are moved by unselfishness and who have contributed so much to the world, and whose vision is not circumscribed by a little ward or precient but looking to the general welfare of the great masses of 110,000,000 people, must be moved and induced to affiliate and support enthusiastically the party that stands for such principles.

The Republican Party through its Congress placed upon the statute books of our country a tariff law known as the "Fordney-McCumber Act," which hits women harder than men by declaring everything they wear a luxury and taxing everything they wear as though it was a sin for a woman to wear things of modest beauty. Women's wearing apparel is taxed under that law from 60 to 90 per cent. The tax on ginghams has been doubled, and imported dresses that cost a small sum in the foreign markets can not be purchased here except by the wealthy and very well to do. This tariff bars the beautiful handmade articles of wear which can be bought initially at a low cost but are increased five times by this measure.

One would not complain because only the rich are able to buy if the poor women in the foreign sweatshops were getting a part even of this increase, but such is not the case. The wealthy manufacturers of this country receive the money into their treasuries on account of this tariff.

The women of America, who bear the sons of the Nation upon whom fall the duty to bear the arms of defense, are entitled to first consideration in the matter of policies promoting peace.

The present Republican Congress has set aside the work of the disarmament conference held by President Harding. After we wasted $700,000,000 of good American money by scrapping warships in the process of construction, the present House of Representatives passed a bill to build $146,000,000 of new warships. This is done at the insistence of the war crowd. When they want money for the Army or the Navy they start a lot of war-scare stories in the papers and call every man a pacifist who dares even to call the attention of the American people to the amount of money spent on the Army or the Navy.

I want my country to be honest and sincere in its efforts to secure a reduction of armaments on land, sea, and air, and genuine peace in the world, that the sound of tramping soldiers to martial music, and the roar of guns in sanguinary conflict between nations will belong to a past and forgotten civilization.

LEAVES OF ABSENCE

By unanimous consent, leave of absence was granted to—

Mr. CELLER, indefinitely, on account of illness.

Mr. BURTON, for Friday and Saturday, on account of death in family.

Mr. HUDSPETH, for balance of the session, on account of important business.

WITHDRAWAL OF PAPERS

By unanimous consent, Mr. LEHLBACH was granted leave to withdraw from the files papers filed in support of H. R. 11256 of the Sixty-seventh Congress, no adverse report having been made thereon.

Also papers filed in support of H. R. 10174 of the Sixty-seventh Congress, no adverse report having been made thereon.

ORDER OF BUSINESS

Mr. CAREW. Mr. Speaker, when the House meets at 8 o'clock to-night do I understand that it is to take up the Consent Calendar?

The SPEAKER. The Consent Calendar and any business that may come over from the Senate, but no suspension of the rules.

HOUR OF MEETING TO-MORROW

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that when the House adjourns to-night it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. Is there objection?

There was no objection.

Mr. HULL of Iowa. Mr. Speaker, if the gentleman from Ohio will yield, are there any conference reports to come up to-night; and if so, what?

Mr. LONGWORTH. There may be some important business come over from the Senate. I can not tell.

RECESS

The SPEAKER. Under the order of the House heretofore made the House will stand in recess until 8 o'clock this evening.

Accordingly (at 6 o'clock p. m.) the House stood in recess.

---

## EVENING SESSION

The recess having expired, the House was called to order at 8 o'clock by the Speaker.

The SPEAKER. The Clerk will call the Consent Calendar beginning where we left off last night.

THE NORWEGIAN STEAMSHIP "HASSEL"

The first business on the Consent Calendar was the bill (H. R. 7558) to authorize the payment of an indemnity to the Government of Norway on account of losses sustained by the owners of the Norwegian steamship *Hassel* as the result of a collision between that steamship and the American steamship *Ausable*.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The Clerk read as follows:

*Be it enacted, etc.*, That there is hereby authorized to be paid to the Government of Norway, out of any money in the Treasury not otherwise appropriated, as a matter of grace and without reference to the question of liability therefor, as full indemnity for the losses sustained by the owners of the Norwegian steamship *Hassel* as the result of a collision on August 24, 1918, between that steamship and the American steamship *Ausable*, operated by the War Department, the sum of $164,169.23, as recommended by the President in his message to Congress of February 25, 1924, printed as Senate Document No. 52, Sixty-eighth Congress, first session.

The committee amendment was read, as follows:

Page 1, line 8, after the word "*Hassel*" insert the words "or any other parties pecuniarily interested."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

TO QUIET TITLE TO LANDS WITHIN PUEBLO INDIAN LAND GRANTS

The next business on the Consent Calendar was the bill (S. 2932) to quiet the title to lands within Pueblo Indian land grants, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of this bill? [After a pause.] The Chair hears none.

The Clerk read as follows:

*Be it enacted, etc.*, That in order to quiet title to various lots, parcels, and tracts of land in the State of New Mexico for which claim shall be made by or on behalf of the Pueblo Indians of said State as hereinafter provided, the United States of America, in its sovereign capacity as guardians of said Pueblo Indians, shall, by its attorney general, file in the District Court of the United States for the district of New Mexico, its bill or bills of complaint with a prayer for discovery of the nature of any claim or claims of any kind whatsoever adverse to the claim of said Pueblo Indians, as hereinafter determined.

SEC. 2. That there shall be, and hereby is, established a board to be known as "Pueblo Lands Board" to consist of the Secretary of the Interior, the Attorney General, each of whom may act through an assistant in all hearings, investigations, and deliberations in New Mexico, and a third member to be appointed by the President of the United States. The board shall be provided with suitable quarters in the city of Santa Fe, N. Mex., and shall have power to require the presence of witnesses and the production of documents by subpœna, to employ a clerk who shall be empowered to administer oaths and take acknowledgments, shall employ such clerical assistance, interpreters, and stenographers with such compensation as the Attorney General shall deem adequate, and it shall be provided with such necessary supplies and equipment as it may require on requisitions to the Department of Justice. The compensation and allowance for travel and expenses of the member appointed by the President shall be fixed by the Attorney General.

It shall be the duty of said board to investigate, determine, and report and set forth by metes and bounds, illustrated where necessary by field notes and plats, the lands within the exterior boundaries of any land granted or confirmed to the Pueblo Indians of New Mexico by any authority of the United States of America, or any prior sovereignty, or acquired by said Indians as a community by purchase or otherwise, title to which the said board shall find not to have been extinguished in accordance with the provisions of this act, and the board shall not include in their report any claims of non-Indian claimants who, in the opinion of said board after investigation, hold and occupy such claims of which they have had adverse possession, in accordance with the provisions of section 4 of this act: *Provided, however*, That the board shall be unanimous in all decisions whereby it shall be determined that the Indian title has been extinguished.

The board shall report upon each pueblo as a separate unit, and upon the completion of each report one copy shall be filed with the United States District Court for the District of New Mexico, one with the Attorney General of the United States, one with the Secretary of the Interior, and one with the Board of Indian Commissioners.

SEC. 3. That upon the filing of each report by the said board, the Attorney General shall forthwith cause to be filed in the United States District Court for the District of New Mexico, as provided in section 1 of this act, a suit to quiet title to the lands described in said report as Indian lands, the Indian title to which is determined by said report not to have been extinguished.

SEC. 4. That all persons claiming title to or ownership of any lands involved in any such suit or suits may, in addition to any other legal or equitable defenses which they may have or have had under the laws of the Territory and State of New Mexico, plead limitation of action, as follows, to wit:

(a) That in themselves, their ancestors, grantors, privies, or predecessors in interest or claim of interest, they have had open, notorious, actual, exclusive, continuous, adverse possession of the premises claimed, under color of title from the 6th day of January, 1902, to the date of the passage of this act, and have paid the taxes lawfully assessed and levied thereon to the extent required by the statutes of limitation, or adverse possession of the Territory or of the State of New Mexico, since the 6th day of January, 1902, to the date of the passage of this act, except where the claimant was exempted or entitled to be exempted from such tax payment.

(b) That in themselves, their ancestors, grantors, privies, or predecessors in interest or claim of interest, they have had open, notorious, actual, exclusive, continuous, adverse possession of the premises claimed with claim of ownership but without color of title from the 16th day of March, 1889, to the date of the passage of this act, and have paid the taxes lawfully assessed and levied thereon to the extent required by the statutes of limitation or adverse possession of the Territory or of the State of New Mexico, from the 16th day of March, 1899, to the date of the passage of this act, except where the claimant was exempted or entitled to be exempted from such tax payment.

Nothing in this act contained shall be construed to impair or destroy any existing right of the Pueblo Indians of New Mexico to assert and maintain unaffected by the provisions of this act their title and right to any land by original proceedings, either in law or equity, in any court of competent jurisdiction and any such right may be asserted at any time prior to the filing of the field notes and plats as provided in section 13 hereof, and jurisdiction with respect to any such original proceedings is hereby conferred upon the United States District Court for the District of New Mexico with right of review as in other cases: *Provided, however*, That any contract entered into with any attorney or attorneys by the Pueblo Indians of New Mexico to carry on such litigation shall be subject to and in accordance with existing laws of the United States.

SEC. 5. The plea of such limitations, successfully maintained, shall entitle the claimants so pleading to a decree in favor of them, their heirs, executors, successors, and assigns for the premises so claimed by them, respectively, or so much thereof as may be established, which shall have the effect of a deed of quitclaim as against the United States and said Indians, and a decree in favor of claimants upon any other ground shall have a like effect.

The United States may plead in favor of the pueblo, or any individual Indian thereof, as the case might be, the said limitations hereinbefore defined.

SEC. 6. It shall be the further duty of the board to separately report in respect of each such pueblo—

(a) The area and character of any tract or tracts of land within the exterior boundaries of any land granted or confirmed to the Pueblo Indians of New Mexico and the extent, source, and character of any water right appurtenant thereto in possession of non-Indian claimants

at the time of filing such report, which are not claimed for said Indians by any report of the board.

(b) Whether or not such tract or tracts of land or such water rights could be or could have been at any time recovered for said Indians by the United States by reasonable prosecution of any right of the United States or of said Indians. Seasonable prosecution is defined to mean prosecution by the United States within the same period of time as that within which suits to recover real property could have been brought under the limitation statutes of the Territory and State of New Mexico.

(c) The fair market value of said water rights and of said tract or tracts of land (exclusive of any improvements made therein or placed thereon by non-Indian claimants) whenever the board shall determine that such tract or tracts of land or such water rights could be or could have been at any time recovered for said Indians by the United States by seasonable prosecution of any right of the United States or of said Indians, and the amount of loss, if any, suffered by said Indians through failure of the United States seasonably to prosecute any such right.

The United States shall be liable, and the board shall award compensation, to the pueblo within the exterior boundaries of whose lands such tract or tracts of land shall be situated or to which such water rights shall have been appurtenant to the extent of any loss suffered by said Indians through failure of the United States seasonably to prosecute any right of the United States or of said Indians, subject to review as herein provided. Such report and award shall have the force and effect of a judicial finding and final judgment upon the question and amount of compensation due to the Pueblo Indians from the United States for such losses. Such report shall be filed simultaneously with and in like manner as the reports hereinbefore provided to be made and filed in section 2 of this act.

At any time within 60 days after the filing of said report with the United States District Court for the District of New Mexico, as herein provided, the United States or any pueblo or Indians concerned therein or affected thereby may, in respect of any report upon liability or of any finding of amount or award of compensation set forth in such report, petition said court for judicial review of said report, specifying the portions thereof in which review is desired. Said court shall thereupon have jurisdiction to review, and shall review, such report, finding, or award in like manner as in the case of proceedings in equity. In any such proceeding the report of the board shall be prima facie evidence of the facts, the values, and the liability therein set forth, subject, however, to be rebutted by competent evidence. Any party in interest may offer evidence in support or in opposition to the findings in said report in any respect. Said court shall after hearing render its decision so soon as practicable, confirming, modifying, or rejecting said report or any part thereof. At any time within 30 days after such decision is rendered said court shall, upon petition of any party aggrieved, certify the portions of such report, review of which has been sought, together with the record in connection therewith, to the United States Circuit Court of Appeals for the Eighth Circuit, which shall have jurisdiction to consider, review, and decide all questions arising upon such report and record in like manner as in the case of appeals in equity, and its decision thereon shall be final.

Petition for review of any specific finding or award of compensation in any report shall not affect the finality of any findings nor delay the payment of any award set forth in such report, review of which shall not have been so sought, nor in any proceeding for review in any court under the provisions of this section shall costs be awarded against any party.

SEC. 7. It shall be the further duty of the board to investigate, ascertain, and report to the Secretary of the Interior who shall report to the Congress of the United States, together with his recommendation, the fair market value of lands, improvements appurtenant thereto, and water rights of non-Indian claimants who, in person or through their predecessors in title prior to January 6, 1912, in good faith and for a valuable consideration purchased and entered upon Indian lands under a claim of right based upon a deed or document purporting to convey title to the land claimed or upon a grant, or license from the governing body of a pueblo to said land, but fail to sustain such claim under the provisions of this act, together with a statement of the loss in money value thereby suffered by such non-Indian claimants. Any lands lying within the exterior boundaries of the pueblo of Nambe land grant, which were conveyed to any holder or occupant thereof or his predecessor or predecessors in interest by the governing authorities of said pueblo, in writing, prior to January 6, 1912, shall unless found by said board to have been obtained through fraud or deception, be recognized as constituting valid claims by said board and by said court, and disposed of in such manner as lands the Indian title to which has been determined to have been extinguished pursuant to the provisions of this act: *Provided*, That nothing in this section contained with reference to the said Nambe Pueblo Indians shall be construed as depriving the said Indians of the right to impeach any such deed or conveyance for fraud or to have mistakes therein corrected through a suit in behalf of said pueblo or of an individual Indian under the provisions of this act.

SEC. 8. It shall be the further duty of the board to investigate, ascertain, and report to the Secretary of the Interior the area and the value of the lands and improvements appurtenant thereto of non-Indian claimants within or adjacent to Pueblo Indian settlements or towns in New Mexico, title to which in such non-Indian claimants is valid and indefeasible, said report to include a finding as to the benefit to the Indians in anywise of the removal of such non-Indian claimants by purchase of their lands and improvements and the transfer of the same to the Indians, and the Secretary of the Interior shall report to Congress the facts with his recommendations in the premises.

SEC. 9. That all lands, the title to which is determined in said suit or suits, shall, where necessary, be surveyed and mapped under the direction of the Secretary of the Interior, at the expense of the United States, but such survey shall be subject to the approval of the judge of the United States District Court for the District of New Mexico, and if approved by said judge shall be filed in said court and become a part of the decree or decrees entered in said district court.

SEC. 10. That necessary costs in all original proceedings under this act, to be determined by the court, shall be taxed against the United States, and any party aggrieved by any final judgment or decree shall have the right to a review thereof by appeal or writ of error or other process, as in other cases, but upon such appeal being taken each party shall pay his own costs.

SEC. 11. That in the sense in which used in this act the word "purchase" shall be taken to mean the acquisition of community lands by the Indians other than by grant or donation from a sovereign.

SEC. 12. That any person claiming any interest in the premises involved but not impleaded in any such action may be made a party defendant thereto or may intervene in such action, setting up his claim in usual form.

SEC. 13. That as to all lands within the exterior boundaries of any lands granted or confirmed to the Pueblo Indians of New Mexico, by any authority of the United States of America or any prior sovereignty, or acquired by said Indians as a community by purchase or otherwise and which have not been claimed for said Indians by court proceedings then pending or the findings and report of the board as herein provided, the Secretary of the Interior at any time after two years after the filing of said reports of the board shall file field notes and plat for each pueblo in the office of the surveyor general of New Mexico at Santa Fe, N. Mex., showing the lands to which the Indian title has been extinguished as in said report set out, but excluding therefrom lands claimed by or for the Indians in court proceedings then pending, and copies of said plat and field notes certified by the surveyor general of New Mexico as true and correct copies shall be accepted in any court as competent and conclusive evidence of the extinguishment of all the right, title, and interest of the Indians in and to the lands so described in said plat and field notes and of any claim of the United States in or to the same. And the Secretary of the Interior within 30 days after the Indians' right to bring independent suits under this act shall have expired, shall cause notice to be published in some newspaper or newspapers of general circulation issued, if any there be, in the county wherein lie such lands claimed by non-Indian claimants, respectively, or wherein some part of such lands are situated, otherwise in some newspaper or newspapers of general circulation published nearest to such lands, once a week for five consecutive weeks, setting forth as nearly as may be the names of such non-Indian claimants of land holdings not claimed by or for the Indians as herein provided, with a description of such several holdings, as shown by a survey of Pueblo Indian lands heretofore made under the direction of the Secretary of the Interior and commonly known as the "Joy Survey," or as may be otherwise shown or defined by authority of the Secretary of the Interior, and requiring that any person or persons claiming such described parcel or parcels of land or any part thereof, adversely to the apparent claimant or claimants so named as aforesaid, or their heirs or assigns, shall, on or before the thirtieth day after the last publication of such notice, file his or their adverse claim in the United States Land Office in the land district wherein such parcel or parcels of land are situate, in the nature of a contest, stating the character and basis of such adverse claim, and notice of such contest shall be served upon the claimant or claimants named in the said notice, in the same manner as in cases of contest of homestead entries. If no such contest is instituted as aforesaid, the Secretary of the Interior shall issue to the claimant or claimants, or their heirs or assigns, a patent or other certificate of title for the parcel or parcels of land so described in said notice; but if a contest be filed it shall proceed and be heard and decided as contests of homestead entries are heard and decided under the rules and regulations of the General Land Office pertinent thereto. Upon such contest either party may claim the benefit of the provisions of section 4 of this act to the same extent as if he were a party to a suit to quiet title brought under the provisions of this act, and the successful party shall receive a patent or certificate of title for the land as to which he is successful in such proceeding. Any patent or certificate of title issued under the provisions of this act shall have the effect only of a relinquishment by the United States of America and the said Indians.

If after such notice more than one person or group of persons united in interest makes claim in such land office adverse to the claimant or claimants named in the said notice, or to any other person or group of persons who may have filed such contest, each contestant shall be required to set forth the basis and nature of his respective claim, and thereupon the said claims shall be heard and decided as upon an original contest or intervention.

And in all cases any person or persons whose right to a given parcel or parcels of land has become fixed either by the action of the said board or the said court or in such contest may apply to the Commissioner of the General Land Office for a patent or certificate of title and receive the same without cost or charge.

SEC. 14. That if any non-Indian party to any such suit shall assert against the Indian title a claim based upon a Spanish or Mexican grant, and if the court should finally find that such claim by the non-Indian is superior to that of the Indian claim, no final decree or judgment of ouster of the said Indians shall be entered or writ of possession or assistance shall be allowed against said Indians, or any of them, or against the United States of America acting in their behalf. In such case the court shall ascertain the area and value of the land thus held by any non-Indian claimant under such superior title, excluding therefrom the area and value of lots or parcels of land the title to which has been found to be in other persons under the provisions of this act: *Provided, however,* That any findings by the court under the provisions of this section may be reviewed on appeal or writ of error at the instance of any party aggrieved thereby, in the same manner, to the same extent, and with like effect as if such findings were a final judgment or decree. When such finding adverse to the Indian claim has become final the Secretary of the Interior shall report to Congress the facts, including the area and value of the land so adjudged against the Indian claim, with his recommendations in the premises.

SEC. 15. That when any claimant, other than the United States for said Indians not covered by the report provided for in section 7 of this act, fails to sustain his claim to any parcel of land within any Pueblo Indian grant, purchase, or donation under the provisions of this act, but has held and occupied any such parcel in good faith, claiming the same as his own, and the same has been improved, the value of the improvements upon the said parcel of land shall be found by the court and reported by the Secretary of the Interior to Congress, with his recommendations in the premises.

SEC. 16. That if any land adjudged by the court or said lands board against any claimant be situate among lands adjudicated or otherwise determined in favor of non-Indian claimants and apart from the main body of the Indian land, and the Secretary of the Interior deems it to be for the best interest of the Indians that such parcels so adjudged against the non-Indian claimant be sold, he may, with the consent of the governing authorities of the pueblo, order the sale thereof, under such regulations as he may make, to the highest bidder for cash, and if the buyer thereof be other than the losing claimant, the purchase price shall be used in paying to such losing claimant the adjudicated value of the improvements aforesaid, if found under the provisions of section 15 hereof, and the balance thereof, if any, shall be paid over to the proper officer, or officers, of the Indian community, but if the buyer be the losing claimant, and the value of his improvements has been adjudicated as aforesaid, such buyer shall be entitled to have credit upon his bid for the value of such improvements so adjudicated.

SEC. 17. No right, title, or interest in or to the lands of the Pueblo Indians of New Mexico to which their title has not been extinguished as hereinbefore determined shall hereafter be acquired or initiated by virtue of the laws of the State of New Mexico, or in any other manner except as may hereafter be provided by Congress, and no sale, grant, lease of any character, or other conveyance of lands, or any title or claim thereto, made by any pueblo as a community, or any Pueblo Indian living in a community of Pueblo Indians, in the State of New Mexico, shall be of any validity in law or in equity unless the same be first approved by the Secretary of the Interior.

SEC. 18. That the pleading, practice, procedure, and rules of evidence shall be the same in all causes arising under this act as in other civil causes in the Federal courts, except as otherwise herein provided.

SEC. 19. That all sums of money which may hereafter be appropriated by the Congress of the United States for the purpose of paying in whole or in part any liability found or decreed under this act from the United States to any pueblo or to any of the Indians of any pueblo, shall be paid over to the Bureau of Indian Affairs, which bureau, under the direction of the Secretary of the Interior, shall use such moneys at such times and in such amounts as may seem wise and proper for the purpose of the purchase of lands and water rights to replace those which have been lost to said pueblo or to said Indians, or for purchase or construction of reservoirs, irrigation works, or the making of other permanent improvements upon, or for the benefit of lands held by said pueblo or said Indians.

The bill was ordered to be read a third time, was read the third time, and passed.

RAILROAD ACROSS THE SOUTHWESTERLY PORTION OF FORT LOGAN MILITARY RESERVATION, COLO.

The next business on the Consent Calendar was the bill (H. R. 7909) granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation, in the State of Colorado.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. GRAHAM of Illinois). Is there objection?

Mr. TILSON. Mr. Speaker, reserving the right to object, what need is there for the passage of this bill? It certainly does not appear anywhere in the report.

Mr. VAILE. I am sorry the bill was not more fully reported. I will say, however, that it is not a bill for a commercial railroad. This is not a bill for the benefit of the Denver & Rio Grande Western Railroad at all. It is to construct a short spur track of about a quarter of a mile to enable the city of Denver to construct a filtration plant on the Platt River, and it will be used only for the purpose of taking material and construction crews to that plant.

Mr. TILSON. To what extent, if any, does it interfere with the use of that reservation for military purposes?

Mr. VAILE. Not in the slightest degree. The railroad already runs into the reservation grounds to furnish supplies for the reservation, and this carries it about a quarter of a mile farther.

Mr. McKENZIE. If the gentleman will yield to me, I will state to the gentleman from Connecticut that we investigated this matter very carefully before the committee, and we were convinced that this was not only an accommodation to the people out at the post but absolutely in no way injures the reservation, and the committee voted unanimously to report it, and I am sorry Mr. FISHER did not make a fuller report.

Mr. TILSON. I want to say that if it were the committee asking the passage of it, I doubt if the House would allow it to be passed upon this report; but since the committee is not concerned, but an individual Member is, I will not object.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. VAILE. Mr. Speaker, I ask unanimous consent to consider the Senate bill instead of the House bill. An identical bill has been passed by the Senate.

The SPEAKER pro tempore. The gentleman from Colorado asks unanimous consent that a Senate bill of similar purport be considered in lieu of the House bill. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 3420) granting the consent of Congress to the construction, maintenance, and operation by the Denver & Rio Grande Western Railroad Co., its successors and assigns, of a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado

*Be it enacted, etc.*, That the Secretary of War is hereby authorized to grant to the Denver & Rio Grande Western Railroad Co., a corporation organized under the laws of the State of Delaware, its successors and assigns, a permit to locate, construct, maintain, and operate a line of railroad across the southwesterly portion of the Fort Logan Military Reservation in the State of Colorado upon such location and under such regulations and conditions as shall be approved by the Secretary of War.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read the third time, was read the third time, and passed.

The bill H. R. 7909 was laid upon the table.

PROBATION SYSTEM IN UNITED STATES COURTS

The next business on the Consent Calendar was the bill (H. R. 5195) to provide for the establishment of a probation system in the United States courts, except in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. WOLFF. Mr. Speaker, I object.

Mr. GRAHAM of Pennsylvania. May I ask the gentleman to listen to a word of explanation, to see if the objection can not be removed? I would like to suggest to the gentleman that this bill ought to be passed. We have probation in every State in the Union at this time, and there is a bill on the Speaker's desk, unanimously passed by the Senate, covering

identically the same provisions. All the judges—I would not say all, but a large number of judges, district attorneys, and public opinion has been expressed in a hundred ways, and there is a real demand for this legislation.

Mr. CRAMTON. If the gentleman from Pennsylvania will yield, if the gentleman will permit——

Mr. WOLFF. I am going to say to the gentleman from Pennsylvania there is an old adage that starts out something like this: "Do unto others as you would have others do unto you." There is another old adage that "chickens come home to roost."

Mr. CRAMTON. Will the gentleman yield?

Mr. WOLFF. I will yield.

Mr. CRAMTON. In order to exemplify another adage, "Do unto others as you would have them do unto you." I have a letter from a very good friend of mine at Detroit, Mich., which letter I desire to place in the RECORD.

The letter is as follows:

DETROIT, MICH., *June 3, 1924.*

Hon. LOUIS C. CRAMTON,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN: I am informed that H. R. 5195 has been reported favorably by the Judiciary Committee of the House, but has not yet received consideration in Committee of the Whole. As you doubtless know, this is the bill giving Federal courts authority to place prisoners on probation, which power they do not now possess. Should Congress adjourn, as is now expected, at the end of this week, undoubtedly this bill will never be acted upon by this Congress. In the event that Congress should prolong its sessions this bill is one which should receive favorable action. My experience as judge of a criminal court convinces me that the most hopeful aspect of our present efforts to deal effectively with crime is the power which all judges should possess of placing prisoners on probation in certain cases.

Trusting this may receive your favorable attention, I remain.

Respectfully yours,

PLINY W. MARSH.

I ought to object, so far as some things go, but I feel that this legislation is desirable and worthy, and that no personal consideration should be permitted to interfere.

The SPEAKER pro tempore. Is there objection?

Mr. WOLFF. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

GALLUP-DURANGO HIGHWAY ACROSS THE NAVAJO RESERVATION

The next business on the Consent Calendar was the bill (S. 2139) authorizing annual appropriations for the maintenance of that portion of Gallup-Durango highway across the Navajo Indian Reservation and providing reimbursement therefor.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

Mr. BEGG. Reserving the right to object, Mr. Speaker, why is it necessary to appropriate $20,000 a year for this highway separately? How many miles long is it?

Mr. MORROW. I have not the exact mileage.

Mr. BEGG. Well, approximately.

Mr. TAYLOR of Colorado. This Navajo Indian Reservation road is quite an old road. The appropriations made by Congress heretofore aggregate about $80,000. The road is 90 miles long. This bill has been heartily approved by Secretary Work and Secretary Fall and Secretary Lane, and by the Indian reservation. It is to enable the Navajo Indians to get down to the Santa Fe Railroad at the town of Gallup.

Mr. BEGG. This makes an appropriation of $20,000 a year for the next thousand years. Unless changed, I shall not agree to anything like that, I will say to the gentleman. I will object absolutely unless you put a time limit on it. I will let it go by at five years.

Mr. TAYLOR of Colorado. Let me make this statement to the gentleman. They have just been discovering oil on this Navajo Indian Reservation so that the Indians have funds enough to do this.

Mr. BEGG. Does this come out of the tribal funds?

Mr. TAYLOR of Colorado. Yes. It does not cost the Federal Treasury a dollar.

Mr. BEGG. I withdraw my reservation of an objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That there is hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, the sum of $20,000, or so much thereof as may be necessary for each fiscal year, to be expended under the direction of the Secretary of the Interior, for maintenance of that portion of the Federal-aid highway from Gallup, N. Mex., to Shiprock, N. Mex., across the Navajo Indian Reservation, reimbursable from the tribal funds of the Indians of said reservation: *Provided*, That Indian labor shall be employed as far as practicable: *Provided further*, That if no funds are available, no expenditure shall be made.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

UNALLOTTED LANDS OF THE OMAHA INDIAN RESERVATION, NEBR.

The next business on the Consent Calendar was the bill (H. R. 6541) to amend an act entitled "An act to provide for the disposal of the unallotted lands on the Omaha Indian Reservation, in the State of Nebraska."

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the act approved May 11, 1912 (37 Stat. L. p. 111), entitled "An act to provide for the disposal of the unallotted lands on the Omaha Indian Reservation, in the State of Nebraska," is hereby amended by striking out all after the enacting clause and inserting the following:

"That the Secretary of the Interior be, and he is hereby, authorized to cause to be surveyed, if necessary, and appraised in such manner as he may direct, in tracts of 40 acres each or as nearly thereto as the Secretary may deem practicable, and after such survey and appraisement to sell and convey in quantities not to exceed 160 acres to any one purchaser, all the unallotted lands on the Omaha Indian Reservation in the State of Nebraska except such tracts as are hereinafter specifically reserved: *Provided*, That the said land shall be sold to the highest bidder under such regulations as the Secretary of the Interior may prescribe, but no part of said land shall be sold at less than the appraised value thereof: *Provided further*, That the use of the underground rights of the unallotted lands be, and the same are hereby, reserved for the benefit of the children who are entitled to participate in said lands under the act of May 11, 1912, supra.

"SEC. 2. That the Secretary of the Interior is hereby directed to reserve from sale under the terms of this act the following tracts of land in townships 24, 25, and 26 north, range 9 east of the sixth principal meridian in Nebraska for the purposes designated: Sixty acres of the land now used for agency purposes described as the southeast quarter of the northwest quarter and the south half of the northeast quarter of the northwest quarter of section 25 be reserved for agency and school purposes for so long as the need thereof exists; and 40 acres for use as a tribal cemetery, described as the southwest quarter of the southwest quarter of section 24, including the tract now used for that purpose: *Provided*, That 2½ acres thereof may be reserved for the use of the Presbyterian Church now located thereon so long as needed for religious or educational purposes; and 230 acres, more or less, described as the east half of the northeast quarter of section 26, and the west half of the northwest quarter, and the north half of the northeast quarter of the northwest quarter of section 25, and that portion of the southeast quarter of the northwest quarter of section 25 lying south and west of a certain irrigation ditch, consisting of approximately 10 acres, and the southeast quarter of the southwest quarter of section 24, for the special and specific use of the Omaha Tribe, to be used for fair purposes, camping grounds, race track, and other tribal needs, the same to be held in reserve from the sale authorized by this act until such time as the Secretary of the Interior may determine that reserves are no longer needed.

"SEC. 3. That the proceeds of such sale, after paying all the expenses incident to and necessary for carrying out the provisions of this act, and after reimbursing the general trust fund of the tribe for any assessment paid therefrom for protecting the unalloted tribal lands from overflow, shall be divided pro rata among the children of the Omaha Tribe living on May 11, 1912, who have not received allotments of land under the acts of August 7, 1882 (22 Stat. L. p. 341), and March 3, 1893 (28 Stat. L. p. 630), and shall be expended for the benefit of said Indians when and in such manner as in the opinion of the Secretary of the Interior shall be to their best interests, and pending such expenditure by the said Secretary the sums due the respective Indians shall be placed to the credit of the said Indians in the Treasury of the United States, and shall bear interest at the rate of 5 per cent per annum, but in the event of the death of any such Indian while there remains in the Treasury to his credit any part of the sum so deposited the said sum shall be paid at once to his heirs, who shall be determined by the Secretary of the Interior in accordance with the laws of descent in force in the State of Ne-

braska, and the action of the Secretary of the Interior in determining the legal heirs of any deceased Indian, as provided herein, shall in all respects be conclusive and final.

"SEC. 4. That for the purpose of carrying out the provisions of this act, there is appropriated the sum of $1,000, or so much thereof as may be necessary, to be reimbursable out of the funds arising from the sale of said lands.

"SEC. 5. That sections 1, 3, and 4 of this act shall not become operative so long as the need thereof exists of maintaining an agency and school for the Omaha Tribe of Indians residing on the Omaha Indian Reservation in the State of Nebraska."

With committee amendments, as follows:

Page 2, line 12, after the word "underground," insert the word "mineral."

Page 3, line 17, after the word "that," strike out the word "reserves" and insert "such lands."

Page 3, line 18, after the word "needed," insert the words "for such purposes."

Page 4, line 20, after the word "is," where it occurs the second time, insert the words "hereby authorized to be."

Mr. TILSON. Mr. Speaker, on page 12, in lines 18 and 19, there is recommended the insertion of the words "in townships."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 18, after the word "in," strike out the word "townships" and insert in lieu thereof the word "sections," and in the same line, after the figures "26" insert the words "in township 25."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

DESIGNATION OF CROATAN INDIANS AS CHEROKEES

The next business on the Consent Calendar was the bill (H. R. 8083) to designate the Croatan Indians of Robeson County and adjoining counties in North Carolina as Cherokee Indians.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this bill refers to the fact that this act will not be construed to give these Indians any right to lands or moneys belonging to the Eastern band of Cherokee Indians, or Western Cherokees, or the tribes in Oklahoma. Is not the purpose of it to give them a chance at the money in the Treasury for free schooling? If so, I think it must be pretty clearly justified or I shall have to object.

Mr. WEAVER. Mr. Speaker, I will say to the gentleman that this bill was introduced by my colleague, Mr. LYON, of North Carolina. The only purpose of this legislation, as I understand it, is to give them a status or designation.

Mr. CRAMTON. Is not the only thing to be accomplished by giving them that status to give them the right to attend the United States Indian schools?

Mr. WEAVER. I am not sure about that.

Mr. CRAMTON. For the present——

Mr. WEAVER. I think some provision has already been made by the Indian Department for these Indians, and I do not understand that this is to confer any monetary advantage.

Mr. CRAMTON. I object, Mr. Speaker.

The SPEAKER pro tempore. Objection is made. The Clerk will report the next bill.

PROTECTION OF GAME ANIMALS AND BIRDS

The next business on the Consent Calendar was the bill (S. 2761) to authorize the withdrawal of lands for the protection of antelope and other game animals and birds.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That, subject to valid existing rights and entries heretofore initiated under the public land laws, any or all of the following-described land in Government ownership may be withdrawn from entry and disposition by proclamation of the President for the purpose of protecting and propagating antelope and other game animals and birds: National-forest lands—Township 18 north, range 7 east, Black Hills meridian, section 24, south half, and south half north half; section 25, all; township 18 north, range 8 east, sections 17 to 20, inclusive; section 21, west half; sections 29 to 32, inclusive. Public lands—Township 18 north, range 7 east, sections 5 to 9, inclusive; sections 13 to 23, inclusive; section 24, north half north half; sections 26 to 36, inclusive; and those parts of sections 3, 4, 10, and 11 lying south and west of the Riva Road: *Provided*, That the withdrawal of the lands herein authorized shall not affect existing withdrawals for national-forest purposes.

SEC. 2. That the State of South Dakota is hereby authorized and permitted to erect and maintain a good, substantial fence inclosing in whole or in part such areas as may be designated and set aside by the President under the authority of section 1 hereof. The State shall erect and maintain such gates in this fence as may be required by the authorized agents of the Federal Government in the administration of the national-forest lands embraced therein, or to provide ingress and egress to persons occupying lands within said inclosure. The right of the State to maintain said fence shall continue so long as the area designated by the President shall be given protection by the laws of the State of South Dakota as a game refuge.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

CLAIMS OF CHOCTAW AND CHICKASAW INDIANS

Mr. SNYDER. Mr. Speaker, I ask unanimous consent to present a concurrent resolution.

The SPEAKER pro tempore. The gentleman from New York asks unanimous consent to present a concurrent resolution. The Clerk will report it.

The Clerk read as follows:

Senate Concurrent Resolution 21

*Resolved by the Senate (the House of Representatives concurring)*, That the President of the United States is requested to return to the House of Representatives the enrolled bill H. R. 5325, conferring jurisdiction on the Court of Claims to hear, examine, adjudicate, and enter judgment in any claim which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes.

The SPEAKER pro tempore. Is there objection to the present consideration of this resolution?

There was no objection.

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

ACQUIREMENT OF LANDS WITHIN TAOS COUNTY, N. MEX.

The next business on the Consent Calendar was the bill (S. 1762) providing for the acquirement by the United States of privately owned lands within Taos County, N. Mex., known as the Santa Barbara grant, by exchanging therefor timber, or lands and timber, within the exterior boundaries of any national forest situated within the State of New Mexico.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BEGG. I object.

ACQUIREMENT OF LANDS WITHIN RIO ARRIBA AND TAOS COUNTIES, N. MEX.

The next business on the Consent Calendar was the bill (S. 3024) providing for the acquirement by the United States of privately owned lands within Rio Arriba and Taos Counties, N. Mex., known as the Las Trampas grant, by exchanging therefor timber within the exterior boundaries of any national forest situated within the State of New Mexico.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BEGG. Mr. Speaker, reserving the right to object, I understand the gentleman from New Mexico [Mr. MORROW] desires to make a statement in connection with this bill, and I will withhold my objection in order that he may make such statement.

Mr. MORROW. Mr. Speaker, referring to these bills for the exchange of certain timberlands for other lands, this is a policy that has been pursued by the department for several years. The law permits it and it is absolutely under the jurisdiction of the Interior Department and the Department of Agriculture. These lands are examined and determined and the exchange of timber is made in conformity with the supervision of the department. It is a policy that has been carried out by the Government and the departments are absolutely in sympathy with this action. It is an exchange of lands for the protection of

the watershed and for the timber. There can be no disadvantage to the Government.

If there are any questions that gentlemen desire to ask, I will be glad to answer them.

Mr. BEGG. This bill is similar to a number of others where the Government of the United States is being authorized to give away cut-over lands to private interests so that they can take lands that are uncut and get good timber out of them. Now, I may be converted to that proposition being a good thing, but certainly it will be impossible to-night unless we stop everything else, and that would be unfair to the other bills.

Mr. MORROW. Will the gentleman hear me further?

Mr. BEGG. Yes.

Mr. MORROW. When these bills were presented I took them up with the Governor of the State of New Mexico. He made an investigation and he reported back to me, and I have his letter in which he states that this is a proper exchange for the conservation of the moisture of the State of New Mexico, and that this land is well-timbered land and has not been cut over. The department desires this as a protection to the forest reserves.

Mr. BEGG. I will say to the gentleman from New Mexico that it is not very long until another session of Congress. In the meantime I will investigate that policy; and if I can be shown the wisdom of it, I may be converted. But I can not see any good business in it.

Mr. MORROW. Will the gentleman hear me further?

Mr. BEGG. Yes.

Mr. MORROW. I think if the State authorities of the State of New Mexico have made an investigation of this and recommend that it is to the advantage of the State and to the Government it should be admitted that they have a better knowledge of the matter, and I call the gentleman's attention to the fact that the Department of the Interior and the Department of Agriculture are in sympathy with this action.

Mr. WATKINS. Will the gentleman yield?

Mr. MORROW. Yes.

Mr. WATKINS. As a matter of fact, these bills have the approval of the Secretary of the Interior and Colonel Greeley, of the Forest Service.

Mr. MORROW. Absolutely.

Mr. WATKINS. And this action not only has the advantage of giving the Government land where it affects the watershed, but it puts this land in one block?

Mr. MORROW. Yes.

The SPEAKER pro tempore. The time of the gentleman from New Mexico has expired. Is there objection?

Mr. BEGG. Mr. Speaker, I am going to withdraw my last objection. In the meantime I will investigate the rest of them.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he hereby is, authorized, in his discretion, to accept on behalf of the United States title to all or any part of privately owned lands situated within the Las Trampas grant, located within the counties of Rio Arriba and Taos, State of New Mexico, if in the opinion of the Secretary of Agriculture public interests will be benefited thereby and the lands are chiefly valuable for national-forest purposes, and in exchange therefor the Secretary of Agriculture may authorize the grantor to cut and remove an equal value of timber within the national forests of the same State, the values in each case to be determined by the Secretary of Agriculture and acceptable to the grantor as a fair compensation. Timber given in exchange shall be cut and removed under the laws and regulations relating to the national forests, and under the direction and supervision and in accordance with the requirements of the Secretary of Agriculture.

SEC. 2. That lands offered for exchange hereunder and not covered by public-land surveys shall be identified by metes and bounds surveys, and that such surveys and the plats and field notes thereof shall be made by employees of the United States Forest Service and approved by the United States Surveyor General.

SEC. 3. That any lands conveyed to the United States under the provisions of this act shall, upon acceptance of the conveyance thereof, become and be a part of Carson National Forest.

SEC. 4. That before any exchange of lands for timber as above provided is effected, notice of such exchange proposal, describing the lands involved therein, shall be published once each week for four consecutive weeks in some newspaper of general circulation in the county in which such lands so to be conveyed to the United States are situated.

Mr. BLANTON. Mr. Speaker, I move to strike out the last word. I think our colleague from New Mexico [Mr. MORROW] deserves a great deal of credit for the efficient manner in which he has pushed this bill through to passage in that he has done considerable work over here in getting objections out of the way. I think he should have great credit for it. [Applause.]

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

AMENDMENT OF THE JUDICIAL CODE

The next business on the Consent Calendar was the bill (H. R. 9314) to amend section 98 of the Judicial Code.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MORTON D. HULL. Mr. Speaker, reserving the right to object, let us have an explanation of this bill.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, this bill merely provides that hereafter the terms of the United States District Court for the Eastern District of North Carolina shall be held at Fayetteville instead of Laurinburg. The bill has the approval of the Department of Justice, the district judge, and the district attorney for the district involved, and it appears that the change will entail no additional expense to the Government.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 98 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, as amended, is hereby amended to read as follows:

"SEC. 98. The State of North Carolina is divided into two districts, to be known as the eastern and western districts of North Carolina. The eastern district shall include the territory embraced on the 1st day of July, 1910, in the counties of Beaufort, Bertie, Bladen, Brunswick, Camden, Chatham, Cumberland, Currituck, Craven, Columbus, Chowan, Carteret, Dare, Duplin, Durham, Edgecombe, Franklin, Gates, Granville, Greene, Halifax, Harnett, Hertford, Hyde, Johnston, Jones, Lenoir, Lee, Martin, Moore, Nash, New Hanover, Northampton, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Person, Pitt, Robeson, Richmond, Sampson, Scotland, Tyrrell, Vance, Wake, Warren, Washington, Wayne, and Wilson. Terms of the district court for the eastern district shall be held at Fayetteville on the Monday before the last Mondays in March and September; at Wilson on the first Mondays in April and October; at Elizabeth City on the second Mondays in April and October; at Washington on the third Mondays in April and October; at Newbern on the fourth Mondays in April and October; at Wilmington on the second Monday after the fourth Mondays in April and October; and at Raleigh on the fourth Monday after the fourth Mondays in April and October; and in addition for the trial of civil cases on the first Mondays in March and September: *Provided*, That the city of Fayetteville and the city of Wilson shall each provide and furnish at its own expense a suitable and convenient place for holding the district court at Fayetteville and at Wilson until a courthouse shall be constructed by the United States. The clerk of the court for the eastern district shall maintain an office in charge of himself or a deputy at Raleigh, at Wilmington, at Newbern, at Elizabeth City, at Washington, at Fayetteville, and at Wilson, which shall be kept open at all times for the transaction of the business of the court.

"The western district shall include the territory embraced on the 1st day of July, 1910, in the counties of Alamance, Alexander, Ashe, Alleghany, Anson, Buncombe, Burke, Caswell, Cabarrus, Catawba, Cleveland, Caldwell, Clay, Cherokee, Davidson, Davie, Forsyth, Guilford, Gaston, Graham, Henderson, Haywood, Iredell, Jackson, Lincoln, Montgomery, Mecklenburg, Mitchell, McDowell, Madison, Macon, Orange, Polk, Randolph, Rockingham, Rowan, Rutherford, Stanly, Stokes, Surry, Swain, Transylvania, Union, Wilkes, Watauga, Yadkin, and Yancey. Terms of the district court for the western district shall be held in Greensboro on the first Mondays in June and December; at Statesville on the third Mondays in April and October; at Salisbury on the fourth Mondays in April and October; at Asheville on the first Mondays in May and November; at Charlotte on the first Mondays in April and October; and at Wilkesboro on the fourth Mondays in May and November. The clerk of the court for the western district shall maintain an office in charge of himself or a deputy at Greensboro, at Asheville, at Statesville, and at Wilkesboro, which shall be kept open at all times for the transaction of the business of the court."

SEC. 2. That the act entitled "An act providing for the establishment of two additional terms of the District Court for the Eastern District of North Carolina at Raleigh, N. C.," approved April 27, 1916, is hereby repealed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. DAVIS of Minnesota. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8839)

making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1925, and move to further insist on the amendment of the House to the amendment of the Senate No. 1, and further insist on the disagreement of the House to the remaining Senate amendments and agree to the conference asked for by the Senate.

Mr. BLANTON. Mr. Speaker, reserving the right to object, it was understood there were not to be any conference reports taken up to-night.

Mr. MADDEN. No; that was not understood at all. It was understood that anything that came from the Senate was to be acted on. This is simply to agree to a further conference. This is not a conference report. We are just asking to go to conference.

Mr. CRAMTON. It was announced before the recess that anything coming from the Senate should have consideration.

The SPEAKER pro tempore. The gentleman from Minnesota asks unanimous consent to further insist on the amendment of the House to the Senate amendment No. 1 and further insist on the disagreement of the House to the remaining Senate amendments and agree to the conference. Is there objection?

There was no objection.

The SPEAKER pro tempore. Without objection, the Chair will appoint the following conferees:

Mr. DAVIS of Minnesota, Mr. FUNK, Mr. MADDEN, Mr. AYRES, and Mr. BYRNS of Tennessee.

### CUSTOMS EMPLOYEES AT THE PORT OF PHILADELPHIA

The next business on the Consent Calendar was the bill (H. R. 2858) for the relief of certain customs employees at the port of Philadelphia who served as acting customs guards during the war emergency.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON. I reserve the right to object, Mr. Speaker. I would like to ask the gentleman a question or two. Why should these particular employees in Philadelphia be singled out and paid an extra compensation not authorized by law?

Mr. WATSON. Because they were recommended by the Secretary of the Treasury when Mr. Wilson was in power, and therefore I presume the Democratic Party approved it.

Mr. BLANTON. There were a lot of things recommended then——

Mr. WATSON. Just wait until I get through. During the war it was impossible for the collector of the port to find a sufficient number of men to guard the incoming and outgoing vessels at the port of Philadelphia, and therefore the collector of the port was obliged to obtain laborers and inspectors. The laborers and inspectors were only paid their wages as laborers, and it is only fair and just that these men who were called out day and night and Sundays and holidays should be paid for their services as customs guards. It is only a little over $4,000.

Mr. BLANTON. No; it is over $5,000.

Mr. WATSON. No; $4,600.

Mr. BLANTON. The gentleman has not read his bill.

Mr. WATSON. Oh, yes; I have read it very carefully.

Mr. BLANTON. If the gentleman will look on line 5 of page 2, he will see that the amount is $5,500. Does the gentleman know whether these men worked in the daytime somewhere else?

Mr. WATSON. No. I admit the bill calls for $5,500. The appropriation needed is about $4,600, as stated.

Mr. BLANTON. Lots of them did do that during the war and made double wages.

Mr. WATSON. The Secretary of the Treasury would never have approved the payment of these men's wages if they had worked elsewhere.

Mr. BLANTON. And with regard to what was recommended under the Woodrow Wilson administration, there were lots of bureau chiefs, some of them probably Republicans, who made lots of recommendations that ought not to have been adopted.

Mr. WATSON. That is perhaps true; but I think these men should be paid as approved by the Secretary.

Mr. BLANTON. We ought to have general laws to pay employees of all these services. I object.

Mr. WATSON. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice and retain its place on the calendar.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

### PURCHASE OF PUBLIC LANDS

The next business on the Consent Calendar was the bill (H. R. 8522) granting to certain claimants the preference right to purchase unappropriated public lands.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MORTON D. HULL. Reserving the right to object, I would like to have the bill explained.

Mr. BROWNE of Wisconsin. Mr. Speaker, this bill was introduced by my colleague, the gentleman from Wisconsin [Mr. PEAVEY], who has been called home on account of sickness, and I represent him.

This bill provides that where there was an error in the Government survey and certain land was meandered the Secretary of the Interior shall have the right to sell the lands that were erroneously meandered and placed on the map as watered, and the bill also provides that the land shall be sold to the highest bidder by the Secretary and gives the people who have made improvements on the land the preference.

Such laws have been passed in regard to other States, but this applies to Wisconsin. I understand my friend from Louisiana wants to amend it so as to have it apply to Louisiana.

The SPEAKER pro tempore. Is there objection?

Mr. SANDLIN. Reserving the right to object, will the gentleman object to having this amended so as to include Louisiana?

Mr. BROWNE of Wisconsin. I am willing to have it amended so that the same law will apply to Louisiana.

Mr. BEGG. That is subject to a point of order.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. Without objection the Clerk will report the amendment instead of the original bill.

There was no objection.

The Clerk read the committee amendment as follows:

That the Secretary of the Interior, in his judgment and discretion, is hereby authorized to sell, in the manner hereinafter provided, any of those lands situated in the State of Wisconsin which were originally erroneously meandered and shown upon the official plats as water-covered areas, and which are not lawfully appropriated by a qualified settler or entryman claiming under the public land laws.

SEC. 2. That any citizen of the United States who in good faith under color of title or claiming as a riparian owner has, prior to this act, placed valuable improvements upon or reduced to cultivation any of the lands subject to the operation of the act, shall have a preferred right to file in the office of the register and receiver of the United States land office of the district in which the lands are situated an application to purchase the lands thus improved by them at any time within 90 days from the date of the passage of this act if the lands have been surveyed and plats filed in the United States land office; otherwise within 90 days from the filing of such plats. Every such application must be accompanied with satisfactory proof that the applicant is entitled to such preference right and that the lands which he applies to purchase are not in the legal possession of an adverse claimant.

SEC. 3. That upon the filing of an application to purchase any lands subject to the operation of this act, together with the required proof, the Secretary of the Interior shall cause the lands described in said application to be appraised, said appraisal to be on the basis of the value of such lands at the date of appraisal, exclusive of any increased value resulting from the development or improvement thereof for agricultural purposes by the applicant or his predecessor in interest, but inclusive of the stumpage value of any timber cut or removed by the applicant or his predecessor in interest.

SEC. 4. That an applicant who applies to purchase lands under the provisions of this act, in order to be entitled to receive a patent, must within 30 days from receipt of notice of appraisal by the Secretary of the Interior pay to the receiver of the United States land office of the district in which the lands are situated the appraised price of the lands, and thereupon a patent shall issue to said applicant for such lands as the Secretary of the Interior shall determine that such applicant is entitled to purchase under this act. The proceeds derived by the Government from the sale of lands hereunder shall be covered into the United States Treasury and applied as provided by law for the disposal of the proceeds from the sale of public lands.

SEC. 5. That the Secretary of the Interior is hereby authorized to prescribe all necessary rules and regulations for administering the provisions of this act and determining conflicting claims arising hereunder.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

DAM ACROSS THE POTEAU RIVER

The next business on the Consent Calendar was the bill (H. R. 9459) granting the consent of Congress to the city of Fort Smith, Sebastian County, Ark., and the Fort Smith waterworks district of said city to construct, maintain, and operate a dam across the Poteau River.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, is this a municipal waterworks?

Mr. CARTER. Mr. Speaker, I regret that I am obliged to object.

FORT REVERE RESERVATION, HULL, MASS.

The next business on the Consent Calendar was the bill (H. R. 6995) to authorize the Secretary of War to sell real property, to wit, a portion of the Fort Revere Reservation, at Hull, Mass.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, I want to inquire what the nature of this property is.

Mr. McKENZIE. It is an old military reservation. The bill was introduced by the gentleman from Massachusetts [Mr. GIFFORD], and it is to permit a small strip to be sold for cemetery purposes.

Mr. LAGUARDIA. It does not apply to the whole reservation?

Mr. McKENZIE. No; only a little strip for cemetery purposes. The bill is all right.

Mr. BLANTON. Reserving the right to object, I want to ask a question. How much land is there in this reservation?

Mr. GIFFORD. About 78 acres, and they are asking for only 3 acres for cemetery purposes.

Mr. BLANTON. It is to be used by the city?

Mr. GIFFORD. The town of Hull desires to add to the present cemetery about 3 acres. It has been carefully considered by the War Department, and the War Department has no objection.

Mr. BLANTON. Why does not the town buy 3 acres?

Mr. GIFFORD. It seeks to add to their cemetery by buying these 3 acres. Hull is a very small town. If the gentleman will read the report, he will see that the department says that there is no objection.

Mr. BLANTON. That is what makes me suspicious. The report is about 3 fingers wide and gives no information whatever. It does not tell anything about the necessity of it, the character of the land or the scope of it, or the value of the land, or anything at all. Whenever I see a report like that I get suspicious. Is the land contiguous to the cemetery?

Mr. GIFFORD. It is.

Mr. BLANTON. And they can not get 3 acres anywhere else?

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of War be, and he hereby is, authorized to sell to the town of Hull, Mass., at private sale upon terms and conditions deemed advisable by him, a section of land situated in the town of Hull, Mass., and included in the Fort Revere Reservation, comprising an area of approximately 125,780 square feet, to be added by the town of Hull to its present cemetery, to which said land is adjacent; and to execute and deliver in the name of the United States and in its behalf any and all deeds or other instruments necessary to effect such sale.

SEC. 2. That all moneys received as the proceeds of such sale, after deducting the necessary expenses connected therewith, shall be deposited in the Treasury of the United States to the credit of miscellaneous receipts.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

TO AUTHORIZE THE ACCOUNTING OFFICERS OF THE TREASURY TO PAY TO CERTAIN SUPPLY OFFICERS OF THE REGULAR NAVY AND NAVAL RESERVE FORCE THE PAY AND ALLOWANCES OF THEIR RANKS FOR SERVICE PERFORMED PRIOR TO THE APPROVAL OF THEIR BONDS

The next business on the Consent Calendar was the bill (H. R. 8263) to authorize the accounting officers of the Treasury to pay to certain supply officers of the regular Navy and Naval Reserve Force the pay and allowances of their ranks for service performed prior to the approval of their bonds.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. I object.

TOWN SITE OF SANISH, N. DAK.

The next business on the Consent Calendar was the bill (H. R. 3387) authorizing repayment of excess amounts paid by purchasers of certain lots in the town site of Sanish, former Fort Berthold Indian Reservation, N. Dak.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior is hereby authorized to certify to the Secretary of the Treasury the difference between the amounts paid by purchasers of the lots in the town site of Sanish, within the former Fort Berthold Indian Reservation, N. Dak., and the price fixed as result of reappraisal by the Secretary of the Interior of August 11, 1922, in all cases whether patents had or had not issued at the time of the reappraisal of the lots: *Provided*, That the purchasers or their legal representatives apply for repayment of such amounts within two years from the passage of this act.

SEC. 2. Upon receipt of the certificate from the Secretary of the Interior, the Secretary of the Treasury is hereby authorized and directed to make payment to such purchasers out of the funds held in trust for the Fort Berthold Indians under the act of Congress approved June 1, 1910, and issue his warrant in settlement thereof.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

TOWN SITE OF BOWDOIN, MONT.

The next business on the Consent Calendar was the bill H. R. 7522, to authorize and direct issuance of patents to purchasers of lots in the town site of Bowdoin, Mont.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior is hereby authorized and directed to issue patents to purchasers of lots in the town site of Bowdoin, Mont., who have made payments of at least $50 for each lot by virtue of land contracts previously entered into.

With the following committee amendment:

Strike out all after the enacting clause and insert: "That the Secretary of the Interior is hereby authorized to reappraise the lots in the town site of Bowdoin, Mont., whether sold or unsold, and to issue patent, if not already issued, in those cases where the amount paid is in excess of the value appraised thereunder. In cases where the amount paid is not equal to the new appraisement the purchaser may receive patent upon making payment in accordance with the new appraisal, either in cash or by installments, in conformity with the terms of existing law. Lots not heretofore sold likewise may be sold at the new appraised value in accordance with existing law."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

WAR MEMORIAL IN POTOMAC PARK, DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the Senate Joint Resolution 73, providing for the appointment of a commission for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the armed forces of the United States who served in the Great War.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the Senate joint resolution?

Mr. CONNALLY of Texas. Reserving the right to object, who is to pay the expense of this?

Mr. LUCE. Mr. Speaker, the money for this memorial is to be raised by subscription. No expense whatever is to attach to the Federal Government.

Mr. BLANTON. It is distinctly understood that the commissioners shall receive no salary or compensation?

Mr. LUCE. Absolutely.

Mr. BLANTON. And that all subscriptions are to be raised in the District, and that there is to be no charge on the Federal Treasury?

Mr. LUCE. No charge whatever.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

*Resolved, etc.*, That a commission to be composed of Charles A. Baker, Edward F. Colladay, John Joy Edson, Mrs. William Corcoran Eustis, Isaac Gans, E. Lester Jones, Arthur D. Marks, Frank B. Noyes, Anton Stephan, J. R. McDonald, Gist Blair, and any other person who with the approval of a majority of the commission is added thereto or substituted for any member thereof, is hereby created, to be known as the District of Columbia Memorial Commission, for the purpose of erecting in Potomac Park, in the District of Columbia, a memorial to those members of the military and naval forces of the United States

from the District of Columbia who served their country in the Great War. Such memorial shall be of artistic design suitable for military music and shall take the place of the present wooden band stand in Potomac Park.

SEC. 2. That the Chief of Engineers of the United States Army is hereby authorized and directed to select the site for the memorial and to grant permission for the erection of said memorial thereon: *Provided*, That the site, design, and plans for the memorial shall have been approved by the Joint Committee on the Library acting with the advice of the Commission of Fine Arts: *Provided further*, That the memorial shall be erected under the supervision of the said Chief of Engineers and that no part of the cost of erection shall be borne by the United States.

The joint resolution was ordered to be read a third time, was read the third time, and passed.

BRIDGE ACROSS PEARL RIVER, MISS.

The next business on the Consent Calendar was the bill (H. R. 9077) granting the consent of Congress to the board of supervisors of Hinds County, Miss., to construct a bridge across the Pearl River in the State of Mississippi.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

Mr. COLLIER. Mr. Speaker, I ask unanimous consent to substitute for the bill the Senate bill, S. 3244, identical in character, which has already passed the Senate.

The SPEAKER pro tempore. The gentleman from Mississippi asks unanimous consent to substitute the Senate bill of like purport for the House bill. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the Senate bill.

The Clerk read the Senate bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the board of supervisors of Hinds County, Miss., to construct, maintain, and operate a bridge and approaches thereto across the Pearl River, at a point suitable to the interests of navigation, at the city of Jackson, State of Mississippi, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

The bill H. R. 9077 was ordered to lie on the table.

RELIEF OF OMAHA INDIANS OF NEBRASKA

The next business on the Consent Calendar was the bill (H. R. 8965) for the relief of the Omaha Indians of Nebraska.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON. Mr. Speaker, reserving the right to object, I ask the gentleman from Nebraska [Mr. HOWARD] to have this bill passed over without prejudice. It involves several hundred thousand dollars' worth of interests, and it ought not to be passed here in a minute and a half. Will not the gentleman kindly consent to have the bill passed over without prejudice?

Mr. HOWARD of Nebraska. Surely.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER pro tempore. The gentleman from Texas asks unanimous consent that the bill be passed over without prejudice. Is there objection?

Mr. HOWARD of Nebraska. Mr. Speaker, I do not know what that passing means; but I guess it is all right.

The SPEAKER pro tempore. Is there objection?

There was no objection.

PATENT TO CERTAIN LANDS AT REDLANDS, CALIF.

The next business on the Consent Calendar was the bill (H. R. 166) authorizing the Secretary of the Interior to issue patent to the city of Redlands, Calif., for certain lands, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he hereby is, authorized and directed to issue patent to the city of Redlands (a duly organized and existing municipal corporation of the State of California, a body corporate and politic, with full power to hold and own real estate), of California, for the following tract of public land, to wit: The south half of the southeast quarter of section 14, township 1 south, range 2 west, San Bernardino base and meridian, in the State of California, upon payment therefor to the Secretary of the Interior for the Government of the United States the full sum of $1.25 per acre, which patent shall be issued upon the express condition that the city of Redlands shall use said tract of land for the purpose of water conservation for public benefit: *Provided*, That whenever said lands cease to be used by said city for said purposes or are attempted to be sold or conveyed, then, in that event, title to said lands and the whole thereof shall revert to the United States: *Provided further*, That such patent shall contain a reservation to the United States of all gas, oil, coal, and other mineral deposits that may be found in such land, and the right to the use of the land for extracting the same.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

DEPUTY DISBURSING AGENT, DEPARTMENT OF AGRICULTURE

The next business on the Consent Calendar was the bill (H. R. 8372) to authorize the designation of deputy fiscal or disbursing agents in the Department of Agriculture stationed outside of Washington.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object——

Mr. CLARKE of New York. Reserving the right to object, I would like to have a little explanation.

Mr. CRAMTON. Mr. Speaker, reserving the right to object——

Mr. BLANTON. Mr. Speaker, I object.

AMERICAN ACADEMY IN ROME

The next business on the Consent Calendar was the bill (S. 2834) an act relating to the American Academy in Rome.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the Senate bill?

Mr. PARKS of Arkansas. Mr. Speaker, reserving the right to object, I would like to ask just what this is?

Mr. LUCE. Mr. Speaker, the American Academy at Rome sprang out of an association of sculptors at the World's Fair, and the outcome was the development of a very admirable, useful institution in Rome where artists from this country are able to study art to the best advantage. It has been developed entirely by private subscription, and the intention and expectation is that other funds will be raised in the same way by the friends of art who desire to make it possible for young Americans who otherwise could not study art to have these facilities. The whole purpose of the bill is a routine purpose of extending the limit to which they may have holdings of property.

Mr. PARKS of Arkansas. I have no objection; I just wanted to know what it was.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the act entitled "An act to permit the American Academy in Rome to enlarge its purposes, and for other pusposes," approved June 6, 1912, is amended by striking out "$3,000,000" and inserting in lieu thereof "$10,000,000."

SEC. 2. That section 3 of the act entitled "An act to incorporate the American Academy in Rome," approved March 3, 1905, as amended, is hereby repealed.

The bill was ordered to be read the third time, was read the third time, and passed.

SALARY OF WARDEN, UNITED STATES PENITENTIARY, M'NEIL ISLAND, WASH.

The next business on the Consent Calendar was the bill (H. R. 1468) to increase the salary of the warden of the United States penitentiary at McNeil Island, Wash.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

Mr. WATKINS. Mr. Speaker, reserving the right to object, I would like to ask the gentleman in charge of the bill the amount of increase to this warden?

Mr. GRAHAM of Pennsylvania. I should be very glad to answer the gentleman. That salary was fixed in 1909, and the Department of Justice reports that the growth of the McNeil Island institution in the past 10 years has been such that the present salary of $2,000 per annum is not at all commensurate with the increased duties and responsibilities

of that office. It is increased $1,000. The wardens at the other penitentiaries get $4,000.

Mr. CRAMTON. Mr. Speaker, reserving the right to object, if the gentleman will yield, we have under way a reclassification in the field service. Now, assuming that this will be affected by that, this salary will be equalized, and is there any reason why this particular one should be selected out of a hundred thousand or more for immediate consideration?

Mr. GRAHAM of Pennsylvania. The gentleman from Washington can answer that question.

Mr. JOHNSON of Washington. This bill was introduced at the beginning of the session and has taken the ordinary course.

Mr. CRAMTON. Could the gentleman answer that question—why should not this particular person use the reclassification of the field service——

Mr. JOHNSON of Washington. For the reason there are only three Federal penitentiaries and the one at this place is paid a great deal less than the other wardens. The business of the penitentiary has trebled in the last few years, and he is the executive officer——

Mr. CRAMTON. There are many inequalities in the service——

Mr. CLARKE of New York. There are not as many in the penitentiary as there ought to be.

Mr. CRAMTON. I desire to say to the gentleman from Washington I shall not object; I will not face the consequences. [Laughter.]

The SPEAKER pro tempore. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, is there any danger of this gentleman resigning and it being impossible to fill his place?

Mr. JOHNSON of Washington. Yes, sir; both. This man has been offered a position of agent of the Quinaiult Agency, and declined the position because of his desire to build up this penitentiary.

Mr. UNDERHILL. Would it not be a kindness to relieve him from that responsibility and let him fill the other job?

Mr. CLARKE of New York. Let him come down to Washington and practice a little while.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That from and after the approval of this act the Attorney General is authorized and directed to pay to the warden of the United States Penitentiary at McNeil Island, Wash., a salary at the rate of $3,000 per annum in lieu of that he is now receiving.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

RAILROAD ACROSS FORT MACARTHUR MILITARY RESERVATION, CALIF.

The next business on the Consent Calendar was the bill (H. R. 6852) to authorize the city of Los Angeles, in the State of California, to construct and operate a line of railroad across the Fort MacArthur Military Reservation, in the State of California.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

The was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of War is hereby authorized to grant to the city of Los Angeles, in the State of California, a municipal corporation, its successors and assigns, a permit to locate, construct, maintain, and operate a line of railroad across the tidelands, ceded by the State of California to the United States, fronting on the lower military reservation at Fort MacArthur, in the State of California, upon such location and under such regulations and conditions as shall be approved by the Secretary of War.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments, as follows:

Page 1, after line 6, insert "and a permit to construct and maintain a public highway."

Page 2, line 2, after the word "War," insert "*Provided*, That nothing contained in this act shall be permitted to infringe on the waterfront rights held by the United States on this reservation."

Mr. CRAMTON. Mr. Speaker, I offer an amendment to the second committee amendment, which I send to the Clerk's desk, to perfect the text.

The SPEAKER pro tempore. The question is on the first committee amendment.

The first committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Michigan to the second committee amendment.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON to the second committee amendment: "Strike out the words in line 3, page 2, "permitted to infringe" and insert in lieu thereof the words "held to authorize any infringement."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Michigan to the committee amendment.

The amendment to the committee amendment was agreed to.

The SPEAKER pro tempore. The question now is on the second committee amendment as amended.

The second committee amendment as amended was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

AMENDMENT OF VETERANS' BUREAU ACT

The SPEAKER pro tempore. The Chair is informed that No. 375 on the Consent Calendar, the bill (H. R. 8869) to amend an act entitled "An act to establish a Veterans' Bureau and to improve the facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved August 9, 1921, and to amend and modify the war risk insurance act, and to amend the vocational rehabilitation act, has already passed. The Clerk will report the next bill.

THE HEIGHT OF BUILDINGS IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 3269) to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

Mr. UNDERHILL. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman if it is going to be the practice of the Committee on the District of Columbia to change the law every time and any time somebody wants to put another story on top of a building in the residential district? If we are going to have a zoning system in the city, it seems to me we ought to keep it. If we are not going to have it, we ought to abolish it and not make these exceptions from time to time. Can the gentleman give me a good reason for this?

Mr. BLANTON. I can give you a good reason for the bill. I have no personal interest in it at all. The District Commissioners have recommended it. The gentleman will remember the case. It is the Harrington Hotel.

Mr. UNDERHILL. I remember.

Mr. BLANTON. They want permission to put the same height on that hotel as that of other hotels in the vicinity. It has the approval of the District Commissioners, and the approval of everyone concerned. I know of no reason why it should not be passed. I submit it to the gentleman for his own judgment.

Mr. UNDERHILL. I am not going to object to this bill, but I give notice now that if the zoning system is to stay the next time I shall object.

Mr. SPROUL of Illinois. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. BLANTON. I hope the gentleman will not do that. I have no interest in it at all except that the commissioners want it.

CONFERENCE REPORT ON THE BILL (S. 2257) TO AMEND THE VETERANS' BUREAU ACT

Mr. JOHNSON of South Dakota. Mr. Speaker, I submit for printing, under the rule, a conference report on the bill S. 2257.

The SPEAKER pro tempore. The gentleman from South Dakota submits a conference report for printing under the rule.

The Clerk will report it by title.

Conference report on the bill (S. 2257) to amend an act entitled "An act to establish a Veterans' Bureau and to improve the facilities and service of such bureau, and further to amend and modify the war risk insurance act," approved August 9, 1921, and to amend and modify the war risk insurance act, and to amend the vocational rehabilitation act.

The SPEAKER pro tempore. Ordered to be printed under the rule. The Clerk will report the next bill.

Mr. REECE. Mr. Speaker, can the gentleman from South Dakota give us some information about that?

Mr. JOHNSON of South Dakota. That is the reason I have presented it to-night, so that it will be in the RECORD in the morning and available to the Members.

The SPEAKER pro tempore. The Clerk will report the next bill.

AMENDMENT OF NATIONAL DEFENSE ACT RELATIVE TO RETIREMENT

The next business on the Consent Calendar was the bill (H. R. 5084) to amend the national defense act approved June 13, 1916, as amended by the act of June 4, 1920, relating to retirement, and for other purposes.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. McKENZIE. Mr. Speaker, this is a bill that ought to be given very careful consideration, which can not be done in this manner of passing bills, and therefore I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

MILITARY STATUS TO RUSSIAN SERVICE CORPS

The next business on the Consent Calendar was the bill (S. 1557) to give military status and discharge to the members of the Russian Railway Service Corps, organized by the War Department under authority of the President of the United States for service during the war with Germany.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CONNALLY of Texas. I want to ask the gentleman from South Carolina [Mr. McSWAIN] a question. Will this bill make all these people eligible for the pension and the bonus?

Mr. McSWAIN. It will make them eligible for the bonus and give them a right to war insurance. As to pensions, that is a matter of legislation conferring pensions upon them.

Mr. CONNALLY of Texas. If it is conferred on soldiers, the general language would give them a pensionable status. How many are there in there?

Mr. McSWAIN. One hundred and sixty-three.

Mr. UNDERHILL. Are they all citizens of the United States?

Mr. McSWAIN. Oh, yes.

Mr. STENGLE. And they all did war work?

Mr. McSWAIN. Yes; and this service was accepted in lieu of their military service.

Mr. O'CONNELL of New York. Did the gentleman say how many are included?

Mr. McSWAIN. One hundred and sixty-three.

The SPEAKER pro tempore. Is there objection?

Mr. BEGG. I object.

WILD LIFE AND FISH REFUGE

The next business on the Consent Calendar was the bill (H. R. 4088) to establish the upper Mississippi River wild life and fish refuge.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That this act may be cited as "The upper Mississippi River wild life and fish refuge act."

SEC. 2. The Secretary of Agriculture is authorized and directed to acquire, by purchase, gift, or lease, such areas of land, or of land and water, situated between Rock Island, Ill., and Wabasha, Minn., on either side of or upon islands in the Mississippi River which are subject to overflow by such river and which are not used for agricultural purposes, as he determines suitable for the purposes of this act.

SEC. 3. Any such area, when acquired in accordance with the provisions of this act, shall become a part of the upper Mississippi River wild life and fish refuge (hereinafter in this act referred to as the "refuge"). The refuge shall be established and maintained (a) as a refuge and breeding place for migratory birds included in the terms of the convention between the United States and Great Britain for the protection of migratory birds, concluded August 16, 1916, and (b) to such extent as the Secretary of Agriculture may by regulations prescribe as a refuge and breeding place for other wild birds, game animals, fur-bearing animals, and for the conservation of wild flowers and aquatic plants, and (c) to such extent as the Secretary of Commerce may by regulations prescribe as a refuge and breeding place for fish and other aquatic animal life.

SEC. 4. (a) No such area shall be acquired by the Secretary of Agriculture until the legislature of the State in which such area lies has consented to its acquisition by the United States for the purposes of this act, and, except in the case of a lease, no payment shall be made by the United States for any such area until title thereto is satisfactory to the Attorney General and is vested in the United States.

(b) The existence of a right of way, easement, or other reservation or exception in respect of such area shall not be a bar to its acquisition (1) if the Secretary of Agriculture determines that any such reservation or exception will in no manner interfere with the use of the area for the purposes of this act, or (2) if in the deed or other conveyance it is stipulated that any reservation or exception in respect of such area, in favor of the person from whom the United States receives title, shall be subject to regulations prescribed under authority of this act.

SEC. 5. Except where it is specifically provided otherwise, the Secretary of Agriculture and the Secretary of Commerce shall jointly prescribe such regulations, exercise such functions, and perform such duties as may be necessary to carry out the purposes of this act.

SEC. 6. No person shall, except in accordance with regulations prescribed by the Secretary of Agriculture in respect of wild birds, game animals, fur-bearing animals, wild flowers, and aquatic plants, or by the Secretary of Commerce in respect of fish and other aquatic-animal life—

(a) Enter the refuge for any purpose; or

(b) Disturb, injure, kill, or remove, or attempt to disturb, injure, kill, or remove, any wild bird, game animal, fur-bearing animal, fish, or other aquatic-animal life on the refuge; or

(c) Remove from the refuge or injure or destroy thereon any flower, plant, tree, or natural growth, or the nest or egg of any wild bird; or

(d) Injure or destroy any notice, signboard, fence, building, or other property of the United States thereon.

SEC. 7. Commercial fishing may be conducted in the waters of this refuge under regulation by the Secretary of Commerce.

SEC. 8. (a) Any employee of the Department of Agriculture so authorized by the Secretary of Agriculture, and any employee of the Department of Commerce so authorized by the Secretary of Commerce, (1) shall have power, without warrant, to arrest any person committing in the presence of such employee a violation of this act or of any regulation made pursuant to this act, and to take such person immediately for examination or trial before an officer or court of competent jurisdiction, (2) shall have power to execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of this act or regulations made pursuant thereto, and (3) shall have authority, with a search warrant issued by an officer or court of competent jurisdiction, to make a search in accordance with the terms of such warrant. Any judge of a court established under the laws of the United States or any United States commissioner may, within his respective jurisdiction, upon proper oath or affirmation showing probable cause, issue warrants in all such cases.

(b) All birds, animals, fish, or parts thereof captured, injured, or killed, and all flowers, plants, trees, and other natural growths, and nests and eggs of birds removed, and all implements or paraphernalia, including guns, fishing equipment, and boats used or attempted to be used contrary to the provisions of this act or any regulations made pursuant thereto, shall, when found by such employee or by any marshal or deputy marshal, be summarily seized by him and placed in the custody of such persons as the Secretary of Agriculture and the Secretary of Commerce may jointly by regulation prescribe.

(c) A report of the seizure shall be made to the United States attorney for the judicial district in which the seizure is made, for forfeiture either (1) upon conviction of the offender under section 11, or (2) by proceedings by libel in rem. Such libel proceedings shall conform as near as may be to civil suits in admiralty, except that either party may demand trial by jury upon any issue of fact when the value in controversy exceeds $20. In case of a jury trial the verdict of the jury shall have the same effect as the finding of the court upon the facts. Libel proceedings shall be at the suit and in the name of the United States. If such forfeiture proceedings are not instituted within a reasonable time, the United States attorney shall give notice thereof, and the custodian shall thereupon release the articles seized.

SEC. 9. (a) The Secretary of Agriculture and the Secretary of Commerce are authorized to make such expenditures for construction, equipment, maintenance, repairs, and improvements, including expenditures for personal services at the seat of government and elsewhere, as may be necessary to execute the functions imposed upon them by this act and as may be provided for by Congress from time to time.

(b) For such expenditures there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $300,000, to be available until June 30, 1925, $100,000 of such sum to be available for expenditures by the Secretary of Agriculture and $200,000 by the Secretary of Commerce.

SEC. 10. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, and to be available until expended, the sum of $3,000,000, or so much thereof as may be necessary for the acquisition of any areas authorized by this act to be acquired for such refuge and for all necessary expense incident to the acquisition of such areas.

SEC. 11. Any person who shall violate or fail to comply with any provision of or any regulation made pursuant to this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $500 or be imprisoned not more than six months, or both.

SEC. 12. As used in this act the term "person" includes an individual, partnership, association, or corporation.

With the following committee amendments:

Page 2, strike out lines 17 and 18 and insert in lieu thereof "Secretary of Agriculture until the legislature of each State in which is situated any part of the areas to be acquired under this act consented to the acquisition of such part by the."

Page 4, strike out the words "so authorized by the Secretary of Agriculture," in lines 10 and 11, and insert in lieu thereof "authorized by the Secretary of Agriculture to enforce the provisions of this act."

Page 6, strike out lines 14 to 17, inclusive, and insert in lieu thereof "otherwise appropriated, the sum of $50,000, to be available until expended, $25,000 of such sum to be available for expenditure by the Secretary of Agriculture and $25,000 by the Secretary of Commerce."

Page 6, strike out line 25 and insert "$1,560,000, or so much thereof as may be necessary for."

Page 7, line 4, after the word "areas," insert "but no money shall be available for the acquisition of any area until the Secretary of Agriculture has ascertained that all of the areas to be acquired under this act will be acquired within the amounts appropriated or authorized to be appropriated therefor, and at an average price not in excess of $5 per acre, and not in excess of the average selling price, during the years 1921, 1922, and 1923, of comparable lands within the vicinity of such areas."

Page 7, after line 19, insert a new section, as follows:

"SEC. 13. Nothing in this act shall be construed as exempting any portion of the Mississippi River from the provisions of Federal laws for the improvement, preservation, and protection of navigable waters, nor as authorizing any interference with the operations of the War Department in carrying out any project now or hereafter adopted for the improvement of said river."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. CHINDBLOM. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to address the House for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. CHINDBLOM. Mr. Speaker, I want to take this opportunity merely for the purpose of congratulating the House of Representatives upon the unanimous passage of this bill and to call attention to the very appropriate circumstance that the House at this moment is presided over by the distinguished gentleman who at the present moment represents the district in which is situated the city of Rock Island, where this game and fish refuge is to begin on the south. I refer to the gentleman from Illinois [Mr. GRAHAM]. [Applause.]

PROMOTION OF PEACE AND EQUALIZATION OF THE BURDENS OF WAR

The next business on the Consent Calendar was House Joint Resolution 128, to promote peace and to equalize the burdens and to minify the profits of war.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. MORTON D. HULL. I object, Mr. Speaker.

INCORPORATED TOWN OF JUNEAU, ALASKA

The next business on the Consent Calendar was the bill (H. R. 5558) to authorize the incorporated town of Juneau, Alaska, to issue bonds in any sum not exceeding $200,000 for the purpose of improving the street and sewerage system of the town.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BEGG. Mr. Speaker, reserving the right to object, who is interested in this bill?

Mr. CRAMTON. The gentleman from Aalska [Mr. SUTHERLAND] is interested, but he does not seem to be present.

Mr. BEGG. The query I would like to have answered is this: Is it not entirely beyond reason to bond a town to the extent of $60 per capita for a single enterprise? It seems to me this means bankruptcy.

Mr. CRAMTON. I notice that the gentleman from Alaska is now present.

Mr. BEGG. Does not the gentleman think that $60 per capita of bonded indebtedness for a single bond issue is clear beyond all reason?

Mr. SUTHERLAND. In every one of these bond issues in Alaska they have been taken locally, the people assuming the bonds themselves. In this particular case it is possible that they may be taken by brokers, so the interest is fixed at 6 per cent.

Mr. BEGG. I am not talking about the rate of interest. I am talking about a bond issue of $200,000 for one issue on 3,500 people. I never heard of anything like that in my country.

Mr. SUTHERLAND. I will say to the gentleman that is not at all unusual in Alaska.

Mr. CRAMTON. If the gentleman will yield, this may have some bearing. I have in mind to offer an amendment similar to the one I offered last night requiring the vote of 60 per cent instead of a majority in order to authorize the issuance of the bonds.

Mr. SUTHERLAND. I have had other bond bills and there was a little controversy in those cases so I dropped them entirely, but in this case the people of that town are practically unanimous for it. The gentleman from Michigan proposes an amendment providing for a 60 per cent vote of the people, which I understand is usual in some of the States, and I accept that.

Mr. BEGG. I shall not object.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the incorporated town of Juneau, Alaska, is hereby authorized and empowered to issue bonds in any sum not exceeding $200,000 for the purpose of improving the street and sewerage system of the town.

SEC. 2. That before said bonds shall be issued a special election shall be ordered by the common council of the town of Juneau, at which election the question of whether such bonds shall be issued shall be submitted to the qualified electors of said town of Juneau whose names appear on the last assessment roll of said town for municipal taxation. Thirty days' notice of such election shall be given by publication thereof in a newspaper printed and published and of general circulation in said town before the day fixed for such election.

SEC. 3. That the registration for such election, the manner of conducting the same, and the canvass of the returns of said election shall be, as near as practicable, in accordance with the requirements of law in general or special elections in said municipality, and said bonds shall be issued only upon condition that a majority of the votes cast at such election in said town shall be in favor of issuing said bonds.

SEC. 4. That the bonds above specified, when authorized to be issued as hereinbefore provided, shall bear interest at a rate to be fixed by the common council of Juneau, not to exceed 7 per cent per annum, payable semiannually, and shall not be sold for less than their par value, with accrued interest, and shall be in denominations not exceeding $1,000 each, the principal to be due in 20 years from date thereof: *Provided, however*, That the common council of the said town of Juneau may reserve the right to pay off such bonds in their numerical order at the rate of $5,000 thereof per annum from and after the expiration of five years from their date. Principal and interest shall be payable in lawful money of the United States of America at the office of the town treasurer or at such bank in the city of New York, in the State of New York, or such place as may be designated by the common council of the town of Juneau, the place of payment to be mentioned in the bonds: *And provided further*, That each and every bond shall have the written signature of the mayor and clerk of the said town of Juneau and also bear the seal of said town.

SEC. 5. That no part of the funds arising from the sale of said bonds shall be used for any purpose other than specified in this act. Said bonds shall be sold only in such amounts as the common council shall direct, and the proceeds thereof shall be disbursed for the purposes hereinbefore mentioned and under the order and direction of said common council from time to time as the same may be required for said purpose.

With the following committee amendments:

Page 2, line 17, strike out the figure "7" and insert the figure "6."

Page 2, line 23, strike out "$5,000" and insert "$10,000." Line 25, strike out "five" and insert "four."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. CRAMTON. Mr. Speaker, I offer an amendment. On page 2, line 12, strike out the words "a majority" and insert "60 per cent."

The SPEAKER pro tempore. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: On page 2, line 12, strike out the words "a majority" and insert in lieu thereof "60 per cent."

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Michigan.

The question was taken; and on a division (demanded by Mr. CRAMTON) there were—ayes 44, noes 4.

So the amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

HEIGHT OF BUILDINGS IN THE DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Maryland rise?

Mr. ZIHLMAN. Mr. Speaker, I rise to ask unanimous consent that we return to Calendar No. 376, Senate bill 3269, to amend an act regulating the height of buildings in the District of Columbia, approved June 1, 1910.

The SPEAKER pro tempore. The gentleman from Maryland asks unanimous consent to return to Senate bill 3269. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That an act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, be, and it is hereby, amended by adding at the end of paragraph 5 of said act the following proviso:

"*And provided further*, That a building be permitted to be erected to a height not to exceed 130 feet on lots 15, 804, and 805, square 322, located on the southeast corner of Twelfth and E Streets northwest, said building to conform in height and to be used as an addition to the hotel building located to the east thereof on lot 18, square 322."

The SPEAKER pro tempore. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

MAIL EQUIPMENT SHOPS

The next business on the Consent Calendar was the bill (H. R. 6353) to authorize the Postmaster General to grant sick leave to employees of the mail equipment shops.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON. Reserving the right to object, Mr. Speaker, these are not postal employees.

Mr. KELLY. Mr. Speaker, these employees are a part of the postal establishment.

Mr. BLANTON. No; they are commercial employees engaged in preparing equipment.

Mr. LaGUARDIA. Oh, no.

Mr. KELLY. They are under the post-office establishment, and there are some 200 of them who have been left outside the provision with reference to sick leave which all the other employees of the Post Office Department receive.

Mr. BLANTON. They have nothing to do with the distribution or the delivery of mail.

Mr. KELLY. But they have a very vital connection with the equipment, mail bags, locks, and so forth.

Mr. LaGUARDIA. They are Government employees?

Mr. KELLY. Yes.

Mr. BLANTON. I think we are simply extending and extending all the time, and I shall have to object.

AIR MAIL SERVICE OF THE POST OFFICE DEPARTMENT

The next business on the Consent Calendar was the bill (S. 1051) to authorize and provide for the payment of the amounts expended in the construction of hangars and the maintenance of flying fields for the use of the Air Mail Service of the Post Office Department.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LEATHERWOOD. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice and retain its place on the calendar.

The SPEAKER pro tempore. Is there objection?

There was no objection.

AMERICAN WAR MOTHERS

The next business on the Consent Calendar was the bill (H. R. 9095) to incorporate the American War Mothers.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. TREADWAY. Mr. Speaker, reserving the right to object, I would like to inquire whether a bill put on the Consent Calendar on June 3 can be considered, three days not having elapsed since it was put on the calendar?

The SPEAKER pro tempore. It certainly can be considered, unless a point of order is made against it. The House can consider it under unanimous consent.

Mr. BEGG. Mr. Speaker, I am going to make a point of order on bills that have not been on the calendar three days, particularly the bills that were objected to last night and put back on the calendar to-day, and I want to add further that yesterday there were 28 bills put on the calendar.

This House, as such, has not had an opportunity to know anything about any of those bills that there was any question about. Nobody else has had any opportunity to find out about them, because everything has been under stress and everybody has been working hard and we did not have the time. I think it is unfair unless the men who have put the bills on are perfectly willing to be good-natured and stand for an objection when there is any doubt at all from a single person; otherwise I am going to insist on the point of order.

Mr. NEWTON of Minnesota. I hope the gentleman will not object to these bridge bills.

Mr. BEGG. I will not object to any of them except as I have indicated.

Mr. TREADWAY. Mr. Speaker, it seems to me there should be a ruling on this particular point as to whether or not a bill having been put on the calendar on June 3 must be objected to in order to conform to the statement of the gentleman from Ohio or whether the Speaker will rule that such bills may or may not be considered at this time, because from here on the calendar is filled with bills dated June 3 and June 4. I think it would be very advisable to have the Speaker rule on that point.

Mr. ROGERS of Massachusetts. I would like to call the attention of the Chair to the language of the rule, with particular reference to bills which were formerly on the calendar but which have been stricken from the calendar at the objection of one Member and thereafter replaced. The rule states:

Should objection be made to the consideration of any bill so called it shall immediately be stricken from such calendar, but such bill may be restored to the calendar at the instance of the Member, and if again objected to by three or more Members it shall be immediately stricken from such calendar, and shall not thereafter be placed thereon.

The rule also states that the Clerk shall call the bills which have been for three days upon the Consent Calendar. Any bills which have been on the calendar perhaps a week or a fortnight or a month or more and were objected to yesterday and were replaced to-day have certainly been on the calendar more than the requisite three days.

It has been the rule in the past, very often under similar language. As far as the three-day provision was concerned, the bill had to be on the calendar three days in order to be considered under the rule. But the purpose of that rule, the reason for that rule, would be that there ought to be, as the gentleman from Ohio has said, an opportunity for Members to become familiar with the bill so that the matter should not be brought up by surprise. These bills, such as those taken up yesterday and objected to for the first time by one Member, are bills that have been on the Calendar for some days, and every Member of the House has had an opportunity to consider them. The reason for that rule disappears when they are replaced and called a second time. Therefore I submit that even if the point of order should be made and sustained that the bills have not been on the calendar three days, that point of order should not be held to lie against bills restored to the calendar which have been upon the calendar three days in the past and objected to and again restored.

Mr. LONGWORTH. I think there is merit in the contention of the gentleman from Ohio that these bills of a general char-

acter, not having been on the calendar long enough to give Members an opportunity to examine their merits, ought not to be called in their order. It would be possible to pick out any bill by unanimous consent, but perhaps we could solve this difficulty in this way. I ask unanimous consent that all bills on the calendar placed there since day before yesterday and not in order under the rule—all bridge bills—be called up in their order and disposed of. I exclude all except bridge bills.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent that all bridge bills on the calendar be called up in their order as they appear. Is there objection?

Mr. MOORE of Virginia. Reserving the right to object, I would like to say to the gentleman that some of his colleagues have bills of great simplicity and just as unobjectionable as bridge bills to which nobody would make a point of order. I have in mind a bill in charge of the gentleman from New Jersey which has passed the Senate, and I think probably all would agree that it is a bill that ought to go through. I do not see why that bill should be excluded.

Mr. LONGWORTH. I am only asking to call bills in their order. I have no objection to taking up bills out of order by unanimous consent. That might be done, but I think it would be a mistake. I think there is much reason in the rule that these bills should be on the calendar three days.

Mr. MOORE of Virginia. I have heard it stated—I do not know how true it is—that under conditions prevailing now a different course has been pursued, that all bills have been called and considered without reference to the three-day provision, it being assumed that we are acting under unanimous-consent agreement.

Mr. CRAMTON. Mr. Speaker, let me make this suggestion: The purpose of working late last night and to-night was to go through the calendar so that bills to which there is no objection may be disposed of and thereby relieve the pressure on the Speaker to suspend the rules. Where a bill has been on the Unanimous Consent Calendar three days the rule permits the Speaker to entertain a motion to suspend the rules and pass the bill, and therefore the reason seems to justify the calling of those bills to-night. It is not necessarily a violation of the rules. I would like to suggest, and I would like to ask unanimous consent, that the Clerk may call bills now on the calendar regardless of when they were placed there. If there is any objection it is easy to dispose of them.

Mr. BEGG. Will the gentleman yield?

Mr. CRAMTON. Certainly.

Mr. BEGG. Will the gentleman modify his request so that one objection will keep the bill off?

Mr. LONGWORTH. That would be the effect anyway because this is the last chance.

Mr. CRAMTON. That brings up what the gentleman from Massachusetts [Mr. ROGERS] said. I do not think there is any force in that. These bills, whether they have been on the calendar or not, the rule requires them to be on the calendar three days, and that means three days in connection with this time on the calendar. If the gentleman from Ohio wants to have the request limited to include the provision that one objection will be sufficient, that is satisfactory to me.

Mr. LONGWORTH. After disposing of the bridge bills I will have no objection.

I think it would be wise under the circumstances, in the spirit of the rule, where the question of calling bills in their order is concerned, to let them be called with regard to the bridge bills, and I shall not object to the request of the gentleman after the bridge bills are called.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. CRAMTON. Mr. Speaker, I do not recognize that the only bill of importance in this Congress is a bridge bill.

Mr. BLANTON. Does not the gentleman recognize that a Member ought under the rule to have three days to investigate these bills?

Mr. LONGWORTH. Nobody has had an opportunity to do that.

Mr. BLANTON. We are passing bills here in a minute and a half that the gentleman from Michigan would want three days to investigate, I think.

Mr. LONGWORTH. I think we will save time if the gentleman from Michigan will not object to my suggestion. After that I think there will be no objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio that the bridge bills remaining on the calendar be called in their order? [After a pause.] The Chair hears none, and the Clerk will report the first bridge bill.

BRIDGE ACROSS MISSISSIPPI RIVER AT AITKIN COUNTY, MINN.

The first bridge bill in order was the bill (H. R. 9380) granting the consent of Congress to the Board of County Commissioners of Aitkin County, Minn., to construct a bridge across the Mississippi River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to Board of County Commissioners of Aitkin County, Minn., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at a point suitable to the interests of navigation, at or near section 9, township 52 north, range 23 west, in the county of Aitkin, in the State of Minnesota, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS THE RIO GRANDE

The next bridge bill in order was the bill (H. R. 9361) granting the consent of Congress to the construction of a bridge across the Rio Grande.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to C. M. Newman, his successors and assigns, to construct, maintain, and operate a steel vehicular and foot bridge, and approaches thereto, across the Rio Grande, at a point suitable to the interests of navigation, at or near the point known as Alamo Alto, on the American side of the river, 1,750 feet northwest from the El Paso and Hudspeth County line, in survey No. 51, El Paso County, Tex., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, such construction to be made only with the consent and approval of the Republic of Mexico.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

Page 1, line 5, strike out the words "steel vehicular and foot."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS OHIO RIVER AT PORTSMOUTH, OHIO

The next bridge bill in order was the bill (H. R. 9402) authorizing the construction of a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Fullerton & Portsmouth Bridge Co., a corporation organized and existing under the laws of the State of Kentucky, its successors and assigns, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, to a point in Greenup County, Ky., near the village of Fullerton, from a point near the central portion of the city of Portsmouth, county of Scioto, in the State of Ohio, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

Page 1, line 3, after the word "that," insert the words "the consent of Congress is hereby granted to."

Page 1, line 6, strike out the words "is hereby authorized."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended to read as follows: "A bill granting the consent of Congress to the Fullerton & Portsmouth Bridge Co. to construct a bridge across the Ohio River to connect the city of Portsmouth, Ohio, and the village of Fullerton, Ky."

SEISMOLOGICAL INVESTIGATIONS

Mr. CRAMTON. Mr. Speaker, for a variety in the proceedings I ask unanimous consent that we may return to Calendar No. 311 (H. R. 8308), authorizing the Coast and Geodetic Survey to make seismological investigations, and for other purposes, a bill introduced and reported by the gentleman from California [Mr. LEA], to which I objected last night in order that I might have opportunity to get further information. I have taken the matter up to-day with the Interior Department and the Coast and Geodetic Survey, and I have no further objection.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to return to the bill H. R. 8308 and consider the same at this time. The Clerk will report the title of the bill.

The Clerk reported the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, reserving the right to object, the gentleman from Michigan [Mr. CRAMTON] and the gentleman from Ohio [Mr. BEGG], when they let bills go by here like that one our friend from Missouri [Mr. HAWES] pulled over a while ago, which is going to cost a million and a half dollars to take care of a few bird eggs and have a game preserve——

Mr. CRAMTON. Oh, I was waiting for the gentleman from Texas to object to that.

Mr. BLANTON. I can not object to all of them. That one was a crime against the people of the United States.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Coast and Geodetic Survey is hereby authorized to make investigations and reports in seismology, including such investigations as have been heretofore performed by the Weather Bureau.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS ST. MARYS RIVER, FLA.

The next bridge bill in order was the bill (H. R. 9434) granting the consent of Congress to the States of Georgia and Florida, through their respective highway departments, to construct a bridge across the St. Marys River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the States of Georgia and Florida, through their respective highway departments, and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the St. Marys River, at a point suitable to the interests of navigation, at or near St. Marys, Camden County, Ga., known as the "Borrell Tract," and to the shore opposite thereto, known as "Roses Bluff," in the county of Nassau, in the State of Florida, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS THE CUMBERLAND RIVER

The next business on the Consent Calendar was the bill (H. R. 9456) to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a new bridge across the Cumberland River, in the county of Pulaski, State of Kentucky, near the town of Burnside.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent that the bill (S. 3380) of the same tenor, just passed by the Senate, be taken from the Speaker's table and be substituted for this bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky? [After a pause.] The Chair hears none. The Clerk will report the Senate bill.

The Clerk read as follows:

A bill (S. 3380) to grant the consent of Congress to the Cincinnati, New Orleans & Texas Pacific Railway Co. to construct, maintain, and operate a new bridge across the Cumberland River, in the county of Pulaski, State of Kentucky, near the town of Burnside

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Cincinnati, New Orleans & Texas Pacific Railway Co., lessee of the Cincinnati Southern Railway, and to its successors and assigns, to construct, maintain, and operate a new bridge and the approaches thereto across the Cumberland River, in the county of Pulaski, in the State of Kentucky, near the town of Burnside, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BARKLEY. I move that the bill H. R. 9456 be laid on the table.

The motion was agreed to.

Mr. NEWTON of Minnesota. Mr. Speaker, I ask unanimous consent that No. 378 on the calendar, which was objected to, may retain its place without prejudice on the calendar.

The SPEAKER pro tempore. The gentleman from Minnesota asks unanimous consent that the bill referred to may retain its place on the calendar. Is there objection? [After a pause.] The Chair hears none.

INCORPORATION OF AMERICAN WAR MOTHERS

Mr. SCHAFER. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. SCHAFER. I ask unanimous consent to take up Calendar No. 386, a bill to incorporate the American War Mothers.

The SPEAKER pro tempore. The gentleman from Wisconsin asks unanimous consent to return to Calendar No. 386. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, I want to state to the House that these bills have in the past been referred to the District of Columbia Committee, and invariably the District of Columbia Committee has refused permission to incorporate various organizations. I have in mind one a short time ago before that committee to incorporate a Theodore Roosevelt Association, and the Grand Army of the Republic and others have asked for incorporation in the District of Columbia. Now, they can incorporate in New York or Pennsylvania or in the gentleman's own State, and I think it is a great mistake to throw open the doors to incorporation of these various societies. I am informed that the Shriners are coming here and ask for an incorporation in the District of Columbia, and the Ku-Klux Klan could come in here for the same purpose, or any other organization.

Mr. STENGLE. Will the gentleman yield?

Mr. UNDERHILL. I will.

Mr. STENGLE. I hope and trust and I almost pray that the gentleman will not mention the names of the American War Mothers in connection with the Ku-Klux Klan.

Mr. UNDERHILL. If the gentleman has any objection to my mentioning the Ku-Klux Klan and the War Mothers, I desire to say that the partner of my joys and sorrows is a war mother and I offer no insult when I mention these various organizations. I am simply using them as an illustration of my objection to considering this at this time.

The SPEAKER pro tempore. Objection is heard.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I ask that this bill retain its place on the calendar without prejudice.

The SPEAKER pro tempore. The gentleman from Pennsylvania asks unanimous consent that the bill retain its place on the calendar witnout prejudice. Is there objection?

Mr. WATKINS. I ask the same with respect to Calendar No. 380.

Mr. RAGON. Mr. Speaker, what was the request of the gentleman from Pennsylvania?

The SPEAKER pro tempore. He asks unanimous consent that Calendar No. 386 may retain its place on the calendar without prejudice.

Mr. RAGON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RAGON. What would the attitude of this bill be tomorrow or the next day if the Consent Calendar should be called?

The SPEAKER pro tempore. It would probably be called when reached if it retains its place on the calendar where it can be called.

Mr. RAGON. I would like to ask the attitude of the gentleman from Massachusetts in regard to such contingency.

Mr. UNDERHILL. I maintain my position. I do not believe it is the right procedure.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. RAGON. Reserving the right to object, I would like to say this much: I introduced a bill here to incorporate the association which the gentleman from Massachusetts has mentioned, the Theodore Roosevelt Memorial Educational Association, in Little Rock, Ark. I would like to see the War Mothers' Organization incorporated here or elsewhere, as far as that is concerned, but since the District of Columbia Committee has seen fit to ban my bill to incorporate for educational purposes, I certainly would object to it and insist on the gentleman from Massachusetts doing so.

The SPEAKER pro tempore. Objection is heard.

Mr. RAGON. No; I do not object to its retaining its place.

The SPEAKER pro tempore. Without objection, it is so ordered.

Mr. RANKIN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RANKIN. I understood the gentleman from Ohio [Mr. LONGWORTH] obtained unanimous consent that these bridge bills would be in order first, and I want to know if it is not out of order even to recognize Members of the House to turn back and take up other bills not included in the unanimous-consent request?

The SPEAKER pro tempore. The Chair assumes, inasmuch as the request of the gentleman from Ohio was a unanimous-consent request, that at any time any Member of the House might prefer another unanimous-consent request, that would extend, repeal, or modify that.

Mr. RANKIN. Then his unanimous-consent request does not amount to anything if you are going to recognize Members to ask unanimous consent to take up these various and sundry other measures, regardless of the consent given.

The SPEAKER pro tempore. The Chair will state that what the House has done by unanimous consent it can undo by unanimous consent.

Mr. BLANTON. Mr. Speaker, I ask for the regular order.

The SPEAKER pro tempore. The regular order is demanded. The Clerk will report the next bridge bill.

BRIDGE ACROSS THE CHATTAHOOCHEE RIVER, ALA. AND GA.

The next bridge bill on the Consent Calendar was the bill (H. R. 9457) to authorize the States of Alabama and Georgia, through their respective highway departments, to construct and maintain a bridge across the Chattahoochee River, at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the States of Alabama and Georgia, through their respective highway departments, be, and are hereby, authorized to construct and maintain a bridge and approaches thereto across the Chattahoochee River, at a point suitable to the interests of navigation, at or near Alaga, Ala., connecting Houston County, Ala., and Early County, Ga., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments, as follows:

Page 1, line 3, after the word "that", insert the words "the consent of Congress is hereby granted to."

On page 1, line 5, after the word "Departments," strike out the words "be and are hereby authorized."

On page 2, amend the title.

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE CANAL NEAR REHOBOTH, DEL.

The next bridge bill on the Consent Calendar was the bill (H. R. 9515) granting the consent of Congress to the Delaware State Highway Department to construct a bridge across the canal near Rehoboth, Del.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report it.

The Clerk read as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Delaware State Highway Department and its successors and assigns to construct, maintain, and operate a bridge and the approaches thereto across the canal between Rehoboth Bay and the Delaware Bay, being a part of an inland waterway, partly natural and partly artificial, from Chincoteague Bay to Delaware Bay, at a point suitable to the interests of navigation, at or near Rehoboth, in the county of Sussex, in the State of Delaware, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

With a committee amendment, as follows:

Page 2, line 3, after the figures "1906," insert: "*Provided*, That the Secretary of War is hereby authorized, upon the recommendation of the Chief of Engineers, United States Army, to grant permission to the said Delaware State Highway Department, its successors and assigns, under such terms and conditions as the said Secretary may deem equitable and fair to the public, to cross and occupy such public lands pertinent to the United States Canal as may be necessary for the bridge and approaches thereto.

"SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

BRIDGE ACROSS THE MISSOURI RIVER

The next bridge bill on the Consent Calendar was the bill (H. R. 9516) to authorize the city of South Sioux City, in the State of Nebraska, to construct a bridge across the Missouri River between the States of Nebraska and Iowa.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report it.

The Clerk read as follows:

*Be it enacted, etc.*, That the city of South Sioux City, in the county of Dakota and State of Nebraska, a municipal corporation organized under the laws of the State of Nebraska, be, and it is hereby, authorized to construct, maintain, and operate a bridge, and approaches thereto, across the Missouri River, at a point suitable to the interests of navigation, at or near South Sioux City, in the county of Dakota, in the State of Nebraska, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments, as follows:

Page 1, line 3, after the word "that," insert the words "the consent of Congress is hereby granted to."

On page 1, line 6, after the word "Nebraska," strike out the words "be, and it is hereby, authorized."

Amend the title.

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next one.

BRIDGE ACROSS THE RED RIVER

The next bridge bill on the Consent Calendar was the bill (H. R. 9517) granting the consent of Congress to the Texas & Oklahoma Red River Bridge Co. (Inc.), St. Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Texas & Oklahoma Red River Bridge Co. (Inc.), of St. Jo, Tex., to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex., under specifications complying with all laws, rules, and regulations governing such, and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Red River at a point suitable to the interests of navigation, at or near Illinois Bend, Tex., in the county of Montague, in the State of Texas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With committee amendments as follows:

Page 1, line 3, strike out the words "Texas & Oklahoma Red River Bridge" and insert "North Texas."

On page 1, line 5, strike out the word "incorporated."

On page 1, line 5, strike out the word "toll."

On page 2, amend the title so as to read: "A bill granting the consent of Congress to the North Texas Co., of St. Jo, Tex., a corporation organized under the laws of the State of Texas, to construct a toll bridge across the Red River in the vicinity of Illinois Bend, Tex."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

BRIDGE ACROSS THE COOSA RIVER

The next business on the Consent Calendar was the bill (H. R. 9518) to authorize the State of Alabama, through its highway department, to construct and maintain a bridge across the Coosa River, at or near Leesburg, Ala., connecting Leesburg, Ala., and Center, Ala., on the primary road system of the State.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the State of Alabama, through its highway department, is hereby authorized to construct and maintain a bridge and approaches thereto across the Coosa River, at a point suitable to the interests of navigation, at or near Leesburg, Ala., connecting Leesburg, Ala., and Center, Ala., on the primary road system of the State, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 1, line 4, after the word "department" strike out the words "is hereby authorized."

Page 1, line 8, strike out the words "connecting Leesburg, Ala., and Center, Ala-" and in line 1, page 2, strike out "bama, on the primary road system of the State."

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended to read as follows: "A bill granting the consent of Congress to the State of Alabama, through its highway department, to construct and maintain a bridge across the Coosa River at or near Leesburg, Ala."

BRIDGE ACROSS PEEDEE RIVER

The next business on the Consent Calendar was the bill (S. 3355) granting the consent of Congress to the counties of Marion and Florence in the State of South Carolina, to construct a bridge across the Peedee River at or near Savage Landing, S. C.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the counties of Marion and Florence, in the State of South Carolina, or their assigns, to construct, maintain, and operate a bridge and approaches thereto across the Peedee River at a point suitable to the interests of navigation, at or near a point known as Savage Landing, S. C., in accordance wih the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

BRIDGE ACROSS TOMBIGBEE RIVER

The next business on the Consent Calendar was the bill (H. R. 9610) granting the consent of Congress to the Board of Supervisors of Lowndes County, Miss., to construct a bridge across Tombigbee River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the consent of Congress is hereby granted to the Board of Supervisors of Lowndes County, Miss., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Tombigbee River at a point suitable to the interests of navigation, at or near Columbus, in the county of Lowndes, in the State of Mississippi, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

WAR MINERALS RELIEF ACT

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that we may return to No. 285 on the Consent Calendar. In connection with that I will say that this is a bill to which I objected last night in order that I might have an opportunity to consult with the Secretary of the Interior concerning it.

Mr. BEGG. Mr. Speaker, I object.

Mr. CRAMTON. Will the gentleman withhold his objection?

Mr. BLANTON. Mr. Speaker, I make a point of order against the request. It is against the rules.

Mr. CRAMTON. Of course, the gentleman can object, but as a matter of courtesy I ask him to withhold his objection.

Mr. BLANTON. There was an understanding that these bridge bills were to be finished.

Mr. CRAMTON. We have finished the bridge bills. I ask unanimous consent to make a statement, and then if the gentleman wants to make an objection that is his privilege. Last night I objected because the report of the Secretary of the Interior did not assume responsibility for the action here proposed. I have a letter from the Secretary, and I want the gentleman from Ohio [Mr. BEGG] to read a paragraph of it, and then I want to put the whole letter in the RECORD.

Mr. BEGG. I will say to the gentleman that I have read the letter.

Mr. CRAMTON. I will then ask unanimous consent, if the gentleman is going to insist on his objection, to put the letter in the RECORD.

Mr. BEGG. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BEGG. The letter which the gentleman has in his hand from Secretary Work says that the department is not interested in this bill. If the gentleman will cut out the appropriation and simply release the limitation that is in the law so that they can use the money they now have, I will not object.

Mr. CRAMTON. I was just going to call attention to what the Secretary says about that. I have redrafted the bill in the last few minutes in that form, but I do not know that it is satisfactory to the other gentlemen, and I am going to ask unanimous consent to extend my remarks if the gentleman is going to insist on his objection.

Mr. BEGG. I shall insist unless the bill provides what I have suggested.

Mr. CRAMTON. This is a bill in which many of the Members are interested. I am going to ask unanimous consent to

extend my remarks by putting in the RECORD the March report of the Secretary of the Interior, the letter of to-day, and a suggested amendment to conform to the present recommendation of the Secretary, so that Members interested in the bill can judge whether that will meet their wants or not.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to revise and extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

Mr. BLANTON. Mr. Speaker, I reserve the right to object so I can ask the gentleman a question. The gentleman from Michigan knows that this embraces a claim of at least $2,500,000.

Mr. CRAMTON. That remains to be seen.

Mr. BLANTON. The gentleman knows that, does he not?

Mr. CRAMTON. No; I do not. I say that depends.

Mr. BLANTON. The gentleman is not as well posted as I gave him credit for being.

Mr. VAILE. Not a claim, but a great many claims.

Mr. CRAMTON. It all depends on what the United States Supreme Court decides. I opposed the original act, but we passed it and I submit it is not fair to pay one claim and reject another one just like it. The Secretary of the Interior in the letter I am going to put in says they have probably enough money to pay existing claims unless the decision of the Court of Appeals is sustained by the Supreme Court of the United States. In that event, a further appropriation will be needed, but he says he does not even need the authorization for the appropriation, but he wants the limitation removed. I have modified the bill but have not consulted with the friends of the bill. I do not know whether I am a friend of the bill or not, but I have not consulted with those most interested to know if my amendment will meet their wishes, so I am asking to put it all in the RECORD so everybody can read it in the morning and then determine what they want to do.

The SPEAKER pro tempore. Is there objection?

Mr. BEGG. Reserving the right to object——

Mr. WATKINS. Will the gentleman from Michigan yield?

Mr. CRAMTON. I yield.

Mr. WATKINS. As a matter of fact, about 65 per cent of the claims have already been paid, being those in the larger amounts, and there are many small claims throughout the various States that remain unpaid, and this condition has been brought about by virtue of the latest decision of the District Court of Appeals.

Mr. CRAMTON. The statement of Secretary Work, which I want to put in the RECORD, is very clear. The gentleman from Ohio, I think, intends to object anyway to-night, and I thought I would save time by putting the information in the RECORD and letting everybody know the situation.

Mr. BEGG. The gentleman from Michigan has used considerable time, and I would like sufficient time to make a statement as to why I shall object. A number of men around here are interested in this matter, and I do not particularly like the position of setting up my judgment against all these requests, but here is what Secretary Work says:

> The Government has appealed to the Supreme Court on the question of interest and payment for the investment. The Supreme Court has set the case for November 10. If the Supreme Court decides adversely, there is money enough.

There is not anybody in this House who knows whether the Supreme Court will decide adversely or otherwise, and the only reason they can not pay it out now is because of the action of the litigants in tying it up in court.

Mr. OLDFIELD. Will the gentleman yield?

Mr. BEGG. Let me finish this statement and then I will yield for any question. The Secretary goes on further and says, "We are not interested." That is the language; that the department is not interested in the appropriation, and the only thing they want at all is release from the restriction; and I submit we make ourselves ridiculous to appropriate $2,500,000 and then have it turned back into the Treasury because it is not needed, in the face of a court action set for November 10. Now I will yield to the gentleman from Arkansas.

Mr. OLDFIELD. The Secretary also states in that letter that if the Supreme Court reverses the decision of the court of appeals, none of the money which is appropriated in this bill will be used.

Mr. BEGG. Certainly. How could they use it? There is nothing to use it for.

Mr. CRAMTON. And, further, what has most reassured me and pleased me is that the Secretary says that the case will be taken to the Supreme Court of the United States so that no rights of the Government are going to be given away.

Mr. BLANTON. Will the gentleman yield for a question?

Mr. CRAMTON. Yes.

Mr. BLANTON. The point that is bothering me more than anything else is, even if we pass the bill, would there be this much money left in the Treasury to pay it?

Mr. CRAMTON. Let me read what I am suggesting as an amendment.

Mr. BLACK of New York. I ask for the regular order, Mr. Speaker.

The SPEAKER pro tempore. The question is, Is there objection to the request of the gentleman from Michigan?

Mr. BEGG. What is the request, Mr. Speaker?

Mr. ROBSION of Kentucky. I am the chairman of the Committee on Mines and Mining——

The SPEAKER pro tempore. Let the Chair state the situation. The gentleman from Michigan [Mr. CRAMTON] has asked unanimous consent to return to this bill.

Mr. BEGG. That is what I am objecting to.

Mr. ROBSION of Kentucky. Will the gentleman reserve it?

Mr. BEGG. I reserve it.

Mr. WATKINS. I ask unanimous consent, Mr. Speaker, to extend my remarks in the RECORD in this matter.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. WATKINS. Mr. Speaker, this bill is bottomed on a moral obligation of the Government to hundreds of red-blooded American citizens who answered the call of their country in the time of its dire distress. Prior to the World War this country secured its war materials from foreign countries. When we were hurled into that holocaust and finally had to face the German submarine at a time when all boats were needed for transporting troops to Europe, a call was issued to mining men and the mining industry to produce the necessary minerals. Cooperation and protection were guaranteed on the part of the Government to those who answered the call.

Hundreds of our citizens responded, invested large sums of money, produced the required minerals, and were continuing so to produce when suddenly the enemies of civilization capitulated and that never-to-be-forgotten day in November, 1918, was reached and as suddenly as the war had started did it end.

Suddenly and savagely, so to speak, all embargoes upon the importation of the minerals being produced were removed, and instead of cooperation the American citizen got competition, piracy instead of protection, for immediately peon and coolie produced war minerals, flooded the country, and bankrupted the American patriot.

In March, 1919, Congress recognized the wrong perpetrated against these domestic producers and enacted an act for their relief. The adjudication of the claims was assigned to the Secretary of the Interior, who later appointed a war minerals commission to hear said claims. Procrastination, inaction, vacillation, and inefficiency became the order of the day, and for over five long years these men have gone without relief. The situation has become distressingly acute with many of the claimants who were hurled into financial difficulties simply because they responded to the call of their country. This is now their day in court, and it will be more than a pity—it will be a tragedy—to deny them relief. I earnestly urge favorable consideration; I hope no one will object.

Over 60 per cent of the total claims have been adjudicated and paid, and the remaining claimants have been held up in the payment of their losses because the Secretary of the Interior states that he can not proceed with the payment of awards, as he is restrained by the relief act, and amendment thereto, of November 23, 1921, from exceeding the original appropriation of $8,500,000, which is now insufficient to reimburse the total net losses of claimants, since the courts have held that losses incurred in the purchase of war-minerals properties and leases and interest on borrow capital are legitimate items for reimbursement under the relief act.

The Senate has passed this measure. The House Committee on Mines and Mining has acted favorably and unanimously. It now remains for us to make good the word of the Government given in 1917, and by passing this bill liquidate the obligation entered into and incurred then and there in good faith; at least, do our part in making it possible for these men to secure in some measure the relief long since due.

Mr. ROBSION of Kentucky. Mr. Speaker, I want to make a brief statement. Some gentlemen were not Members of the House when the original legislation passed. The United States

Government during the war wanted certain minerals. These minerals could not be produced in this country at living wages. So Congress passed an act authorizing $50,000,000 to be appropriated to induce people to produce these minerals, and used this money to produce these minerals not only during the war but for two years following the war. In March, 1919, after the war, Congress thought it unwise to continue the proposition and they cut out the $50,000,000 or reduced it to eight and one-half million, and out of that these claims were to be settled. Now, under that provision hundreds of claims were filed. A commission was created by that act and these men passed on the claims and could have paid all of the claims according to their ruling to the men, but they would not allow interest on the investment; they would not allow the money that was put into the buying of land, and so forth. The courts have decided that the interest on the money paid out for land must be considered in the estimate of the amount of loss. Now, these men could not get the money they lost while producing the minerals for the Government during the war.

Mr. BEGG. There would have been ample money appropriated if the gentleman's statement was true. The claimants brought suit for the original investment plus the interest, and hence there is going to be a shortage.

Mr. ROBSION of Kentucky. The gentleman is only partly correct. Some of the claimants have entered suit and claimed the interest on the investment was a part of the loss, that is true.

Mr. WINGO. Will the gentleman yield?

Mr. ROBSION of Kentucky. Mr. Speaker, there is some money available, and if you count that interest on the investment and go according to the rulings of the court we lack about two and a half million dollars to pay it. Two-thirds of the claimants have been paid. The big claimants have got their money and got away. There are hundreds of little fellows that lost money, that your commission said lost money, and have not been paid.

The claimants have come in with their proof and spent half as much proving their claims as they will get. Mr. Speaker, I ask unanimous consent to return to this bill. If this authorization is made and if the money is not required it goes back into the Treasury. This money is being held up for the men who are broken up and waiting for the money.

Mr. CLARKE of New York. Will the gentleman yield?

Mr. ROBSION of Kentucky. Yes.

Mr. CLARKE of New York. Who constitutes this commission? What is the personnel of the commission?

Mr. ROBSION of Kentucky. I think there were three ex-United States Senators.

Mr. CLARKE of New York. That does not cut any ice with me.

Mr. WINGO. Mr. Speaker, I want to direct the attention of the gentleman from Ohio to one fact I think he has overlooked. I feel like I ought to say it because I am responsible for cutting this down to eight and one-half million dollars. The gentleman from Massachusetts, Mr. Walsh, and myself had the matter up and we were trying to reduce appropriations, to cut out that which was not needed. We estimated and we made a mistake—we estimated that eight and a half million dollars would be sufficient. There were $50,000,000 appropriated, and if we had not insisted and turned it back there would have been money available according to the decision of the courts. There is no question that the meritorious old claims are those being held up. I have no interest except that I was responsible for cutting it down to eight and a half million dollars.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan to return to this bill?

Mr. BEGG. I reserve the right to object.

Mr. BLANTON. I ask unanimous consent that the gentleman from Kentucky may proceed for 10 minutes more.

Mr. BEGG. We are trying to work out an amendment, and I am willing to have it reported.

Mr. CRAMTON. But first let us return to the bill. [Cries of "Regular order!"]

The SPEAKER pro tempore. The regular order is, Is there objection to the request to return to this bill?

Mr. BEGG. Mr. Speaker, if the request is granted to return, does that request include taking up and passing the bill?

The SPEAKER pro tempore. The Chair thinks so.

Mr. BEGG. Then I am going to ask unanimous consent that the amendment may be offered for information.

Mr. BLANTON. Mr. Speaker, I am going to object.

The SPEAKER pro tempore. The gentleman from Texas objects.

Mr. CRAMTON. Mr. Speaker, I have made a request which has not been quite correctly stated by the Chair. I do not request that the bill be passed. I simply request that we return to it. Having returned to it, it will still be subject to every objection that it would be in the first place.

The SPEAKER pro tempore. That is true of course, but the Chair understands that the gentleman from Texas objects to returning to it.

Mr. BLANTON. Until November 19.

The SPEAKER pro tempore. Objection is heard.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that the bill may retain its place on the calendar.

The SPEAKER pro tempore. The gentleman from Kentucky asks unanimous consent that the bill may retain its place on the calendar. Is there objection.

Mr. VAILE. Mr. Speaker, I object.

Mr. CRAMTON. Mr. Speaker, under the consent given me to extend my remarks on No. 285, Consent Calendar, S. 2797, I insert herewith the letters of the Secretary of the Interior, March 15, 1924, and June 5, 1924. I also insert the text of the proposed bill, showing the amendment I suggest, which seems to me to put the bill in accord with the Secretary's recommendation and to fully meet the situation:

DEPARTMENT OF THE INTERIOR,
*Washington, March 15, 1924.*

Hon. TASKER L. ODDIE,
*Chairman Committee on Mines and Mining,*
*United States Senate.*

MY DEAR SENATOR ODDIE: I am in receipt of your request for report upon S. 2797, entitled "A bill to authorize the payment of claims under the provisions of the so-called war minerals relief act," which bill proposes to appropriate out of the Treasury such sums, not exceeding $2,500,000, as may be necessary to satisfy such claims as shall be approved and certified for payment by the Secretary of the Interior.

If claims, or parts of claims, heretofore denied by the Secretary of the Interior are not reversed as a result of litigation now pending in the courts, the money still remaining available in the appropriation will be sufficient, or nearly sufficient, to pay the remaining unadjusted claims. If, as a result of pending litigation, items for property losses and for interest, etc., must ultimately be paid, I point out that because these items have never been allowed for payment no statistics are available on which to predicate a statement as to the per cent of the claims likely to prevail, but it is believed, from as careful an analysis of the claims as can be made, that the additional appropriation proposed of $2,500,000 will be sufficient to take care of all claims. Whether legislation making provision for an increased appropriation largely to take care of claims now in litigation should be enacted at this time is a question which, I think, Congress and not this department should determine.

Sincerely yours,

HUBERT WORK.

---

DEPARTMENT OF THE INTERIOR,
*Washington, June 5, 1924.*

Hon. LOUIS C. CRAMTON,
*House of Representatives, Washington, D. C.*

MY DEAR MR. CRAMTON: In further response to your inquiry of yesterday over the telephone in relation to S. 2797, I am submitting herein a brief statement which I believe furnishes the information you desire.

In the settlement of war minerals claims it has been held from the beginning that the act did not contemplate reimbursement for the purchase price of property or interest on borrowed capital. Mandamus proceedings were begun to compel such payments, and the Supreme Court and the Court of Appeals of the District of Columbia have sustained the relators. The Government has appealed to the Supreme Court of the United States in both cases, and the latter court has set November 10, next, as a date for hearing on the question of purchase of property. Upon advice that the lower courts had ruled favorable to the relators, the Secretary of the Interior suspended payment of awards because the present law contains an express provision that in the administration of the act the appropriation in no event shall be exceeded; and to make further payments would have been a violation of the law, as a deficiency is certain under the lower courts' findings.

Suspension of payments was ordered last October, but the work of adjusting claims went on and is still going on, no money being paid to claimants. The present situation is that while approximately a million and three-quarters dollars are still in the war minerals fund, not a cent can lawfully be paid to claimants unless the limitation provision of the law be repealed. S. 2797 repeals the limitation, and, if passed, will permit adjustment and payment of all remaining claims, a practical completion of the entire work under present

practice by the time the Supreme Court of the United States shall pass upon the appeals as to purchase price of property and interest on borrowed capital. This explains why the passage of the bill is desired now, when none of the money appropriated by it will be used unless the Supreme Court should hold adversely to the Government.

As to the number of claimants who would be benefited by the passage of S. 2797 and the extent to which they are interested, I may state that since last October, when payments were stopped, to the present time, net loss has been found in 164 claims, and the total amount which would be paid to these 164 claimants through the passage of S. 2797 is $325,233.48. In addition, awards could be paid in any and all of the 91 claims which are still to be examined wherein it shall be found that a net loss was suffered.

You will see by the foregoing that the department is not concerned about the appropriation of the $2,500,000 now. That money would not be needed unless the Supreme Court should compel repayment of purchase price or property or interest on borrowed capital, or both. But it is desirable that the limitation of the present law as to extending the appropriation be repealed, and, unfortunately, the repeal is linked with the appropriation of the $2,500,000 in the bill before you.

A further brief statement as to war-minerals work during the last 13 months may be of interest to you.

On May 1, 1923, there were 537 claims awaiting adjustment, and since that date 19 other claims have been resurrected, making a total of 556 claims to be considered. In the 13 months which have passed, 465 of these claims have been adjusted, and only 91 remain unadjusted.

I am placing this communication in the hands of the Commissioner of War Minerals Relief, Mr. Briar, for personal delivery to you. He will be glad to talk with you upon any phase of the matter.

Very truly yours,

HUBERT WORK.

---

"Amended form proposed by Mr. CRAMTON:

"An act (S. 2797) to authorize the payment of claims under the provisions of the so-called War Minerals Relief Act.

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That, to enable the Secretary of the Interior to lawfully pay adjudicated claims arising under the provisions of the so-called War Minerals Relief Act, ~~there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated such sum or sums, not exceeding $2,500,000, as may be necessary to satisfy such of said claims as shall be approved and certified for payment by the said Secretary of the Interior, under the provisions of~~ an Act entitled, 'An Act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes,' approved March 2, 1919, as amended, ~~and that~~ the limitation in said Act, ~~as amended,~~ on the aggregate amount to be disbursed thereunder in the payment of said claims is hereby repealed."

DEPUTY FISCAL AGENTS IN DEPARTMENT OF AGRICULTURE

Mr. HAUGEN. Mr. Speaker, I ask unanimous consent to return to Calendar No. 371.

The SPEAKER pro tempore. The gentleman from Iowa asks unanimous consent to return to No. 371 on the calendar. The Clerk will report the title of the bill.

Mr. BLANTON. Mr. Speaker, I reserve the right to object. I want to find out what the bill is.

The Clerk read as follows:

A bill (H. R. 8372) to authorize the designation of deputy fiscal or disbursing agents in the Department of Agriculture stationed outside of Washington.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. I object. We have too many deputies now.

Mr. HAUGEN. Mr. Speaker, will the gentleman withhold his objection?

Mr. BLANTON. Mr. Speaker, I am going to object.

DESIGNATING STATE OF NEW MEXICO AS JUDICIAL DISTRICT

Mr. MORROW. Mr. Speaker, I ask unanimous consent to return to Calendar No. 250, which was objected to last evening. The objection has been withdrawn, and at the same time I ask unanimous consent to take from the Speaker's table the Senate bill 3023, a similar bill, and substitute it for the House bill, H. R. 7523.

Mr. CLARKE of New York. Mr. Speaker, may I ask the nature of the bill?

The SPEAKER pro tempore. The gentleman from New Mexico asks unanimous consent to return to Calendar No. 250 for consideration. Is there objection?

Mr. CLARKE of New York. Mr. Speaker, reserving the right to object, I want an explanation of what the bill is.

The SPEAKER pro tempore. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (H. R. 7523) designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes.

Mr. CLARKE of New York. Mr. Speaker, I object.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask the gentleman from New York to withdraw his objection. I think the gentleman will not have objection when he understands.

Mr. CLARKE of New York. Mr. Speaker, I withdraw my objection.

The SPEAKER pro tempore. The gentleman from New Mexico calls up a bill which the Clerk has reported and asks unanimous consent to substitute the Senate bill, 3023, for the House bill and to consider the same. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the Senate bill.

The Clerk read the Senate bill, as follows:

An act (S. 3023) designating the State of New Mexico as a judicial district, fixing the time and place for holding terms of court therein, and for other purposes

*Be it enacted, etc.*, That the State of New Mexico shall constitute one judicial district, to be known as the district of New Mexico.

Terms of the district court shall be held at Santa Fe on the first Monday in March and September, at Albuquerque on the first Monday in June and December, at Roswell on the first Monday in May and October, at Las Cruces on the first Monday in November, at Silver City on the first Monday in January, at Las Vegas on the first Monday in February, and at Raton on the first Monday in April: *Provided*, That if at the time of the holding of the terms of said court in any year in the cities or towns of Las Vegas, Las Cruces, Silver City, or Raton there is insufficient business to justify the holding of any such term the same may be adjourned or continued by order of the judge of said court made at any place in the district: *And provided further*, That terms of court at Silver City, town of Las Vegas, and Raton shall not be held unless facilities therefor are furnished by the county of Grant at Silver City, the county of San Miguel at town of Las Vegas, and the county of Colfax at Raton, without cost and expense to the United States, until such time as court rooms and other necessary facilities have been constructed by the United States.

Causes, civil and criminal, may be transferred by the court or either judge thereof from any of the aforesaid places where court shall be held in said district to any of the places herein above mentioned in said district whenever in the opinion of the court or judge the convenience of the parties or the ends of justice would be promoted by the transfer.

That the marshal and clerk of said court shall each, respectively, appoint at least one deputy to reside at and who shall maintain an office at each of the cities of Albuquerque and Roswell, and the marshal and the clerk of said court may each, respectively, with the approval of the Attorney General, appoint one deputy at each of the cities of Las Cruces, Silver City, Raton, and the town of Las Vegas: *Provided*, That upon completion of the Federal building in the city of Las Vegas, the court shall be transferred to and held in the city of Las Vegas instead of the town of Las Vegas and court at the latter place discontinued.

The bill was ordered to be read a third time, was read the third time, and passed.

The bill H. R. 7523 was ordered to lie on the table.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

S. J. Res. 142. Joint resolution providing for the United States Government to have representation at the celebration of the centennial of the first meeting of the Legislative Council of the Territory of Florida.

ORDER OF BUSINESS

Mr. BEGG. Mr. Speaker, I rise to prefer a unanimous consent request, to see if we can get some order out of this. The floor leader, the gentleman from Ohio [Mr. LONGWORTH], just advised me that it is going to be necessary for us to stay here for an hour and 10 minutes yet, and perhaps longer, so as to be here if something comes up in the Senate.

Mr. BLANTON. Mr. Speaker, then the floor leader better get a quorum if he is going to do that, because the understanding was that we were going to work here until 11 o'clock.

Mr. BEGG. I suggest to the gentleman from Texas that the purpose of staying here late to-night is to be here so as to assist in getting work cleaned up so that we may adjourn.

Mr. BLANTON. Mr. Speaker, the floor leader is a reasonable man and he is not going to work this little handful of men here all night when others are off in their beds asleep.

He better go out and wake them up and bring them in and have a new shift.

Mr. BEGG. I will say to the gentleman from Texas that that always happens.

Mr. BLANTON. I know, and we have been working all day and I have been up since 6 o'clock this morning.

Mr. BEGG. Mr. Speaker, I ask unanimous consent that we begin at the beginning of the calendar and go through those bills, in order, that have been objected to once before.

Mr. BLANTON. Mr. Speaker, I object.

Mr. SCOTT. Mr. Speaker, I ask unanimous consent that we proceed with the call of the calendar where we left off when they took up the bridge bills. I have been waiting here all evening.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent that the House proceed to call up the bills on the calendar, beginning at the point where we stopped on account of the unanimous consent request of the gentleman from Ohio [Mr. LONGWORTH].

Mr. BEGG. Mr. Speaker, reserving the right to object——

The SPEAKER pro tempore. Is there objection?

Mr. BRIGGS. Mr. Speaker, I object.

Mr. LUCE. Mr. Speaker, I ask unanimous consent to take up Calendar No. 415.

The SPEAKER pro tempore. The gentleman from Massachusetts asks unanimous consent to take up Calendar No. 415. Is there objection?

Mr. CLAGUE. Mr. Speaker, I object.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, I ask unanimous consent to take up Calendar No. 389. This is a Senate bill which was passed and reported favorably by the Committee on the Judiciary, and is a very simple proposition.

The SPEAKER pro tempore. The gentleman from Pennsylvania asks unanimous consent to take up Calendar No. 389. Is there objection?

Mr. WOLFF. Mr. Speaker, I object.

Mr. SCOTT. Mr. Speaker, I ask unanimous consent to take up the next number on the order of bills, Calendar No. 391.

Mr. CLARKE of New York. Mr. Speaker, reserving the right to object, does the gentleman expect to remain here the rest of the evening and help us?

Mr. SCOTT. Yes; I expect to remain here.

CALENDAR NO. 391

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent to take up Calendar No. 391. Is there objection?

Mr. BLANTON. I ask to have the bill reported.

The SPEAKER pro tempore. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 4482) providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes.

The SPEAKER pro tempore. Is there objection?

Mr. BRIGGS. Reserving the right to object——

Mr. SCOTT. If the House will consent to the consideration of this bill I shall ask unanimous consent that the Senate bill, which was unanimously reported and adopted unanimously by the Senate, be substituted for the House bill. This represents only about 200 acres of land occupied by a number of people who lived on it for 40 or 50 years, and paid taxes and made improvements, and had a conveyance from the State of Michigan, to which the land was conveyed by the United States Government, and then later it was discovered that the Government had made an erroneous survey. Now, the only way they can remedy the mistake is by an act of the Congress of the United States.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the Senate bill.

The Clerk read as follows:

An act (S. 697) providing for the disposal of certain lands on Crooked and Pickerel Lakes, Mich., and for other purposes

*Be it enacted, etc.*, That upon the survey of any public lands erroneously omitted from the original survey found to exist within the area heretofore surveyed and represented upon the official plat of township 35 north, range 4 west, Michigan meridian, Michigan, approved February 9, 1841, on file in the General Land Office as a meandered lake, and said lake now appearing as two lakes, locally known as Crooked Lake and Pickerel Lake, in sections 20, 21, 22, 27, 28, and 29, the owners of adjacent lands shall have a preference right to purchase such lands so surveyed for a period of 90 days after the filing of the approved plat of such survey in the United States land office at Marquette, Mich., to be appraised at not less than $1.25 per acre, and that the State of Michigan be allowed to select such of the lands as may have inured to the State under the act of September 28, 1850 (9 Stat. L. p. 519): *Provided*, That nothing herein contained shall have the effect of defeating the rights of any person or the State of Michigan which may have attached to such lands or any part thereof.

SEC. 2. That the Secretary of the Interior is authorized to make all necessary regulations to carry out the provisions of this act.

The bill was ordered to be read a third time, was read the third time, and passed.

The bill (H. R. 4482) was laid on the table.

CALL OF THE HOUSE—NO QUORUM

Mr. GALLIVAN. Mr. Speaker, I ask unanimous consent to call up calendar No. 415.

The SPEAKER pro tempore. The gentleman from Massachusetts asks unanimous consent to call up Calendar No. 415. Is there objection?

Mr. BEGG. If the gentleman will withhold that for a moment, I desire to make a unanimous-consent request, and that is to begin where we left off and finish the calendar.

Mr. BLANTON. Mr. Speaker, I make the point of order we have no quorum.

The SPEAKER pro tempore. The gentleman from Texas makes the point of order of no quorum.

Mr. BLANTON. We have reached the hour of 11 o'clock, when it was understood we would quit.

Mr. BEGG. Will the gentleman withhold it to allow me to ask unanimous consent that we take a recess for 30 minutes, in which no business be transacted, and then we will know——

Mr. BLANTON. I make the point of order we have no quorum.

Mr. BEGG. There will be no business, and the gentleman can go home. I guarantee there will be no business transacted.

Mr. BLANTON. We can put it off until morning. I insist on my point of order.

The SPEAKER pro tempore. Obviously there is no quorum present.

Mr. BLANTON. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER pro tempore. The gentleman from Texas moves that the House do now adjourn.

Mr. BLANTON. I will withhold the motion if the gentleman wants to work all night.

Mr. WINGO. Mr. Speaker, I move a call of the House.

The question was taken; and the Speaker pro tempore announced that the ayes seemed to have it.

On a division (demanded by Mr. BEGG) there were—ayes 32, noes 62.

Mr. WINGO. Mr. Speaker, I ask for tellers.

Mr. BLANTON. I insist on the point of no quorum.

The SPEAKER pro tempore. The gentleman from Arkansas demands tellers. Fifty-six gentlemen have arisen, a sufficient number, and tellers are ordered.

The House again divided; and the tellers (Mr. WINGO and Mr. SANDERS of Indiana) reported that there were—ayes 4, noes 76.

So the call of the House was refused.

TAXATION

Mr. LANKFORD. Mr. Speaker and gentlemen of the House, on June 7 this session of Congress with a Republican majority will probably adjourn. The Democrats here have made a splendid showing in spite of great difficulties and have prevented the passage of hundreds of bad bills by defeating many and improving others. Much that is bad passed in spite of us. I will not at this time go into the full history of the session. The best example of what the Democrats have done is the so-called Mellon tax bill, which, when finally passed, was more Democratic than Republican, giving relief from millions of taxes, principally to the little taxpayers, but fair to all. The friends of the farmers were able to prevent finally a tax which would have crippled the new tobacco industry in my section and were able by hard work to improve the bill in many ways. The speeches of Democrats assailing the original bill were carried by the press of the Nation and helped largely to overcome the enormous sentiment caused by propaganda. I wish to thank the numerous papers of the country which carried in full my paraphrase of Don Lupton's poem on taxation. The Democrats need more publicity, putting before the country what we are really doing and striving to do. With the country informed of the ideals of the Democrats and of the failures and crimes of the Republicans there can be only victory for the Democrats at the next election.

ADJUSTED COMPENSATION

Mr. FISH. Mr. Speaker, my friends have asked me, as the sponsor for the 20-year endowment insurance bill recently enacted into law over the veto of the President, to review the

history of adjusted compensation in Congress and to answer the main objections raised by the opposition, which for the most part centers in the big metropolitan papers, ably abetted and supported by the big financial and industrial interests.

The bill has been enacted into law, and therefore what I propose to say is not propaganda but a simple statement of facts to prove without fear of contradiction that the paramount contention of the opponents of adjusted compensation that there could be no tax reduction if the adjusted compensation measure was passed to be wholly and totally false. The public was lead to believe from repeated statements in the press emanating from high sources that tax reduction was out of the question if Congress persisted in passing an adjusted compensation measure. By dint of constant repetition and intensive and extensive propaganda the taxpayer was forced to believe in the accuracy of these inspired articles. The Secretary of the Treasury gave out a statement to the effect that if the adjusted compensation bill passed that the price of Liberty bonds would go down, the rate of interest would go up, the price of market securities would fall off, and there could be no thought of tax reduction for another generation. In fact he went even as far as to threaten bankruptcy. A great many good citizens believed in this propaganda because it was served up to them daily in all forms and shapes.

It is a wonder to me that more people were not fooled into believing in the ruination of this country. It is a wonder to me that all the business men of the country did not see red over their morning newspapers. It is a wonder to me that not more taxpayers and business men were deceived by the prediction of financial disaster which was the incessant motif of these inspired articles.

The truth is, and can not be denied, that a few days after the enactment of the 20-year endowment insurance bill over the presidential veto and the passage of the Simmons tax reduction bill, reducing taxes $22,000,000 more than proposed under the Mellon program, the price of Liberty bonds recorded a new high for all times, the rate of interest remain the same, and the security market went up a few points. Now, after the enactment of both these bills, comes the astounding assurances from Senator SMOOT, chairman of the Senate Finance Committee, and Representative GREEN, chairman of the Ways and Means Committee, that there will be a surplus after all. Mr. GREEN puts the surplus for June 30, 1925, as high as $138,000,000 after making deductions for both these bills, and Senator SMOOT, who has always opposed adjusted compensation, admits there will be a surplus after all. What becomes of Secretary Mellon's prediction and his statement that if the adjusted compensation bill was passed there could be no tax reduction for another generation.

The Members of Congress who voted to override the presidential veto knew the facts, but the public, that defends for its information on the metropolitan press, did not have any means to know the truth, and are only just waking up to the fact that it has been purposely deceived, or, in well-known slang, bunkoed.

The fact is that the Members of Congress who voted for the adjusted compensation bill have been crucified on a cross of falsehoods and malicious propaganda for selfish purposes. The battle to keep the faith with our veterans has been won in spite of every kind of false and malicious propaganda. The people of America who were deceived by these attacks owe a debt of gratitude to the Members of Congress who stood by their guns in spite of all kinds of pressure and threats, and once again proved by their votes that this is a grateful Republic. Five years after the armistice, in spite of the promises and pledges made by the American people during and after the war, we were urged to plead poverty to escape an obligation that has been recognized and fulfilled by every one of the Allies during the World War, and partly with the money we loaned them. Both parties have pledged adjusted compensation to the veterans of the World War.

Former President Harding in a speech prior to his election stated that he was for adjusted compensation and he only vetoed the Fordney-McCumber bill for a reason which proved to be false. He was informed by Secretary Mellon that there would be a deficit of $600,000,000 in the Treasury on June 30, 1923, but it turned out instead that there was a surplus of $329,000,000. On June 30, 1924, according to Secretary Mellon himself, there will be a further surplus of $370,000,000 in the Treasury.

This bill is based on sound business and insurance principles, and without hampering business fulfills a pledge given during and after the war by the American people. It is nothing but a simple act of justice and recognition of the services of these men during the war. It is not a complete adjustment of compensation based on the difference of wages paid back home and the pay of the soldiers, as that would amount to $30,000,000,000. This bill will cost eventually about $2,000,000,000, or about half the cost of the Fordney-McCumber measure, which President Harding vetoed.

It carries out a continuous policy from Revolutionary days.

We adjusted the compensation of Washington, of Lafayette, of Steuben, and of all the soldiers and officers. It is an American policy; it is a sound policy; and it is a policy to which we have pledged ourselves individually and collectively.

Congress adjusted the payments of the war contractors, the railroads, and the munition makers, and in one day passed the Dent bill, appropriating $3,200,000,000 for the adjustment of business claims. I do not propose to discriminate in favor of everyone as against the soldiers, nor do I propose on this question to march up the hill and then down again. The whole trouble is that we did not meet it when we should have, five years ago, and given $300 to every soldier that was honorably discharged. We are now simply doing what we should have done five years ago by giving them partial adjusted compensation as the grateful act of a grateful Republic and the consummation of a debt of honor.

The bill is designed to be a simple act of justice built on solid insurance and business principles. It is brief, clear, and readily understandable to all who read, and should be acceptable to the veterans, the public, and to the taxpayers. Without desiring to go into the detailed merits of the bill I take this opportunity to state 14 points without fear of contradiction:

(1) No cash payment involved except under $50.

(2) Provides substantial insurance policies for living and for beneficiaries of those who have died since discharge.

(3) Appropriation spread over 20 years. Average, slightly over $100,000,000.

(4) Will not hamper business, harm economic stability, or effect price of Liberty bonds.

(5) Total cost less than cost to our Government of two months of war if it had continued based of General Staff figures of $44,000,000 a day.

(6) Reduction in annual naval appropriations resulting from Washington Limitation of Armaments Conference approximates $300,000,000, or almost three times the yearly cost of proposed 20-year endowment insurance.

(7) Forty-five per cent of cost estimated by President Coolidge of so-called Legion bill, without deducting 15 per cent estimated number who would not apply, which would reduce it to 39 per cent.

(8) Total yearly cost of $30,000,000 less than the annual interest being paid on English debt.

(9) Proposed reduction in Government expenditures in two and a half times the yearly cost of the bill. Reductions recommended by President Coolidge in recent Budget message amounts to $260,000,000—probable reduction by Congress much greater.

(10) Fulfillment of obligation and promises made during and immediately after the war, in recognition of services during the war.

(11) A proper adjustment of compensation.

(12) Insurance for national defense.

(13) Promotion of Americanization and national contentment.

(14) An expression of gratitude by a grateful Republic. The consummation of a debt of honor.

REVIEW OF THE HISTORY OF ADJUSTED COMPENSATION

1919

January to November: Nation's debt to ex-service man generally recognized. Fifty-six adjusted compensation bills introduced in Congress designed to right economic balance between man who fought and man who stayed at home and reaped rewards of war-time industry.

November 10–12: The American Legion, at its first national convention at Minneapolis, goes on record in favor of adjusted compensation, but "leaves with confidence to the Congress the discharge of this obligation"; that is, expresses no preference in favor of any of the 56 bills.

1920

February 10: National legislative committee of the Legion in special session declares that veterans feel themselves entitled to $50 a month, payable in Government bonds. Special committee is appointed to work out details of a bill, in response to requests from leaders in Congress desiring Legion to give some definite expression of veterans' desires, Congress being in a quandary with its 56 bills.

March 2: Legion's special committee, after canvass of veteran sentiment, decides that a bill which would meet approval

of a majority of veterans should give veteran option of taking his compensation in form of land settlement, home or farm aid, vocational training, or cash payable in bonds. The committee drafts such a bill.

March 19–22: National executive committee of Legion approves fourfold bill drafted along above lines. This bill is introduced in the House. Subsequently a fifth option is added, giving veterans an opportunity to take their compensation in the form of 20-year paid-up endowment insurance policies. Rate of compensation is fixed at $1 a day for home and $1.25 a day for foreign service, with maximums of $500 for all home and $625 for home and foreign service combined.

May 29: House of Representatives passes fivefold bill, 289 to 92. The bill is sent to the Senate and referred to the Finance Committee, where it remains when Congress adjourns a few weeks later. Large financial and industrial interests revealed as the principal opponents of the bill.

September 27–29: Fivefold bill indorsed by second national convention of the American Legion at Cleveland.

September 30: Senator Harding, a candidate for President, declares in favor of adjusted compensation, saying the bill before Congress should pass.

1921

June 20: Senate Finance Committee favorably reports fivefold bill.

July 5: By a vote of 46 to 4 the Senate makes the bill unfinished business, by which action the bill can not be displaced from the calendar without a record vote. This is a severe blow to the opposition, which works for delay.

July 6: Secretary of the Treasury Mellon sends the Senate a letter urging that the bill be beaten, asserting its passage would impose intolerable burdens on Treasury.

July 12: Mr. Mellon's letter does not have the effect intended. The compensation forces in the Senate stand firm, ready to pass the bill. Accordingly Mr. Harding appears before the Senate and asks them to send the bill back to the Finance Committee. His argument is that the Treasury can not stand the strain. The bill is recommitted by 47 to 29 votes, where it dies when Congress adjourns.

October 31–November 2: Adjusted compensation bill again indorsed by Third National Convention of the American Legion at Kansas City.

December 5: Congress reconvenes and five-fold bill is reintroduced.

1922

February 2: Secretary Mellon appears before House Ways and Means Committee and argues against the bill, saying its passage would embarrass the Treasury, because the Government was running at a loss and the deficit for the fiscal year of 1922 would be $24,000,000 and for the fiscal year of 1923 $167,000,000.

February: After a series of conferences between House leaders, Legion officials, and the President, to meet the President's wishes the cash feature of the bill is restricted to veterans who would be entitled to $50 or less. Arrangements are made for borrowing on the insurance certificates provided in the measure. Later the land-settlement provision is dropped from the bill. This leaves three options in the bill—home and farm aid, vocational training, paid-up insurance.

March 7: Secretary Mellon, Comptroller Crissinger, and Governor Harding of the Federal Reserve Board appear before the House Ways and Means Committee and urge defeat of the bill.

March 23: Bill passes House, 333 to 70. Fight for action in the Senate begins forthwith. The opposition strives to delay action.

June 30: Treasury statement at end of fiscal year shows surplus of $313,000,000 as against deficit of $24,000,000 predicted by Mr. Mellon in his arguments against the bill three months before. Amount of Mr. Mellon's incorrectness, $337,000,000.

August 31: Bill passes Senate, 47 to 22.

September 16: Bill goes to President.

September 18: Heads of 12 nationally known veterans' organizations, dating from Civil War down, call on President and urge him to sign bill.

September 19: President Harding vetoes bill, saying country can not afford it. In his veto message the President quotes Secretary Mellon's estimated deficit for fiscal year ending June 30, 1923, would be $650,000,000.

September 20: House of Representatives passes bill over President's veto, 258 to 54. Senate votes 44 to 28 to sustain veto; 4 short of the two-thirds required to nullify the President's action.

October 16–20: Fourth national convention of the American Legion at New Orleans again indorses adjusted compensation bill as vetoed by President and instructs newly elected national commander to fight for its enactment into law.

November 20, 1922, to March 4, 1923: Special session of Congress called to enact ship subsidy bill. This bill passes the House, but a filibuster develops against it in the Senate and holds up all legislation until ship subsidy is abandoned. This makes consideration of adjusted compensation a legislative impossibility.

1923

June 30: Annual Treasury report shows a surplus of $310,000,000 for fiscal year of 1923. To support President Harding's plea of national poverty the Secretary of the Treasury nine months before had predicted a deficit of $650,000,000. Amount of Mr. Mellon's incorrectness in this instance was $960,000,000.

March to October: Legion's national legislative committee lays plans for a finish fight in 1924. At the elections in November, 1922, a few weeks after Mr. Harding's veto, most of the candidates for the Senate and House who opposed adjusted compensation were defeated and most of those who favored it were elected. The friends of compensation have sufficient majorities in both Houses to pass a bill over a presidential veto. The opposition also lays its plans, which plans are carefully studied by the Legion. The fact that the opposition, actively supported by big business, would invoke the tax-reduction issue is anticipated.

October 15–19: Adjusted compensation bill again reindorsed by fifth national convention of the American Legion at San Francisco.

November 12: Secretary Mellon launches the campaign of the opposition, announcing that income taxes can be reduced if the adjusted compensation bill is beaten.

1924

November 12, 1923, to February 1, 1924: First phase of the final campaign opens. It is the opposition's inning. The most remarkable demonstration of organized propaganda Congress or the country has ever seen is unloosed by big business in favor of the Mellon plan, the slogan of which is "Bonus or tax reduction—which?" A barrage of letters and telegrams for the Mellon tax plan and against compensation all but smothers Congress. The anticompensationists are jubilant.

February: The Legion picks the psychological moment and launches its counterattack. The anticompensation propaganda is exposed as the manufactured clamor of the big interests. It is shown that employees of large firms were obliged to write their Congressmen to vote against adjusted compensation. It is shown that the Secretary of the Treasury has distorted figures. It is shown that Big Business is behind virtually every effort directed against the bill, denials notwithstanding. The Legion's case is so complete that President Coolidge himself, who early in the fight had come out against adjusted compensation, is moved to repudiate some of the methods of the anticompensationists which the Legion exposed. In a month the opposition's front, built up at a cost of millions of dollars, crumbles. House votes tax reduction.

March 18: Adjusted compensation bill passes House, 355 to 54. The vocational training and farm and home-aid options are eliminated, the insurance provision alone remaining, but provisions added calling for cash payments to deceased veterans' dependents.

April 23: Senate votes down cash option; passes insurance bill by vote of 67 to 17.

May 15: President Coolidge vetoes bill.

May 16: House repasses bill over veto, 313 to 78.

May 19: Senate repasses bill over veto, 59 to 26.

The victory is won.

NAVAL APPROPRIATION BILL FOR 1925

Mr. BLACK of New York. Mr. Speaker, the heaviest obligation on the Congress under all mandates of common sense as well as under the explicit directions of the Constitution is to provide adequately for the common defense.

At no time in our history has this obligation been more pressing than the present. We are rich at the expense of the armed world; we are torn with cross currents of racial, religious, and sectional prejudices; we are indulging a fetish of false economy that would knock the props from under government. Germany was charged with trying to influence American thought in Germany's favor in the war. English agencies in America are trying to divide American thought against Americans.

The disarmament conference of 1921 indicated the probable lines of the next war. It was thought that we should have an equality with England and a superiority over Japan. The

American people thought such was the result of the conference. The American representatives offered a plan of disarmament based on tonnage, with little regard to other features of naval strength. For instance, they gave no thought to the fact that England's Navy could fight us at its full strength, for the German Navy is no longer a menace to England, and the English fleet has been freed to attack. Our Navy would have to protect our tremendous coast lines of North and South America, if the Monroe doctrine is to carry other than a theoretical sanction.

It is useless just now to depend on international courts. The public thought of America is against our submitting to an international jurisdiction. When we are ready to accept such cooperation in the name of justice and peace we will be ready not only to accept the court but its physical accessories in the form of an international police superior in power to any nation. Nobody wants a court to give an academic decision; the great desideratum is not the decision but the action of the sheriff on on the decision. If your neighbor trespasses on your property, you do not want the court to say to him, "Mr. Jones, you ought to stay off Mr. Smith's property"; you want to have the court say, "Sheriff, if one John Doe Jones trespasses on the property of Richard Roe Smith, I order you to lock up said Jones." So all the talk of an international court without force in back of it would be childish, if it were not the expression of the knavery of international political deceit.

America's policy under present conditions had best be:

Love many—trust few;
Always paddle your own canoe.

The disarmament conference itself demonstrated the international bad feeling. All the delegates were maneuvering to secure war-time advantage for their respective countries. The nations avidly seized upon America's invitation to disarm, and they disarmed America. We were well on our way to lead the world in capital ships, and we agreed to cut down our capital ships to an equality tonnage basis with England. The following table indicates the comparative pre-conference and post-conference capital-ship strength of Great Britain, America, and Japan:

*Capital-ship strength*

| | Pre-conference | | Post-conference | |
|---|---|---|---|---|
| | Number | Tonnage | Number | Tonnage |
| United States | 33 | 1,118,650 | 18 | 500,650 |
| Great Britain | 26 | 752,450 | 22 | 580,450 |
| Japan | 16 | 545,278 | 10 | 301,320 |

Tonnage should not have been the basis of the reduction, for while we had been superior in tonnage England and Japan were left with certain advantages in the matter of speed:

*Speed of capital ships of United States, Great Britain, and Japanese navies*

| UNITED STATES | Knots |
|---|---|
| Florida | 22.08 |
| Maryland | 21.76 |
| New York | 21.47 |
| California | 21.46 |
| Idaho | 21.29 |
| Wyoming | 21.22 |
| Mississippi | 21.09 |
| New Mexico | 21.08 |
| Arkansas | 21.05 |
| Texas | 21.05 |
| Pennsylvania | 21.05 |
| Tennessee | 21.01 |
| West Virginia | 21.00 |
| Colorado | 21.00 |
| Arizona | 21.00 |
| Oklahoma | 20.58 |
| Nevada | 20.53 |
| Utah | 21.04 |
| GREAT BRITAIN | |
| Renown | 31.5 |
| Repulse | 31.5 |
| Hood | 31.0 |
| Tiger | 30.0 |
| Malaya | 25.0 |
| Valiant | 25.0 |
| Barham | 25.0 |
| Queen Elizabeth | 25.0 |
| Warspite | 25.0 |
| Royal Sovereign | 23.0 |
| Royal Oak | 23.0 |
| Revenge | 23.0 |
| Resolution | 23.0 |
| Ramillies | 23.0 |
| Benbow | 21.0 |
| Emperor of India | 21.0 |
| Iron Duke | 21.0 |
| Marlborough | 21.0 |
| Thunderer | 21.0 |
| King George V | 21.0 |
| Ajax | 21.0 |
| Centurion | 21.0 |
| JAPAN | |
| Kongo | 27.5 |
| Hiyei | 27.5 |
| Haruna | 27.5 |
| Kirishima | 27.5 |
| Mutsu | 23.0 |
| Nagato | 23.0 |
| Hulga | 23.0 |
| Ise | 23.0 |
| Yamashiro | 22.5 |
| Fu-So | 22.5 |

The only reason the other countries were ready to do business on disarmament reduction was because of our great tonnage. We reduced that and received no consideration in return except England's and Japan's agreement that in tonnage of capital ships they would not go beyond certain ratios. America had the money to keep up its capital ship strength and they did not. The total wealth of the United States as compared with the United Kingdom and Japan is shown in the following table, giving the pre-war and post-war figures:

*Pre-war and post-war money value of the wealth of the 5-5-3 nations*

| Nation | 1912 | 1922 |
|---|---|---|
| United States | $186,299,664,000 | $320,803,862,000 |
| United Kingdom | 70,500,000,000 | 120,000,000,000 |
| Japan | 11,700,000,000 | 22,500,000,000 |

Having agreed on capital ship reduction, on the reduction of the American Navy, the conference adjourned with little else to its credit.

Our representatives should have forced a general disarmament, for navies fight in aggregates, not in classes. Our battleship strength rests not only on the battleship strength of other countries but on their strength in auxiliary craft. Great harm was done America when the conference adjourned without providing for a general reduction. Were it not for the so-called American plan of tonnage reduction which we foolishly offered and the other nations wisely accepted we should not now be a second-class naval power. As Mr. Archibald Douglas Turnbull, writing in the Current History Magazine of March, 1924, states:

The United States, judged by its naval status, is to-day a second-class power. It has been pointed out by scores of authorities, both ancient and modern, that foreign trade is a vital essential of any nation's existence as a world power; it has been demonstrated that foreign trade can not live without an adequate navy; the inference is obvious. What, then, is the condition of the United States Navy to-day? It has abandoned its naval building program of capital ships; it has surrendered the command of the Pacific; and it has destroyed certain units of its fleet. This fleet now has its full international allowance of capital ships, but many of them not fully modernized. It has one-third of its destroyers. It has a fraction of its allowance of submarines and about one-half its aircraft. It has a percentage of its fuel supply for training its ships and its men. Its personnel is at about two-thirds of adequate strength. From all of which it seems that the United States, after lifting its voice to avert war, has been content to destroy the power which alone could make that voice carry.

That the spirit of the Disarmament Conference was not idealistic and altruistic, but was infernally practical and selfish, can best be proved by the action of Great Britain and Japan in taking advantage of the loopholes left by the conference. Comparative tables of the postconference and preconference cruiser and submarine strength indicated their cleverness. They wanted us to cut down battleships. England wanted to keep cruisers, and Japan to build submarines.

The evidence against Great Britain and Japan is found in these tables showing preconference and postconference strength of cruisers and submarines of United States, Great Britain, and Japan, as shown in an article by William Howard Gardiner in the American Review of Reviews, March, 1924.

*Cruisers*

| | United States | | Great Britain | | Japan | |
|---|---|---|---|---|---|---|
| | Number | Tonnage | Number | Tonnage | Number | Tonnage |
| Preconference | 10 | 75,000 | 52 | 274,020 | 21 | 106,680 |
| Postconference | None. | | None. | | 8 | 70,000 |
| Present total | 10 | 75,000 | 52 | 274,020 | 29 | 175,680 |

*Submarines*

| | United States | | Great Britain | | Japan | |
|---|---|---|---|---|---|---|
| | Number | Tonnage | Number | Tonnage | Number | Tonnage |
| Preconference | [1] 99 | 76,388 | 41 | 47,130 | 52 | 46,488 |
| Postconference | None. | | None. | | [2] 22 | 28,165 |
| Present total | 99 | 76,388 | 41 | 47,130 | 74 | 74,653 |

[1] Old type.
[2] Modern type.

Mr. Gardiner in this article, "Naval fleet ratios," states of the conference:

* * * The net result of all of this was that where the United States had sought a comprehensive limitation of fleets, it secured the limitation only of capital ships and of aircraft carriers, leaving all powers free to build as large a number and volume of cruisers, flotilla leaders, destroyers, submarines, etc., as each might choose. And this fraction of success, that involved the destruction of the better half of the American capital fleet, the United States was oblized to purchase by further agreeing to hold in their inadequate status quo our insular fortifications and naval bases west of the Hawaiian Islands and Alaska as by Article XIX of the naval treaty.

We are trying to build up our cruiser strength by the naval bill. We realize that the rules of the House require this preliminary legislation to the appropriation. It is to be regretted that parliamentary practice prevents our immediate building of warcraft, and I respectfully submit that a book of rules is a feeble defense against big guns. The naval bill does not build, but simply permits a subsequent Congress to appropriate for building.

Cruisers are very necessary to our growing merchant marine, which has effectively challenged England's commercial maritime supremacy. Speedy cruisers with long-range guns can best protect our investment on the high seas, which in due time will mean so much to America's prosperity.

Our crying need is coast-line protection, and in that we are sadly deficient. Submarines are needed. Japan is building 22 fleet submarines under German expert instruction. We have been building three fleet submarines since 1916—and the appropriation bill provides for a mine-laying submarine. There is a test of cruiser type submarine by the naval appropriation act under favorable conditions.

Submarines demonstrated their efficiency in the war. This is graphically pointed out in a statement given to the press on November 20, 1915, by the Hon. Claude Kitchin, as follows:

* * * England has a navy two and one-half times as strong as that of Germany. England and France has a fleet more than three times as strong as that of Germany. Take a map and you will see that the German seacoast on the North Sea is practically at the head of the English Channel, within less than 300 miles of London, and has several miles of seacoast along the Baltic. The bulk of the English and French fleet is now, and has been, within less than a day's run of the German coast. If England could bombard or land on the coast of Germany, on the North Sea or on the Baltic Sea, the war would end in 60 days. Germany would have to withdraw from France to protect her own soil. Why does not the fleet of the Allies, nearly four times as strong, go in and destroy the little fleet of Germany, bombard her seacoast at once, land an army, etc.? Certainly not because of a little German fleet already bottled up, one-fourth as large, but because of mines and submarines. Now, look at the map again and see how the Russian coast and the German coast compare and how they adjoin along the Baltic Sea. Germany has control of the Baltic, even against the fleet of the Allies. Germany has a fleet four times as large as that of Russia. What keeps Germany away from the Russian coast? Why doesn't Germany, with a fleet four times as strong, destroy the Russian fleet, bombard her seaport towns, and land an army? If she could do this the war would end in 60 days.

Russia would be forced to a separate peace in spite of her agreement with the Allies. Certainly it is not the little one-fourth size fleet she has but because of mines and submarines. If Germany, with her fleet not one-third as strong as that of the Allies, does not fear the bombardment of her coast or the landing of an army by the Allies, when within less than 200 miles, and if Russia, with her little fleet one-fourth as large as that of Germany, is not afraid of Germany bombarding her coast and landing an army on her shores, why in the name of common sense should any man, woman, or child in the United States fear that Germany or any other nation can ever get within gun reach of our shores or land an army on our coast, when they are over 3,000 miles away, provided we are equipped with mines and submarines?

But in this most powerful arm of defense, we have been weakened by parsimony and indecision. The House refused to accept my amendment for three more submarines to be built immediately. However, the Senate, under the inspiration of the Shearer articles in the New York Times, provided for the one mine-laying submarine under the 1916 authority.

The administration has scrapped our Navy not in the interests of peace but in the interest of politics. It destroyed our battleships by the conference and gives us a bill authorizing the building of eight cruisers at some future time. The chairman of the subcommittee in charge of naval appropriations admitted that our Navy needed auxiliary craft to maintain its relative strength, but also confessed that his subcommittee had not done all it could in this line under existing authority.

The Republican Executive sees that we scrap battleships while England and Japan is permitted to grow strong in craft that we have not, because the administration did not insist on a comprehensive disarmament conference. The Republican Congress, realizing our present deficiencies, think to satisfy this defect by legislation, and refuses to meet the situation by appropriation and construction.

THE REVENUE BILL

Mr. WEAVER. Mr. Speaker, the question of taxation is as old as organized society. It has vexed all governments in all civilized ages. Since the organization of society the question of a fair distribution of the burden of taxation has been difficult of solution. The Master Himself, on His way to Golgotha, was annoyed by His persecutors with the question, "Is it lawful to pay tribute to Cæsar?" At that time it is evident that the question upon whom the burden should rest was acute in the public mind.

I think that the very rich men of this country, those whose net incomes run into the hundreds of thousands and millions of dollars a year, who the gentleman from New York [Mr. MILLS] states have become inveterate tax dodgers, might well reflect upon the reply by the Master to this question by his tormentors. The gentleman from New York has told us bluntly that men who through the accumulation of their wealth have come into excessively large incomes have by every means found available eluded the payment of their taxes so necessary to take care of the great burden of indebtedness left from the war.

It is no purpose of the Democratic Party through the policy relating to tax reduction adopted by it to tax wealth merely because of a desire to punish wealth. The underlying principle of the Democratic scheme is that the great burden of taxation now resting upon the people should be borne justly by those who are able to pay, and should rest more lightly upon the masses of the people who through their daily struggle to live are constantly contributing to the wealth of the great industries of the Nation.

Mr. Mellon has told us repeatedly that the war is over and it is now necessary to return to a peace-time basis of taxation. We are anxious to return to the lowest possible tax burden that can be imposed. But, from the standpoint of taxation, is the war over? It is true that the fighting has ceased and that our soldiers have done their part. It is true that the boys gathered from the fields and farms of the Nation by their heroic services have ended the actual conflict. The guns of the Argonne are silent. The sacrifices and heroic courage of the American soldier have made it no longer a possibility that the rude hand of German tyranny may levy tribute upon American wealth or interfere with the growth of American industry. It is estimated that American wealth has grown since the beginning of the Great War from an estimated $186,000,000,000 to almost $350,000,000,000. But while all this is true we are left as a Nation with a very large and a very definite burden of indebtedness. The indebtedness of the United States is now, in round numbers, about $23,000,000,000.

The interest alone on this debt approximates a billion dollars a year. In addition to this we have other obligations which must be met. We are paying in compensation and hospitalization and other expenses for the wounded and the sick left from the World War about $600,000,000 annually. Government expenses as a whole have increased until now in order to balance our Budget it is necessary to raise by the tax bill about $3,500,000,000 a year. The problems of tax reduction, whether proposed by Mr. Mellon or by the Democratic leadership, should be considered with a view to the problems we must meet.

I think too little attention has been given to this fact in the discussion of the Mellon plan or any other plan of tax reduction. None of us are for taxation. We would like to abandon it. We know that it hampers business. We know that it is a drag upon the initiative of men, but somebody must

pay the taxes that are still necessary, and unless those who have it are willing to pay I do not know from what source it will be raised. The Mellon tax plan, for which so much propaganda has been distributed, and which is claimed to be the only scientific plan, proposed to cut in half, to reduce by 50 per cent, the surtaxes upon the large income-tax payer, while giving a modicum of relief to the millions of small incomes. The Democratic plan and that embodied in the bill now adopted by the Congress gives the greater reductions upon the millions of men and women having the smaller incomes, but at the same time giving at least 20 per cent to 25 per cent reduction, or reducing by at least one-fifth or one-fourth the income taxes of the very largest income-tax payers. Under the Mellon plan 21 men, with net incomes of $1,000,000 and above, would secure a tax reduction of $11,364,807. Under the Garner plan these same 21 individuals would have had their taxes reduced about $6,000,000, but Mr. Mellon and the President insist that it is totally uneconomic not to give the entire $11,000,000 reduction to these 21 men.

Before discussing the relative merits of the two plans known as the Mellon plan and the Garner or Simmons plan, there should be a clear understanding as to what is meant by net income. Before arriving at the net income, under the law the taxpayer is first entitled to deduct his exemptions. If the taxpayer is a married man he will be entitled to an exemption of $2,000, under the Mellon plan, with certain allowances for dependent children. Under the Garner plan it was proposed to make this $3,000, but under the Simmons plan as embraced in this conference report, the exemption is placed at $2,500, with certain allowances for dependent children. In addition to these exemptions the taxpayer is permitted to charge out of his gross earnings, in order to arrive at his net income, all of the cost of the operation of his business, including wages, salaries, taxes, repairs on buildings, and other items that may be considered in any sense a cost of operation, even including indebtedness which has become incollectible. So that a net income is that residue of undisputed earnings left after the payments of all possible operating expenses. It ought to be clear, therefore, that a man whose clear net income runs into the large figures, upon which Mr. Mellon has centered his interest, has ability to bear these expenses of his Government, and that any tax schedule is not unjust which recognizes this ability to pay. When the emergency was greatest the maximum surtax went as high as 65 per cent, but immediately after the war, in order to relieve this excessive burden, the surtax was reduced to 50 per cent without any proportionate reduction upon the smaller taxpayers. In addition to this, the Congress has heretofore stricken from the tax bill the excess-profits tax on corporations, amounting to $450,000,000 annually, without relief to the smaller taxpayers. It now develops that we will have a surplus of about $300,000,000 and that taxes can again be reduced, and Mr. Mellon proposes again to give the benefit of this reduction to the large taxpayers without concern to the smaller. The following table, taken from the statistics of incomes from returns of net incomes for 1921, compiled by the income tax department, show the number of persons making income-tax returns.

*Personal returns—Simple distribution by income classes*

[Income returned for the calendar year ended December 31, 1921]

| Income class | Returns, simple distribution, number in each class | Net income, simple distribution, amount in each class |
|---|---|---|
| Under $1,000 | 401,849 | $213,849,934 |
| $1,000 to $2,000 | 2,440,544 | 3,620,761,768 |
| $2,000 to $3,000 | 2,222,031 | 5,325,931,265 |
| $3,000 to $4,000 | 702,991 | 2,405,013,063 |
| $4,000 to $5,000 | 369,155 | 1,649,878,181 |
| $5,000 to $6,000 | 137,191 | 748,709,713 |
| $6,000 to $7,000 | 86,030 | 555,891,193 |
| $7,000 to $8,000 | 58,760 | 438,799,338 |
| $8,000 to $9,000 | 40,156 | 340,281,149 |
| $9,000 to $10,000 | 31,110 | 295,077,844 |
| $10,000 to $11,000 | 23,416 | 245,413,518 |
| $11,000 to $12,000 | 18,743 | 215,275,154 |
| $12,000 to $13,000 | 14,887 | 185,807,937 |
| $13,000 to $14,000 | 12,575 | 169,623,679 |
| $14,000 to $15,000 | 10,393 | 150,654,635 |
| $15,000 to $20,000 | 34,230 | 587,887,974 |
| $20,000 to $25,000 | 18,100 | 403,493,309 |
| $25,000 to $30,000 | 10,848 | 296,152,625 |
| $30,000 to $40,000 | 12,047 | 414,214,285 |
| $40,000 to $50,000 | 6,051 | 269,262,395 |
| $50,000 to $60,000 | 3,431 | 187,484,667 |
| $60,000 to $70,000 | 2,240 | 144,436,181 |
| $70,000 to $80,000 | 1,423 | 106,389,373 |
| $80,000 to $90,000 | 957 | 80,965,747 |
| $90,000 to $100,000 | 666 | 62,954,250 |
| $100,000 to $150,000 | 1,367 | 163,520,999 |
| $150,000 to $200,000 | 450 | 77,435,517 |
| $200,000 to $250,000 | 205 | 45,684,970 |

*Personal returns—Simple distribution by income classes*—Continued

| Income class | Returns, simple distribution, number in each class | Net income, simple distribution, amount in each class |
|---|---|---|
| $250,000 to $300,000 | 84 | $22,827,560 |
| $300,000 to $400,000 | 98 | 33,411,137 |
| $400,000 to $500,000 | 64 | 27,931,413 |
| $500,000 to $750,000 | 46 | 28,418,867 |
| $750,000 to $1,000,000 | 17 | 14,361,559 |
| $1,000,000 to $1,500,000 | 12 | 12,844,170 |
| $1,500,000 to $2,000,000 | | |

Including all classes from incomes of $1,000 to $1,000,000 and over, the total of persons making returns is 6,662,176. This number of persons therefore are obviously involved and interested in the subject of income-tax reduction. The number of persons paying incomes on amounts from $100,000 to $1,000,000 and over, with whom Mr. Mellon seems mostly concerned, are in number 2,289. In classes ranging below $100,000 we have a total of 6,659,887. These will be more largely benefited by way of reduction in their taxes by the Democratic schedules. To reduce by 50 per cent the taxes on the small number of large taxpayers is scientific, according to the Mellon plan and the widely distributed propaganda in its favor. To give the larger proportionate reductions to the more than 6,000,000, while at the same time giving a substantial reduction to the large income-tax payers, according to the same propagandists, is wholly unscientific and ought to be rebuked by the American people.

Mr. Mellon's objective, and his sole objective, has been to effect this 50 per cent reduction on the very large income taxes. For this he has been willing to sacrifice every other consideration. He and those who think with him have approached this objective indirectly and by every sort of specious argument and by the dissemination of many economic fallacies.

He told the people of the country that there could be no tax reduction if the so-called bonus bill for adjusting compensation to the soldiers was passed, but on the morning after the passage of the bill, in an interview in the Washington Herald, he admitted that the bonus could well be taken care of without business depression, and that the actual surplus for the fiscal year would be nearer four hundred million instead of three hundred and twenty-three million. And Senator SMOOT admitted that the tax bill containing the Simmons amendment would yield revenue for the next fiscal year to meet Government needs, to pay the money necessary for the bonus, and leave a surplus of at least $2,000,000, and that for the next fiscal year the reduction in taxes would amount to more than $400,000,000.

Another matter to which I wish to call attention is that while under the Garner plan the maximum surtax would have been 44 per cent and under the Simmons plan the maximum surtax is 40 per cent and under the present law is 50 per cent, actually the taxpayer does not pay 50 per cent at present nor will he pay a total of 40 per cent under the Simmons schedule. This is due to the fact that the amounts named are maximum amounts and that surtaxes are graduated under the present law from $6,000 to $200,000, and under the Simmons plan from $10,000 to $500,000. For instance, under the bill now in force the maximum surtax is 50 per cent and the normal tax is 8 per cent. Mr. Mellon and President Coolidge himself have referred to the fact that 58 per cent of the net incomes of the taxpayers would be taken by the Government. As a matter of fact, let us take a person who pays tax upon an income of $100,000. He pays his normal tax of 8 per cent. This normal tax is, of course, under the law payable upon all incomes subject to taxation at all. The surtax is payable only upon amounts above $6,000 and is graduated from 1 per cent up to 50 per cent upon successive amounts of income, so that the taxpayer only pays the sum of all the brackets, as they are termed, from 1 per cent to 50 per cent. In the case of an income of $100,000, under the present 50 per cent surtax law, the tax would be about $30,000. If this income was derived from dividends from corporations, the normal tax is not paid. This is due to the fact that the corporation pays a 12½ per cent tax upon its net earnings. Therefore in the case mentioned you would deduct the 8 per cent normal tax, leaving the actual tax in that instance paid on a net income of $100,000 at about $24,000. There is a wide difference between this and the $58,000 mentioned by Mr. Mellon. Under the Mellon plan it has been popularly supposed that a net income would bear a tax of 25 per cent, the maximum surtax under the Mellon plan, plus 6 per cent, the normal tax provided under the Mellon plan. But take, again, an income of $100,000. Actually, under the Mellon plan, the taxpayer would be required to pay about 19 per cent, and if derived from divi-

dends paid by a corporation the normal tax of 6 per cent would be deducted, leaving a total tax upon an individual income of $100,000 of about 13 per cent, or $13,000. The Garner plan proposed a maximum surtax of 44 per cent up to $100,000 and above. The following table shows what would have been paid upon incomes ranging from $5,000 to $1,000,000 under the Mellon plan and under the Garner plan:

| Net income | Present | Mellon | Garner |
|---|---|---|---|
| | *Per cent* | *Per cent* | *Per cent* |
| $5,000 | 2.00 | 1.50 | 0.80 |
| $10,000 | 5.20 | 3.60 | 2.80 |
| $20,000 | 8.60 | 6.30 | 5.40 |
| $30,000 | 11.73 | 8.87 | 7.93 |
| $40,000 | 14.60 | 11.35 | 10.45 |
| $50,000 | 17.28 | 13.36 | 12.96 |
| $60,000 | 19.00 | 14.94 | 15.47 |
| $70,000 | 22.49 | 16.34 | 18.27 |
| $80,000 | 25.05 | 17.60 | 21.11 |
| $90,000 | 27.60 | 18.76 | 23.88 |
| $100,000 | 30.14 | 19.84 | 26.47 |
| $150,000 | 38.76 | 23.56 | 34.31 |
| $250,000 | 46.26 | 26.54 | 40.59 |
| $500,000 | 52.12 | 28.77 | 45.29 |
| $1,000,000 | 55.06 | 29.88 | 47.64 |

The schedule as finally adopted by the Senate embracing the Simmons schedule would reduce the figures proportionately, as the surtax under the Simmons plan is only 40 per cent on the excess above $500,000. The above table also shows the difference in effect between the Mellon plan and the Democratic plan and the present law. The larger proportionate reductions are given upon the smaller incomes under the Democratic plan.

Again it has been industriously circulated by the advocates of the Mellon plan that the reduction of taxes upon net incomes, and especially the larger net incomes, would reduce the cost of living to the workingman and the consumer generally. It has been contended that these taxes were added directly to the cost of production, and that in order to bring down the prices of things that are ordinarily consumed it is necessary to reduce the surtaxes. This will bear investigation.

Undoubtedly taxes as an economic fact are considered in production cost. Excise taxes are directly added. Taxes upon business are added, including all ad valorem taxes. Wages and salaries are, of course, necessarily included. But the payment of an income tax—that is, a tax upon the net annual income—is in this respect unlike other taxes. In the first place, an income tax is not paid until the year following that in which it is earned. For instance, between January 1, 1924, and March 15, 1924, an individual is required to list his income, showing the net income earned during the year of 1923. To have added it to the cost of any article sold in business during that year would have been a sheer impossibility, for the very simple reason that the tax could not be determined until after the end of the year in which the business was done.

In fact, I am strongly convinced that the very desperate effort made to reduce surtaxes upon large incomes is due to the fact that these taxes can not be passed on to the consumer. The exorbitant tariff taxes levied under the Fordney-McCumber bill are estimated to place a burden, in the way of additional cost to the American consumer, of between three or four billion dollars. These tariff taxes are determined before the article is sold and added to its price and transferred directly to the backs of the consumer. There is no demand from those who are benefiting to-day from these tariff taxes for any reduction in aid of business and to aid the workingmen and benefit the consumer. The protected industries are making their large incomes to-day through the aid of these tariff impositions. They pass them on to the people and are now clamoring to be relieved from surtaxes upon incomes of excessive amounts derived from this source, and if with equal facility they could pass these surtaxes to the consuming public, Mr. Mellon and his propagandists would not be so agitated over income taxes. I herewith submit a table that is worthy of analysis. It is taken from the Statistics of Incomes for 1921, compiled by the Treasury Department.

*Distribution of personal income, by sources and income classes, calendar year 1921*

| Income classes | Wages and salaries | Business | Partnerships, fiduciaries, etc. | Profits from sales of real estate, stocks, and bonds | Rents and royalties | Dividends | Interest and investment income | Total income |
|---|---|---|---|---|---|---|---|---|
| Under $1,000 | $321,336,288 | $118,976,642 | $35,958,353 | $38,687,462 | $116,652,120 | $168,395,621 | $137,227,982 | $937,234,468 |
| $1,000 to $2,000 | 3,243,836,486 | 255,152,738 | 64,351,011 | 21,079,522 | 151,391,796 | 66,325,058 | 187,355,502 | 3,989,492,113 |
| $2,000 to $3,000 | 4,557,288,548 | 504,808,881 | 131,467,747 | 47,918,236 | 240,115,413 | 97,084,540 | 271,229,250 | 5,849,912,615 |
| $3,000 to $5,000 | 2,859,188,037 | 671,340,314 | 205,838,250 | 100,717,407 | 248,866,148 | 230,009,270 | 321,548,395 | 4,637,507,822 |
| $5,000 to $10,000 | 1,342,428,025 | 402,162,409 | 245,779,077 | 102,815,373 | 171,850,952 | 349,231,315 | 246,391,101 | 2,860,658,253 |
| $10,000 to $20,000 | 739,488,597 | 203,725,400 | 211,339,251 | 69,380,623 | 107,953,738 | 407,565,766 | 195,199,049 | 1,934,652,424 |
| $20,000 to $40,000 | 432,377,205 | 114,939,390 | 179,099,464 | 45,016,118 | 70,605,214 | 409,556,238 | 150,913,119 | 1,402,505,748 |
| $40,000 to $60,000 | 141,721,538 | 38,292,212 | 82,954,230 | 17,124,369 | 25,446,558 | 208,162,957 | 63,567,022 | 577,268,886 |
| $60,000 to $80,000 | 69,183,289 | 17,413,250 | 53,245,226 | 7,555,036 | 13,260,527 | 129,500,747 | 34,945,233 | 325,103,308 |
| $80,000 to $100,000 | 36,959,421 | 10,451,395 | 33,288,987 | 3,736,992 | 7,496,676 | 78,235,249 | 18,459,463 | 188,628,183 |
| $100,000 to $150,000 | 35,031,445 | 11,686,903 | 37,751,740 | 3,627,370 | 8,257,046 | 100,568,997 | 23,791,009 | 220,714,510 |
| $150,000 to $200,000 | 13,070,218 | 3,819,615 | 19,235,446 | 1,755,299 | 4,036,166 | 49,960,272 | 10,091,507 | 102,868,523 |
| $200,000 to $250,000 | 8,030,747 | 2,785,738 | 9,451,914 | 476,067 | 2,013,993 | 31,898,612 | 6,715,841 | 61,372,892 |
| $250,000 to $300,000 | 2,999,694 | 2,390,270 | 5,306,958 | 543,628 | 464,146 | 15,219,643 | 2,772,307 | 29,705,646 |
| $300,000 to $500,000 | 5,624,235 | 3,090,472 | 13,493,482 | 1,598,829 | 2,268,217 | 55,429,204 | 10,400,671 | 91,905,110 |
| $500,000 to $1,000,000 | 1,873,412 | 4,249,156 | 9,592,904 | 469,259 | 4,356,613 | 31,353,986 | 5,161,187 | 57,056,517 |
| $1,000,000 to $1,500,000 | 352,856 | 1,024,825 | 2,958,814 | 65,468 | 1,233 | 9,956,287 | 587,090 | 14,946,573 |
| $1,500,000 to $2,000,000 | | | | | | | | |
| $2,000,000 and over | 2,379,123 | | 73,454 | 291,615 | 2,021,356 | 38,498,637 | 3,983,166 | 47,247,351 |
| Total | 13,813,169,165 | 2,366,318,610 | 1,341,186,308 | 462,858,673 | 1,177,957,882 | 2,476,952,399 | 1,660,338,895 | 23,328,781,932 |

An examination of this table should disclose clearly the fallacy of the argument that income taxes go into the cost of production. That they do not is stated by most, if not all, economic writers. In fact Mr. GREENE, the chairman of the Committee on Ways and Means in the House, has himself stated that income taxes did not go into production cost. This table shows that the total income returns taxation for 1921, the last year for which statistics are available, amounted to $23,000,000,000 in round numbers. This represents the basis upon which all incomes were levied. Of this amount it will be seen from this table that $13,000,000,000 was returned by persons having incomes from $1,000 to $2,000,000 and over, and represented salaries and wages. Now, undoubtedly salaries and wages themselves go into the cost of production and are reflected in prices. They are one of the principal items of cost. The figures given represent all salaries and wages returned for income-tax purposes. But can it be reasoned successfully that the payment of an income tax to the Government by one of these individual taxpayers is considered by his employer in making up the selling price of an article that employee produces? Thousands of these returns were made, for instance, by men connected with producing corporations. But would the corporation in any sense be interested in the question of the income tax the employee would be required to pay under the law? Let us suppose that one of these individuals has received a salary of $10,000 a year from a given corporation. That salary is added to the cost of the article produced, but certainly there could be no basis by which the corporation itself would be interested in or could follow the payment of the income tax by its employee and add it to the price paid by the consumer.

In the above table it is shown that incomes derived from sales of real estate, stocks, and bonds, amounting to $462,858,673 were reported in the more than 6,000,000 tax returns. The total income tax of the individual would probably be made up from items of this class and items of other classes and the total net income determined. But can any stretch of the imagination figure how the income tax paid by persons receiving commissions from sales of real estate, stocks, and bonds is in any way added to the price of any article? Let us take a real estate broker. He makes a commission of $500 from the sale of one piece of property, $1,000 from another in a different

locality or different section, until at the end of the year his total net income is $25,000. He pays an income tax based upon this amount. Does this or can this in any way be added to the cost of real estate or be reflected in the price of any article to the consumer? The same is true of stocks and bonds. Upon the aggregate commissions the individual pays an income tax, but it is reflected in an increased price nowhere. An analysis of the other sources of income will disclose the same situation.

This view may further be illustrated by reference to the above table showing the amount of incomes returned representing dividends from corporations. The total is $2,476,932,379. These figures represent dividends from corporations paid to all classes of our people. At the end of the year the corporation, after having figured its cost of operation, determines what dividends shall be paid to the various stockholders and these dividends are distributed according to the amount of stock held by each. The individual probably includes the dividends with other sources of income in arriving at his total net income. But certainly the corporation takes no account of the income tax paid by the various stockholders so as to figure such taxes in the cost of production at all. And certainly the individual stockholder has no opportunity to pass it on to anyone.

Professor Seligman, of Columbia University, Professor Taussig, formerly of Harvard University, Professor Ely, of the University of Wisconsin, and other great economists have stated absolutely that prices are fixed and governed by cost and that attacks upon the net income in no way enters into such cost.

Yet, under the Mellon plan we are told, and the country has been educated to believe, that by reducing by one-half the surtaxes upon the large income-tax payers, is to bring a direct blessing in the way of reduced cost of living to the consumer, but that the reduction of taxes upon the men who actually do the business of the Nation, men whose incomes range from $4,000 to $50,000 is grossly unscientific and hurtful to business. And in this connection I wish further to call attention to the table last above submitted. It will convince you that the millionaire after all does not figure in the business of the Nation as we have been taught to believe. A casual study of the table above set out, showing the sources of net incomes, shows conclusively that the real business of the Nation is done by men having net incomes of $50,000 to $60,000 and below. Take the column relating to business, and President Coolidge continually refers to freeing money for business purposes, and you will see that the total amount of income returned by persons with incomes of $1,000,000 and above amounts to only $1,024,825 and that the total net incomes reported by this class are only $57,000,000. The total income returned by persons with incomes ranging up to $60,000 constitutes almost entirely the total of $2,366,318,610 returned as incomes derived from business sources. It will not be necessary to discuss the illuminating facts disclosed by the above table to refute the claim made by the President and by Mr. Mellon that the very high surtaxes are the important and very necessary object of tax revision.

Mr. Mellon has stated repeatedly that—

> There is only one thing that must be insisted upon—the high surtaxes must be reduced.

His theory is that this is necessary to liberate money for business investments. But why not liberate the money of the men who are actually doing the business of the Nation as far as it can be done? The men with these smaller incomes not in excess of $60,000 are the men who are manning the corporations, making the wheels of industry turn, and whose daily and hourly activities constitute the very industrial life of the Nation. The Simmons plan is designed to relieve as far as possible this class of incomes from the oppression of the surtax, and when the amount of business done by them, as reflected in the income-tax returns, is considered there is no escape from the fact that to relieve them as far as possible will invigorate business far more than relieving the comparatively few with incomes above $100,000 to $1,000,000.

Mr. Mellon does not strike his pace in reduction until he passes the $100,000 mark. But we are told that these men are seeking refuge in tax-exempt securities and every sort of evasion. The report of the Federal Trade Commission just issued shows that a comparatively small amount of tax-exempt securities are held by the very wealthy. In fact, the Treasury reports show that in 1921 estate taxes were collected upon a gross amount of $2,879,372,168. This represents estates of decedents liable to the estate tax. This is a very large amount, and analysis of the returns show that of this amount only a little more than $163,000,000 was represented by tax-exempt securities. The total burial expenses of the persons leaving these estates was $106,000,000, so that the amount represented by tax-exempt securities would not have been sufficient to bury the persons leaving these estates. It is true that there are some twelve billion of tax-exempt securities, but no law can affect them now, and when compared with the enormous amount of money invested in business, totaling $350,000,000,000, the whole affair becomes insignificant.

Under the Mellon plan a person with a net income of $5,000 and paying a tax of $100 would have a reduction of $25. The Simmons plan reduces this to about $40, but the President states that this is mere tax reduction and not tax reform. The man with a clear net income of $1,000,000 would under the Mellon plan have received a total reduction of his taxes of $251,000, but, according to the President, this is tax reform and not tax reduction.

If taxes are hurtful to business, which we all concede, then the Simmons plan can not be condemned, for it reduces the total amount of taxes more than the Mellon plan. But this is mere tax reduction, for the reason that it places the greater per cent of reduction on incomes below $60,000 and fails to give the 50 per cent reduction demanded by Mr. Mellon and the President on incomes of $100,000 and above. But the Simmons plan also provides for substantial reductions of the large surtaxes. They will be reduced at least 20 to 25 per cent, yet the country is continually told that because the full amount demanded by Mr. Mellon has not been allowed that business will not be invigorated and that the Democratic scheme is unscientific.

Mr. FREAR, of Wisconsin, stated that, though he was a Republican, he would support the Democratic plan in preference to the Mellon plan, because it benefited 449 out of every 500 taxpayers. Is this not to be the object of tax reduction? Is not the policy of benefiting the taxpayers as a whole an object of concern? Even Mr. LONGWORTH, the majority leader, stated that it was impossible to adopt a scheme that would give a 50 per cent reduction upon the large taxpayers and a 25 per cent reduction upon the smaller taxpayers. It is not sound. It is not economic. It is not democratic.

In North Carolina the total number of persons making income-tax returns for 1921 was 44,161. Of these, 44,123 would be benefited more under the Democratic plan and 38 would be benefited more under the Mellon plan. In Arizona there was a total of 18,477 taxpayers, 1 of whom would be benefited more under the Mellon plan, while the other 18,476 would derive greater relief under the Democratic plan, and the same is true proportionately of all the States. But in order to create tax reform, as Mr. Coolidge terms it, and to invigorate business, as Mr. Mellon demands, these comparatively few must have their surtaxes reduced by 50 per cent. We must believe that a reduction of 20 to 30 per cent of their taxes is not sound economics but that in distributing the small reduction that we can now make the lion's share must again go to the very high surtax payers.

If this is to be the issue, then certainly it will be welcomed by the Democratic Party. Why does the President not concern himself with the enormous burden of indirect taxation levied upon the people by the Fordney-McCumber tariff bill? It is estimated that this burden amounts to three to four billion dollars. It amounts to as much in one year as the total tax collected by the Government from all sources. We have suffered from excessive freight rates. We have suffered from a lack of international cooperation for the extension of American markets. But, with these great burdens which have resulted so disastrously to American business, the whole force of the administration has been placed upon the proposition of cutting in half the surtaxes upon men with very large incomes while denying a small measure of relief to those of smaller incomes. We have no desire to punish wealth. It is not the purpose of the Democratic Party nor of its leadership. In the bill adopted, which is undoubtedly Democratic in its provisions, the large surtax has been justly dealt with. The amount of reduction given under the Simmons plan to a man with an income of $1,000,000 is very large computed in dollars and cents. This reduction is more in one year than the average man accumulates in a lifetime. But this is mere tax reduction and not tax reform, as announced by Mr. Coolidge.

Mr. Mellon has erected a golden calf in the market place, and many are they who have fallen down to worship it.

### VIOLATIONS OF PROHIBITION LAWS

Mr. WATRES. Mr. Speaker and gentlemen of the House, on Thursday, May 29, the gentleman from Connecticut [Mr. O'SULLIVAN] made some remarks on law enforcement, in the course of which he read from a table of statistics from a number of cities as to the arrests for drunkenness between the years 1915 and 1923, in which he included the city of Scran-

ton, Pa., the purpose being to show that there were more arrests for the spring of 1923 than there were in 1915.

I have no doubt that it was not in the gentleman's mind to say anything which he would consider as a reflection on the citizens of Scranton. Inasmuch, however, as the portion of his remarks referred to will, without doubt, be wrongly interpreted by many, the statement calls for some attention.

It can not be claimed that there are no violators of the prohibition laws, but I desire to say emphatically to the gentleman that the people of that community are a law-respecting and a law-abiding people, and any remarks which might indicate the contrary are unjust in the extreme.

Since the gentleman from Connecticut has publicly called attention to the city of Scranton in such a way, I ask him to show me any city of the same size in Connecticut or any other part of the United States which has given such concrete evidence of its citizenship as has Scranton within the last nine months. Its public-spirited and generous citizens have raised for a community chest to provide for the various needs of its unfortunate citizens over $580,000 as an annual fund, and $700,000 has been provided for a chamber of commerce or community center. In both cases the limit of time not to exceed 10 days was fixed, and in each case the full amount was raised, and the campaign closed successfully on schedule time.

I must not trespass further on the time of the House in these busy closing hours, but I assure the gentleman from Connecticut that the people of Scranton have much pride and great faith in their community, and that they respect the laws of the country and revere its institutions.

SESQUICENTENNIAL, CONTINENTAL CONGRESS

Mr. VARE. Mr. Speaker, in commemoration of the sesquicentennial of the Provincial Committee and the one hundred and fiftieth anniversary of the opening of Continental Congress, exercises will be held in the city of Philadelphia September 25, 1924.

Invitation has been extended to the President of the United States, Members of Congress from the thirteen Colonies which took part in the Continental Congress from which this great Nation grew, and other high officials to join in these exercises. Any Member of Congress from any State in the Union will be welcomed and is invited to join in the celebration of this commendable exercise.

The Carpenters' Company, in outlining the purposes of the celebration, has declared:

One hundred and fifty years ago the message of Massachusetts in distress, borne by Paul Revere, here reached the patriots of Pennsylvania, with the invitation to unite in Colonial Congress. In this earliest shrine of liberty the voice of Patrick Henry spoke to the assembled Members of Continental Congress, in stirring eloquence, the first words of that body, and gave first utterance to the soul and spirit of America now being born. Within this sacred sanctuary the representatives of the thirteen Colonies of North America bore the infant Nation, now compacted, into moral unity of mind, heart, and hand, into that stable union of aspirations, determined ambitions and indivisible Commonwealth of service and self-sacrifice which is now the United States.

Rising above the provincial interests of each colony and elevating his spirit above the several divisions and many differences of province, race, and creed, from that hour each Member, looking exclusively to the new Nation's welfare, at the very birth of its independence, might speak of his home Province after the example of Patrick Henry: "Now I am not a Virginian, but an American!"

Two hundred years ago was organized the Carpenters' Company, who, after nearly 50 years of corporate life, had recently built Carpenters' Hall. They were united to bring about the material progress of their company and their city by the common opportunity offered its members to advance the knowledge of their art in building and architecture. Thus they sought by common endeavors the material aggrandizement of themselves and the enhancing of the beauty and solidity of their city. A hall recently built to house such noble social effort was without a peer to be the appropriate home of the Nation's travail and the birthplace of America.

The patriotic spirit of the Carpenters' Company, which moved them 150 years ago to offer their new hall as an asylum for liberty-seeking statesmen of our nascent country, still animates the company, and moves them to the common celebration of their own institution, of the establishment of the provincial committee, and of the opening of Continental Congress.

ADJUSTED COMPENSATION

Mr. LEE of Georgia. Mr. Speaker, in view of the fact that adjusted compensation became a law over the presidental veto and inasmuch as some questions might arise in the future as to the wisdom of the course pursued by Congress, I take advantage of this privilege by here and now submitting some observations that might prove of interest to the American people.

In the first place, it may be of interest to know how a matter of this character was considered by a former Congress composed of men at whose shrine we now worship. Here it is, and coupled with it is the answer and attitude of the recipient, General Lafayette:

PRESENTATION OF BONUS TO GENERAL LAFAYETTE

[An act of Congress, December, 1824]

*Be it enacted*, That the sum of $200,000 be, and the same is hereby, granted to Major General Lafayette, in compensation for his important services and expenditures during the American Revolution, and that, for this purpose, a stock to that amount be issued in his favor, dated the 4th of July, 1824, bearing an annual interest of 6 per cent, payable quarter-yearly, and redeemable on the 31st of December, 1834.

SEC. 2. And be it further enacted, that one complete and entire township of land, be, and the same is hereby, granted to the said Major General Lafayette, and that the President of the United States be authorized to cause the said township to be located on any of the public lands which remain unsold, and that patents be issued to General Lafayette for the same.

MONDAY, *December 20, 1824.*

Here follows an address to General Lafayette by a committee of Congress, delivered January 1, 1825:

"General: We are a committee of the Senate and the House of Representatives, charged with the office of informing you of the passage of an act, a copy of which we now present. You will perceive from this act, sir, that the two Houses of Congress, aware of the large pecuniary as well as other sacrifices which your long and arduous devotion to the cause of freedom has cost you, have deemed it their privilege to reimburse a portion of them, as having been incurred in part on account of the United States.

"The principles that have marked your character will not permit you to oppose any objection to the discharge of so much of the national obligation to you as admits of it. We are directed to express to you the confidence, as well as the request of the two Houses, that you will, by an acquiescence with their wishes in this respect, add another to the many and signal proofs you have afforded of your esteem for a people whose esteem for you can never cease until they have ceased to prize the liberty they enjoy and emulate the virtues by which it was acquired. We have only to subjoin an expression of our gratification in being the authors of this communication, and of the distinguished personal respect with which we are,

"Your obedient servants,

"SAMUEL SMITH.
"ROBERT Y. HAYNE.
"B. BOULIGNY.
"WILLIAM S. ARCHER.
"S. VAN RENSSALER.
"PHILIP S. MARKLEY."

And here follows the reply of the Marquis de Lafayette on the same day, accepting the bonus:

"Gentlemen of the committee of both Houses of Congress, the immense and unexpected gift which, in addition to former and considerable bounties, it has pleased Congress to confer upon me, calls for the warmest acknowledgments of an old American soldier and adopted son of the United States, two titles dearer to my heart than all the treasures of the world.

"However proud I am of every sort of obligation received from the people of the United States and their representatives in Congress, the large extent of this benefaction might have created in my mind feelings of hesitation, not inconsistent, I hope, with those of the most grateful reverence. But the so very kind resolution of both Houses, delivered by you, gentlemen, in terms of equal kindness, precludes all other sentiments but those of the lively and profound gratitude of which, in respectfully accepting the munificent favor, I have the honor to beg you will be the organ.

"Permit me also, gentlemen, to join a tender of my affectionate personal thanks to the expression of the highest respect with which I have the honor to be,

"Your obedient servant,

"LAFAYETTE.

"WASHINGTON, *January 1, 1825.*"

In the second place, it might be of moment to know how big men and outstanding Presidents have considered questions of

this kind. Here is how Grant, Lee, and Lincoln viewed the proposition:

APPLICATION FOR BONUS
[By Gen. Ulysses S. Grant]

STATE OF MICHIGAN,
*County of Wayne, ss:*

On the 6th day of November, A. D. 1850, personally appeared before me, a justice of the peace within and for the county and State aforesaid, First Lieut. Ulysses S. Grant, aged 28 years, an officer of the Fourth Regiment United States Infantry, in the service of the United States who, being duly sworn, according to law, declares that he is the identical Ulysses S. Grant who was a second lieutenant and regimental quartermaster in the Fourth Regiment of United States Infantry, commanded by Col. William Whistler, in the war with Mexico declared to exist on the 13th day of May, A. D. 1846; that he graduated at West Point, in the State of New York, about the 30th day of June, A. D. 1843, and continued in actual service during the entire period of the war, as will be shown by the muster rolls of the field and staff of the Fourth Regiment of United States Infantry.

He makes this declaration for the purpose of obtaining the bounty lands to which he may be entitled under the "act granting bounty lands to certain officers and soldiers who have been engaged in the military service of the United States," passed September 28, 1850.

U. S. GRANT,
*First Lieutenant and Regimental Quartermaster, Fourth Infantry.*

---

STATE OF MICHIGAN,
*County of Wayne, ss:*

I, Silas A. Bagg, clerk of said county of Wayne, do hereby certify that George Clancy, whose name is subscribed to the affidavit of the annexed instrument and therein written, was, at the time of taking affidavit, a justice of the peace for said county, duly elected and qualified, and duly authorized to take the affidavit. And, further, that I am well acquainted with the handwriting of such justice and verily believe that the signature to the said jurat is genuine.

In testimony whereof I have hereunto set my hand and affixed the seal of said county at the city of Detroit this 6th day of November, A. D. 1850.

---

DETROIT, MICH., *November 6, 1850.*

SIR: Will you please forward me my land warrant on the inclosed certificate? I am, sir,

Very respectfully, your obedient servant,

U. S. GRANT,
*First Lieutenant and Regimental Quartermaster, Fourth Infantry.*

---

APPLICATION FOR BONUS
[By Abraham Lincoln]

TO JAS. L. EDWARDS,
*Commissioner of Pensions.*

STATE OF ILLINOIS,
*Sangamon County, ss:*

On this 21st day of August, A. D. 1855, personally appeared before me, a justice of the peace within and for the county and State aforesaid, Abraham Lincoln, aged 46 years, a resident of Sangamon County, in the State of Illinois, who, being duly sworn according to law, declares that he is the identical Abraham Lincoln who was captain of a company in the regiment of Illinois Mounted Volunteers commanded by Col. Samuel M. Thompson, in the war with the British Band of Sacs and other tribes of Indians on our northwestern frontier in A. D. 1832, known as the Black Hawk War. That he volunteered at the State and county aforesaid on or about the 21st day of April, 1832, for no definite time and continued in actual service in said war for about 40 days; that he has heretofore made application for bounty land under the act of September 28, 1850, and received a land warrant, No. 52076, for forty (40) acres, which he has since located and can not now return.

He makes this declaration for the purpose of obtaining the additional bounty land to which he may be entitled under the act approved the 3d day of March, 1855. He also declares that he has never applied for nor received, under this or any other act of Congress, any bounty land warrant except the one above mentioned.

ABRAHAM LINCOLN.

---

APPLICATION FOR BONUS
[By Gen. Robert E. Lee]

STATE OF NEW YORK,
*County of Orange:*

On the 20th day of February, A. D. 1854, personally appeared before me, a special judge within and for the county and State aforesaid, Robert E. Lee, aged 45 years, an officer of the United States Army, who, being duly sworn according to law, declares that he is the identical Robert E. Lee who was a captain in the Corps of Engineers of the Army of the United States in the late war with Mexico; that he was commissioned on or about the 7th day of July, A. D. 1838, and continued in actual service in said war until its close; that he still remains in the military service of the United States, as will appear by the records of the Engineering Department.

He makes this declaration for the purpose of obtaining the bounty land to which he may be entitled under the "act granting bounty land to certain officers and soldiers who have been engaged in the military service of the United States," passed September 28, 1850, and avers that he is not entitled to nor has he received bounty land under any other act of Congress.

R. E. LEE,
*Captain, Corps of Engineers.*

In the third place, it perhaps is of interest to remember how the people themselves have acted when called on to register their sovereign will.

Every State in the Union has voted in favor of adjusted compensation wherever the opportunity has presented itself, save and except the State of Oklahoma, which State rejected it for reasons purely local.

The compensation votes in the States in which referenda were held, according to official figures furnished the American Legion Weekly up to November 23, 1923, by the secretaries of state, were:

| State | For | Against | Ratio for— |
|---|---|---|---|
| Illinois | 1,220,815 | 502,373 | 2.4-1 |
| Iowa | 383,335 | 195,898 | 1.9-1 |
| Kansas | 373,015 | 148,898 | 2.5-1 |
| Maine | 105,712 | 32,820 | 3.2-1 |
| Michigan | 471,159 | 185,602 | 2.5-1 |
| Missouri | 210,238 | 100,131 | 2.1-1 |
| Montana [1] | 67,500 | 62,100 | 1.1-1 |
| New Jersey | 534,532 | 165,555 | 3.2-1 |
| Ohio | 949,109 | 324,447 | 2.9-1 |
| Oregon | 88,219 | 37,866 | 2.3-1 |
| Rhode Island | 10,535 | 1,303 | 8.1-1 |
| South Dakota | 93,459 | 56,366 | 1.7-1 |
| Washington | 224,356 | 88,128 | 2.5-1 |
| Wisconsin | 165,762 | 57,324 | 2.7-1 |
| Total | 4,899,746 | 1,958,811 | 2.5-1 |

[1] The exact and official figures in Montana are not yet available

The veterans of the World War gave more and received less than any of the citizens of this great American Union. They tower over and above all as the victims of that terrible catastrophe. They saved this mighty Republic from the devastating heel of Prussianism, and yet within five short years the President of their country openly and unnecessarily insults them and vetoed the bill giving them just compensation.

The President vetoed the soldier boys; the soldier boys will veto the President next November. Thanks to a grateful people who nobly responded not only in words but in deeds, as the following table eloquently demonstrates:

*Cash bonus paid by the States to their veterans of the World War*

| | |
|---|---|
| Illinois | $55,000,000 |
| Iowa | 22,000,000 |
| Kansas | 25,000,000 |
| Massachusetts | 22,275,000 |
| Maine | 3,211,397 |
| Michigan | 30,657,576 |
| Minnesota | 23,500,000 |
| Missouri | 15,000,000 |
| New Hampshire | 1,901,423 |
| New Jersey | 11,250,000 |
| New York | 45,000,000 |
| North Dakota | 11,000,000 |
| Ohio | 32,500,000 |
| Oregon | 20,000,000 |
| Rhode Island | 2,588,000 |
| South Dakota | 6,000,000 |
| Vermont | 31,500,000 |
| Washington | 13,500,000 |
| Wisconsin | 16,102,006 |
| Colorado | 8,000,000 |
| Montana | 4,500,000 |
| Pennsylvania | 35,000,000 |

The two great political parties in their last national conventions took the following stand with respect to the soldier boys:

DEMOCRATIC PARTY

We believe that no higher nor more valued privilege can be afforded to an American citizen than to become a freeholder in the soil of the United States, and to that end we pledge our party to the enactment of soldier settlements and home aid legislation which will afford to the men who fought for America the opportunity to become land and home owners under conditions affording genuine Government assistance unencumbered by needless difficulties of red tape or advance financial investment.

REPUBLICAN PARTY

We hold in imperishable remembrance the valor and the patriotism of the soldiers and sailors of America who fought in the Great War for human liberty, and we pledge ourselves to discharge to the fullest the

obligations which a grateful Nation justly should fulfill in appreciation of the services rendered by its defenders on sea and on land.

In every instance where the American people have registered their will directly upon this question, they have voted overwhelmingly in favor of it. In 22 States the people have voted for State compensation, and the majorities have been as high as 8 to 1. All national polls taken on the question, show the people favor it overwhelmingly.

This legislation has now passed the House of Representatives six times, and the Senate five times. The dates, with votes cast, are as follows:

HOUSE OF REPRESENTATIVES

May 29, 1920: 289 votes for, to 92 votes against.
March 23, 1922: 333 votes for, to 70 votes against.
September 14, 1922: Passed without record vote.
September 20, 1922: 258 votes for, to 54 votes against.
March 18, 1924: 355 votes for, to 54 votes against.
May 2, 1924: Passed without record vote.

SENATE

August 31, 1922: 47 votes for, to 22 votes against.
September 15, 1922: 36 votes for, to 17 votes against.
September 20, 1922: 44 votes for, to 28 votes against.
April 23, 1924: 67 votes for, to 17 votes against.
May 1, 1924: Passed without record vote.

In the fourth place, by way of contrast, it may be refreshing, though surprising to many, may be, to hear how foreign nations have acted toward their own World War heroes.

Other countries have set us an example worthy of emulation, nations that owe us billions of dollars, money enough to overpay the total cost of the adjusted compensation measure together with all incidental outlay.

The United States of America stands alone as the selfish, cringing worshipper at the Shrine of Mammon. Here is what foreign countries have done:

The following tables show the bonus payments made by foreign countries to their veterans since the war:

*Bonus paid by foreign countries to their veterans*

| Country | Base of bonus, maximum rate | Maximum possible | Probable average | Total cost |
|---|---|---|---|---|
| Great Britain | £5 plus 10s. per month's service in excess of one year; maximum 48 months. | £29 ($101.50) | ---------- | £78,831,556 ($275,910,446) to men and officers. |
| Canada | Pay and allowances they would have received if not demobilized, for from 1 to 6 months, depending on service. | $600 ($540) | ---------- | $164,000,000 ($147,600,000). |
| Australia | 1s. 6d. per day of service. | £117 ($409.50) | £83½ | £30,000,000 ($105,000,000); mostly paid in 5½ per cent bonds, maturing May 31, 1924. |
| New Zealand | Same as Australia | £117 ($409.50) | £83½ | £5,225,900 ($18,290,650) to May 20, 1920. |
| France | 250 francs plus 20 francs per month for service at front, between Aug. 2, 1914, and Nov. 11, 1918. | 1,270 francs ($95.25). | ---------- | 4,964,948,670 francs ($372,371,150); payable in monthly installments of 100 francs. |
| Belgium | 75 francs per month for services at front, Aug. 1, 1914, to Nov. 11, 1918, less family allowance. | 3,825 francs (less family allowance) ($287). | ---------- | 141,230,000 francs ($10,592,250); in budget for 1921. |
| Germany | ---------- | 65 marks ($0.97). | 65 marks | |

Czechoslovakia, no bonus; gratuity to those 20 per cent or more incapacitated and to widows and orphans.

NOTE.—At the time of the aforementioned payments to enlisted men of the World War, the currency of such countries was worth in United States money about as follows: Great Britain, $3.50; Canada, $0.90; Australia, $3.50; New Zealand, $3.50; France, $0.075; Belgium, $0.075; Germany, $0.015.

Foreign currency is converted in the above table into dollars at these rates.

Mr. Speaker, the war contractors demanded and received hundreds of millions of dollars in payment of work never done. The railroads were guaranteed against loss. The war profiteers have retained the millions they defrauded the Government out of during the war. These and others of their kind have received cash from the Treasury of the United States on every occasion attempted and under any old pretext.

Millions have been squandered in the Veterans' Bureau not for and in the interest of the boys but for crooks and thieves. The same is true of the public domain, and yet Messrs. Forbes, Fall, and others retain their booty and their freedom.

The soldiers, sailors, and marines and saviors of this matchless Nation, however, are denied even so much as an encouraging word, but on the contrary are insulted and abused. Happily this Congress refused to be a party to the presidential veto, but with righteous indignation hurled it back as men and as Members of an American Congress registering the will and the wishes of an appreciative people of an ever-grateful Republic, thereby making it the law of the land as a grateful acknowledgment of a noble people to its World War heroes.

THE SIXTY-EIGHTH CONGRESS

Mr. STENGLE. Mr. Speaker, this House has about reached the hour of adjournment, and soon each and all of us will be journeying to our several homes to renew old friendships and greet loved ones from whom we have been separated for the past six months. To some of us this is an old "performance," but to me it is a new experience.

I came to this House on December 3 last with great hopes and fixed aspirations to make a record which should reflect credit upon my parentage and prove of some assistance to the wonderful country of which you and I are component parts. Whether my efforts have produced fruit, history will some time record. I am sure, however, that I return to my home with a much broader view of public affairs and a stronger affection for Old Glory and all that it symbolizes than I had when I arrived at the Capital. More than that, I return home feeling that I can now cherish in memory's casket a host of friends whom I did not know before coming. What a pleasure it has been to sit here day after day and rub elbows with conscientious citizens from all parts of the United States and its possessions, to feel the effects of their heartbeats as they have with me yearned to do something for the common good of mankind in general and for Americans in particular. Propagandists may endeavor to poison the minds of the people in their ungodly efforts to overthrow representative government and set up in America a rule of plutocracy, but they will never succeed as long as the citizens of this Republic continue to send to this House men of the character displayed by my colleagues. The press may impugn our motives and malign our high purposes, but there is not enough printer's ink in America to drive us from our aim to render real public service to all the people rather than become the slaves of a few captains of wealth. Some of us, because of misrepresentations and misunderstandings, may not be permitted to receive the approval of the electorate in the approaching elections, but, my colleagues, win or lose, we can return to our former places of abode with the undoubted assurance that we have done our best to guarantee unto our constituents all the rights and privileges purchased for us by the blood of our forefathers.

It seems to be the popular pastime nowadays for some self-appointed "judges" to devote their energies and what little brain they possess to the excoriation of public servants. In this work, the capitalistic press pats them with an approving hand, in the hope that by so doing the citizenry of America may be led to look elsewhere than in the channels where the real dirt is being accumulated and the real crimes are being committed. I firmly believe that "truth crushed to earth shall rise again" and because of that well-grounded conviction, I expect to see the day, and not far distant, when the masses will rise in their might and utterly annihilate those who are continually exploiting our Government and all of its resources for no other purpose than to fill their private pockets and feather their unrighteous nests with ill-gotten gains. Let the dogs of plutocracy howl until they grow red in the face. You and I have the happy satisfaction of knowing that we must have hit some of them else the howling would not be so loud and long. The Good Book says, "Woe unto them concerning whom all men speak well." The Members of this House lay no claim to perfection, but I venture the assertion that taken as a whole we will measure up fairly well with any other 435 citizens to be found in any walk of life.

I want in the brief time allotted to me to pay my sincere respects to some of those who have contributed, in a marked degree, to the success of the Sixty-eighth Congress. At what better place can I begin than at the Speaker's desk, the place where the gavel of authority is daily wielded and the rules of procedure hourly interpreted. The Speaker of this House is not of my political faith, and for that reason I took no part in his selection, but common honesty compels me to acknowledge in this presence that he has been absolutely fair and impartial in his decisions, a man of noble impulses and high purposes who is entitled to, and I believe enjoys, the respect and esteem of every Member of this body.

As I pass on the natural place for me to stop next is at the tables of the majority and minority leaders of this great legislative assembly—the working "spaces" for LONGWORTH and

GARRETT and occupied with honor and distinction by both of them. It would be hard to find two better fitted men to guide the destinies of the House. Both are thoroughgoing Americans and each loves his country better than his political party. Very much of our legislative success is directly due to their untiring zeal and distinct devotion to the highest ideals of honest government.

Neither time nor space would permit me to single out each and every Member of this body in order to tell him what I think of him and how highly I regard him, and I shall make no such attempt. Suffice it to say that I look upon all of you as "comrades."

Some day, when the smoke of political battle shall have cleared away and the propagandists cease to trouble and the weary are at rest, history is going to record that the Members of the Sixty-eighth Congress worked just as hard and earnestly and with just as much thought of the country's welfare as any body of lawmakers this Nation has ever known.

I wish the good people of America had the inclination and could find the time to review some of the legislation which we have passed. I am sure if they did, the verdict, by a large majority, would be that our Government has greatly benefited by our sojourn at the Capitol.

Take the tax reduction law as a fair sample. For months paid propagandists "fired" volley after volley of invectives and unjust criticisms into our ranks and literally "mobbed" us in an effort to drive us into adopting something that we did not believe in, something which would have directly benefited 6,000 rich men at the expense of more than 6,000,000 hard-working income-tax payers. The strain was heavy, but we held fast. Thousands upon thousands of letters were sent us, demanding that we capitulate to greed, but "our boys" had the "stuff" in them and never moved an inch. I suppose many will some day, in adding up results of that battle, look only upon the financial side of the question, but, gentlemen, I hold that the greatest victory we achieved was the complete annihilation of propagandism, which was lifting its serpentlike head over our Government, and which would have become our masters had we surrendered.

Then there was the immigration restriction law. I am fully aware that some of us fought a most determined fight against it, but the great majority stood adamant for America. How many wounded were left on the field of this battle only the coming elections can tell. But when we reckon up the results the people of this country should rejoice that they had as representatives men who could not be swerved from the path of duty by threats of political banishment. I am proud to have had a slight part in the winning of that victory.

Some will tell you that we made a great mistake in passing the bonus law. The only regret that I have in that connection is the fact that I had no opportunity to vote for a cash bonus. Congress took the best of care of war profiteers in its last session. Why should we not have taken some care of the real war winners?

Only to-day, by a vote of 362 to 6, this House passed a salary increase for postal employees, in order to give these faithful and loyal servants some little opportunity to live decently and provide the necessities of life for their loved ones. If rewarding faithful service is a crime, I plead guilty and ask no mercy at the hands of the voters. My only regret is that we were not financially able to do more than we did.

Take the child labor amendment. Where is there in all America a citizen who is so deeply engrossed in the making of money that he would be willing to draw on the very lifeblood of our children to assist him in filling his coffers with gold? If there be such among us, I rejoice in having had a hand in "scotching" his unholy efforts.

And so I might go on at some length in enumerating accomplishments of this session, but time will not permit. I do want, however, in closing to mention the reclassification fight which has been going on for months past. In 1923, Congress ordered the reclassification of all Federal employees on a basis of justice and right. When we got here we found that those orders had not been obeyed. Some of us got busy, and in spite of bitter opposition this House passed a bill to abolish the Personnel Reclassification Board and to transfer its functions to the United States Civil Service Commission, in whose hands there is hope for a fair and equitable adjustment of the salaries paid the Government's servants. That job is not yet completed, but we are in a fair way to win this fight and we may be expected to fight until right shall prevail.

Mr. Speaker, I sincerely hope that as we adjourn this session we may all be permitted to enjoy that rest and recreation which is certainly due to faithful public servants and that when we return in the fall each and every one of us may return with greater vigor and renewed courage to do our full duty as God has given us the light to see it. Let us all step out into the highway of life, with heads erect and a sincere consciousness of work well done. Let those who would revile us take heed unto their own records and note how little they have done for the good of humanity during the same period that we have been endeavoring to obey the mandates of conscience rather than the orders of either political or self-seeking bosses. Until we meet again, may God's richest blessings rest upon and abide with you all.

### TARIFF ON VEGETABLE OILS

Mr. WURZBACH. Mr. Speaker, on April 10, 1924, I introduced the following bill, H. R. 8589, which was referred to the Committee on Ways and Means:

A bill to amend an act entitled "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," approved September 21, 1922

*Be it enacted, etc.*, That the act entitled "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," approved September 21, 1922, be amended as follows:

Amend paragraph 53 to read:

"PAR. 53. Oils, animal: Sod, herring, cod, and menhaden, 5 cents per gallon; whale and seal, 6 cents per gallon; sperm, 10 cents per gallon; and all fish oils, not specially provided for, 20 per cent ad valorem; wool grease, crude, including that known commercially as degras or brown wool grease, one-half of 1 per cent per pound; wool grease, not crude, including adeps lanae, hydrous and anhydrous, 1 cent per pound; all other animal oils, fats, and greases, not specially provided for, 20 per cent ad valorem."

Amend paragraph 55 to read:

"PAR. 55. Coconut oil, 2 cents per pound; cottonseed oil, palm oil, palm-kernel oil, sesame oil, inedible, for mechanical and manufacturing purposes, 3 cents per pound; peanut oil, 4 cents per pound; soya-bean oil, perilla oil, Chinese tung oil, Japanese tung oil (known in commerce as wood or nut oil), 2½ cents per pound; vegetable tallow and vegetable wax, one-half of 1 cent per pound; and all other vegetable oils not specially provided for, 25 per cent ad valorem."

Amend paragraph 760 to read:

"PAR. 760. Oil-bearing seeds and materials, castor beans, hempseed, and soya beans, one-half of 1 cent per pound; copra and palm-nut kernels, one-half of 1 cent per pound; palm nuts and perilla seed, eight-tenths of 1 cent per pound; tung nuts and sesame seed, 1.3 cents per pound; flaxseed, 40 cents per bushel of 56 pounds; poppy seed, 32 cents per 100 pounds; sunflower seed, 2 cents per pound; apricot and peach kernels, 3 cents per pound; cottonseed and rapeseed, one-third of 1 cent per pound, and all other oil-bearing seeds and nuts not specially provided for, 20 per cent ad valorem."

Strike out paragraph 1626.

Amend paragraph 1630 to read:

"PAR. 1630. Oils, animal: Spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries and all cod-liver oil."

Amend paragraph 1632 to read:

"PAR. 1632. Oils, expressed or extracted; croton and sweet almond."

Strike out paragraph 1691.

Amend paragraph (c) of section 315 by adding a new subparagraph reading as follows:

"In the conduct of such investigations the commission shall provide that all the facts gathered by its own investigators or submitted to it under oath by parties in interest shall be presented to the commission in open public session, and that all persons who present such facts shall submit to examination and cross-examination by all interested parties, and that the commission in making its findings and the President in making his decision shall take into consideration only evidence taken by the commission in open hearings."

This bill takes the following items off the free list and makes them dutiable, as indicated:

| FISH OILS | Per gallon. |
|---|---|
| Cod | $0.05 |

| VEGETABLE OILS | Per pound. |
|---|---|
| Palm oil | $0.03 |
| Palm-kernel oil | .03 |
| Sesame oil | .03 |
| Inedible olive oil | .03 |
| Perilla oil | .02½ |
| Chinese tung oil | .02½ |
| Japanese tung oil | .02½ |
| Vegetable tallow | .02½ |
| Vegetable wax | .02½ |

All other vegetable oils not specially provided for, 25 per cent ad valorem.

OIL-BEARING SEEDS AND MATERIALS

| | Per pound. |
|---|---|
| Hempseed | $0.005 |
| Copra | .012 |
| Palm nut kernels | .012 |
| Perilla seed | .008 |
| Tung nuts | .013 |
| Sesame seed | .013 |
| Rapeseed | .03½ |

All other oil-bearing seeds and nuts not specially provided for, 20 per cent ad valorem.

The bill leaves cod liver oil and oils from American fisheries on the free list, also croton and sweet almond oils.

Since the tariff act of 1922 went into effect the imports of these oils have greatly increased with the single exception of palm kernel oil which have been withheld within British possessions by an export duty imposed by Great Britain. The following table shows the past and present imports of these oils and oil-bearing materials:

*Imports of oils and oil materials not on dutiable list, tariff act, 1922*

[Pounds, 000 omitted]

| | 1914 | 1921 | 1923 | Increase in pounds 1923 over 1921 | Percentage increase in 1923 over 1921 |
|---|---|---|---|---|---|
| Cod oil | 1,091 | 13,908 | 13,391 | 607 | |
| Palm oil | 49,082 | 23,155 | 128,494 | 105,339 | 457 |
| Palm kernel oil | 21,089 | 2,383 | 2,565 | 282 | 7.7 |
| Sesame oil | 1,369 | 89 | 8,702 | 8,813 | 965 |
| Olive oil, inedible | 5,609 | 4,170 | 40,604 | 36,434 | 900 |
| Perilla oil | 117 | 651 | 6,440 | 5,789 | 900 |
| Chinese tung oil | 30,139 | 27,248 | 87,291 | 60,043 | 210 |
| Japanese tung oil | 163 | 1,342 | (1) | | |
| Vegetable tallow | | [2]31 | 8,547 | | |
| Vegetable wax | 4,255 | 6,701 | 9,738 | 3,037 | 45 |
| Hempseed | | 1,142 | 2,558 | 1,416 | 123 |
| Copra | 44,499 | 189,320 | 332,974 | 143,654 | 72 |
| Palm nuts and palm nut kernels | 385 | 230 | 742 | 512 | 222 |
| Perilla seed and sesame seed | | [2]365 | 13,650 | | |
| Rapeseed | 5,979 | 5,113 | 8,385 | 3,272 | 64 |

[1] Not reported separately.
[2] 1922; not reported separately prior to Sept. 22, 1922.

Or an increase of 369,000,000 pounds of fats and oils taking the place duty free of that amount of American productions.

A study of the resources of the United States shows some marvelous facts. One of these most astounding discoveries is the vastness of our agricultural industry and the diversity and value of its products. The Department of Agriculture reports that the total value of these products for the year just past was as follows:

*1923*

| | |
|---|---|
| Total cereals | $3,793,000,000 |
| Cotton lint and seed | 1,769,000,000 |
| Flax fiber and seed | 37,000,000 |
| Total fruits and fruit products | 681,000,000 |
| Hay and forage | 1,480,000,000 |
| Total legume seeds | 175,000,000 |
| Seeds for planting | 38,000,000 |
| Total sugar crops | 142,000,000 |
| Tobacco | 299,000,000 |
| Total vegetables | 1,089,000,000 |
| Farm forest products | 318,000,000 |
| Other crops | 132,000,000 |
| Total crops | 9,953,000,000 |
| Total animals raised | 2,397,000,000 |
| Bee products | 11,000,000 |
| Total dairy products | 2,506,000,000 |
| Total poultry products | 1,047,000,000 |
| Wool | 87,000,000 |
| Other animal products | 3,000,000 |
| Total animal products | 6,111,000,000 |
| Total crops and animal products | 16,064,000,000 |
| Value of crops fed to livestock | 3,860,000,000 |
| Value crops not fed plus animal products | 12,204,000,000 |

This enormous total is in spite of depleted values for almost every item except perhaps our chief textiles of cotton and wool, of which a world shortage caused fairly remunerative prices to those fortunate enough to produce the crop.

I believe that it is a national necessity to protect the industry which produces this enormous total wealth each year. It is a national necessity to do everything possible to maintain such remunerative prices for all the products which make up our national agricultural reservoir of resource as will constantly increase its volume, make those engaged in the industry prosperous and thus keep the farmers of the United States not only prosperous themselves but make them the best market for our industrial and manufactured products.

I have heard many tariff arguments based on the thesis that protection is the best policy because it makes our home market the best market for agricultural products. My belief is that protection is the best policy because it makes farmers prosperous and the best buyers of manufactured commodities. It will fail to do this if the products of the farms are not properly protected against cheap foreign competition.

The products of agriculture fall naturally into a few classes, textiles, cereals, meats, fats, and oils and oil-bearing products, fruits, and vegetables. The bill which I have introduced deals with only one class, a class in which the State of Texas is largely interested, in which every southern State is largely interested, in which every dairy State is interested, fats and oils and oil-bearing products. The value of the fats and oils and oil-bearing products of American farmers, including cottonseed, peanuts, flaxseed, corn (used for making corn oil), sunflower seed, soy beans, beef tallow, lard, and butter amounted in 1923, according to the best estimates made by the United States Department of Agriculture, to:

| | Value, 1923 |
|---|---|
| Cottonseed | $265,528,000 |
| Peanuts | 45,078,000 |
| Flaxseed | 31,735,000 |
| Sunflower seed | 500,000 |
| Soy beans | 18,169,000 |
| Corn (used for oil) | 91,716,000 |
| Beef tallow | 72,630,000 |
| Lard | 387,000,000 |
| Farm butter | 246,318,000 |
| Factory butter | 580,000,000 |
| Total | 1,776,052,000 |

These products are among the most important in American agriculture. The total value of this group should be considered in comparison with the value of other groups which are of known importance, including cotton, wool, wheat, beef, and pork. A table made up from the Department of Agriculture figures gives the following:

| | |
|---|---|
| Oils and fats, 1923 | $1,776,052,000 |
| Cotton, 1923 | 1,563,347,000 |
| Wool, 1923 | 100,322,000 |
| Beef cattle, 1923 | 1,052,599,000 |
| Swine, 1923 | 638,793,000 |
| Wheat, 1923 | 723,501,000 |
| Corn, 1923 | 2,222,013,000 |

American-produced fats and oils have been so plentiful, so cheap, and so universally used that until the last few years no one has realized their real importance and real relationship to agriculture. It has taken war experience and the present years of agricultural hard times to emphasize the fact that this is one of the larger divisions of agriculture and one whose prosperity was essential to agricultural prosperity. The value of the fats and oils, even with the depressed prices of 1922 and 1923, was greater than the value of beef cattle, cotton, hay, or total fruits and vegetables raised in the United States.

Two dangers menace this American oils and fats producing industry; one, the cheap tropical oils, the other the cheap oriental oils. These dangers were met only in part by the tariff act of 1922. In the light of present experience we have found where that act was incomplete. This bill seeks to remedy the deficiencies.

Cheap and plentiful as American cottonseed oil and peanut oil are, they are produced where men and women have American standards of living and American wages and can not meet the competition of coconut oil made by natives of tropical islands, to whom a few yards of calico is a year's wardrobe, who live on what nature provides them to eat, and whose wages are based on this standard of living.

Abundant as the supply of American lard is, it can not be produced and sold at a price comparable with that of a lard substitute made from coconut and soya-bean oil or whale oil, all produced by labor receiving from one-tenth to one-half what American farmers and American laboring men receive for their labors.

Abundant and health-giving as the supply of American-made butter is, full of vitamines, the most valuable and purest edible fat known to science, it can not be produced at a price which can not be undersold by margarine made from coconut oil, soya-bean oil, sesame oil, whale oil, palm-kernel oil, perilla oil, or other tropical and oriental oils which can be laid down at our doors at 6 or 7 or 8 cents a pound after paying ocean freights and big profits to importers, because the labor which produces the materials and gathers the copra or soya beans or other oil-bearing seeds will work for a few cents an hour or a handful of silver pieces a month.

Our farmers must either be protected at living wages and American standards of living while producing these oils and fats—an industry which is a vital and important part of American agriculture—or else they will stop producing them.

Just before the tariff of 1922 went into effect, when there was no protection for the American market for cottonseed

and peanuts, competing oils and fats were coming in as shown by this table of imports for 1918–19–20:

| | 1918 | 1919 | 1920 |
|---|---|---|---|
| Linseed | $6,387,000 | | |
| Chinese nut | 46,387,000 | $8,121,000 | $11,077,000 |
| Coconut | 44,290,000 | 35,380,000 | 33,080,000 |
| Cottonseed | 2,215,000 | 3,673,000 | 1,305,000 |
| Palm | 1,651,000 | 4,317,000 | 5,430,000 |
| Peanut | 8,531,000 | 22,010,000 | 16,990,000 |
| Rapeseed | 3,090,000 | 1,306,000 | 1,922,000 |
| Soya bean | 38,455,000 | 24,109,000 | 13,721,000 |
| Soya beans | 693,000 | 146,000 | 214,000 |

The tariff act of 1922 took cognizance of this situation and put a duty of from 2 cents to 4 cents a pound on most of these oils, but it left two loopholes—a third one, perhaps, in the so-called flexible proviso which opens the whole list to attack at any time. One of the two loopholes was the omission from the dutiable list of palm oil, already coming in but in some way overlooked in the rate schedule, and of other interchangeable oils such as sesame oil, inedible olive oil, perilla oil, and the tung oils which are directly in competition with linseed oils. The other was the omission of copra, the dried meat of the coconut from which coconut oil is made, and of other oil-bearing raw materials. The results of these omissions is found in the increased volume of imports of these materials since the tariff act of 1922 went into effect.

| | 1921 | 1922 | 1923 |
|---|---|---|---|
| Palm oil | 23,155,230 | 57,516,889 | 128,494,679 |
| Sesame oil | 89,061 | 64,180 | 8,702,034 |
| Inedible olive oil | 4,170,547 | 26,787,795 | 40,604,535 |
| Perilla oil | 651,840 | 2,208,139 | 6,440,749 |
| Chinese tung oil | 27,248,888 | 79,089,292 | 87,291,675 |
| Copra | 189,329,950 | 268,955,518 | 332,974,498 |
| Palm-nut kernels | 230,191 | 198,382 | 742,401 |
| Hempseed | 1,142,704 | 4,180,343 | 2,558,245 |
| Perilla seed | | 365,853 | 13,650,480 |
| Rapeseed | 5,113,767 | 6,336,422 | 8,385,007 |

Argument will be made that these articles should be free because none of them are produced in the United States. I do not want anyone to be deceived by this argument. Every article mentioned comes in competition with cottonseed and cottonseed oil and flaxseed and linseed oil and indirectly but no less definitely with lard, pork products, tallow, and butter.

These oils are used in a multitude of food and industrial products. Oleomargarine, lard compound, cooking oil, salad oil, soap, paint, varnish, and linoleum manufacturers are among the major users. Other uses include glycerine and explosives, printing ink, cordage oil, medicines, candy, perfume and toilet preparations, and in the metal trades for core oil and tin-plate flux. Scientific discoveries in deodorization and bleaching and in oxidizing and hydrogenating have made it possible to make a hardening oil of any of these oils or a drying oil of most of them. Soya bean oil almost without treatment is available in paint manufacture or in lard compounds or oleomargarine, while sardine oil or whale oil can now be fixed up as a lard compound or oleomargarine material without a trace to offend tongue or nostril. Almost every one of these oils makes as good soap as any domestic fat or grease.

The fact stands fully established that every pound of vegetable oil which is imported competes actually or potentially in a very close price margin with every pound of American cotton oil, peanut oil, lard, and butter.

For example see the two following tables showing the changes in quantities of oils and fats over a series of years used in oleomargarine manufacture and in soap manufacture in the United States:

*Material used in soap manufacture*
[Pounds, 000 omitted]

| | 1912 | 1914 | 1916 | 1917 | 1919 |
|---|---|---|---|---|---|
| Cottonseed | 132,312 | 119,254 | 194,916 | 126,390 | 56,126 |
| Coconut oil | 78,816 | 77,959 | 111,084 | 168,602 | 182,625 |
| Palm-kernel oil | 20,579 | 31,376 | 5,804 | 4,162 | 4,352 |
| Corn oil | 9,322 | 11,368 | 12,821 | 15,997 | 2,245 |
| Palm oil | 7,546 | 71,896 | 14,938 | 27,345 | 29,765 |
| Rapeseed oil | 6,532 | 6,664 | 7,224 | 5,972 | |
| Vegetable tallow | 2,013 | 3,485 | 5,273 | 6,417 | |
| Linseed | 1,390 | 1,034 | 803 | 1,006 | 205 |
| Soya-bean oil | 1,182 | 4,499 | 57,373 | 124,058 | 38,345 |
| Sesame | 1,110 | 11 | 8 | 5 | |
| Olive oil | 640 | 748 | 1,184 | 1,731 | 937 |
| Peanut oil | 31 | 76 | 1,181 | 15,126 | 3,032 |
| Shea Nut oil | | | 1,058 | 2,487 | |
| Chinese nut oil | | | 118 | 115 | |

Note reduction in cottonseed oil, and increase in use of soya-bean and coconut oils.

*Material used in manufacture of oleomargarine*
[Pounds, 000 omitted]

| | 1912 | 1917 | 1920 | 1921 | 1923 |
|---|---|---|---|---|---|
| Cottonseed oil | 17,839 | 63,652 | 39,450 | 18,533 | 20,337 |
| Peanut oil | 2,453 | 10,498 | 48,346 | 16,332 | 5,934 |
| Soya-bean oil | 708 | 6,614 | | 461 | |
| Mustard-seed oil | 197 | 46 | | 110 | 61 |
| Coconut oil | 292 | 19,763 | 60,784 | 103,112 | 75,680 |
| Corn oil | | 859 | 35 | 922 | 223 |
| Oleo oil | 28,145 | 96,852 | 89,842 | 49,676 | 30,017 |
| Neutral lard | 14,794 | 42,401 | 38,456 | 29,268 | 31,192 |
| Oleo stearine | 906 | 2,494 | 2,132 | 4,858 | 4,395 |
| Butter | 645 | 3,303 | 6,845 | 1,499 | 1,732 |
| Oleo stock | 92 | 3,458 | 5,804 | 2,065 | 2,539 |

Note large increase in coconut oil.

This shows plainly why the imports of certain oils and oil materials not included in the 1922 tariff act have increased. They were cheaper than those paying a duty. The soap and lard compound makers especially could use them, could buy them cheaper and use this price to depress the price of our cottonseed and peanut oil, and they did so, benefiting twice at our expense. I want to close this door. I want American manufacturers who have the benefit of a tariff on their own products to pay the farmers of Texas a fair price for cotton seed and cottonseed oil and not have a club in their hands in the form of free copra and free palm oil to hammer down our oils while selling their soap, lard compound, and oleomargarine in a protected market.

The tariff on soap, lard compound, and oleomargarine, paint, and varnish in the tariff act of 1922 is as follows:

| | | |
|---|---|---|
| Soap, castile | per cent | 15 |
| Soap, toilet | do | 30 |
| Soap powder | do | 15 |
| Soap, n. s. p. f | do | 15 |
| Lard compound | cents per pound | 4 |
| Oleomargarine | do | 8 |
| Paints, n. s. p. f | per cent | 25–40 |
| Varnish, n. s. p. f | do | 25 |

During the discussions and while the McCumber-Fordney tariff bill was under consideration before the Ways and Means Committee the strongest opposition to a tariff on vegetable oils and animal fats came from the American soap manufacturers. The producers of American oils and fats—that is to say, the American farmers—won only a partial victory, because the tariff imposed on foreign oils was only partially protective, as is evidenced by the fact of greatly increased importation of various vegetable oils, as hereinbefore shown. The attempt is being made to further cripple the American producer of vegetable oils and animal fats by inducing the Tariff Commission and the President, under the provisions of paragraph (c) of section 315 of the tariff act, to reduce the existing rates on these products. My purpose in introducing my bill and in inserting these remarks in the RECORD is to call attention to the organized effort of the soap manufacturers of the country to gain an unfair advantage over the already hard-pressed tillers of the soil, and to sound a note of warning to the Representatives in Congress of these farmers that they be on their guard and prevent any reduction in the tariff rates fixed on vegetable oils.

### INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. HAYDEN. Mr. Speaker, under the permission to extend my remarks in the RECORD I include the following telegram which I sent on May 29, 1924, to the Coconino Sun, of Flagstaff, Ariz., and the Williams News, of Williams, Ariz., relative to an item in the Interior Department appropriation bill, which is now a law.

House and Senate conferees have to-day unanimously agreed upon following provision in the Interior Department appropriation bill:

> "For the construction of trails within the Grand Canyon National Park, $100,000, to be immediately available and to remain available until expended: *Provided*, That said sum may be used by the Secretary of the Interior for the purchase from the county of Coconino, Ariz., of the Bright Angel Toll Road and Trail within said park under such terms and conditions as he may deem proper, and the Secretary of the Interior is authorized to construct an approach road from the National Old Trails Highway to the south boundary of said park."

Under this provision the Secretary of the Interior can purchase the Bright Angel Trail for $100,000, paying cash into the county treasury, or make any other agreement with the county for its purchase that is mutually satisfactory. The Secretary is authorized to construct an approach road from anywhere on the National Old Trails Highway to the Grand Canyon National Park, and whatever money is necessary to build the road is authorized to be appropriated. The Secretary would probably ask Coconino County to cooperate in the

construction of this road on the route to be agreed upon to the extent of the money received from the sale of the Bright Angel Trail, the remainder of the cost to be paid by the United States. I am assured by the Director of the National Park Service that he will submit estimates for additional funds to construct the road from the Old Trails Highway to the Grand Canyon in cooperation with Coconino County, and am confident that Congress will make the necessary appropriation at the next session. I am further assured by the Interior Department and the House Appropriations Committee that the chief desire is to work out all these matters in the most satisfactory way possible, with due regards to the rights and welfare of the county as well as the Nation. CARL HAYDEN.

THE EIGHTEENTH AMENDMENT

Mr. COOK. Mr. Speaker, under the general leave granted, I desire to briefly discuss the eighteenth amendment.

The introduction of the 58 bills in the House proposing to authorize the manufacture and sale of beer and wine has aroused the people of the country. They expected and had the right to expect that with the almost unanimous ratification of the amendment as part of the Constitution it would be acquiesced in and respected by all, and that the long agitation over the liquor question would be set at rest and that no one would try to reopen it. It had been discussed for over 50 years, and the people finally came to the conclusion that it would be a good thing to put the brewery, distillery, wine press, and saloon out of business. Thirty-three of the States had outlawed intoxicating liquor, and every county in the United States except 305 had voted against its manufacture and sale. This was done even before the women had the right to vote on the question.

Hence it was a very easy step to the ratification of the eighteenth amendment. This amendment was proposed to the legislatures of the several States in the usual way, like all of the other amendments had been proposed. The legislatures certainly knew the sentiment of the people which they represented. It had been frequently expressed in no uncertain tone. With all of these facts before them it was ratified by every State in the Union except three. Three-fourths would have been sufficient. It had nine more than that. Even though it was nearly unanimous, there are those who are now trying to discredit the amendment because there was no referendum on it. That is only a quibble. Since nearly every county in the whole country had voted dry, is it not fair to assume they would have voted the same way and ratified the amendment? In view of these conditions, it seems to me that the ratification reflected the careful and deliberate judgment of vastly more than a majority of the voters at that time and also the will of nearly 100 per cent of the women.

The amendment prohibits the manufacture, sale, and transportation of intoxicating liquors for beverage purposes. It is plain the people meant to entirely destroy the traffic and stop the use of liquor as a beverage. Everyone at that time conceded that beer and wine were intoxicating. It was apparent that legislation would be required to enforce the amendment. It is provided therein that Congress and the States should have this power of enforcement by appropriate legislation.

What did the people mean when they used the words "appropriate legislation"? In my opinion, they meant the legislation should be of such a character as to leave no doubt on the question of enforcing the amendment; that if it leaned the one way or the other it should be on the side of enforcement; and that if there was any doubt about drawing the proper line between intoxicating and nonintoxicating liquors the doubt should be resolved in favor of the amendment and that the line should be drawn in favor of its enforcement.

It is idle to contend that they meant anything else. For this reason enforcement legislation became the vital point and key to the whole situation. If the opponents to the amendment can weaken this legislation, they can to that extent defeat the amendment. This seems to be their present point of attack. For they denounce the enforcement legislation—the Volstead Act—and are, in my opinion, seeking to modify it so as to defeat the amendment.

Acting in obedience to the command of the amendment, Congress enacted this enforcement law and provided that all liquors containing one-half of 1 per cent or more of alcohol should be considered as intoxicating. It had power to enforce but none to destroy. It seems to be conceded that it put the line at a point which will effectually enforce the amendment. The opposition will have to concede that. It seems to enforce it a little too well to suit them.

If it is at a point which leaves no doubt about prohibiting the manufacture of intoxicating liquors, why not leave it alone? That was what it was intended to do.

Instead of trying to repeal the amendment, which can only be done by another amendment ratified by 36 States, the opponents are attempting to undermine it by asking Congress to enact a law authorizing the manufacture and sale of beer and wine. They contend it will not be intoxicating. However, as this proposal comes from those who are opposed to the amendment, is it not fair to assume that their purpose is not to authorize a nonintoxicating article but that it is their sole purpose to authorize the manufacture of something which is really intoxicating? If such a law were passed, we would have the anomaly of the Constitution prohibiting a thing and Congress attempting to authorize it. It is astounding that anyone should suggest such a proposition. There can be no compromise on such a proposal as that.

I have listened to quite a number of speeches at this session against the amendment and in favor of a modification of the enforcement act. The burden of most of them is in denouncing the enforcement act and attacking those who are in favor of enforcing the law of the land. Though they propose that this beer and wine be sold in the original package to the consumer, it would not be long, in my view of it, until the next step proposed would be to have places where it would be sold, and there would soon have to be laws to regulate the traffic. It would be the same old trouble of legalizing intoxicating liquor and then trying to regulate it. The people remember something about that, and it seems to me will not return to it again.

The ultimate result of such a modification would be the return of the saloon. It seems to me it has already done enough damage to humanity without giving it another chance.

No one can deny but that the people have already been greatly benefited by the saving of the liquor bill and that these benefits will increase when the law is fully enforced.

America has taken the greatest step ever taken for the benefit of the human race, and in my opinion she will never retreat.

Europe will not fully recover until she throws off the burden of her liquor bill.

Such a change in the habits of the people can not be brought about in a day. Time will be required.

In the meantime the people should be on their guard so as not to lose that which it took 50 years to bring about.

There is quite a good deal of wet sentiment and activity developing in certain parts of the country at this time, and it seems to me it is all aimed at the overthrow of the amendment. It is well for the people who favor the amendment to get busy and make their voices heard.

They should beware of the statement that the amendment is part of the Constitution and there is nothing further to be done. The Constitution can not enforce itself. Laws are required, and the vigilance of the people to enforce them is also necessary.

This is not a question which concerns only the welfare of the adults of this generation, but it concerns the children and millions of young men and women who will soon take our places in the contest of life and the task of perpetuating our Constitution and Government. This great question has been settled, and settled right, and it should remain settled.

The failure of any State—a member of the "indestructible Union"—to perform its duty in enforcing the amendment can not be defended. It puts itself in the attitude of accepting the benefits of the other parts of the Constitution, the protection and benefits of legislation of the General Government, while it refuses to accept any of the burdens, and places it in the position of regarding one part of the Constitution and disregarding another.

It seems to me that such a refusal can mean but one thing—a hostility to the amendment and an intention to obstruct and weaken its enforcement. The people of the whole Union in giving them this power certainly expected each State would exercise it and would do all within its power to uphold this as well as every other part of the Constitution. That is what statehood means.

I am opposed to every movement to weaken the amendment and favor such additional laws as may be found necessary to enforce it.

With that in mind I supported the bill to increase the Coast Guard Service which became a law at this session. The purpose of this is to transfer a number of suitable vessels from the Navy Department to the Coast Guard and for the appointment of officers to command these vessels. When they get into operation it will be pretty difficult for the rum runners to land liquor into the United States. A great step for enforcement will be taken when the supply from abroad is cut off.

I also supported the bill providing for a separate bureau in the Treasury Department for the enforcement of the prohibition act. This bill passed the House the last week of the

session and was sent to the Senate. It was not acted upon in that body, but will come up at the next session. It is believed that if it becomes a law it will greatly promote the enforcement of the amendment.

FEDERAL APPROPRIATIONS

Mr. McLAUGHLIN of Michigan. Mr. Speaker, I wish to speak of a subject of great interest to the Congress and to the country, the subject of appropriations which have been made, also to make a comparison of estimates and recommendations by the Bureau of the Budget with appropriations actually made by the Congress.

The country believes the Congress is extravagant, believes that appropriations are made in disregard of estimates and recommendations of the Bureau of the Budget.

The Congress appreciated the need of a Bureau of the Budget. The Congress itself prepared and enacted the Budget law. The Sixty-fifth Congress passed a Budget bill, but it was vetoed by President Wilson. The bill was again passed by the next Congress and was approved by President Harding June 10, 1921.

I wish to quote from official records, which conclusively show that the Congress not only cooperates heartily with the bureau, but that appropriations are, and ever since the bureau was organized have been, below—many millions of dollars below—the estimates and recommendations of the bureau.

The bureau has recommended many large reductions of expenditures. Congress has effected more and even larger reductions.

The country evidently believes the Congress has given little, if any, attention to the actual money needs of our Government as determined by the estimates of the bureau, that appropriations far in excess of these estimates have been extravagant and wasteful, made without method or system and without consideration of the welfare of taxpayers. Official records of estimates by the bureau and of appropriations actually made are a refutation of this charge.

Some years ago there may have been ground for criticism of lack of system or method by which the need or advisability of some appropriation was determined. Such lack as there was was appreciated by the Congress; hence the enactment of the act of June 10, 1921, known as the Budget law, under which the Bureau of the Budget was organized and the office of Comptroller General, to conduct an independent audit of all expenditures, was established. Previous to the enactment of the Budget law and the organization of the Bureau of the Budget each department of the Government practically prepared its own annual estimates of money necessary or desired to be appropriated by the Congress for the purpose of enabling such department to pursue its activities during the next fiscal year. This method of preparing and submitting estimates and of making appropriations was open to criticism, in that it provided no effective means by which thorough, systematic inquiry and investigation of operations of departments could be made; no effective way by which overlapping or duplication of activities and expenditures by two or more departments might be disclosed; no way by which the several appropriating committees of the Congress, each preparing and securing enactment of appropriation measures for the department concerning which it had jurisdiction, could compare the activities of one department with those of other departments; no practical or effective way by which the several committees or the Congress itself might definitely or with approximate accuracy determine whether or not the total of such bills was within the total of estimated revenues of the Government for the fiscal year for which appropriations were made.

The purpose of the Budget law was, if possible, to correct this unfortunate condition. The Bureau of the Budget has functioned very satisfactorily. The intimate knowledge it is able to gain of the activities of every department and of every operation of our Government for which appropriations are made enables it intelligently to advise the Congress as to the amount of money necessary and proper for each and every purpose. Its advice and recommendations have been helpful to the Committees on Appropriations of House and Senate and to the Congress itself in enabling them to effect large and much-needed reduction of expenditures.

The Congress and the country appreciate the work of the bureau, but throughout the country there is evident misunderstanding of the duty of the bureau and misconception of its authority. Its duty is to make investigations, prepare estimates, and recommend to the Congress the amount of money to be appropriated. It has no authority finally to determine the amount of any appropriation or the purpose for which money shall be used. Many of our people evidently do not know, certainly do not appreciate, that the Federal Constitution invests Congress, and Congress alone, with the duty and authority to determine the amount of each and every appropriation, also each and every purpose for which money shall be expended. The Congress can not legally, if it wished to do so, divest itself of this authority and responsibility. The bureau recommends, but the Congress determines, and must determine, the amount and character of appropriations.

This mistaken idea, prevalent throughout the country, as to the duty and authority of the bureau and the Congress has led to criticism of the Congress when appropriations for a department or for any activity of the Government exceeds the recommendation of the bureau, or when money is provided for any purpose without or contrary to such recommendation.

There is also lack of information and serious misunderstanding generally throughout the country as to the attitude of the Congress toward expenditures and as to the result of its efforts to effect economy. The country knows the bureau has recommended cessation of numerous activities and operations, that it has recommended many eliminations and reductions of appropriations, but the country does not know the manner or extent of the cooperation of the Congress with the bureau, nor does it know the intensive and effective work of the Committees on Appropriations and of the Congress itself in reducing expenses of government. The country knows the wise and effective work of the bureau, but it still believes the Congress is and has been guilty of gross and wanton extravagance, and this opinion and state of feeling persist in face of the fact that in almost every session of the Congress since the bureau was organized the total of appropriations has been less by many millions of dollars than was recommended by the bureau. The bureau has been economical, but the Congress has been even more economical.

I shall now speak only of the record of the Sixty-seventh Congress. That Congress was elected in November, 1920, and extended from March 4, 1921, to March 4, 1923, and it made appropriations for two fiscal years, one ending June 30, 1923, the other ending June 30, 1924. That is the last Congress of which there is a complete official record. In presenting this record I make comparison between the total estimates by the Bureau of the Budget of the amount of money necessary, in its judgment, to be appropriated for all operations and activities of the Government, and the total appropriations actually made by the Congress.

For the fiscal year which ended June 30, 1923, the bureau submitted regular, supplemental, and deficiency estimates amounting to $4,392,158,059.46; the total appropriation by the Congress was $4,159,796,267.19; that is, appropriations were $232,361,792.27 less than the bureau had advised and estimated as necessary and proper to meet expenses of government during that fiscal year.

In order that this economy record of the Congress may be better understood, it should be known that included in the bureau's estimates, also in the appropriations for that year, there were approximately $1,546,000,000 of what are known as "permanent or fixed" appropriations, as to the amount of which neither the bureau nor the Congress was permitted to exercise discretion. These "permanent or fixed" appropriations included approximately $1,458,000,000 for payment of interest and to apply on the principal of the public debt; also approximately $88,000,000 to meet the expense of certain operations and activities of the Government which had been determined by laws enacted from time to time during previous years. In other words, these laws—until modified or repealed—practically determine the bureau's estimates; also the appropriation by the Congress to the extent, as I have said, of approximately $1,546,000,000. If this amount—$1,546,000,000—be deducted from the total estimates of the bureau—$4,392,158,059—there remains only $2,846,158,059 concerning which the bureau was permitted to exercise its judgment, and concerning which, of course, the Congress exercised its judgment.

I have said that the total appropriations were $232,361,729 below the total estimates of the bureau, but the fact is that the Congress actually reduced the bureau estimates to the extent of $361,096,965. Why do I say that? I say it because the Congress made two absolutely necessary appropriations amounting to $128,735,173, for which the bureau submitted no estimates. What were these two necessary appropriations? One was an appropriation of $90,000,000, demanded and approved by the entire country, to provide for cooperation of the Federal Government with the States in construction of highways; the other was an appropriation of $38,735,173 to provide additional compensation of $240 each to many thousands of Federal employees whose regular compensations were fixed by laws enacted before the World War. It is not neces-

sary to speak of the necessity of these two appropriations; the bureau should have estimated for them.

The amount I have stated—$361,006,965—is the difference between the economies recommended by the bureau and those actually effected by the Congress during one year. This is the answer to the unfounded charge that appropriations by the Congress have been extravagant and wasteful. The Bureau of the Budget has been economical, but the Congress has been more economical.

What is the record of the Congress for the fiscal year ending June 30, 1924, the second year of the life of the Sixty-seventh Congress? The total regular, supplemental, and deficiency estimates of the bureau for that fiscal year were $3,951,013,447, whereas the total appropriation by the Congress for that year was $3,940,271,943, or a reduction of the bureau estimates and a net saving of $10,741,504. And it should be noted that there was included in the estimates of the bureau, also in the appropriations by Congress, "permanent and fixed" appropriations amounting to $1,542,352,928, made up, as during the previous fiscal year, of $1,451,968,125, to provide for payment of interest and to apply on the principal of the public debt; also other permanent and fixed appropriations amounting to $90,384,803. If the amount of these "permanent and fixed" appropriations be deducted from the total estimates of the bureau, there remains only $2,408,660,519, and it was this amount which the Congress reduced to the extent of $10,741,504.

By what I have said it will be seen that the Sixty-seventh Congress in making appropriations for the fiscal years 1923 and 1924 made a net reduction of the bureau's estimates of $213,103,296, and as we very properly take into account appropriations for highways and additional compensation to underpaid employees we find that appropriations were $371,838,469 below the estimates of the bureau.

This is a record of economy of which the country is evidently not informed.

THE NECESSITY FOR REDUCING RAILROAD RATES ON FARM PRODUCTS

Mr. FAVROT. Mr. Speaker, Congress has left many things undone. Congress should not adjourn until it passes some measure of farm relief. Congress should not adjourn until it relieves the farmer of the burden of excessive transportation charges.

Many plans have been suggested for the relief of the farmer, some feasible, some not feasible, some sound, some unsound. But there is one burden, one handicap borne by the farmer that could be and should be lightened, and that is the burden of excessive freight rates upon farm products.

The interests that control the railroads would have us believe that these freight rates are the result of a high wage scale. Such is not the fact. The net return per man hour of most Class A roads is nearly double what it was in 1915 prior to the time the Government forced an increase in railroad wages.

Every attempt to secure a reduction in freight rates on farm products and upon the necessities of the farm is blocked by that provision of the interstate commerce act under which the Interstate Commerce Commission fixes rates so as to provide the railroads with an adequate return upon a value fixed by the Interstate Commerce Commission. That return has been fixed at 5½ per cent. And freight rates must remain excessive in order that the weaker roads may earn that return upon that fixed value.

We all realize the need for railroads. We all recognize the part of the railroads in the development of the country. But some railroads should never have been built. Some railroads have been so grossly mismanaged that it has been a public scandal. Some roads are valued at several times more than their actual value. But the American farmer must pay in freight rates; there must be taken from the selling price of his product sufficient to permit the weakest, the most overvalued and the most mismanaged of these roads to earn that net return upon its fixed value. The farmer must bear this burden, not that the properly located, the properly managed roads might earn this revenue but that the most mismanaged, the weakest among them, might earn it. And in order that the weakest, the most mismanaged roads might earn this revenue, the sound roads, the properly managed roads, are permitted to earn a revenue that is excessive.

During the last year the earnings of the railroads were greater than they ever have been. Their net operating income was greater than it ever has been. Yet there has been no reduction in freight rates. The farmer continues to bear the burden of transportation charges that are almost prohibitive.

I recognize that an adequate transportation system is a necessity. I believe that the railroads should be dealt with justly and fairly. But the farmer should not be made to bear the burden of transportation charges admittedly excessive in order that all railroads might prosper.

The great body of the American people, producer and consumer, should not be made to bear the burden of freight rates almost prohibitive in order that the stockholders and the bondholders of the most mismanaged roads might receive a fair return upon securities that cost them, in most instances, practically nothing.

These public utilities, these public necessities, should be conducted in the interest of the public. Freight rates should be so regulated as to aid industry and agriculture. Transportation charges should be so fixed as to aid the farmer in the remunerative marketing of his products; not so fixed as to make impossible that remunerative marketing.

I believe that the railroads should be managed in the interest of the people, not that the welfare of the people should be subordinated to the interest of the railroads.

SOLDIERS' REHABILITATION ACT

Mr. WEFALD. Mr. Speaker, when we passed this bill to-day I think we did the best day's work we have done during this session of Congress. I know of nothing in my congressional career that has caused me so much heartache as some of the letters I have received from veterans of the World War who are sick and down and out and whose cause has been turned down by the Veterans' Bureau.

I understand that all sick and helpless veterans will now be taken care of, especially those who are suffering from tuberculosis and nervous disorders, many of whom have been treated miserably.

It has always been the intention of Congress that the veterans should receive not only fair but also generous treatment. Let us hope that from now on no worthy veteran will suffer want or in any way be slighted. If this will not be the result of the passage of this bill, then there is some hidden joker in it that the rank and file of the membership of this House did not know about. Passing the bill on such short notice and without a chance to examine it carefully, we have taken the word of the members of the committee that the bill is what its sponsors claim it to be.

We will also hope that the Veterans' Bureau from now on will be honestly administered, no matter what political party will be in power. The scandal in the administration of the Veterans' Bureau during the Harding administration is one of the blackest spots, among the many other black ones, on our recent American history.

The passage of this bill, together with the passage of the adjusted compensation act, will to some extent restore Congress in the confidence of the people. This Congress has kept faith and has redeemed to a great extent the promises made to the soldiers by both the major parties, which up until this time had been poorly kept.

I voted for the adjusted compensation act as well as for the rehabilitation act, not as a reward to the soldiers for valor shown in war, not because such a reward would be the surest way to insure young men again rallying to the colors in case of future wars, but because I felt the great injustice that had been perpetrated upon our young men in so far as we as a Nation had obtained their services under false pretenses and faithlessly broken our word to them.

The laws relating to veterans' compensation are now being liberalized in many respects. Greater compensation will now be granted both the soldiers and their widows and children. But the greatest improvement that this bill reads into the old law is that it extends from three years to six years the time limit under which clinical diagnosis of nervous disorders and tuberculosis had to be made. It also extends the time limit for filing claims up to six years from the date of discharge from service.

I believe that every case that has come to me for attention from boys in my district that the Veterans' Bureau could do nothing with can now be taken care of and straightened out. Practically all the cases that I have had trouble with were barred out by the law as it existed.

A couple of the most glaring cases that I have had to struggle with ought to be cited here to show how unreasonable the law has been. The boys have been unable to understand how such cases could not have been straightened out, but the law, under a literal interpretation, has prevented it.

One of the biggest, huskiest, and most determined fellows that ever put on Uncle Sam's uniform was, while in action somewhere in France, shot through both legs above the knees. About four years after his discharge paralysis developed in both legs and he became helpless. He was taken care of to some extent at first, but later, as his condition grew worse, his

compensation was taken away from him. Under the law his trouble could not be connected up with service; it did not come within the three-year period.

But the saddest case that has come to my notice was brought to my attention last March. I received a letter from a dying veteran confined in one of the county hospitals in my district. The letter was written by a buddy who was also sick with tuberculosis but who as yet was better able to write.

The dying veteran had contracted the dread disease, but being a hard-working fellow did not want to give in and ask for assistance until he was flat on his back. His sickness was definitely diagnosed as tuberculosis, but not until five months after the three-year period was up. However, the district office in Minneapolis allowed him compensation, and back pay was also granted that amounted to several hundred dollars.

As the veteran kept sinking lower and lower, some kind-hearted official in the district office undertook to get his compensation increased to the maximum, but when the case came to the attention of highest officials his whole compensation was promptly disallowed. Nothing could be done for him. I was met with the cold but courteous reply that the law did not allow anything further to be done.

The messages you get from the dying soldier boys are pathetic; the second letter I received from the veteran he said that he felt that he was "at the end of his rope." A couple of weeks later the buddy sent me a newspaper clipping, the obituary of the lad, who had recently died.

He left a wife and an aged father whom he had supported until he had to take to the bed. His country had exacted a full measure of service from him but had not kept faith with him.

As I understand it, after the law we have just passed takes effect cases like the one I have here cited will be taken care of without any Congressman having to beg and plead and have sleepless nights over them. Similar cases have come to the attention of most Members of Congress. Some Members may have even more hair-raising stories to tell. Let us hope that the taking up of soldiers' compensation claims will be a pleasanter task hereafter.

RÉSUMÉ OF WORK OF COMMITTEE ON INDIAN AFFAIRS

Mr. SNYDER. Mr. Speaker and gentlemen of the House, under leave to extend my remarks in the RECORD I desire to bring to the attention of the Congress and of the people of this country the large amount of constructive legislation which the Committee on Indian Affairs of the House of Representatives has acted upon during the first session of this Congress. I am justly proud of the work of this committee, and the Congress and the country should be congratulated upon the work which it has accomplished. Further, I take this opportunity to thank each and every one of its members for assisting in bringing about a record which has never before been equaled by any Indian Committee.

This committee, composed of 22 members from all sections of the country, has labored diligently during the entire session, having met on 42 days, and, in addition to this, subcommittees have held hearings on 26 bills. It may be interesting to know some of the large matters affected by the action of this Congress.

Perhaps one of the leading bills enacted into law during this session, and which is a recognition that all native Indians should have long ago received, is the law which throws down the bars which have prevented approximately 125,000 Indians from becoming citizens and allows them to now enjoy full citizenship in this great country. This is a most constructive measure and is so recognized both by the Indians and the whites of the United States.

The so-called "San Carlos bill" became a law, authorizing an appropriation of $5,500,000 for the construction of the San Carlos irrigation project, giving much-needed relief to the Pima Indians of Arizona.

The Pueblo Indian land bill, a most complex matter, which caused a very disturbing controversy, was enacted into law. Extensive hearings were held, and the measure was agreed upon by all interested parties, and thus the Indians' rights were amply protected.

For many years the various tribes of Indians in the country have endeavored to secure permission to settle their differences with the United States by submission of their claims to the Court of Claims. During this session of Congress your committee investigated this matter very carefully and recommended to the House that 12 of these tribes be given jurisdiction to present their claims. Eight of these bills became laws, two passed the House, and two failed of passage during the closing days of the session. This action will eliminate many of the controversial claims against the Government, and at the same time your committee has been most careful to safeguard the interests of the Government.

Other bills of equal importance to the Indians have become laws. A brief summary may be interesting at this time. Seventy-eight bills were reported to the House; 72 bills passed the House; 54 bills passed the House and Senate and became laws, leaving but 6 bills on the House Calendar.

To illustrate the importance of the work accomplished, I present the following list of bills, with their status, so the Congress and the people of the country may know exactly what has been done in the first session of the Sixty-eighth Congress regarding Indian legislation.

Jurisdictional bills passed by both Houses of Congress and became laws:

H. R. 71. Cowlitz Indians.
H. R. 694. Saginaw, Swan Creek, and Black River Chippewas.
H. R. 731. Wichita and affiliated bands.
H. R. 3444. Montana Indians.
H. R. 4457. Cherokee Indians.
H. R. 5325. Choctaw and Chickasaw Indians.
H. R. 5799. Seminole Indians.
H. R. 7913. Creek Indians.
H. R. 8493. Stockbridge Indians.

The following bills passed both Houses and became laws:

H. R. 185. Chippewa per capita payment of $100.
H. R. 192. Providing for a girls' dormitory, Lapwai Indian Sanatorium.
H. R. 472. Deposit certain funds to the credit of Navajo Tribe.
H. R. 1414. Pay certain taxes to Stevens and Ferry Counties, Wash.
H. R. 1629. Removal restrictions on allotment of Isaac Jack.
H. R. 2812. Authorizing Secretary of Interior to sell certain lands.
H. R. 2875. Addition of names of certain persons to roll of Flathead Indians.
H. R. 2876. Payment of claims for back annuities, Chippewa Indians.
H. R. 2877. Reserve certain lands for Indians of Zia Pueblo.
H. R. 2878. Authorized sale of lands allotted under Moses agreement.
H. R. 2879. Providing for disposition of homestead allotments of deceased allottees, Blackfeet Reservation, Mont.
H. R. 2881. Compensate three Comanche Indians.
H. R. 2882. Reservation of certain land in Utah for a school site for Ute Indians.
H. R. 2883. Validate certain allotments of land on Lac Courte Oreille Reservation in Wisconsin.
H. R. 2884. Reservation of certain lands in Utah for certain bands of Paiute Indians.
H. R. 2887. Extension of restrictions against alienation of homestead allotments made to members of the Kansas or Kaw Tribe in Oklahoma.
H. R. 3684. Enrollment and allotment of the members of the Lac du Flambeau Band of Lake Superior Chippewas.
H. R. 3800. Cancel allotment of land made to Mary Crane.
H. R. 3852. Final disposition of affairs of Eastern Band of Cherokee Indians of North Carolina.
H. R. 3900. Cancel two allotments made to Richard Bell.
H. R. 4117. Construction of road in Fort Apache Reservation, Ariz.
H. R. 4460. Pay certain Red Lake Indians for garden plats surrendered.
H. R. 4462. Payment of Choctaw and Chickasaw town-site fund.
H. R. 4803. Sale of lands and plants not longer needed for Indian administrative purposes.
H. R. 4804. Allotment of certain lands, Fort Yuma Indian Reservation.
H. R. 4835. Pay tuition of Indian children in public schools.
H. R. 5416. Set aside certain lands, Quinaielt Reservation, for lighthouse.
H. R. 5525. Relief of J. G. Seupelt.
H. R. 6298. Permitting leasing of unallotted lands of Indians for oil and gas purposes.
H. R. 6355. Making all Indians born within the territorial limits of the United States citizens.
H. R. 6483. Amending Osage act of June 28, 1906.
H. R. 6490. Relief of dispossessed allotted Indians, Nisqually Reservation.
H. R. 6857. Relief of Chester Calf and Crooked Nose Woman.
H. R. 6864. Use of Indian lands, Fort Hall Reservation, Idaho, for reservoir purposes, Minidoka project.
H. R. 7400. Authorizing Secretary of the Interior to investigate claims of certain Sioux Indians.

H. R. 7887. Providing for quarters, fuel, and light for employees of Indian field service.
H. R. 4161. Secure rights of way for drainage ditch, Lake Andes.
H. J. Res. 181. Investigation of the administration of Indian affairs in Oklahoma.
S. J. Res. 103. Authorizing expenditure of the Fort Peck 4 per cent fund.
S. 966. Construction of the San Carlos irrigation project, Arizona.
S. 1203. Drainage system for Piute Indian lands.
S. 1308. Purchase lands for Temoak Band of Indians, Nevada.
S. 1409. Relief of settlers and town-site occupants, Pyramid Lake Reservation, Nev.
S. 2798. Leasing for mining purposes unallotted lands, Kaw Reservation.
S. 2159. Appropriation for maintenance of Gallup-Durango Highway, Navajo Reservation.
S. 2932. Quiet title to lands within the Pueblo land grants.
The following bills passed the House:
H. R. 25. Per capita payment of $50 to Red Lake Indians.
H. R. 26. Compensate Chippewa Indians.
H. R. 2694. Jurisdictional bill, Washington Indians.
H. R. 2977. Relief of H. E. Kuca and V. J. Koupal.
H. R. 3387. Repayment of excess amounts paid by purchasers of certain lots in the town site of Sanish, formerly Fort Berthold Indian Reservation, N. Dak.
H. R. 4275. Jurisdictional bill, Ponca Indians.
H. R. 4461. Pay certain claims against Chippewa Indians.
H. R. 4818. Perfect title of purchasers of Indian lands.
H. R. 5726. Amending Osage act of March 3, 1921.
H. R. 6328. Relief of Charles F. Peirce, Frank T. Mann, and Mollie V. Gaither.
H. R. 6541. Disposal of unallotted lands, Omaha Reservation.
H. R. 7077. Amending appropriation bill of 1914.
H. R. 7239. Pay certain funds to various Pottawatomi Indians.
H. R. 7249. Relief of F. J. Kramer.
H. R. 7453. Amending act of March 3, 1909.
H. R. 8086. Amending act of August 1, 1914.
H. R. 8545. Jurisdictional bill, Yankton Band Santee Sioux.
The following bills were reported to the House and are now on the calendar:
H. R. 27. To compensate the Chippewa Indians.
H. R. 2258. Relief of James J. McAllister.
H. R. 3913. Jurisdictional bill, Delaware Indians.
H. R. 8083. Designate Croatan Indians in North Carolina as Cherokees.
H. R. 8965. Relief of Omaha Indians.
H. R. 9343. Jurisdictional bill, Chippewa Indians.

NATIONAL DEFENSE

Mr. FROTHINGHAM. Mr. Speaker, another step toward preparedness is provided in a bill reported by me from the Committee on Military Affairs. Authorization is given for the acquirement of lands in which is located helium-bearing gas. Helium is the safest kind of gas for use in airships. Gas that contains helium is located almost exclusively in this country. It exists in Texas and extends into New York through the States of Oklahoma, Kansas, Indiana, West Virginia, and Pennsylvania. Outside the United States there is a little in Canada, Italy, and Czechoslovakia. There is said to be too little in these foreign countries to be of practical use. The consequence is that we have in this country a virtual monopoly.

The purpose of this bill is to have the Government take over our supply and preserve it for national defense and public uses. This will prevent its exploitation by private parties. There is also a provision in the bill forbidding its exportation to foreign countries without permission.

The great advantage of helium in airships is that it is noncombustible. During the war the use of the incendiary bullet made it possible to puncture the balloons of these ships and set them on fire. A spark will ignite a balloon filled with hydrogen gas. This is not the case with helium. If the *Shenandoah* had been using hydrogen gas instead of helium when the storm pulled her from her moorings some months ago, there would probably have been an explosion and the ship been burnt up. Had the *Roma* been equipped with helium and the French ship *Dixmude*, the disastrous accidents that happened to them would not have occurred. The helium now obtained by the Government comes from a private plant in Texas and is stored in metal cylinders about a foot in diameter and 5 or 6 feet long and containing from 190 to 200 cubic feet of helium. These cylinders are stored in a warehouse and from there sent as required by the United States forces. Helium is carried in airships in a number of different bags so if one or more bags are punctured the others can still float the machine.

More and more it is being shown that rigid airships are of great use both in time of peace and in time of war. Many passengers and great quantities of freight can be carried by them.

Helium was discovered by an astronomer while observing an eclipse of the sun in India in 1868. Sir William Ramsey, in 1896, discovered helium in a mineral which was sent to him. At first the amount obtained was only a few thimblefuls and the idea that it ever could be used in airships was not even considered.

The Conference for the Limitation of Armament put no limitation on the number of airships, whether heavier or lighter than air, that a country could build. In fact, no limit was put on the number of light cruisers and submarines. Consequently much of the good expected from this conference has been thwarted by the activities of certain countries in building airships and vessels of war not covered by the conference.

While I am on this subject I think it important that something should be said about this phase of conference. A great deal of misunderstanding seems to exist as to exactly what was done. The conference assembled in Washington and held its first meeting November 15, 1921. Deliberations continued until February 3, 1922. Separate treaties were signed between the United States, the British Empire, France, Italy, and Japan, providing for the limitation of the navies of those countries and establishing the ratio as between three great naval powers, the United States, Great Britain, and Japan, of 5–5–3.

This limitation, however, applied to capital ships only. In other words, no limit was put on the number of light craft that could be built. For some time rumors have been current that this country was falling behind in its ratio because Great Britain and Japan were building many lighter craft, while this country was not. In the last session of Congress I brought in a resolution asking what was being done by the different countries under this treaty in the way of scrapping or disposal of vessels. I appeared before the Naval Committee of the House in relation to it, and a report was submitted by the Secretary of the Navy.

Under the treaty the United States is limited in total capital ship replacement tonnage to 525,000; the British Empire to 525,000 tons; the Japanese, 315,000 tons; the French, 175,000; and Italy, 175,000 tons. A capital ship is defined as one over 10,000 tons displacement, and no capital ship shall be acquired or constructed exceeding 35,000 tons. Guns on capital ships are limited to a caliber of 16 inches. Total tonnage for aircraft carriers is also limited in displacement: For the United States, 135,000 tons; British Empire, the same; for Japan, 81,000 tons; and for France and Italy, 60,000 tons. No aircraft carrier can be acquired or constructed exceeding 27,000 tons, provided that any of the countries can build two aircraft carriers, each of a tonnage of not more than 33,000 tons, and may use for the purpose two of their ships, constructed or in course of construction, which otherwise would have to be scrapped.

The number and caliber of guns to be carried by aircraft carriers is also limited. Provision is also made that no vessel of war hereafter laid down by any of the contracting parties other than a capital ship shall carry a gun of a caliber with an excess of 8 inches. It was under the provision in the treaty for keeping two of the vessels under construction and converting them into plane carriers that it was possible for me to help in having the *Lexington*—then building at the Fore River Yards, in Quincy—designated in an act of Congress as one of those to be kept for conversion.

Under this treaty Great Britain and Japan have built cruisers and other lighter ships not covered by the treaty, and have, in other ways, maintained the ratio of strength allowed them. This country has fallen behind. According to a recent alarmist report we had fallen to the ratio of 1 as compared with Great Britain's 5 and Japan's 3. This is an exaggeration. The Navy Department admits, however, that we have fallen behind, and the best that can be said is that the United States is approximately 4 instead of on an equality with Great Britain, as the treaty provided.

A bill recently passed by the House provided for the modernization of some battleships and the building of eight light cruisers of 10,000 tons. When this construction takes place we shall be in a better position. The great weakness with the arms conference was that the limitations did not cover cruisers, submarines, chasers, and other craft, including airplanes, but was limited to capital ships.

It is the duty of this country to keep up its Navy to the limit allowed. It is our duty, because the Navy is the first line of defense. It is our duty, because that was the understanding of the treaty. Woe to this country if she fails to do so. It is our first line of defense in case we are attacked—to hold off an enemy and enable us to mobilize an army. War is a dreadful thing. Every effort should be made to outlaw it and substitute some other method for settling international disputes. As long, however, as other countries are armed, as other countries are covetous of our riches, it is essential that we remain awake and protected. All history shows that the weak nations are the ones that have fallen. No one can want this Nation to be swept from the seas and fall like Carthage. We owe it to our forefathers; to our history; to the men and women who have sacrificed themselves for our safe-keeping; to those who maintained our prestige on the fields of France; to those of to-day who are helping to keep us a leader among nations, to see that this country is properly prepared against attack.

2.75 PER CENT BEER

Mr. CRAMTON. Mr. Speaker, on some suitable occasion I desire to address the House somewhat fully on the proposed beer and wine amendment to the Volstead Act. At this time, under the general leave granted, I desire to refer but briefly to some points that have been brought out during the recent voluminous hearings before the Judiciary Committee of the House on the 2.75 per cent beer bills, and to call attention to the recent medicinal-beer decision of the United States Supreme Court.

In the committee hearings the statement has been made that the Government admitted during the trial of cases involving the validity of the definition of intoxicating liquors contained in the war prohibition act that 2.75 per cent alcoholic content in beverages did not render them intoxicating. This is misleading. The facts were that during the period of the war regulations upon the use of food products in the manufacture of intoxicating liquors brewers were at one time permitted to manufacture 2.75 per cent beer. On October 28, 1919, Congress enacted the Volstead Act, Title II of which provided for the enforcement of war prohibition. It prohibited the manufacture of liquors containing as much as one-half of 1 per cent of alcohol by volume. The Jacob Ruppert Brewing Corporation filed a petition in equity in the District Court of the United States for the Southern District of New York seeking to enjoin the Federal authorities from the enforcement of this measure, alleging that they were engaged in the manufacture of beer containing not more than 2.75 per cent of alcohol by weight; that the war prohibition act of November 21, 1918, had become void or expired by its own terms, and that the provisions of Title I of the Volstead Act for the enforcement of the war prohibition, which fixed the definition of intoxicating liquors at one-half of 1 per cent, was unconstitutional because in excess of the war powers of Congress.

The Government, as a matter of pleading, moved to dismiss the bill on the grounds that it did not state a cause for equitable relief. This technically admitted that, for the purposes of that case, the Government did not contest the question of whether beverages of 2.75 per cent alcoholic content were in fact intoxicating, but the reason for the Government's making this motion was that the question was no longer material, since Congress had by the later act of October 28, 1919, the Volstead Act, defined intoxicating liquors to be those containing one-half of 1 per cent or more of alcohol by volume, and the issue was whether this act was constitutional. If Congress had the power to fix the definition at this point in order to make the law enforceable, then the question of whether 2.75 per cent beer would actually intoxicate was immaterial.

This is pointed out by Mr. Justice Brandeis in the opinion of the court, where he said (Ruppert *v.* Caffey, 251 U. S. 264, 282):

> May the plaintiff show as a basis for relief that the beer manufactured by it with alcoholic content not greater than 2.75 per cent in weight and 3.4 per cent in volume is not in fact intoxicating? The Government insists that the fact alleged is immaterial since the passage of the Volstead Act, by which the prohibition of the manufacture and sale is extended to all beer and other malt liquor containing as much as one-half of 1 per cent of alcohol by volume.

The quotation which is so often used by the opponents of the one-half of 1 per cent definition is taken from the language used by Mr. Justice McReynolds in the dissenting opinion. The statement that the Government admitted beverages containing 2.75 per cent of alcohol to be nonintoxicating is therefore misleading. The admission was made as a matter of pleading simply because the Government did not feel it necessary to contest the point in that particular case.

Concerning the reasons for the one-half of 1 per cent limitation in the Volstead Act, Mr. Justice Brandeis said in that same case of Ruppert against Caffey, at page 283:

> In other words, it clearly appears that a liquor law, to be capable of effective enforcement, must, in the opinion of the legislatures and courts of the several States, be made to apply either to all liquors of the species enumerated, like beer, ale, or wine, regardless of the presence or degree of alcoholic content; or, if a more general description is used, such as distilled, rectified, spirituous, fermented, malt, or brewed liquors, to all liquors within that general description, regardless of alcoholic content; or to such of these liquors as contain a named percentage of alcohol.
>
> A survey of the liquor laws of the States reveals that in 16 States the test is either a list of enumerated beverages, without regard to whether they contain any alcohol or the presence of any alcohol in a beverage, regardless of quantity; in 18 States it is the presence of as much as or more than one-half of 1 per cent of alcohol; in 6 States, 1 per cent of alcohol; in 1 State, the presence of the "alcoholic principle." * * *
>
> It is therefore clear both that Congress might reasonably have considered some legislative definition of intoxicating liquor to be essential to effective enforcement of prohibition, and also that the definition provided by the Volstead Act was not an arbitrary one.

It was also claimed that the Volstead Act contains a double standard—one for the city and one for the country. Anyone who will read the Volstead Act will find that the same provisions apply in every inch of the territory of the United States. It is true that section 29 of the Volstead Act does not prohibit cider and fruit juices that are not intoxicating in fact when made and used exclusively in the home.

Congress had all the reasons for this when the bill was originally considered and since that time. The complaint which the proponents of these beer bills make about the standard set for cider and fruit juices furnishes a good argument to show how the law would be evaded if there was no definite standard set for the commercialized traffic or for beer. It may be that the provision should be changed and strengthened. If so, it will doubtless be done by its friends and not by its enemies.

There has been considerable discussion concerning the attitude of former Congressman Volstead about what is intoxicating liquor. The corrected record shows clearly his position. Members of Congress, as well as witnesses, are permitted by the committee to take the notes of the stenographer and make corrections. The corrected statement of Mr. Volstead carried out clearly the intent of the eighteenth amendment and the enforcement act. Every Member of Congress knows Mr. Volstead's attitude concerning intoxicating liquor.

It was discussed in committee and on the floor of the House when the Volstead Act was pending—that alcoholic liquor affects people differently, depending upon their tolerance of its use and many other conditions. It would be a truthful statement that 3 per cent beer would not visibly intoxicate some people who are strongly tolerant to its use, but that does not mean that it would be a safe standard for enforcement for the people generally. Others would become more intoxicated upon 2 per cent than the confirmed drinker would be on 3 per cent.

It has been made clear to the Congress that the one-half per cent alcoholic content is not the determining point as to whether or not it would be actually intoxicating, but it is the determining point based on experience in fixing a standard that would make the law enforceable. No one ever argued that the one-half of 1 per cent standard was adopted because that would or could intoxicate anybody. It was adopted because the experience in 95 per cent of the territory of the United States, which adopted prohibition before the eighteenth amendment and the Volstead Act went into effect, found it necessary in order to enforce the law against the liquor traffic.

The cases of James Everard's Breweries against Day, Prohibition Director, and Edward and John Burke (Ltd.) against Blair, Commissioner of Internal Revenue, were decided by the Supreme Court June 9, 1924, in a unanimous opinion of the court. Each of these corporations brought a suit in equity in the district court to enjoin the commissioner of internal revenue and other Federal officers from enforcing the provision of the supplemental act prohibiting the prescribing of intoxicating malt liquors for medicinal purposes, alleging that it was not authorized by the eighteenth amendment and was in conflict with other provisions of the Constitution.

The court fully sustained the act and denied the relief sought. The following brief excerpts from the opinion will be found of especial interest:

We come then to the question whether this act is within the power conferred upon Congress by the eighteenth amendment. By its terms the amendment prohibits the manufacture, sale, or transportation of intoxicating liquors for beverage purposes and grants to Congress the power to enforce this prohibition "by appropriate legislation." Its purpose is to suppress the entire traffic in intoxicating liquor as a beverage. See Grogan v. Walker (259 U. S. 39, 89). And it must be respected and given effect in the same manner as other provisions of the Constitution. National Prohibition Cases (253 U. S. 350, 386).

* * * * * * *

The ultimate and controlling question, then, is whether in prohibiting physicians from prescribing intoxicating malt liquors for medicinal purposes as a means of enforcing the prohibition of traffic in such liquors for beverage purposes Congress has exceeded the constitutional limits upon its legislative discretion.

In enacting this legislation Congress has affirmed its validity. That determination must be given great weight; this court by an unbroken line of decisions having "steadily adhered to the rule that every possible presumption is in favor of the validity of an act of Congress until overcome beyond rational doubt." Adkins v. Children's Hospital (261 U. S. 525, 544).

We can not say that prohibiting traffic in intoxicating malt liquors for medicinal purposes has no real or substantial relation to the enforcement of the eighteenth amendment, and is not adapted to accomplish that end and make the constitutional prohibition effective. The difficulties always attendant upon the suppression of traffic in intoxicating liquors are notorious. Crane v. Campbell (245 U. S. 304, 307). The Federal Government in enforcing prohibition is confronted with difficulties similar to those encountered by the States. Ruppert v. Caffey, supra, page 297. The opportunity to manufacture, sell, and prescribe intoxicating malt liquors for "medicinal purposes" opens many doors to clandestine traffic in them as beverages under the guise of medicines; facilitates many frauds, subterfuges, and artifices; aids evasion, and thereby and to that extent hampers and obstructs the enforcement of the eighteenth amendment. A provision in a revenue act which tends to diminish the opportunity for clandestine traffic in avoidance of the tax has a reasonable relation to its enforcement. United States v. Doremus (249 U. S. 86, 94).

Nor can it be held that the act is an arbitrary and unreasonable prohibition of the use of valuable medicinal agents.

When the bill was pending in Congress the Judiciary Committee of the House of Representatives held an extended public hearing, in which it received testimony, among other things, on the question whether beer and other intoxicating malt liquors possessed any substantial medicinal properties. Hearings before House Judiciary Committee on H. R. 5033, serial 2, May 12, 13, 16, 17, 20, 1921. On the information thus received the committee recommended the passage of the bill (H. Rept. No. 224, 67th Cong., 1st sess.). And in the light of all the testimony Congress determined, in effect, that intoxicating malt liquors possessed no substantial and essential medicinal properties which made it necessary that their use for medicinal purposes should be permitted, and that, as a matter affecting the public health, it was sufficient to permit physicians to prescribe spirituous and vinous intoxicating liquors in addition to the nonintoxicating malt liquors whose manufacture and sale is permitted under the national prohibition act.

Neither beer nor any other intoxicating malt liquor is listed as a medicinal remedy in the United States Pharmacopoeia. They are not generally recognized as medicinal agents. There is no consensus of opinion among physicians and medical authorities that they have any substantial value as medicinal agents; and while there is some difference of opinion on this subject the question is, at the most, debatable. And their medicinal properties, if any, may, it appears, be supplied by the use of other available remedies. That the opinion is extensively held that the prohibition of prescription of malt liquors is a necessary and proper means to the suppression of the traffic in intoxicating beverages likewise appears from the legislation in many States, under which such prescriptions are not permitted.

The following in the report of the House Judiciary Committee on the supplemental prohibition act (Rept. No. 224, 67th Cong., 1st sess.) was referred to in the opinion and is worthy of note:

In its report the committee said:

"The evidence presented to the committee to the effect that beer has never been recognized as a medicine was overwhelming. The United States Pharmacopoeia has never listed it as a medicine. One hundred and four of the leading physicians and scientists in the Nation signed the following statement: 'The undersigned physicians of the United States desire to place on record their conviction that the manufacture and sale of beer and other malt liquors for medicinal purposes should not be permitted. Malt liquors never have been listed in the United States Pharmacopoeia as official medicinal remedies. They serve no medical purpose which can not be satisfactorily met in other ways, and that without the danger of cultivating the beverage use of an alcoholic liquor.' Several thousand other physicians signed the above, or a similar statement, and presented it to the committee. The attorney for the Anheuser-Busch Co. (Inc.) appeared before the committee and called attention to the fact that if beer was permitted as a medicine it would be impossible to enforce the prohibition law. There was only one doctor who appeared before the committee in favor of beer as a medicine, and the New York County Medical Association, the official medical association of New York, denied that he spoke for them in favoring beer for medicinal purposes."

Congress has found beer to be lacking in medicinal value. The Supreme Court says the opportunity to manufacture, sell, and prescribe beer for medicinal purposes would open the door to frauds and hamper and obstruct the enforcement of the eighteenth amendment.

How much more would the unrestricted sale of beer of intoxicating strength obstruct and defeat that amendment? It is unnecessary and impossible. Better to realize the truth of these two paragraphs closing an editorial in the Washington Herald, May 13, 1924:

The conscience of the civilized world is solidly against the use of alcohol in any form as a beverage.

The number of people who are aware of the necessity of prohibition and still drink a little is decreasing daily. The conscience of the civilized world is slowly taking form against the use of alcohol as a beverage. It is regrettable that a man of Doctor Butler's prominence should think otherwise.

### A PROGRESSIVE REVIEW OF THE LEGISLATIVE RECORD

Mr. NELSON of Wisconsin. Mr. Speaker, the progressive Members that have held the balance of power in the House during the past session instructed me to prepare a brief review of our legislative record. Out of the general scope of legislative matters considered during this session I select a dozen for brief comment:

Organization of the House; its rules and committees.
Investigations of Shipping Board and Air Service.
Taxes.
Adjusted compensation.
Federal Trade Commission.
German relief.
Alaskan fisheries.
Bloom election case.
Railroad legislation.
Cape Cod Canal.
Banking bill.
Farm legislation.

These more important subjects are selected out of the general run of legislation as they came up in order to illustrate how the progressive group has fought for the best interests of all the people.

### ORGANIZATION OF THE HOUSE

Immediately at the opening of Congress we demonstrated our firm hold upon the balance of power. Before the House organized we compelled the regulars to permit a reformation of some of the more tyrannical rules and to yield a place to a progressive on the governing Rules Committee.

Let it be at once well understood that Congress is visibly controlled by a floor leader and the old Members that hold the higher places in the organization of the leading committees and into whose grasp the rules center legislative power. But behind a large majority of these experienced legislators stands, more or less directly, the invisible government of our country.

### THE REAL RULERS

That citizen is greatly deceived who thinks that this power is made up of the American voters, to whom under the Constitution it rightfully belongs. Everyone at all familiar with affairs as they actually are knows, without having pointed out for him either the true character, the constituent elements, or the enormous resources of this power, that a usurper has seized the reins of government and now dominates more or less directly not only the Congress but also the courts, and now particularly the Cabinet.

This usurper, it is sufficient to say, is popularly spoken of as "big business." By this term all understand a class-conscious group of financiers, whose headquarters is on or potentially near a well-known street in the very heart of the financial district of our country. This all-powerful financial group is as much a minor quantity in America, when compared with the whole people, whose right it is to rule, as is the minority that now governs Russia. The chief difference in respect of persons between the Government of Russia and that of the United States is largely that, under the form of still remaining republics, the one is governed by a small minority representing

the extremely poor, whereas the other is governed by a small minority representing the extremely rich.

Big business was the first class to have its bloc in Congress. The financial bloc has long been in control of the House organization. But even by reforming the rules so that the chairman of the Committee on Rules can not carry resolutions around in his pocket but must file them within a specified time and call them up only after one day's notice; next, by changing the rules so that an amendment to a tax bill providing for another kind of taxation than that reported from a committee shall be in order, if germane, and then by providing for the discharge of a committee upon the filing of a petition signed by 150 Members to a discharge motion, the power of entrenched regulars representing big business was somewhat restrained, as the legislative influence of the progressives was notably increased when one of their number was placed on the governing Rules Committee. It is freely conceded that much remains to be done not only looking toward further revision and liberalization of the rules but also toward an enlargement of progressive representation on the dominant committees of the House. This fight for further reform of the House organization is scheduled to be taken up again at the earliest favorable opportunity.

INVESTIGATIONS BY SELECT COMMITTEES

Without the balance of power being held by the progressives, there would have been no investigation by select committees either of the Shipping Board or of the Air Service. These are both now well under way.

At the opening of the session leading progressive Democrats met with some of us to consider such investigations. We had learned in the consideration of the ship subsidy bill that big business had made billions of dollars out of the Public Treasury by manipulation of contracts for the building of ships for our alleged merchant marine. Congress had appropriated more than $4,000,000,000 during the war for ships without getting a single ship ready for the transport of our troops across the Atlantic. Evidence of continued graft and corruption came to us in abundance. As a result we decided to fight for the appointment of a select committee to investigate the Shipping Board. We succeeded. This committee consists of some of the best men in Congress, and one of them is the distinguished gentleman from Wisconsin [Mr. COOPER], for whom we cast our votes for Speaker.

Likewise, big business had made hundreds of millions out of the Treasury during the war under the guise of building airplanes. Congress had been persuaded to appropriate more than a billion dollars for flying machines without succeeding in getting a single fighting plane at the front. The corruption and graft in this branch of the War Department has been scandalous to the extreme. Evidence came to us that the same special interests organized as a monopoly that had caused this sad chapter in our war history was still potent in securing contracts with these air services. As a result, we secured the appointment of a select committee to investigate this branch of the War Department. It was a hard struggle, but again we won. The committee consists of members of excellent character, two of whom—Mr. LAMPERT, of Wisconsin, and Mr. REID, of Illinois—directly represent the progressive group holding the balance of power in the House.

These investigations have already more than justified themselves and will be of inestimable benefit to the people not only in putting an end to two enormous wastes of public funds but also in developing constructive programs for the upbuilding of a merchant marine on the sea and in providing an effective fleet of airships as a part of our national defense in the air, not overlooking the future usefulness of the airplane as a modern instrumentality of commerce.

TAXATION

But for the opposition of the progressives the Mellon tax plan would have succeeded. Systematically since the war big business has sought to relieve itself of its just share of the burdens of taxation brought upon the American people by the profiteers of the World War. In the last Congress big business succeeded in repealing entirely the excess-profits tax and in reducing the higher surtaxes to 50 per cent. The intent of the Mellon plan was to further relieve big business of these surtaxes by reducing them down to 25 per cent. This was carried on under a well-organized, special-interest propaganda for so-called tax reduction.

Early in the session the progressives had worked out the progressive tax plan. This was presented to the country and to the Congress. We succeeded not only in defeating the effort of Mr. Mellon and his big business associates in shifting the burden of taxation onto the masses of the people but secured for the average taxpayers a reduction of taxes that will greatly please them when they realize what we have done.

Time will not permit the enumeration and discussion of our partly successful efforts to amend the tax bill in many details, such as our fight for increased tax on inheritances, stock dividends, undistributed profits, and for the publicity of tax returns.

In the face of the most skillfully organized propaganda of misrepresentation that was ever perpetrated on the American people by the big special interests, progressives succeeded in working out a tax reduction based with some degree of success upon justice and equity for the people.

ADJUSTED COMPENSATION

Without the support of progressives the adjusted compensation bill for veterans of the World War would have failed. Big business, under the leadership of Mr. Mellon, fought adjusted compensation with all its might and main. These same special interests who had profiteered out of war to an extent that the world's history never before had seen equaled bitterly opposed granting this small degree of adjusted compensation to the boys whom these profiteers clamored to have sent across the sea to insure the collection of their war-gotten gains. The progressives felt that inasmuch as Congress had compelled these young men to leave their occupations for the pitiful sum of $30 per month, risking life, health, and liberty, it was but the plain duty of Congress to heed their demand for some adjustment for the injustice that had been done them. At the darkest moment, when the Mellon opposition seemed about to triumph, we urged the commander of the Legion to reply to the Mellon propaganda and to appeal to all Legion posts to back up their demand for justice. The commander responded, made the appeal, and the Legion posts were heard from in every portion of the land. While the President, under Mr. Mellon's advice, saw fit to veto the bonus bill, Congress overwhelmingly passed it over the President's objection, every progressive voting not only for the original bill but also to override the President's veto. Big business cheered the soldier going to France to fight for the protection of their war contracts but sneered at the soldier when asked to pay a small portion of the huge profits of these war contracts for adjusted compensation.

GERMAN RELIEF

One of these veterans of the World War, the gentleman from New York [Mr. FISH], introduced a resolution to provide relief for the starving women and children of Germany in the form of foodstuffs. One of the witnesses and advocates of this measure before the Foreign Affairs Committee was General Allen, in charge of the American troops during the occupation of the Rhine. It was urged by progressives that this was not only the duty of America in keeping with her wealth and historic character, but would be most potent in doing away with hate, suspicion, and feelings of revenge for the future. In fact, this relief would do more for promoting peace in the world than all the millions spent for preparedness for war on land and sea. Every progressive in the House voted for this humanitarian measure. It passed the House but failed in the Senate during the closing days of the session. Big business opposed this relief strenuously. It was also opposed by a narrow, selfish, sectionalism, and by an appeal to the angry passions that were engendered during the war. Big business is Bourbon blind; it thinks only in terms of violence and hate, and does not respond to the nobler emotions of the human heart.

FEDERAL TRADE COMMISSION

But for the support of the progressives the Federal Trade Commission would have been both hamstrung and starved.

This agency of the Government has remained faithful to the best interests of the people. It so happened that a number of progressive-minded men were appointed originally on this commission whose duty it is to investigate and report upon the practices of monopolies that restrain or interfere with the freedom of competition. The commission has faithfully investigated and reported on these monopoly practices, but the Attorney General has refused to prosecute the criminals. The representatives of big business in the House and Senate, and recently the President, has tried to destroy the usefulness for the people of this body. Certain amendments were proposed, and the usual appropriations cut down in order to hamstring or starve the commission. The progressives appointed a special committee to do its utmost to protect the commission from this attack. In this we were very successful. However, the President has recently made an appointment which may prove to be the turning over to big business of this agency designed to protect the people against the evil practices of monopolies.

ALASKAN FISHERIES

The Delegate from Alaska, Mr. DAN SUTHERLAND, is a member of the progressive group. He revealed to us by indisputable proof that the fisheries of Alaska had been turned over by Secretary of Commerce, Mr. Hoover, to the big packing interests of Chicago and the West. These packers controlled the so-called salmon canneries, who were given all kinds of fishing privileges at the expense of the people of Alaska.

We assisted him in getting his complaint before the American people, not only in speeches made in Congress but in articles prepared by the great news gathering associations. We also helped him get a bill out of the Committee on the Merchant Marine and Fisheries, which was passed by the House and Senate, relieving the people of Alaska to a large degree of these fishing monopolies.

BLOOM ELECTION CONTEST CASE

The progressives have also had a conspicuous part in protecting Members elected to the House from loss of their seats. The most notable of these was the Bloom election case. Mr. BLOOM's seat was contested by Mr. Chandler, of New York, who originally had been a Roosevelt follower but had become one of the stanchest of regulars. Although defeated at the elections, he made an incessant campaign in Congress to unseat his Democratic opponent. Every kind of pressure was brought to bear upon the Republican membership by the Republican regulars to give Mr. Chandler the contested seat in the House. It was charged that the purpose was to unseat Mr. BLOOM, a Democrat, and to seat Mr. Chandler, a Republican, in order to turn the electoral vote of New York into the Republican column in the event of the election of President by the House. The New York delegation is now Democratic by one vote. But this steal of a seat was defeated by progressives who had carefully studied the precedents of the House and the results of the elections in that congressional district.

CAPE COD CANAL

No better illustration can be given of the exploitation of the Public Treasury in the interest of big business than is afforded by the Cape Cod Canal bill.

Big-business financiers in New York, under the leadership of August Belmont, had made a poor investment by securing possession of this Cape Cod Canal. So unprofitable had it been that the stock was worse than worthless and the bonds could not be floated upon the market. These financiers then conceived the plan of unloading this bit of "busted" big business on Uncle Sam. In this purpose they were aided by Mr. John W. Weeks when he was in the United States Senate and afterwards by the same gentleman as Secretary of War. It is a long story and has been told in detail in speeches that are in the RECORD. Progressives opposed this steal unanimously, but because Mr. Belmont is a Democrat the leaders of that party put up only a feigned opposition to the measure, many of them joining in this raid on the Treasury in order to secure "pork" for various districts in the rivers and harbors bill. Thus this deal went through the House by a small majority. The cost of this Cape Cod Canal job would be $11,500,000 upon the purchase of the canal, but would cost upward of $50,000,000 to make it fit for commerce and then would be used largely to furnish free toll for the vessels of these special interests who had originally invested in the canal. Because of the fight made upon this job in the House the Senate held this bill in committee to the end of the session. No doubt an effort will be made by these big-business interests to put it through Congress after the elections. It will be interesting to learn whether Mr. Coolidge will sign or veto the Cape Cod Canal bill, in view of his veto of the soldier pension bills.

RAILROAD LEGISLATION

Progressives had an opportunity to demonstrate the need of the new discharge rule in forcing consideration of legislation in the interest of the railroad workers. One of the most grievous evils of the Esch-Cummins Act was the establishment of a Railroad Labor Board. This has functioned in a way to disgust the railroad employer, the railway employee, and the public alike, but it has been especially distasteful to the railway brotherhoods. One of the wisest, fairest, and most effective measures ever presented on the subject was prepared by the railway brotherhoods to abolish the Labor Board. This bill was largely made up of past railway legislation, such as the Erdman Act, the Newlands Act, and the best portions of title 3 of the Esch-Cummins Act, perfectly fair to the railway carriers and to the public, as well as to the railway brotherhoods. Progressives supported it cheerfully. Hearings were refused by the Committee on Interstate and Foreign Commerce presided over by the gentleman from Massachusetts [Mr. WINSLOW]. Thereupon the new progressive discharge motion was filed in behalf of the Howell-Barkley bill repealing the Labor Board and supported by progressives of all parties; the committee was discharged and the bill brought up in the House for consideration. Thereupon the regulars, under the instigation of the railway executives, began a determined filibuster to defeat it, but failed utterly to do more than obstruct its passage. Owing to the adjournment of Congress the bill is still pending, but holds its prominent place on the discharge calendar.

Progressives also instituted a discharge motion to bring up the consideration of a bill to reduce freight rates by revising section 15a of the Esch-Cummins Act. As soon as the Howell-Barkley bill is out of the way we expect to push the legislation for the relief of the producer on the farm and the consumer in the city.

These measures illustrate not only the facts stated, that the regulars in the House hold power by virtue of their control of committees and their vicious use of parliamentary rules, but that they represent the big business interests that send them to Congress, in this instance the railroad corporations backed by the great banking houses of Wall Street, who own or control the country's railway systems.

BANKERS' BILL

Speaking of the bankers of Wall Street naturally brings up the consideration of the McFadden bill for the relief of the bankers in the Federal reserve system. This bill is a special-interest and special-privilege measure through and through. Among other bad provisions it not only grants to these banks who now have charters running for 100 years the privilege of holding them in perpetuity but also extends the vicious principle of branch banking. Progressives have appointed a committee to fight this bill as energetically as possible. The representative of the progressives on the Committee on Rules opposed the granting a rule for its consideration, but big business got its rule readily for the consideration of a measure like this bill extending branch banking and granting perpetual charters to banks, as it did to consider the Belmont-Winslow Cape Cod Canal bill. However, the regulars in the House feared to press the passage of this bankers' bill during the closing days of the session, and so it is one of the first to be considered after the elections. We realize, however, that it will be difficult, then, to prevent the enactment of this so-called relief for the bankers, who set up the cry that their Federal banking interests are in danger because of the rivalry of State branch banks and liberal State charters.

FARM LEGISLATION

All real farmer-relief legislation failed. Progressives are the sincere champions of legislation for relief of the farmer. Unfortunately, they had not sufficient representation on committees that consider such relief and are handicapped by the rules of the House. Every form of farm relief was given consideration by us at our meetings, but the so-called McNary-Haugen bill was given right of way by the regulars in the Agricultural Committee. We knew that it could not pass. We knew that it was not the intention of the regulars to permit it to pass. It served to block the way of any real farmers' relief legislation. But, as it was defeated during the closing days of the session, there was not time for working out effective relief for the farmer. A meeting of progressive Members of the House and Senate was called before adjournment in order to see, as a last resort, if something could be worked out, but it was soon apparent that in the event of adjournment being decided upon by the regulars in control of both branches of Congress there would be no opportunity for further farm legislation. Progressives therefore resisted adjournment in both House and Senate until farm relief was had, but the regulars of both political parties united in forcing an adjournment.

CONCLUSIONS

The foregoing résumé of the record made by the progressives in the House during the past session is most gratifying. Our success exceeded by far our hope. We not only prevented reactionary legislation, we promoted many progressive measures.

Every member of the progressive group goes home happy in the realization that he has not only made a good record for himself as a faithful representative of the people but is also mightily pleased with the knowledge that he will meet with only smiles of approval on the countenances of his constituents. Not one progressive goes back fearful of defeat.

We are well aware that Congress is being condemned by some well-known spokesmen—in and out of the press—who represent the interests of big business. Gary, of the United States Steel Corporation, has declared that "the worst thing we have is our American Congress." This remark by the head

of the Steel Trust is regarded by progressives as highly complimentary. Had we received the approval of the Steel Trust we would have met with the disapproval of the people. Mr. Gary speaks for big business at the head of one of the greatest monopolies in the world under the complete control of the house of Morgan, the first place of financial power in America and the world.

We know well why Mr. Gary is peeved at Congress. Some of us remember that a score of years back the United States Steel Corporation was the most potent power behind the House organization. The representative of the Steel Trust from Pittsburgh, Mr. Dalzell, held a dominating place on the governing committee of the House. He was at the steering wheel in the Cannon régime. In the Senate Standard Oil was all powerful in the person of the chairman of the Finance Committee, Senator Aldrich, of Rhode Island. During the session just terminating the influence of the Steel Corporation in the House has been near zero; and oil, whether Standard or not, has completely lost its grip on the Senate. In fact, instead of Standard Oil running the Senate the Senate has been going after the entire oil crowd. No wonder Gary and Doheny declare that "the worst thing we have is our American Congress."

Looking over a period of nearly 20 years of service in the House, it is my considerate conclusion that this Congress excels all others in high character, not merely for the reason of its resisting well-organized special-interest propaganda of misrepresentation as to pending legislation but more particularly because it has sought most zealously to get at the truth of things with reference to mismanagement and graft in the executive departments of the Government, the like of which has not been surpassed in the entire history of our country.

This Congress has not only a record unequaled for its resistance of the forces of evil in public life that sought special privilege in legislation, it has also taken advance ground in promoting the public good.

Finally, it has been the freest, the most independent, and the least subservient Congress in my long experience as a legislator. The progressives, who have held the balance of power, by refusing to wear party shackles have unshackled Congress, as we earnestly hope to unshackle the people of our country.

Whatever may be the sacrifices that we have been or shall be called upon to make—and it has not been an easy or a pleasant task to defy the party machine—we have resolved that having put our hands to the plow we shall go through to the end of the road, confident that our cause is right, for it is the common cause of all the people of our country.

Let them misrepresent us as "radicals." This only reveals that we are right. We see no virtue in compromises on principle or the public good. They now denounce blocs in Congress. We know that big business had had for a score of years in the House and Senate a well-organized, thoroughly trained, and skillfully manipulated financial bloc. Now that we have sought to protect the people from further exploitation by uniting our efforts as progressives to that patriotic purpose, big business, which has so long ruled Congress, rages and gnashes its teeth in hypocritical horror at blocs, realizing with fear that its riotous reign of shameless profiteering may be over in Congress and the country, as we fondly hope and fervently pray, forever.

### THE "BLOC" SYSTEM OF GOVERNMENT

Mr. COLE of Ohio. Mr. Speaker, I do not believe in the so-called "bloc" system of government. When our fathers bade adieu to their loved homes in Europe, severed the thousand natural ties that bound them thereto, braved the terrors of the treacherous seas, landed on the bleak Atlantic coast, pushed out into the wide forests, and after years of suffering and strife, turmoil and war established here the highest type of government of which the mind of man, aided by Divinity, is able to conceive, they did not have in mind so much the material resources of the country as they did the civil and religious welfare of themselves and their children.

The sweeping plains, the boundless forests, the majestic streams, the sublime mountains, the variegated climate, and all the wonderful material resources of the country, while essential to development such as they were seeking, were not by them considered to be primary, but were secondary in character.

In that far day there was practically but one industry in the country, and that was agriculture; but as the Nation grew in population and extended in area it became apparent that all could not live by agriculture alone. The sustenance of the people made necessary the diversifying of our industries. Hence the industries of the country began to multiply, until to-day we have almost every conceivable enterprise that is carried on anywhere in the world.

The pendulum now seems to have swung too much to the other extreme, and instead of our following their lead and considering primary the civil and religious development of the country, our primary purpose now seems to be the development of its physical resources.

I am persuaded that we shall never be able to attain to that standard of civilization that might be ours until we have, to a degree at least, returned to the faith of our fathers. It seems to me that the domestic peace and welfare are grounded in that faith. It was in that faith that our Nation was conceived and brought forth, and if by that faith it was brought forth, it is by that faith that it must live and achieve its highest destiny.

There are sections of our country that are suitable for certain particular pursuits, sections where manufacturing is the logical pursuit, sections where mining takes precedence over all others, sections where agriculture holds sway, and so on all down the line of our industries, and there should be no quarrel among them. One section should not undertake to take advantage of another section to advance its own development, but all should work together in peace and harmony.

I do not agree that the farmer is solely interested in the development of his farm. I ascribe to him much loftier motives than that. While, of course, he is primarily interested in the development of his farm and that which it produces, he yet understands that all that he has, and all that he can hope to be, is dependent upon the integrity of the Nation that gives him security. This is true also of all the other industries, or at least should be.

The tree can not live without its branches and leaves. The leaves can not live without the trunk and branches. The branches can not live without the leaves and trunk. The trunk can not live without the branches and leaves, each having its definite function to perform, yet all working together, being necessary for the life and growth of the tree. So it is with our Government. These different sections supporting the various industries, each performing a separate function, are yet dependent upon one another for life and development.

There should be no manufacturers' bloc, there should be no labor bloc, there should be no farmer bloc, because, since they are interdependent, for their full strength and growth they should work together rather than undertake to work independently.

I feel that a great many of these unfortunate issues are raised by ambitious Congressmen, rather than through demands made upon them by their constituencies. I do not mean to say that a Congressman is not often in a position of advantage, where he may know what is better for his constituents than they themselves do, but the trouble is that the constituents are given credit for a great many things that they knew nothing about until they were revealed to them by the Congressman.

The whole world is groaning under the burdens of materialism. And while I realize that no moral advancement can be made except in conjunction with material development, yet we are stressing the material too much and the moral not enough. Let us abandon the "blocs" and domestic strife, return to the faith of our fathers, and thus insure to our children and our children's children that the United States of America has really taken its "place in the sun"; that this Nation, founded upon the broad basis of liberty and equality, this Nation, that loosed the bands of royalty and crowned each private citizen a king; this Nation, that rent the curtain of aristocracy and paved the way for the lowly to rise, shall, like the grand old "ship of state," continue to sail on, breast heroically the tides of oppression and tyranny, of domestic strife and turmoil and foreign misunderstandings, and finally weigh anchor in the harbor of the highest possible attainments toward governmental perfection.

### FINANCIAL ANGLE OF M'NARY-HAUGEN BILL

Mr. ACKERMAN. Mr. Speaker, if the McNary-Haugen bill had been enacted into law and it had been necessary to raise by taxation the $200,000,000 to finance it, the four Middle Atlantic States, New York, New Jersey, Pennsylvania, and Ohio, would have had to bear nearly 50 per cent of this burden. In other words, these four States would have contributed a sum equal to that of the other 44 States whether the taxes were derived from individual, corporation, or estate taxes, as the following tables, all based on the latest Treasury statistics, will show.

In other words, if the McNary-Haugen plan had been carried out, the four States of New York, New Jersey, Ohio, and Pennsylvania, with 8 Senators and 113 Representatives, a total

population of 26.44 per cent of the whole country, and with only 30.5% per cent of the country's wealth, would raise as much toward carrying out the plan and the bearing of the burden, or loss, as 44 States having 88 Senators, 322 Representatives, having 73.56 per cent of the population and 69.34 per cent of its wealth. This is a disproportionate burden of 3 to 1, practically, as to population and over 2 to 1 as to wealth. Is it to be wondered at while the bill was under discussion that the Representatives of these mid-Atlantic States could not be induced to become enthusiastic over the plan as then presented, while at all times being sympathetically inclined to any equitable plan that might increase the happiness of the farmer?

THE AGRICULTURAL SITUATION AND THE REPUBLICAN PARTY

Mr. LOWREY. Mr. Speaker, Congress has definitely determined to adjourn without passing farm-relief legislation. There are many of us who believed this course to be wrong and who very earnestly voted against the adjournment. We would have stayed here all summer, had it been necessary, so long as there was any hope of beneficial action.

The tragedy of the situation is that the party in power has wasted weeks of precious time on measures that were doomed to defeat from the beginning, because they were socialistic in nature and of very doubtful value. These were measures which we are now given in a general way to understand the President would have vetoed had they passed.

The President could have saved these weeks and opened the way for something worth while if he had given us to understand this sooner. If the bill proposed was unacceptable to him, it was clearly his duty to say so and to advise the leaders of his party in framing a new measure which would be acceptable. Time and again he has proclaimed it one of the great tasks of his administration to bring relief to agriculture. He has talked in all sorts of fervent generalities. And there he has quit. When he has been asked for definite proposals on agricultural relief he has replied, we are told, that he believed Congress ought to work out legislation without interference from the Executive. Obviously this was because he had nothing to suggest. When he has had suggestions to make on other measures he has not been held back by any great regard for the prerogative of Congress. On the tax bill and on immigration he displayed no such attitude. He did not wait, then, to see what we were going to do up here at the Capitol before he declared himself. Instead, he expressed himself vigorously, and sometimes admirably, and once or twice defiantly. He brought every pressure at his command to bear to cause Congress to do what he desired. Despite his name of "Silent Cal," on this farm situation alone has he been silent.

Mr. Speaker, I doubt whether in the history of the country a more astounding lack of opinion and decision has been displayed toward a major issue by the Chief Executive. With the country relying on him for leadership and his own party pleading with him for an idea, he has had no idea to give them.

There have been several proposals made by minority Members of this House that were worthy of consideration. Any one of them, if enacted, would have afforded a measure of relief. But they were Democratic proposals and, as such, were unacceptable.

The Curtis-Aswell bill, embodying the Yoakum plan, offers at comparatively small cost a great marketing system. And if any man in America has made a sane and exhaustive study of farm needs, B. F. Yoakum has. My able young colleague, JOHN RANKIN, of Mississippi, has proposed a tariff resolution that would stimulate our export trade in farm products and reduce prices on what the farmer has to buy. And the Lowrey-Dial bill would unquestionably have done much to restore our foreign makets to us and raise the price of wheat and cotton by encouraging the demand for them. This last bill, in the form of the Dial resolution, was favorably reported out by the Senate Committee on Agriculture, and has been called up for discussion. There are those of us who hoped that if Congress held on for a week or so yet it could be put through. But it, too, has been caught in the ruthless jam brought on by the administration's demand for adjournment.

Certainly the passage of these three measures, all of them championed chiefly by minority Members, would have given the farmer a large measure of relief and at little expense to the taxpayer. They were all safe and sane propositions, not tainted by socialistic demand for price-fixing and governmental control. However, the attitude of the President and his party seemed to be: We do not know what to do ourselves, but you may be very sure we are not going to ask your advice.

Perhaps it is just as well, Mr. Speaker, because any plan put through under this Republican administration must, by the very nature of things, have been temporary. The Republican Party can not give real relief to agriculture without violating the fundamental tenets on which it has built its power. No wonder that the President and his party leaders were helpless to bring forth a constructive proposition. Had they done that we would have had the astounding spectacle of the Grand Old Party deserting its makers and masters, the barons of protective tariff and selfish nationalism.

For there is absolutely no hope of restoring permanent and sound agricultural prosperity so long as the farmer is forced to buy the necessities of life on a plane of high cost created by a protective tariff, and so long as he is cut off from the European markets, where in former years he sold half his cotton and one-third of his grain.

The Republican Party has never fooled the southern farmer on this. I am not sure that it has ever fooled the western farmer. But somehow or other it has succeeded at times in holding the vote of the western farmer in spite of its traditional policy which was so inimical to his best interests.

We have simply had to go along until the unrelenting pressure of economic law should bring these western farmers to our side. It is very evident that the time has come when they no longer can be fooled. We may be mistaken, but there are some of us who are very thoroughly convinced that Democracy is about to come into its own. Under its sound leadership Congress will become again the servant of the interests of the whole people and not of the chosen few.

We will have a tariff law that will be reasonable and just. Under it the farmer will be able to buy on a plane proximate to the plane on which he must sell. He will not longer have to carry on his back the burden of pampered industry, as well as his own burden. Industry will carry itself, as we may be sure it is abundantly able to do. We will have a situation that will make agriculture and industry brothers in a common prosperity, instead of a situation which antagonizes and discriminates.

More than this, the greatest crime ever perpetrated against the American farmer in a measure will be rectified. It is impossible to recall all the suffering and loss that has flowed directly from the act of the Republican Party when it assassinated Woodrow Wilson five years ago. Humanity here and abroad has paid a terrific price, and the American farmer has borne more than his share. Had sane steps been taken to restore world conditions at the end of the war, cotton and wheat for these three years would have brought top prices, not bottom prices. The world seeking to rehabilitate itself would have bought largely and would have paid handsomely.

But instead, as the direct result of the actions of the party which is now in power, the world has gone on in suffering and misunderstanding. Economic conditions have steadily become worse. Europe has ceased to buy because, with the prolonged derangement of its systems, it has been unable to buy. Instead

of credit there has been discredit; instead of confidence there has been suspicion; instead of cooperation there has been striving and confusion.

No wonder the President and his party leaders have been helpless. They are the victims of their own system. They are reaping what they have sown. And perhaps it is just as well that this Congress should pass no temporary, inconclusive measure, for it thereby insures that real relief, when it does come, will come in a more positive and thorough fashion.

THE M'NARY-HAUGEN BILL AND PROHIBITION

Mr. BLACK of New York. Mr. Speaker, in offering various amendments to the pending Agricultural bill I had in mind accomplishing a benefit for the rural districts without working any hardship on the city folks, and all within our power under the Constitution.

The advocates of the McNary-Haugen bill boldly stated it was a price-fixing bill, with assurances that as far as the domestic markets were concerned the prices were to be high and as far as the foreign markets were considered American products were to be sold lower. The farmer by charging American city workers more could charge the foreign workers less.

This was the farm bloc's way of meeting an emergency. Emergency legislation affecting the cost of living has always been justified on reduction features and as well on the theory of general benefit as against class benefit. The McNary-Haugen bill was for class benefit and for general damage.

Its requirement of an initial subscription of $200,000,000 by the Government for the capital stock of the "United States Agricultural Corporation," the corporation created by the bill, would have depressed a country struggling against existing tax burdens.

The emergency justifying the bill could have been cured in other ways than by the elaborate extravagance of the measure.

It seemed to me that prohibition had something to do with the farmer's plight. The brewing industry had been a good customer of the farmer. The following table gives some idea of what the farmer lost by Volsteadism as far as fermented liquors were concerned:

*Materials used in the production of fermented liquors in the United States, years ending June 30, 1915, 1916, and 1917*

[Compiled by the Bureau of Crop Estimates, United States Department of Agriculture, from records of the Office of Internal Revenue, Treasury Department]

| Material | Unit of quantity | July 1, 1914, to June 30, 1915 | July 1, 1915, to June 30, 1916 | July 1, 1916, to June 30, 1917 |

| Total, all items estimated | Pounds | 3,274,261,921 | 3,004,754,590 | 3,477,526,330 |

Those who, prior to prohibition had raised barley where they now raise too much wheat are especial sufferers because of the Volstead Act. Hon. SYDNEY ANDERSON indicated the extent of the farmer's interest in the brewing business when he stated to the House of Representatives Committee on Agriculture, on August 2, 1912, that—

There are to-day 8,000,000 acres of land in this country under cultivation in barley. The barley crop last year was 139,000,000 bushels, and the estimate this year is about 160,000,000 bushels. The production of beer in this country amounts to nearly 2,000,000,000 gallons annually, a per capita consumption of about 20 gallons. I merely mention these facts as an indication of the magnitude of the business. The brewers some years ago issued a propaganda to induce the farmers of the Northwest to engage in barley growing in order that they would have a sufficient supply of that product to manufacture beer. I feel that the farmers who have gone into barley raising—and *there is practically no market for it except such as comes from its use in making beer*—are entitled to have the term "beer" defined.

In an extension of remarks by Hon. Charles H. Randall in the CONGRESSIONAL RECORD, volume 56, part 12, Sixty-fifth Congress, second session, the farmer may find how much the brewers took of his products. Mr. Randall sets forth:

Mr. Speaker, there is before the House the report of disagreement between the House and Senate conference committees on the price of wheat. The House stands for $2.20 and the Senate insists upon $2.50 wheat.

The assurance which it is proposed to give the farmer of the price which he shall receive for his wheat, of course, has relation to the food supply of the country. Such a proposition is based upon the effort to assure a sufficient food supply by encouraging the increase of the acreage of wheat.

The Food Administration wants this law. Yet the Food Administration can by one stroke of a pen save 4,000,000 pounds of bread daily and fails to act. Last summer Mr. Herbert Hoover, in answer to an avalanche of demands that he save the food wanted by brewers, wrote the following response:

> "In 1916 there was used in the production of malt for the manufacture of beer for home consumption and export about 60,000,000 bushels of barley, 15,000,000 bushels of corn, and about 3,000,000 bushels of rice. It will be seen therefore that the economic advantage to be gained from the prohibition of the manufacture of beer relates almost entirely to the question of saving 60,000,000 bushels of barley, which could be milled to 60 per cent of its food value and produce a pound loaf of barley bread per day for 6,000,000 people!"

Since the above letter was sent out by Mr. Hoover he has written me under date of January 22, 1918:

> "Dear Congressmen Randall: In the administration of the food bill we have reduced the foodstuffs used in brewing by 30 per cent. I hope that by this order there may be effected a saving of approximately 18,000,000 bushels of grain.
>
> "Faithfully yours,
>
> "HERBERT HOOVER."

It will be seen at a glance that, from Mr. Hoover's own figures the brewers are still permitted to use 42,000,000 bushels of barley, more than 10,000,000 bushels of corn, and more than 2,000,000 bushels of rice annually. The barley alone will make more than 4,000,000 pounds of bread daily.

About 8,000 square miles of American farm lands were at one time devoted to the production of barley for brewers says E. C. Horst, an American farmer.

I proposed in my amendments to the McNary-Haugen Act to permit the farmers to raise the ingredients of beer and cider to be processed by the farmers' corporation, the profits of the operation to go to farm relief, and to contribute to the ratio price that excess over present price that the consumer would otherwise pay if the bill were law. The legislators from the rural districts preferred to fight about what bill should become law, or in which bill was the most votes to consider my suggestions which I offered as constructive propositions. It is worthy to note that lecturers have grown rich declaring for Volsteadism, while farmers have grown poor because of it.

Prohibition and Volsteadism are different. Prohibition is aimed at intoxicating liquors; Volsteadism bars nonintoxicants. Volsteadism says that one-half of 1 per cent alcohol by volume is an intoxicating content. No court or scientist has said that. It is well within our constitutional powers to permit 2.75 per cent beer and help the farmer. As I have submitted to the Judiciary Committee of the House:

The court held in the national prohibition cases, reported in 253 U. S. 350, and in the Jacob Ruppert v. Caffy case, reported in 251 U. S. 264, that Congress might define intoxicants by generic terms, fixing an arbitrary content regardless of the fact of its intoxicating possibilities. So Congress in order to conserve food has fixed the intoxicants by familiar terms with a low alcoholic content.

These decisions leave us free to raise the content up to the point of possibility of intoxication, and the Government admitted that 2.75 per cent beer was not intoxicating, for in the argument on the Volstead Act before the Supreme Court on November 21, 1919, Assistant Attorney General Frierson said:

I admit that a man can not drink 2¾ per cent beer in such quantities as to intoxicate.

Moreover, the judgment of the American people is swinging toward moderation, as the Literary Digest poll on the prohibition question forcibly developed. Hon. William Jennings Bryan has said of this poll:

The poll which the Literary Digest is making is not only entirely legitimate and fairly conducted, but is a rare illustration of journalistic enterprise. * * * Nothing except ballots cast by all the voters can give the exact sentiment, and of course that is impossible without an election.

With the exception of Kansas and Oklahoma the country is opposed to Volsteadism, as a retabulation of the poll shows:

*Retabulation of Literary Digest's poll*

| States | Main poll | | Woman's poll | | Main and woman's polls | | | |
|---|---|---|---|---|---|---|---|---|

[1] Indicates majorities.
66.6 per cent is a 2 to 1 vote; 60 per cent is a 3 to 2 vote.

It is time the hard-headed American farmers woke up to the fact that they are being fooled by a lot of circus men posing as dry leaders. No farm relief bill is in sight because country legislators think the farmers will be satisfied with their dry speeches. The McNary-Haugen bill would have carried in the House with a 2¾ per cent beer amendment, and it would have brought prosperity to the farmer without gouging the consumer. The farmer has paid a heavy economic price for a questionable moral victory. The farmer will not be able to pay his mortgage with a copy of a dry speech sent out from Washington, which Admiral Plunkett thought was the wettest city in America.

The denial of 2¾ per cent beer hurts the farmer and the temperate city workman, but it elects dry-voting farmer Congressmen, who will not pass a farm bill; it buys automobiles for bootleggers; it puts gems on the wives of Canadian farmers and buys cigarettes for dry lecturers who stop off at Chautauquas between drinks.

Lord Birkenhead, a keen observer of American conditions, writing for the Hearst papers, has this to say of the results of prohibition:

STUPENDOUS PROFITS

The result is that the drink trade is to-day enthroned in greater strength and hardly less wealth than before, though its activities have been driven to illegitimate and subterranean channels. And just because the profits of this trade are so stupendous those who carry it on prefer the existing system, with all its risks, to the doubtful chance of reversion to the old practice. And for this reason they are most formidable, if they are the most silent, allies of prohibition in the United States of America.

Consumers are not to blame for agricultural conditions. The blame is on farmer legislators who will not be reasonable on farm legislation or on the Volstead Act.

The farmers may be glad to know that one captain of industry is satisfied with prohibition. Senator THOMAS STERLING, of South Dakota, was glad to inform the Senate that Isaac F. North, president of the American Soda Fountain Co., said:

Looking at prohibition from a purely economic standpoint, I think that all employers of labor, regardless of their personal opinion, will agree that it has been beneficial both to the workmen and business; but in my estimation the moral effect of it outweighs the economic side and is of vastly more importance to the country at large.

THE BATTLE OF LEXINGTON AND CONCORD COMMISSION

Mr. BLACK of New York. Mr. Speaker, under leave granted to extend my remarks in the RECORD I include a speech which I delivered at the annual spring dinner of the Brace Memorial Newsboys' Home of New York, under the auspices of its superintendent, William Lewis Butcher, held April 19, 1924:

From October 12, 1492, to April 19, 1775, America welcomed the adventurous, the strong, the oppressed, and the wronged. America was the last region in God's gift to open up to all men. America was a refuge, and God made it such for those whom He loved. So to America came those who would serve God and man. Hope was the pilot of Columbus, courage the power of Father Marquette, and freedom the compass of the *Mayflower*. Freedom, courage, and hope, all these were breathed into Americans by a thoughtful God.

So for 283 long, dreary, rigorous years freedom, courage, and hope were nurturing Americans. They were prepared to hold that liberty which grew hardy from a friendly soil. On April 19, 1775, a shot was fired to salute the birth of a free country, a model for a world of free countries.

New England had known liberty and wanted to know it forever. New England ruled itself through its town meetings and through its judges, who were men of New England. The people of New England were peaceful, home ruling, and devout. Old England had forgotten about New England until some Englishmen suddenly decided that America would be a fruitful source of revenue for English politicians. There they could create new places. So England began taxing America and sent English politicians over here to take the place of American officials. England tried to break up the town meetings. England tried to install a royal jury system here. Cases were sent to England to be tried which should have been tried here.

All through this the Americans only protested. True, their protests at times took extreme forms, as in the case of the Boston tea party and in the case of the New York tea party. In 1774 the vigilance committee of New York City boarded the ship *London* and threw 18 pounds of taxable tea into the sea off Sandy Hook. Christopher Gadsden, of South Carolina, stated a most emphatic declaration of independence when he wrote to Boston, "Don't pay for an ounce of their damned tea." General Gage was sent to Boston to enforce the English laws and collect the American taxes.

Massachusetts, through its house of representatives, in 1774 authorized and organized the Minute Men. Samuel Adams and John Hancock, President of the Provincial Congress, were the outstanding patriots of New England, and on April 18, 1775, English troops were sent out from Boston to capture Adams and Hancock, who were at Lexington, and to destroy the patriots' munition stores which were at Concord. Three patriots were dispatched to warn the Minute Men, Major Dawes, Samuel Prescott, and Paul Revere. Longfellow has the landlord say in the Tales of the Wayside Inn in describing the Ride of Paul Revere:

"And yet through the gloom and the light
The fate of a nation was riding that night."

Thus was Lexington warned; thus was America born. Lexington has been called the Thermopylæ of America, and it was consecrated to a new race of martyrs.

Sixty patriots stood on the green at Lexington under their officers on the morning of April 19, 1775, as the English, numbering about 1,200 appeared. The patriots were a regularly organized militia under the law and so subject to the command of their officers. It was a time of peace, but their muskets were loaded. They prepared no defenses and did not intend to attack, but they were in line because the English were coming. The Americans knew that these English troops had killed citizens of Boston, and that Parliament had just passed an act permitting English troops to kill Americans without being tried for murder. The Americans were assembled to stop the English greed that had called down upon America the stamp tax, the tea tax, the Boston port bill, which closed the harbor of Boston and starved its people, the military act, and the restraining act, all of which were known as the regulating act. Exasperated by these oppressions, Lexington had written to Boston, "We trust in God that should the state of our affairs require it we will sacrifice our estates and everything we hold dear in life, yea even life itself, in the common cause."

Whittier has said of these men of Lexington:

"No maddening thirst for blood had they,
No battle joy was theirs who set
Against the alien bayonet
Their homespun breasts in that old day."

Lexington had set aside a day of fasting, humiliation, and prayer, for the patriots were religious men and wanted the guidance of a reliable God in their terrible emergency.

Some of these militiamen had fought side by side with some of the approaching English regulars in the French and Indian war. They had fought side by side at Crown Point, Ticonderoga, Louisburg, and Quebec. They had also fought as subjects of the same Government in the West Indies. Indeed, the very standard bearer of the Americans at Lexington had borne the royal banner through Louisburg. Indeed, the very drum that summoned the Americans to arms had often thrilled the American colonists and English regulars to victory for St. George. American colonists and English troops had been thrown in the same pits, having been killed in battle for the old country. So America had resolved to endure everything short of shame before falling back on force. America had resolved that England must strike the first blow.

Capt. John Parker had given this command to his 60 patriots: "Don't fire unless you are fired on; but if they want war, let them begin it here." Major Pitcairn, subsequently killed at Bunker Hill, a marine commander placed in command of the Light Infantry by General Gage for the occasion, with an oath ordered the Americans to disperse and to disarm. They remained silent. He then ordered his command to fire, and the English, wild with the lust for blood, shot down their blood brothers and former comrades. The Americans, "too few to resist, too brave to fly," lost in killed and wounded 13 men at Lexington that day.

Thirteen Americans fell that day at Lexington, but there are now over 100,000,000 freemen in the United States. Thirteen Americans fell that day, but there are millions here to-day whose parents were attracted here by the liberty of Lexington. Thirteen Americans fell that day, but there are millions of free colored men here to-day due to the emancipation proclamation, whose seed was sown in Lexington.

It is a strange fact that a wounded patriot named John Brown was shielded from the British by a negro slave named Prince Esterbrook. This was probably prophetic of the John Brown of Harpers Ferry and his death for the negro slave. Thirteen American patriots fell that day at Lexington, but 13 Colonies became 13 free States. The English, before the day was over and Lord Percy had saved them by coming to their assistance and bringing them under the protection of the English fleet, lost 273 in killed and wounded. Truly has it been said of the Americans who fell that day at Lexington—

"* * * who seem to die in such a cause
We can not call them dead."

Jonothan Harrington fell before the eyes of his wife, who with the wives, mothers, daughters, and sweethearts of Lexington were gazing from their windows on a scene the most significant since Calvary. She rushed to him as he lay with the warm lifeblood bubbling at his breast, but before she reached him the soul of that patriot became the first star of liberty. The English perpetrated atrocities as outrageous as any in the history of shame. Before noon of the 20th patriotic bands set out from New Hampshire, Rhode Island, and Connecticut. One band from New Hampshire marched 55 miles in 24 hours. Israel Putnam rode 100 miles in 18 hours and was on Cambridge Commons shortly after sunrise on the 21st. Daniel Webster has said of the men of Lexington:

"They poured forth their patriotic blood like water, because they knew not whether it would fertilize a land of freedom or of bondage."

It fertilized a land of freedom, and, more than that, prolific blossoms of freedom were carried by the winds and the waves to the Old World.

Lexington was the beginning of a new world—it sputtered, "Live and let live!" and created manhood. Kings had been somewhat between God and men, but Lexington made men of kings and kings of men. Lexington showed that kings could do wrong and Lexington was the germ of democracy. Our liberty inspired the French to their gruesome revolution of '93, which had such bright results. The beheading of Louis XVI followed the defiance of George the Third by Patrick Henry and ushered in a nation where all were heads. Lexington spelled an earth ruled by its people. Lexington spelled the end of despots, and thank God for it. All the world holds forth to every man the reward of virtue, of genius, of talent, and of industry. Countries are ruled by cabinets, not by courtesans.

All because of Lexington—at 5 a. m., April 19, 1775, a new world was born, a world that could welcome and house a Washington, a Franklin, a Jefferson, a Lincoln, a Gladstone, an Edison, and a Wilson.

Lexington was the great divide between moats and castles and free schools. Lexington crowded back the serfdom of the past and blessed the freedom of the future. Lexington smiled through its tears in '75, just as Paris beamed through its blood in '98. Thirteen patriots fell on Lexington green, but free men arose from it in millions.

The English officer who shouted fire, warmed humanity to the healthy glow of liberty, without which life itself is cold as death.

The patriots of Lexington were martyrs to equal opportunity to the sons of men. They redeemed the earth from the bondage of the Cæsars. They died creating liberty, and it is ours to protect and to die to preserve. It is loaned to us for a time, to be passed on to the Americans of 2024, and by them on and on to judgment.

On a monument in Lexington, erected to its heroes of '75, are these words:

"They nobly dared to be free. The peace, liberty, and independence of the United States was their glorious reward."

### M'NARY-HAUGEN FARM BILL

Mr. RICHARDS. Mr. Speaker, one of the most important, if not the most vital condition before the American people to-day, is the plight of the American farmer. Any legislation that has for its purpose a change for the farmer's financial condition is likewise important legislation. This made the McNary-Haugen bill one of the real measures of this session of Congress. With 42 per cent of our population affected either directly or indirectly through legislation, makes one taking part in the enactment, or defeat, consider it most carefully. That is the part of a conscientious legislator, and from my limited observations all Members of Congress are conscientious. No one can doubt their sincerity of purpose, even though their views might be directly opposite to your own.

None approached the consideration of this measure with a greater desire to vote for or against it, delivering their vote for the benefit of the American farmer, than did the delegation from Nevada. None were freer to act. That delegation caucused and caucused and caucused. The measure was studied and the delegation deliberated night and day. Its ambition was to view the provisions of the bill and conclude as to their effect on our farmer. This was done impartially. The delegation flung party allegiance and party ideas to the wind. Its membership had never eaten at the trough of special privilege, and our farmer constituency instructed that delegation to use its own judgment. It was with an unwarped, unbiased, and open mind that I approached the hearing of the case of the farmer versus the financier. I went into the jury box with the avowed purpose of giving my best services as juryman to the American people. My unbiased open mind was soon confused. I readily appreciated the viewpoint of an orthodox Democrat, and when not serving as an American juror for the American people I shared this political viewpoint. Under normal conditions we Democrats dislike an unjust, insane, discriminatory tariff and are opposed to price fixing or price adjusting by the Government. We are sure this is sound political policy and justified on the ground that it unduly burdens our people. We then listened to the "hard-boiled" protective-tariff Republicans who have been fed and fostered and nurtured and nursed and prospered through a Government policy that fixed a price and added cost to consumers through stimulation by law. His evidence at the bar was against the interest of the farmer. He could not share in the idea of placing him in a similar position. In fact, to do so would injure his cause, although he has prospered through similar laws. This was an angle that was difficult to understand. It looked like the Democrat was consistent and fair and this kind of Republican inconsistent and selfish.

As the cause progressed it was evident that the farmer had inveigled himself into the hearts of the congressional American jury and split party lines. He was apparently so misunderstood, or deliberately misunderstood, I know not which. Some of us believed he was making legitimate legislative demands for economic ills that ailed him. Others had no hesitancy in saying he was under a delusion and had no cause; and if he did, he was not seeking relief in the proper place; that if we passed the bill, we would commit the greatest blunders for him and our country. As the argument continued we all agreed that the "old boy" had a reason for complaint but disagreed on the diagnosis. That the farmer had slipped from a most prosperous and independent position to one of bankruptcy, from a bank account and all that goes with it to debts, interest, mortgage, and loss of home and all was a reality. It all happened through a Republican administration, another indisputable fact. Democrats lay the cause to high tariffs; Republicans said the present protective tariff was the best the farmer ever had. The father of the bill, a staunch Republican from Iowa, said the tariff was of no consequence, that when the President raised it 12 cents per bushel on wheat by Executive order the price of wheat dropped 10 cents in a week thereafter. Democrats and Republicans were agreed that farmers sold their product in a free market and bought their needs in a protective market. Republicans say tariff does not injure the farmer, because farm implements are on the free list. Democrats and Republicans were sure the free list was of little or no benefit.

A Republican from Kansas and a Democrat from Texas informed the jury that we are exporters of hogs and cattle, and here we find another Texan informing us with equal certainty that we were importers of hogs and cattle. The hog and cattle controversy was most illuminating when the jury discovered the source of information of these parties was indentical. A Republican from New England recalled the "basic" economic law. He informed us that it was useless to endeavor through legislation to get away from the law of "supply and demand." This witness was flabbergasted in this contention when his Republican brother from Washington interrogated him as to the price of his pocketknife, which article was tariff protected and price fixed as a result of congressional legislation and not the "basic" economic law of supply and demand. Thence comes another Texan, who claimed the economic condition was unbalanced, that we had one of the farmer's legs high on the pedestal of protection, and that we were, through faulty and unsound legislation, going to make the farmer lift himself by his own bootstraps to an economic level. We were going to balance him with the rest of the world, although through an unbalanced, unsound, uneconomic law.

There came a time when all the evidence was in. We were to vote our verdict. Where did I find myself as an unbiased, impartial, American juror? Convinced that high protective tariff laws against importations from without and in favor of railroads within, without the possibility of legislative remedy, and though, for the sake of argument, the remedy offered for the farmer was just as unsound, my inherent interest for the welfare of my fellow American made me cast my vote for the farmer. If defective and unsound and uneconomic laws work to the benefit of some of our population, I was forced to vote for a possibly similar law in order that we put a large percentage of forgotten American farmers on an equal basis with protected American financiers. If it were necessary to put a double-hooked legislative block and tackle on to the bootstraps of my farmer friends and pull them to an economic level with the rest of his American brothers, I am for that if there is no other alternative. There is no reason why the American farmer should not be held to an economic level with his protected brothers through similar Government processes. All may be wrong, but what is to be done under such conditions? Without a saner program there was but a single choice. My decision meant more ruin to the farmer, according to some of my colleagues, but I was unable to contemplate a worse plight for my farmer friends. It was a theory, and I was confident that dollar-and-a-half wheat and better prices for hogs and cattle were the real practical things they needed. That is what I sought. My verdict was for the American farmer.

### OUR FUTURE FOREIGN POLICY

Mr. GOLDSBOROUGH. Mr. Speaker, under leave given to print I insert the following speech which I delivered before the graduating class at Washington College, Chestertown, Md., on commencement day, 1924:

In casting about for something appropriate to say here to-day at this the one hundred and forty-second Washington College commencement it seemed to me, as a graduate of the college just 25 years ago—I freely admit that my youthful appearance does not justify such a statement, although the records of the college are against me—that the occasion justified a real effort to visualize the governmental aspirations and achievements of the years immediately to come, of the years when to-day's graduates and the present students at this school will assume the responsibility of American citizenship and occupy the arena of human action, which is continuously being emptied and refilled. There are in every community immediate needs which have to be looked after. There is in every county the necessity for change to provide for social evolution. There comes in every State a time when governmental machinery can be simplified to follow the advancement in the average standard of citizenship due to better education. It is on behalf of the teeming millions of the Nation necessary constantly to modify governmental machinery in order to protect this or that emergency, and there is always danger in the stress and strain of class competition that proper attention will not be given to the larger issues, to fundamental policies, to the problems which, if solved, will do away with class clamor, equalize economic opportunity, and give the fullest possible opportunity to individual initiative and ingenuity, which, of course, is the only legitimate aim and end of all government.

I have not, of course, in mind saying anything which would or could by any possibility be construed into partisan political expression. Time and time again in the sessions of the Sixty-eighth Congress, just closed, I was restrained from taking the floor by the thought that partisan feeling was somewhat high, and that whatever I said, however sincere the expression, might be construed in a partisan light and interfere with whatever influence I might have in guiding the action of the Congress over a very difficult period, and certainly any partisan color would be the very last thing to be injected into an address delivered on an occasion of this kind.

But there are certain truths which are eternal, and the expression of those truths in one way or another will be revealed from time to time in human action. One of these truths is the

necessity for human cooperation, and within the next few years, if I am able to visualize the future at all, that truth will be expressed by our people in a larger way than ever before, will be expressed in a stabilized currency and in international cooperation. It is of this last I would speak to-day to you, symbolizing as you do the youth of America and the hope of the future.

Many of those who oppose anything like international cooperation use as their argument that "man is a fighting animal" and that therefore there is no way to avoid destructive wars; that these wars are bound to take place from time to time; and that it is only when people have fought themselves to exhaustion there can be a respite from war, and that this respite will last only as long as is required for recuperation. This, roughly speaking, is their argument, but their premises are not sound. People, as distinguished from the individual, fight only when warfare is their only means of settling a difficulty. Originally there was no protection by law and each individual had to protect himself or herself. Family quarrels were settled as Cain and Abel settled theirs. To rid the family of fratricide and patricide a family government evolved, as among the ancient Hebrews, the patriarch representing the family group to settle the family quarrels and so preserve the peace as between individuals within the family, and so within that family peace reigned as a rule because there was a means of settling a difference without resort to physical force. But other family groups sprang up, and in course of time the groups clashed and there was fighting, fighting because at first there was no other way to settle a difference. When population was sparse sometimes fighting could be prevented by isolating the family group, and when this could be done it was as a rule done. You will remember how Abram and Lot resorted to this method:

> And there was a strife between the herdmen of Abram's cattle and the herdmen of Lot's cattle, and Abram said unto Lot, "Let there be no strife, I pray thee, between me and thee, and between my herdmen and thy herdmen; * * * separate thyself, I pray thee, from me; if thou wilt take the left hand, then I will go to the right; or if thou depart to the right hand, then I wil go to the left."

But the spread of population would not permit for long of peace by isolation, so that family groups began to join, began to combine to protect themselves against other family groups, and these combined groups grew larger until finally communities were formed and then tribes, and the tribes combined into small states, and the states into larger ones, the peace group becoming larger each time, and finally culminating in the combination of states for mutual protection into great countries. Within the last 800 years in Europe we have seen the feudal lord absorbed into the earldom, the dukedom, the principality, the small kingdom, and the great country, the peace group becoming larger with the evolution of civilization. The culmination of the system is shown here in the United States, the original theory of our federation of States being for mutual protection and mutual economic benefit.

People do not want war, people realize that war means destruction, people understand that in war both sides lose, and in the last analysis war is only used in the absence of any other weapon of protection. The civilized nations of the world, and especially the people of the United States, are ready to build the permanent legal machinery to settle international differences without war. A great deal of this machinery has already been built, and while political or class economic selfishness may for a time prevent the full cooperation of the United States, the sound sense, the clear vision, and the spiritual elevation of America will inevitably bring about the result which so many of our people consciously and so many subconsciously desire.

The scope of this address will not permit of a historical review of the peace movement. I will only say this: That after breathing the breath of life into the League of Nations we abandoned it, presumably to die. Eleven nations had become members of it. They looked to the United States for leadership. That leadership was withdrawn, but the miracle happened, and without American leadership the league gathered unto itself the peoples of the world, until 54 nations, representing seven-eighths of the globe's population, are now members of the League of Nations. All of Europe is now in the league except Germany and Russia; all of North and South America except the United States, Mexico, and Ecuador; all Asia except Afghanistan, and all Africa.

Aside from its other activities, what has the League of Nations done to prevent war? Finland and Sweden were drifting inevitably into war over the Aaland Islands. They were claimed by Sweden because their population was chiefly Swedish and by Finland because before the war they had been a part of the Russian Duchy of Finland. The League of Nations took over the controversy. The award, chiefly in Finland's favor, was accepted by both nations. The league then called a conference of 10 nations which provided for keeping the islands unfortified and neutral under the auspices of the league, so as to remove all chance of their again becoming the bone of contention.

Next, Poland and Lithuania became involved in a boundary dispute. Armies were on the march and war was imminent when the league took over the controversy, and without moving a soldier or firing a shot the league of peace proved sufficient to avert war.

Again, Germany and Poland were contending over the partition of Upper Silesia. Rich coal fields and important cities and racial differences were stirring the passions of war when the league was applied to. For the third time, without purse or sword, soldier or ship, the Council of the League of Nations brought about a solution.

Later there was another boundary dispute between Yugoslavia and Albania. Albania was invaded, but the League of Nations threatened a world-wide boycott against Yugoslavia under article 16 of the covenant. Yugoslav exchange fell. An international loan to her was suspended; she was brought to her senses, and within 30 days her army was back within her own boundaries and the dispute settled.

And then came the Corfu crisis. Corfu had been a possession of Venice for about 400 years, and for a long time Italy has desired to repossess this island because of its strategic position in the Adriatic Sea; and when on August 27 last the dastardly murder of General Tellini and his party took place on Greek soil Italy made the following demands upon Greece:

(1) Full and formal apology by Greece.

(2) Solemn funeral service for victims in Catholic cathedral at Athens.

(3) Italian flag, hoisted by Italian squadron off Phalerum, to be saluted by Greek battleships flying the Italian flag, the salute not being returned till departure of Italian squadron at sunset the same day.

(4) and (5) Greece to carry out within five days a very strict inquiry "with the assistance of the Italian military attaché."

(6) All persons found guilty to be sentenced to death and Greece to pay Italy, within five days, 50,000,000 lire—say, £500,000—as penalty.

(7) Military honors to bodies of victims on embarkation.

The Greek Government expressed itself as being unable to accept demands Nos. 4, 5, and 6, but stated that unless some modification of Italy's demands could be agreed to it would, in accordance with the provisions of the covenant of the League of Nations, appeal to the league and undertake to accept its decisions. To that reply Mussolini's rejoinder was short and sharp. At 3 o'clock on the afternoon of August 31, a day after the reply of the Greek Government had been handed to the Italian minister at Athens, an Italian naval squadron approached Corfu, its commanding officer informing the prefect that he would occupy the island and demanding immediate surrender. The surrender not being immediate, the fortress was shelled and some 15 Greeks and Armenian refugees were killed and many wounded. The fortress then surrendered. On the day of the occupation of Corfu the Greek Government referred the controversy to the League of Nations, while during the first and second weeks of September Corfu as well as several adjacent islands of purely strategic value were occupied by an increasing number of Italian troops. The situation was very delicate and reminded one of the tragic days of July, 1914, when a brutal murder at Sarajevo, in Serbia, served to light a torch which plunged the world into a war the like of which it had never seen. But in 1914 there was no League of Nations in existence; there was no accredited clearing house through which the public opinion of the world could find legitimate expression. There was no body to which could be referred matters involving the peace of the world and in which neutrals could speak without taking an unwarranted position in matters outside of their own immediate concern and thereby endangering their own peace. This was not so in 1923. The League of Nations, that organization into which this country had breathed the breath of life, was in existence and prepared and ready to take up this international controversy; and without delay, on September 1, the first session of the Council of the League of Nations to consider the controversy between Italy and Greece was held. At this meeting Salandra, Mussolini's representative in Geneva, stated with an air of finality that the matter was not within the competence of the league. His attitude raised a storm. Italy found itself alone at Geneva. At the first meeting of

the assembly, on September 3, of all the vice presidents and other honorary officers that were elected not one was an Italian. It was a vote of protest. It spoke the belief of 50 nations that this open proclamation of violence, if unchallenged, would smash the frail structure of the world's peace and proclaim to the whole earth that brute force was once more unleashed.

On September 4 the council of the league again met, with Salandra elaborating and defending in detail the point which he had arrogantly announced on September 1. At the meeting of September 5 he was repeating over and over that the occupation of Corfu was only temporary and that Italy would make every provision for the families of the victims of the bombardment. On the 6th, with the perspiration rolling down his face, he was attempting to sidetrack the point at issue with a vehement defense of Italy as being the center of art and the home of sunshine and beauty. By September 17 he was freely arguing the matter from every angle with M. Politis, the representative of Greece, who sat across the table at the meeting of the council. Without going into further detail, in less than four weeks the whole controversy was settled and the danger of war obviated by the intervention of the League of Nations.

In times of quiet the League of Nations, through its permanent secretariat and the meetings of its council and assembly, considers world needs and issues warnings of controversies which if not promptly settled may lead to future serious rupture. In times of stress the League of Nations is primarily the great clearing house of world public opinion, before the bar of which no nation can afford to stand and be proclaimed in the wrong.

What a change of heart the action of the League of Nations and several months of contemplation have given to Mussolini. Three days after Corfu was abandoned Mussolini said, "The league has the inadmissible defect that it permits small nations to intervene, discuss, and regulate the affairs of great powers." On Decoration Day last, only about two weeks ago, in answer to the question, What do you think of the League of Nations, Mussolini said:

I think everything possible should be done to realize the ideal of the league—the ideal of universal peace based upon justice. At times in their long history Italians have been almost too wide in their thinking and in their sympathies. Still if they were, I reckon it among their first titles to greatness. Remarkable thinkers, Reman among them, have feared universalism as leading to national decay. But our world is different from what it was before the war. All humanity has a wider vision, a keener sense of fellowship, a quickened conscience toward those who must bear the brunt of war, if war comes.

Peace with honor, peace with justice, peace that does no violence to any nation's healthy and righteous self-respect; that, indeed, is something worth struggling for, despite any peril inhering in internationalism. Internationalism would not be safe for a single nation; it is safe for all nations moving in concert toward a rational scheme of political, economic, and cultural intercourse. Nations need, and generally realize that they need, a lasting foundation of pacific coexistence. Such a foundation can not be had without skillful and patient building, and such building is out of the question without established machinery for conducting international affairs in accordance with deliberately developed world opinion. Governments and peoples must work together. They can work together only by understanding one another. They can understand one another only, so to speak, by foregathering in a common council chamber or forum.

Now, what is our relationship with the League of Nations? From the 4th of March, 1921, until September of that year the State Department of this Government did not answer a single communication directed to it by the League of Nations, but the public began to protest, and in September, 1921, 15 communications were answered. It is true they were almost identical and all ended with the following sentence:

The Secretary of State has taken note of this information for any purposes of relevancy to the United States as a state not a member of the League of Nations.

Nine were acknowledged in November and 11 in December of 1921.

By 1922 the relations of the State Department to the League of Nations became more friendly. Mr. Hughes wrote the league sympathetically in reply to letters concerning white slavery and the arms traffic. An official of the Department of Agriculture was sent to the League of Nations Commission on Anthrax.

Shortly after Assistant Surgeon General Blue was appointed to the opium committee, and at the next session of the committee a delegation of Chairman STEPHEN G. PORTER, of the Foreign Affairs Committee of the House of Representatives; Bishop Brent; Doctor Blue again; and Edward Aneville, of the State Department, was appointed. American proposals were adopted, and at a meeting of the assembly of the League of Nations in September, 1923, the United States represented by the same delegation, the American plan was unanimously approved.

Miss Grace Abbott, head of the Children's Bureau of the Department of Labor, was appointed to the league's committee on the traffic in women and children, and the plan for an international inquiry was adopted upon her recommendation.

Surgeon General Cummings, of the United States Public Health Service, represented America on the health committee of the league, and a meeting of the public-health officials of some 20 countries was recently held in Washington at his suggestion.

At the league's conference in London on antitoxic serums the United States was represented by Assistant Surgeon General Blue.

When it became evident last June that the American relief organization must retire from Greece, Secretary Hughes sent a representative to the financial committee of the league, and later to a special committee of the council, where a comprehensive plan of relief was worked out.

In October, 1923, the United States sent a delegation of five to the league's conference on customs formalities, and in November Mr. Lewis W. Haskell, the American consul at Geneva, was ordered to attend the league's conference on communications and transit.

The American minister to Switzerland was ordered to participate, and did participate, in the deliberation in the recent conference at Geneva on the suppression of the traffic in arms.

The Government has now been represented in the league committees on health, anthrax, opium, customs formalities, communications and transit, traffic in arms, and the trade in women and children, and STEPHEN G. PORTER, chairman of the Foreign Affairs Committee of the House of Representatives, is to attend another meeting of the opium committee of the league in September.

The scope of this address will not permit me to undertake to detail our vast unofficial cooperation with the league, nor can I undertake to detail the number of private organizations in this country who send representatives to, or are in communication with, various league activities.

I will add, however, that more Americans than persons of any other nationality visit the league headquarters at Geneva; more American journalists follow its sessions; and more league documents are sold in America than in any other country; and I call attention to the fact that the International Health Board of New York has pledged $33,000 a year for five years to the health service of the league to assist in the publication of reports of current diseases, and has pledged $60,000 a year for three years to facilitate the league's plan for the interchange of public-health officers among the nations of the world, and contributed $30,000 to promote the league's study of vital statistics; and that the American Society of International Law has given $7,500 for the printing of the league's treaty series in English; that the bureau of social hygiene has subscribed $75,000 for the study of the international aspects of the white-slave traffic; and that American investors bought $25,000,000 of the loan worked out by the league for the reconstruction of Austria.

Of course, the forces of pure conservatism are opposed to the League of Nations; of course, the high priests of favored industries are afraid of international cooperation, as they see in it the battering down of the tariff wall which has caused more than half of the class hatred in this country for 75 years; of course, the political reactionary will always fight any widening of the scope of human sympathy and cooperation; but the common sense of the American people is finding expression in the ever-increasing sympathy of the present administration with the activities of the League of Nations. In his Memorial Day address on May 30 last, the President of the United States, in speaking of the World Court of the League of Nations, says:

But we have an opportunity before us to reassert our desire and to lend the force of our example for the peaceful adjudication of differences between nations. Such action would be in entire harmony with the policy which we have long advocated. I do not look upon it as a certain guaranty against war, but it would be a method of disposing of troublesome questions, an accumulation of which leads to irritating conditions and results in mutually hostile sentiments. More than a year ago President Harding proposed that the Senate should authorize our adherence to the protocol of the Permanent Court of International Justice with certain conditions. His suggestion has already had my approval. On that I stand. I should not

oppose other reservations, but any material changes which would not probably receive the consent of the many other nations would be impracticable. We can not take a step in advance of this kind without assuming certain obligations. Here, again, if we receive anything we must surrender something. We may as well face the question candidly, and if we are willing to assume these new duties in exchange for the benefits which would accrue to us let us say so. If we are not willing, let us say that. We can accomplish nothing by taking a doubtful or ambiguous position. We are not going to be able to avoid meeting the world and bearing our part of the burdens of the world. We must meet these burdens and overcome them or they will meet us and overcome us. For my part, I desire my country to meet them without evasion and without fear in an upright, downright, square, American way.

While there are those who think we would be exposed to peril by adhering to this court, I am unable to attach great weight to their arguments. Whatever differences, whatever perils exist for us in the world will come anyway, whether we oppose or support the court. I am one of those who believe we would be safer and that we would be meeting our duties better by supporting it and making every possible use of it. I feel confident that such action would make a greater America, that it would be productive of a higher and finer national spirit and of a more complete national life.

Ninety-six per cent of our Government expenditure is for war, past, present, and future. The great War College, brooding over Washington Barracks, studying the economic resources of the great nations of the world and our military course in case of war with any one or more of them, is a warning that the problem of international cooperation must be undertaken and solved.

The great poet of the present is the great prophet of the future, and in 1842, 82 years ago, my young friends will remember that Lord Tennyson, speaking through his poem, Locksley Hall, foresaw aerial and gas warfare followed by a league of peace:

> For I dipt into the future, far as human eye could see,
> Saw the vision of the world, and all the wonder that would be;
> Saw the heavens fill with commerce, argosies of magic sails,
> Pilots of the purple twilight, dropping down with costly bales;
> Heard the heavens fill with shouting, and there rained a ghastly dew
> From the nations' airy navies grappling in the central blue;
> Far along the world-wide whisper of the south wind rushing warm,
> With the standards of the peoples plunging through the thunderstorm;
> Till the war drum throbbed no longer, and the battle flags were furled
> In the parliament of man, the federation of the world.
> There the common sense of most shall hold a fretful realm in awe,
> And the kindly earth shall slumber, lapt in universal law.

About this time seven years ago the stars looked down upon a strange, new flag of war crossing the broad Atlantic. It landed in France, it passed through Paris and on to Chateau Thierry, Belleau Wood, and Verdun. This flag always advanced, never went back; and at night the angel came close to the sleeping doughboy and whispered—"What flag is this? This is not the lion of England, or the great bear of Russia, or the eagle of Germany, or the tricolor of France, or the dragon of Japan. We have seen these flags through the ages on many a stricken field, but this flag that always advances and never goes back; what flag is this with its flowing stripes of red and white and its stars of silver on a blue field?" And the boy whispers in his sleep: "Why, this is a war to end war. The stripes of crimson speak of the blood of the youth of the world who, through the ages, have been sacrificed on the altar of human liberty, and sometimes on the altar of human ambition; the field azure is the dome of Heaven, and the stars are the stars of hope."

Fifty thousand of these boys will sleep forever on alien soil. More than a hundred thousand more are back, it is true, but back to carry with them the devastating marks of war through all the years of their lives to come. The backs of our people are bowed down by an additional debt burden of twenty-five thousand million dollars due to this war. Is all this sacrifice to be in vain, or shall the stars of silver on the field of azure of the flag of America symbolize the stars of eternal peace?

### THE FARMER'S REWARD

Mr. EVANS of Montana. Mr. Speaker, the farmers have been producing food since 1920 for practically nothing; and in many cases at an actual cash loss for the three years, even without counting their own time and labor and that of their families as being worth anything at all. As a result, they have come to the end of their rope. Thousands of men who owned their land have lost it. Thousands more who were tenant farmers have seen their savings swept away and have gone through bankruptcy, being forced to begin again with nothing after spending their lives in hard and honest toil in the most essential of all industries. The standard of living has been reduced to the lowest possible point; the farmer who has bought a new suit of clothes in the past four years is a conspicuous exception. In many localities nearly every man who knows how to do any other kind of work has left the farm, never to return if he can avoid it. Social standards in rural communities are going steadily down. The farm boy who in former years would have gone to the State agricultural college to learn scientific methods and return home to aid his father or to start in with his bride on a near-by quarter section is to-day studying for some other occupation.

The Secretary of Agriculture reports that in the 15 principal wheat-growing States more than 108,000 farmers since 1920 have lost their farms through foreclosure or bankruptcy; that more than 122,000 have surrendered their property without legal proceedings, and that nearly 375,000 have retained possession of their property only through the leniency of their creditors, making a total of more than 600,000, or 26 per cent of all farmers, who have virtually been bankrupted since 1920 in these 15 States alone.

The poverty of the farmers is reflected, of course, in the cities and towns. Thousands of men and women, not alone in my State but all over the West, are not only bankrupt but at the door of the poorhouse.

Realizing the condition of the agricultural people of the country, an effort was made to relieve the situation by legislation. For 10 days this House had before it the McNary-Haugen bill, which on Tuesday, June 3, was defeated by a vote of 224 to 164 amid the plaudits of the beneficiaries of the Fordney-McCumber tariff law.

Now that the shouting is over, Mr. Speaker, we can calmly survey the wreck, and it will be of interest to the country to know who voted for and who voted against the only bill that promised relief for this great industry.

You will recall in December last the President of the United States sent a message to Congress on this subject. He had sent Frank W. Mondell and Eugene Meyer, jr., directors of the War Finance Corporation into the agricultural districts of the country to make him a report on the subject and had otherwise professed interest for the distressed industry, and yet when the vote is taken we find Massachusetts, the home of the President of the United States; the home of John W. Weeks, a member of the President's Cabinet; the home of HENRY CABOT LODGE, leader of the majority in the United States Senate; the home of Mr. GILLETT, Speaker of this House; the home of Mr. WINSLOW, chairman of the Committee on Interstate and Foreign Commerce, which controls railroad legislation; the home of Mr. DALLINGER, chairman of the Committee on Education in this House; the home of Mr. LUCE, chairman of the Library Committee of this House; the home of WILLIAM S. GREENE, chairman of the Committee on Merchant Marine in this House; casting its vote solidly against the bill with one exception. One lone man from Massachusetts—may his tribe increase—voted with us, while every other man in that delegation voted against us. Perhaps we should be thankful for that one vote, because we did not get a single other one from all New England. New England, that section of the country that for 50 years has prospered and grown rich at the expense of the American people because of special-privilege legislation passed in her behalf, gives us not a single vote—save the one from Massachusetts.

Out of 43 votes from the Empire State of New York the suffering agriculturists of the country must content themselves with 1 vote. The States bordering on the Atlantic coast from Maine to Florida—all largely engaged in commerce and manufacturing give agriculture in this crisis 3 votes.

Throughout the discussion of the bill the attitude of the Members from the Atlantic coast and particularly from New England has been to decry this bill on the theory that it granted special privilege to a part of the people. We have heard, over and over, these men say it was wrong to tax all the people for a part of the people. Why, Mr. Speaker, it has not been three weeks since the Massachusetts delegation led by Mr. WINSLOW, chairman of the Interstate and Foreign Commerce Committee, put through this House a bill to take from the American people $11,000,000 to build Cape Cod Canal; and yet they have the temerity to complain that the McNary-Haugen bill is special legislation.

The prosperous manufacturing section of the country is thriving on the results of special privilege granted them through laws of the land. The Fordney-McCumber tariff bill permits the manufacturers to take from the pockets of the American people $3,000,000,000 to $4,000,000,000 annually by compelling them to pay 50 to 100 per cent more for every article they consume than they would otherwise be compelled to do; but whenever any legislation is attempted in an effort to do something for the farm population it is denounced as class legislation.

The gentleman from Massachusetts [Mr. LUCE] spoke of this legislation as a "bonus" to the farmer; on another occasion he called it a "subsidy" to the farmer, and suggested in time the farmers would work out their salvation under the natural economic laws of supply and demand. During his speech in opposition to the bill the following colloquy took place:

Mr. LUCE. I will yield to the gentleman from Washington.

Mr. SUMMERS of Washington. The gentleman had a good deal to say about supply and demand and economic forces and all that sort of thing. Does that apply to this knife, which cost me 75 cents but which I believe could be made to sell at 30 cents, but it would have been manufactured in Japan or Germany instead of Pennsylvania or Connecticut?

Mr. LUCE. I am a Yankee, and it is said to be the prerogative of a Yankee to answer one question by asking another. Did the gentleman vote for the tariff which produced that price? [Laughter and applause.] And if he voted for the tariff, why?

Mr. SUMMERS of Washington. It is the first time I have had the opportunity of saying I will never vote for a tariff that does not give its benefits to all classes and all parts of the country. [Applause.]

Mr. Speaker, perhaps the gentleman from Washington [Mr. SUMMERS] has the key to the situation. When gentlemen from the State of Washington and other agricultural States refuse longer to vote for bills like the Fordney-McCumber tariff bill the financial distress of the farmer will begin to lessen.

A brief review of the votes cast for the Fordney-McCumber tariff bill by men representing these distressed agricultural States might now be illuminating.

The imperial State of Iowa, which probably produces more agricultural products than any other State in the Union, has 11 votes in this House, and she cast 11 votes for the Fordney-McCumber tariff bill.

Kansas, which produces almost twice as much wheat as any other State, has 8 votes to give, and she gives all for this tariff bill.

Nebraska gives her total of 6 votes to the cause of special privilege.

Washington, the home of Mr. SUMMERS, who now says he will never again vote for a tariff bill that does not give equal benefits to all classes, casts her 5 votes for the bill.

Every vote cast by Colorado, South Dakota, New Mexico, and Wyoming was cast for the benefit of New England.

When the roll was called Oregon, Montana, Utah, and Idaho found every Representative in his seat, and every man cast his vote for the Fordney-McCumber tariff bill.

North Dakota alone, out of all that empire stretching from the Mississippi River to the Pacific Ocean, cast 1 vote against this tariff bill.

Now when these 15 stricken States ask the great industrial interests of the country to reciprocate the favor bestowed, that great beehive of industry, New England, gives us 1 vote.

Mr. Speaker, if New England industries were in the stricken condition that agriculture finds itself west of the Mississippi, there would be riots in the Capitol to-day in an effort to secure legislative relief.

Mr. Speaker, there is now pending before this House a resolution introduced by myself exempting from tariff duty all articles imported from foreign countries which are exchanged for American farm products for exportation. I believe the passage of this resolution would largely solve the agricultural problem of this country. It would in a few months deplete the agricultural surplus and thus raise the price to the producer, and it would permit this same producer to purchase a large part of his goods on the same basis that he sells his produce. I quote the resolution:

[House Joint Resolution 289, Sixty-eighth Congress, first session]

Joint resolution exempting from tariff duty all articles imported from foreign countries which are exchanged for American farm products for exportation

*Resolved, etc.*, That from and after the passage of this resolution all articles imported from any foreign country into the United States and exchanged for American farm products for exportation shall be admitted free of any tariff or import duty, regardless of whether the exchange is made directly with the producer of such farm products or not; and all laws and parts of laws in conflict with this resolution are hereby repealed.

This resolution, Mr. Speaker, can be passed in an hour's time. The Congress has already voted to adjourn on Saturday evening, and this is the last possible opportunity to do anything for the stricken farmers of this country. Pass this resolution, put it into effect, and you gentlemen who are to meet in Cleveland next week will not need to pass a lot of inane resolutions about what will be done for the farmer when Congress meets again in December. It is little short of criminal for this Congress to adjourn at this time, but that die is cast. In the few hours yet remaining this resolution or some similar resolution could be passed and hundreds of thousands of worthy people could be saved from bankruptcy, the insane asylum, and a suicide's grave.

## RÉSUMÉ OF FIRST SESSION SIXTY-EIGHT CONGRESS

Mr. SIMMONS. Mr. Speaker and gentlemen of the House, it is my purpose to review this session of the Sixty-eighth Congress, to discuss briefly the major questions which have been submitted to us for decision, and to state my position on them. In considering these matters I have had but one ambition, and that is to represent my people and to vote both for the best interests of my district and of our common country. Whether or not I have succeeded is for the voters of my district to decide.

### TAX-FREE SECURITIES

One of the first legislative matters with which we had to deal was the tax-free securities amendment. "Must a system of taxation which permits a man with an income of over $1,000,000 a year to pay not one cent to the support of his Government remain unaltered?" This question asked of Senator COUZENS by Secretary Mellon was answered in the affirmative by the House of Representatives, when it failed to secure the necessary two-thirds vote to submit a constitutional amendment to the States authorizing the taxation of income from Federal, State, and municipal bonds.

The opposition to this amendment came largely from Democratic leaders, who argued that it was not the right of the Federal or State Governments to interfere with the credit or finances of the other sovereignty.

The Nebraska State Legislature in 1922 indorsed this amendment. It was indorsed and supported by the American Farm Bureau Federation, labor organizations, and other representative groups of taxpayers.

I voted for the amendment. This would refer it to the people to decide whether or not we would have a class in America who live on an income derived from securities not taxed, who pay nothing to support the Government, and have accordingly a lack of interest in or responsibility to governmental agencies.

Securities exempt from income taxation are not consistent with a high surtax rate, because the man of great wealth has found that he can avoid them by investing in tax-exempt securities. The result is that the producer of great wealth and the employer of labor is becoming a nonproducer and is putting his money in securities upon which he pays no taxes. The Government is losing one of its chief sources of revenue. I believe that the holder of great wealth should bear a proportionate burden of taxation. So long as an avenue of escape is provided by these securities he will not do so.

### TAX REDUCTION

Last fall Secretary Mellon surprised the country by announcing a $329,000,000 surplus after estimating in 1922 a deficit of $650,000,000. Tax reduction at once became a paramount issue in Congress. The feasibility or advisability of tax reduction was not disputed. The issue was "how to reduce." The "Mellon plan" was proposed. The country apparently instantly demanded its adoption by legislative action. My belief then was that the apparent immediate approval of the idea by the public was not of the Mellon plan but of tax reduction without regard to plan. Subsequent events have confirmed that belief.

The President asked for nonpartisan consideration of the tax reduction issue. The hope of that was dissipated by the Democratic caucus proposing the Garner plan with its subsequent disapproval by President Coolidge.

There are about 3,500,000 income-tax payers in the United States. There are about 35,000,000 wage earners. The Mellon plan, as I saw it, gave a too liberal reduction to those receiving large incomes, but at the same time gave a substantial reduction to all income-tax payers. The Garner plan ostensibly following the principle of taxing those best able to pay, proposed the greater reduction on small incomes. It had, however, this

serious defect—it would not raise sufficient revenue. The loss of revenue would have had to be made up by indirect or consumption taxes had the Garner plan been adopted. These consumption taxes would be paid by those still less able to pay a Federal tax—those who are that part of the 35,000,000 wage earners and their families who pay no Federal income tax making up the greater part of the 110,000,000 people. I could not support the Garner plan.

The plan finally adopted was practically that urged by a group of Republicans—60 in number—of whom I was one, coming mostly from the agricultural States between the Mississippi and the Rocky Mountains. It reduces the normal tax on incomes up to $4,000 from 4 per cent to 2 per cent; on incomes up to $8,000 from 6 per cent to 4 per cent; and on incomes above $8,000 from 8 per cent to 6 per cent. The surtaxes on the average are reduced 25 per cent. An additional 25 per cent reduction is given on earned incomes. This is the general plan which I supported throughout the consideration of the measure.

In 1921, 70,245 residents of Nebraska reported incomes of $8,000 or less; 1,451 reported incomes of from $8,000 to $25,000; only 155 reported incomes above $25,000. Nebraska's greater direct concern was in the reduction of taxes on small incomes. Her direct and indirect concern is in the economic prosperity of the whole country. The bill as passed works advantageously for all concerned in that regard. It is a fair bill and will bring prompt and effective tax relief.

In addition to the above a general 25 per cent reduction on 1923 incomes was granted.

It seems proper to again call attention to the fact that the passage of this bill does not reduce the amount of personal and real estate taxes paid in the State. Congress has no authority to change those levies. In 1921 Nebraska paid $2.57 per capita Federal income tax. The State and local taxes the same year were $46.02 per capita. Federal legislation can not reduce the $46.02. It can and has reduced materially the $2.57.

ADJUSTED COMPENSATION

In the discussion of tax reduction there has been associated the question of adjusted compensation. Congress, following the war, called upon the service men of America to suggest an equitable adjustment of their economic losses caused by their armed service. The service men left the matter to Congress. The "five-fold plan" resulted. Congress failed to pass it on the plea of economy and inability to pay—proceeding at the same time to adjust losses of war contractors, the railroads, and other interests. Congress finally passed the "four-fold plan," which President Harding vetoed. The issue was thereby thrown into the elections of two years ago. The Republican and Democratic platforms in Nebraska in 1922 indorsed adjusted compensation. The State Legislature of Nebraska memoralized Congress to pass it. Candidates were pledged to support the measure. Everyone knew of these promises—given because it was believed that the proposition was morally justified, economically sound, and a distinctly patriotic act for a grateful Nation to recognize this obligation.

The bill reported by the committee provided for 20-year endowment insurance policies based on age, length of service, and whether or not performed overseas. Personally, I felt that we should have passed the bill as vetoed by President Harding. That was the bill the veterans knew and the public knew.

President Coolidge vetoed the bill. I gladly acknowledge his right and hold it his highest duty to approve or disapprove of legislation as it is given him to judge. Likewise, giving due consideration to the President's views, I claim the right and duty to vote as my judgment dictates. No other course is honorable. I was pledged to support this measure. I believe it right and highly just. I voted to override the President's veto. America's service men should, and I believe will, accept this act as a full adjustment of their economic losses and shoulder to shoulder—in peace as in war—continue to carry on in their patriotic and loyal service to our common country.

Before this measure became a law its enemies claimed that there could be no tax reduction and adjusted compensation. The tax bill passed and approved by President Coolidge reduces taxes $22,000,000 more than the Mellon plan. It gives a 25 per cent reduction in taxes being paid this year. The Treasury Department estimates show that all this can be done, adjusted compensation paid in an orderly way, the obligations of the Government met in every respect, and a substantial surplus be left in the Treasury. The threatened bankruptcy of the country and paralysis of business need not and will not follow the enactment of this measure.

VETERANS' LEGISLATION

I count it a great opportunity for service to have been a member of the newly formed Committee on Veterans' Affairs. This committee held extensive hearings. The bill which it reported and which passed Congress and was approved by the President is a forward move for better and more complete care of our sick and disabled service men. It is not a perfect bill. Neither does it do all some of us desired. It provides for hospitalization of veterans—complete care—without regard to whether or not the sickness is service connected. It increases the compensation to the widows and orphans and to dependent parents. It extends the period of presumption of service-connected disability in tuberculosis and other diseases until January 1 next. In general, it liberalizes the present act. America is keeping faith with those entitled to her first care. Last year the Government paid out in the care of her sick and disabled service men the sum of $381,556,495.

IMMIGRATION

That immigration into the United States is a privilege granted by a sovereign people, and not a right of the immigrant, and that the United States alone will regulate who may come, when they may come, and how many may enter has been affirmatively established by legislative act.

Objection to the immigration bill came from those who wanted more than a 2 per cent quota, from those who objected to fixing the basis of the quota on the nationals in this country in 1890, and from those whose people were excluded as undesirable, principally Japan.

The bill, as it passed the House, will allow about 160,000 to enter for permanent residence each year. The 1890 census as a basis gives the races from northern and central Europe an advantage over those from southern Europe. Around that alleged "discrimination" a great deal of opposition centered. Those nationals favored by the bill have shown themselves more assimilable and better citizenship material than have those from the south. The northern and central races have not colonized in cities, but have spread generally throughout the agricultural sections of the country, while an unhealthy civic condition exists in practically all of our large cities from the colonizing of southern European nationals. This bill will better balance the races entering and stem the tide until America can assimilate her foreign populaton.

It is significant that no country based its opposition to the bill on the ground that to exclude their nationals would be against the interests of the United States or that to allow them to enter would help America—and yet this land is ours, and this bill is designed to benefit our America.

I supported this bill in every respect. It is a distinct, practical, effective step toward the solution of our most difficult Americanization problem. It benefits and protects American labor, and at the same time provides for a healthy influx of European nationals.

A grave situation developed following the passage of this bill in the Senate. Japan was offended by its terms. The President fully supporting Congress in its exclusion provisions, asked that it be changed so that diplomatic action might be taken with a friendly nation to "ease off" the inevitable decision. I supported the President in this request. A majority vote of the House denied it. It is to be sincerely hoped that this act of Congress will not permanently affect the friendly progress of our Nation and Japan. That it has made the President's task more difficult is certain.

THE RAILROAD PROBLEM

President Coolidge, in his annual address to Congress, called for the "entire reorganization of the rate structure for freight" and stated that the farmer "must be assisted by the reorganization of the freight-rate structure which could reduce charges on his production."

I stated then, and still believe, that the carrying out of this program was of far more importance, and its benefits far more reaching to the people of the Central West than tax reduction. Tax reduction reaches relatively few in proportion to the great number that freight-rate reduction, such as suggested by the President, would reach and benefit. Preliminary legislation intended to bring this about has been passed. For example, the Mellon plan would bring an estimated tax reduction to Nebraska of $1,253,154. That is a material reduction. In 1922 the total freight revenue paid Nebraska carriers was $79,290,720. A 1.6 per cent reduction in freight rates will equal the saving in Nebraska by Federal tax reduction. I submit these figures not as an argument against tax reduction but to show that reasonable adjustment of the freight burden of the West will bring benefits materially greater than

tax reduction, and in addition will reach those more in need of relief. But the country demanded tax revision; a few of us demanded freight-rate revision. Tax reduction came—the transportation problem remains unsolved.

THE HOWELL-BARKLEY BILL

The President in his message said:

The settlement of railroad labor disputes is a matter of grave public concern. The Labor Board was established to protect the public in the enjoyment of continuous service by attempting to insure justice between the companies and their employees. It has been a great help, but is not altogther satisfactory to the public, the employees, or the companies. If a substantial agreement can be reached among the groups interested, there should be no hesitation in enacting such agreement into law. If it is not reached, the Labor Board may very well be left for the present to protect the public welfare.

A bill introduced late this session in the House by Mr. BARKLEY, of Kentucky, and in the Senate by Mr. HOWELL, of Nebraska, dealt with this problem. Shortly after it was introduced the "discharge rule" was invoked to bring this bill before the House for consideration. I supported the measures liberalizing the rules of the House, including a rule which provided that 150 Members could file a petition and force a vote as to whether a measure pending in committee should be considered by the House. The rule is right. It prevents the killing of important legislation by committees. The committee considering the Howell-Barkley bill could not hold hearings and report it to the House in time for action this session. I felt that the subject matter of this legislation was of sufficient "public concern" to entitle the House to pass upon it. I voted to discharge the committee and bring the Howell-Barkley bill up for discussion. It was done.

In its title it is declared the bill is "to provide for the expeditious and prompt settlement, mediation, conciliation, and arbitration of disputes between carriers and their employees and subordinate officials." With that purpose I am in hearty accord. The country has been told that the purpose of the bill is to abolish the Railway Labor Board. If that were all, the bill would be simple, the issue plain. I would vote for it. But that is only a minor part of the bill. It abolishes the Railway Labor Board, composed of nine members, three representing the public, three the employees, and three the employers. These nine men receive a salary of $10,000 per year—a total of $90,000. This bill sets up in its stead four national boards of adjustment, with 40 members, at a salary of $7,000 each—a total of $280,000. These are divided equally between the employers and employees. The public has no representation upon these boards. It further provides for a board of mediation and conciliation composed of five members representing the public—each at a salary of $12,000, or a total of $60,000; a grand total of $340,000 in salaries as compared to $90,000 under the present law. To this, of course, must be added salaries of attorneys, clerks, and office expenses of undetermined amount. The salary cost of this bill is equal to the total salary paid to the President, Vice President, the entire Cabinet, the entire Supreme Court, the President of the Senate and the Speaker of the House. This increased cost alone raises a grave doubt of the advisability of its passage.

The Government is asked to pay the expenses of these four boards of agreement, and at the same time we have been told that the public is not entitled to any representation upon them, or, as one official of the brotherhoods told me, "The public is not competent to be represented on these boards."

One-half of the membership of these boards is to be appointed from representatives of the nationally organized crafts. But there are great groups of employees that do not belong to these nationally organized crafts. They do not want to join. They feel that they are entitled to representation in the settlement of industrial disputes, and that representation is denied them under this bill. The President said, "There should be no hesitation in enacting new legislation if a substantial agreement can be reached among the groups interested." The protests filed by employers, employees, and the public indicate that there can be no "substantial agreement" on this bill in its present form. This bill provides only for "national boards." It sets up no boards for settling disputes by adjustment between employees and the roads for which they work.

The bill does not affect transportation charges directly. It does not raise wages. It does not reduce freight rates. It does not apply to transportation charges. It brings no relief to the people of the West in this, their big item of expense. The lowering of transportation charges must come. Organized labor has indicated its willingness to accept wage reductions concurrent with a reduction of transportation charges and general living costs. This bill will greatly increase the difficulties of bringing about that adjustment in a friendly, amicable way, "satisfactory to the public" and insuring "justice between the companies and their employees."

Our whole scheme of legislation regarding railroads is leading directly to Government ownership. I do not favor Government ownership and operation of the railroads. I favor a simplification of our legislation instead of complicating it. A reduction of costs instead of increased costs; fewer Government boards instead of more. I can not support the Howell-Barkley bill in its present form.

INTERSTATE COMMERCE COMMISSION

The Labor Board adjusts wage differences. The Interstate Commerce Commission adjusts rates and charges. These two boards, one fixing the big item of cost of operation and the other fixing the revenue of the roads, have no connection and work independently of each other. It is an illogical, makeshift plan. If a new plan and new boards must be, then there should be a consolidation of these two boards in one new group, so that the income and expense of the roads may be adjusted economically by the same body and for the best interests of the public. My view is that it would be better to do away with the Labor Board entirely, curtail the powers of the Interstate Commerce Commission, restore the power of our State railway commissions, and give the railroads a legitimate opportunity to efficiently serve the American people.

SECTION 15-A AND THE ESCH-CUMMINS ACT

The farmers of the West have been told, and generally believe, that their transportation troubles come from this act and especially section 15-A, or the so-called "guaranty" clause.

The Esch-Cummins Act is not a sacred instrument to me. I stand ready to vote to amend it or repeal it whenever better legislation is proposed. Many in the West have demanded its repeal. They have not stopped to think that with its repeal must come some other plan, some other regulatory legislation. The building of a new transportation act must be worked out. We can not tear down the present law without putting something in its place. To repeal the Esch-Cummins Act and put nothing in its place is to lose a great part of that which has been gained for the people in two generations of struggle with this problem.

The Interstate Commerce Committee is now holding hearings on section 15-A. Legislation affecting it will be proposed. The truth about this section and its effect on freight charges should be definitely determined. New legislation should definitely make certain that the rates on the bulky farm commodities, upon grains, foods, cattle, livestock, and so forth, will be materially reduced. Agriculture can not continue to pay the present charges. If the income from the railroads is disastrously affected by this plan, then let the difference be made up by an adjustment of our through-freight charges and placing the burden upon less bulky and greater value commodities.

The minimum-rate rule, fixing a rate below which carriers can not go, should be abolished so that the roads may return to an actual competitive basis.

INLAND WATERWAYS

An integral part of our transportation problem is the question of developing the inland waterways of the Nation. Experimental work on the lower Mississippi has shown its feasibility. The opening of the St. Lawrence, the deepening of the Mississippi and the Missouri, and their connection with the Great Lakes, means much to the Central West. It will place us nearer the world's markets, decrease our transportation charges, and thus increase the price received by the farmer and at the same time relieve the railroads of the East of the congested traffic which they now carry. Committees of Congress have been considering these matters, plans are being matured, and some progress by legislation has been made. The agricultural prosperity and future industrial development of the West depend much upon this program. Legislation carrying out these plans should have immediate and favorable consideration.

M'NARY-HAUGEN BILL

There are three great economic groups in America—industry, labor, and agriculture. The industrial enterprises are organized and prosperous, labor is organized and better paid to-day than ever in its history. Agriculture is unorganized and not receiving the same measure of prosperity as the other groups. In many sections there is real distress. The purchasing power of the farmers' products is much below that of the other groups. Our problem has been to place agriculture, so far as it can be done by law, on an equality with industry and labor. The farmer must produce at a profit; his purchasing power must be restored. Additional credit relieves but does not cure. Reduced interest rates are equivalent to reduced

taxes, but unaided will not bring prosperity. Cooperative marketing is of great assistance, but it can not entirely solve the problem. It has not been possible to bring the general farmer of the West and North into one great cooperating organization, although great progress has been made. Diversification is producing good results. The solution is better and more adequate prices for what he sells. The farmer wants no gifts; he seeks no charity. Relief is not asked because of the farmers' poverty. It is asked as a matter of right and justice. The McNary-Haugen bill proposed a plan whereby the pre-war purchasing power of the farmer would be restored. It proposed to put agricultural products, for which there was an exportable surplus, on a ratio price basis equal to that of other commodities. Its opponents said it might not work, but if it did not, agriculture would be no worse off, and if it did succeed 25 per cent of what is claimed for it agriculture would immeasurably gain. They told us it is a new idea and without precedent. The West is not afraid of new ideas nor does it fear the making of precedents. The bill failed to pass. Industry is protected by a tariff, labor is protected by restricted immigration and favorable legislation. Is the farmer alone to be denied relief? If that is the answer, then the agricultural States must insist upon a revision of tariff rates. There is no other alternative.

The present tariff law has as a revenue measure succeeded beyond the expectations of its sponsors. It has produced industrial prosperity. The McNary-Haugen bill would have brought that prosperity to the farmer. He is entitled to it. It has been denied to him. Tariff rates that operate against agricultural prosperity should be lowered, keeping in mind always that agriculture can not prosper without industrial prosperity. Neither can industry remain permanently prosperous without a prosperous agriculture. Certain provisions of the present tariff law have benefited our western people. A striking illustration is the benefit given our cattlemen by the tariff on "feeders," which has kept out Canadian cattle. The cattlemen of the West are in need of better prices, but their condition would be worse without this protection. Where beneficial the present tariff law should be supported.

CHILD LABOR

We failed to pass the tax-free securities amendment, but by an overwhelming vote we submitted to the States an amendment authorizing Congress to regulate child labor. By so doing we recognized this as a national problem and have taken the first step to stop their exploitation by capital in the industries. The problem now rests with the States.

PROHIBITION

Political gestures toward the repeal of the eighteenth amendment and the weakening of the Volstead Act have been made. They have accomplished nothing. They will accomplish nothing. Industrial centers of the East may want it. The great agricultural States of the West will not permit of the weakening of the enforcement law nor its repeal. They will give every aid and assistance to its vigorous enforcement.

MUSCLE SHOALS

The facts regarding Muscle Shoals have been stated in this House, in the press, and from the public platform. Further statement of them can serve no beneficial purpose. I was unable to support the Ford bill.

President Coolidge recommended that this "Congress appoint a joint committee to consider offers, conduct negotiations, and report definite recommendations." His suggestions were ignored.

Muscle Shoals alone is important. If the Ford offer is accepted the Government loses over $100,000,000 invested there; it enters into burdensome and expensive obligations; it leases the power dams there at a rental netting but 2.85 per cent on the investment; it ties its own hands for 100 years; it secures no adequate return of funds and no adequate covenants. The Ford bill violates the fundamental idea of the conservation of our natural resources. Nebraska has great streams with undeveloped power possibilities. We have no coal in our soil. We can provide electrical energy from our streams for industrial uses. I am not without hope that the time will soon come when, with governmental cooperation, this development can be brought about. To sell Muscle Shoals under the conditions of this bid is to admit the failure of the Government to develop the Nation's water power. I can not admit that that failure exists. I believe that the Government should complete this development, dispose of the power under the Federal water power act, keep the ownership of the nitrate plants for peace and wartime uses, producing fertilizer for peace activities and munitions for war.

PRESIDENT COOLIDGE

President Coolidge came to the Presidency under most trying circumstances. Meeting every issue without flinching, squarely facing every problem, he set himself to the service of the American people. He has succeeded. The American people believe in him. His ability is known, his character is unassailed and unassailable; his courage proven, cool, calm, determined, God respecting, he goes about his task. Congress, reserving the right to act finally as its judgment dictates, has given full consideration to his views. He, giving full consideration to the views of Congress, has maintained his own position and views on public matters. The legislative and executive branches of the Government have performed their constitutional powers. The country has generally approved. Criticism comes from those who have been unable to dictate either the policies of the President or Congress. I favor the reelection of President Coolidge. He is preeminently the man best suited and fitted for the difficult tasks ahead. I confidently believe that the American people will retain his services in the Presidency.

THREE YEARS OF REPUBLICAN ADMINISTRATION

Mr. TILSON. Mr. Speaker, with the close of the present session of Congress the record of the Republican administration of governmental affairs is made up for the little more than three years since the party came into power. In view of the approaching general election, it is fitting to briefly review what has been accomplished. In order to do this with any degree of fairness or accuracy it is necessary to at least outline briefly the condition that prevailed at the time the Republican administration came into power.

Our international affairs were then in a deplorable state. More than two years had elapsed since hostilities had ceased and we were still technically at war with the Central Powers. Our relations with other countries were strained. The mad competition in building navies and naval armament was again in full swing among the principal nations of the world.

Foreign governments owed this country more than $10,000,000,000, on which more than $1,000,000,000 due and unpaid interest had accumulated, and no provision whatever had been made for the payment or refunding of this enormous indebtedness.

The public debt had grown from $1,000,000,000 to the staggering sum of $24,000,000,000, to which should be added $2,000,000,000, which is about the present cash value of the bonus, plus administrative expenses, recently voted as adjusted compensation for war service; so that the national debt left by the war was in fact more than $26,000,000,000. About $7,500,000,000 was due to mature within two and a half years and no provision for its refunding had been made. Enormous amounts of this debt were carried in short-time certificates, which were turning over monthly with consequent unsettling effect on the markets.

Liberty bonds which had been sold to the public at par to pay the cost of the war were selling at 85 cents on the dollar.

The interest charge alone on the public debt had grown from $23,000,000 before the war to about $1,000,000,000 per annum, considerably more than the annual running expenses of the entire Government at the beginning of the war.

The annual ordinary expenditures of the Government had risen from about $740,000,000 in 1916 to $5,500,000,000 in 1921.

War-time taxes still remained in force and were becoming a serious burden on the entire people through their effect on business.

A large number of merchant ships had been built, at a cost of more than $3,000,000,000. In 1921 this vast fleet was estimated to be worth less than $500,000,000, while claims growing out of our shipbuilding venture amounting to $200,000,000 were pending against the Government. Many of the ships were entirely worthless.

The railroads of the country had been thoroughly demoralized by Government operation and by management characterized by extravagance and recklessness which in the end cost the taxpayers of the country $3,000,000,000 and left the railroad properties so crippled as to seriously handicap them for a long time in rendering service to the public.

The agricultural interests of the country had been brought face to face with financial disaster as a result of the sudden fall in the prices of agricultural products, so that the problem of relieving the resulting distress has proved to be about the most difficult and perplexing one left by the preceding Democratic administration.

Widespread unemployment prevailed. Estimates made by the Department of Labor, then under Democratic control, and by the American Federation of Labor placed the number of

the unemployed during the early months of 1921 as high as 5,000,000 persons.

Such in brief was the situation when by an overwhelming vote of lack of confidence the Democratic administration went out and the Republican Party came into power. What has been accomplished since coming into power is here referred to broadly as the work of the Republican administration, and includes both Congress and the Executive.

Coming into power by so large a vote much was expected of the administration, and no one who is disposed to be fair can deny that much has been accomplished. It has already solved many of the pressing problems inherited from a discredited Democratic administration and has made substantial progress toward the solution of many others.

It has established peace with Germany and Austria, restored commerce and friendly intercourse with those nations, and preserved for the United States all of our rights under the Versailles treaty without involving us in the meshes of European entanglements.

It has maintained friendly relations with all the other nations of the world.

It suggested the plan for an expert commission to consider the vexed problem of reparations in Europe, and these experts, under the brilliant leadership of Charles G. Dawes, worked out and offered a practical plan for the salvation of war-torn Europe.

Through the friendly mediation of this country, it has provided a means for the settlement of a long-standing dispute between Chile and Peru, thus avoiding a possible war in South America.

It has restored friendly relations with Mexico and maintained the security of the treaty rights of American citizens.

By the Conference for the Limitation of Armament it has made the greatest advance in history toward universal peace and the abolition of war.

It has established a budget system which, by placing our finances on a business basis, has already resulted in great economies and assures greater economies in the future.

It has reduced the national debt by nearly $2,500,000,000.

It has either retired or refunded the $7,500,000,000 of maturing debt, and in its place has issued a new class of short-dated debt aggregating $5,000,000,000, with maturities distributed so as to permit of refinancing with the minimum of disturbance to business.

By rigid economies it was made possible to reduce the tax burden over $800,000,000 in the first year of the administration and at the same time show a substantial surplus each year. On the basis of the showing made within two years the Treasury recommended a further tax reduction of more than $300,000,000, which has been made.

Sound principles of tax reduction and tax reform have been initiated and made understandable to the people, which upon their insistence will be eventually enacted into law.

The total operating expenses of the Government, including fixed debt charges, have been reduced from $5,500,000,000 during the last year of Democratic administration to an expenditure for the present fiscal year of approximately $3,500,000,000, a reduction of 40 per cent in the running expenses of the Government, without in any wise crippling any useful activity.

The debts due this country by Great Britain and Finland have been refunded so that the total payments of principal and interest will aggregate $160,000,000 a year during the next 10 years, with somewhat larger amounts thereafter.

Through an administration of the Treasury that has been characterized by remarkable financial ability and a complete mastery of fiscal problems, banking and credit conditions throughout the country have been improved so that Liberty bonds have appreciated to par and so that no one who loaned money to the Government during the war need lose a dollar.

Liberal appropriations have been made for carrying into effect the desire of all good citizens everywhere that the obligation of the Nation to the disabled veterans of the World War be fulfilled to the uttermost. More liberal legislation has been enacted for their benefit and a standing committee to consider matters relating to the welfare of all veterans has been provided for in the House of Representatives.

A protective tariff has been enacted to meet the conditions growing out of the World War. The need for protection to American labor and industry was never greater than in 1921, when an influx of foreign-made goods was being encouraged not only by the low tariff then in force and by the low labor costs abroad but by a depreciated exchange, which gave to countries having depreciated currency a great temporary advantage.

Owing to the rapid changes taking place in Europe the provisions of the new tariff law were made flexible, and the President was invested with discretionary power within prescribed limits to meet changing conditions. While fully protecting our home market in most instances, more than 60 per cent of all imports now come in duty free, and the average rates on dutiable articles are lower than in any previous Republican tariff law.

Except in a comparatively few instances where the rates of duty have been found too low to give needed protection, the only Americans who have been displeased by the operation of the present tariff law are the Democratic spellbinders and campaign-literature writers, who have been shown up so effectively as false prophets. They predicted freely that the new tariff rates would restrict imports to such an extent that the revenues from this source would not be $300,000,000 per year, and that our exports would be seriously curtailed. Republican proponents of the new law claimed that it would produce $450,000,000 in revenues and that it would not reduce exports. The result for the period during which the law has been in operation has been even more favorable than the most sanguine Republican prediction. Revenues from tariff duties are now coming into the Treasury at a rate approximating $50,000,000 per month, or $600,000,000 per year, while exports have actually increased in like proportion. In fact, it can not be successfully denied that no tariff in our history has in so short a time produced results so satisfactory. Within a year unemployment had ceased to be a problem and has not returned to plague us.

In short, the record stands that in the brief space of three years a Republican administration has placed the country once more on the high road of orderly progress and assured prosperity. This summary of what has been accomplished is submitted with pride and confidence to the unprejudiced judgment of the American people. It is a record of achievement never before equaled by any national administration within so short a period of time and one that could well be submitted to the calm, dispassionate consideration of the people with confidence of approval.

The party that has done so much in so short a time under such unfavorable conditions is worthy of continued confidence. It should be again commissioned to go on with the orderly development of its policies to which the country expressed its adherence by an overwhelming vote at the last presidential election. The country can not afford to turn back or to halt in its forward march. The Republican Party has always stood for orderly progress along safe and sane lines of constructive legislation and administration. With Calvin Coolidge in the White House and a safe Republican majority in Congress the next four years will prove no exception to the rule already so well established.

### TAX-EXEMPT SECURITIES—ALL IS NOT GOLD THAT GLITTERS

Mr. VINSON of Kentucky. Mr. Speaker and gentlemen of the House, in my days of childhood I marveled at the craftiness of the wolf in its attempt to lure the unsuspecting Red Riding Hood to her death. Later, in my school days, I learned a trite and significant statement, namely, that we should "fear Greeks bearing gifts"; but until I observed with my own eyes the representatives of the moneyed interests of the East boldly advocating the adoption of this constitutional amendment as a benefit to the people of our country did I realize in what modish manner wolves could wear sheep's clothing.

Sworn in as a Member of Congress on January 31, 1924, with the vote on this resolution to be cast on February 8, I gave practically all my time to the study of this problem. I do not hesitate to say that when I began the consideration of this amendment to our Constitution I was strongly inclined toward its submission and ratification. The articles which I had read upon the subject, together with the catchy name affixed to it, had about convinced me that it was the panacea for all our financial ills. It had been debated in the previous Congress, in which it had failed of passage, and I had much authority at my disposal upon the subject. Until I began close study of the question I had received no information that, while clothed as a placid, harmless sheep, the amendment contained the most deadly attack against the people of our country which the financial wolves of Wall Street could launch.

### THE WOLVES OF WALL STREET SPONSOR THIS AMENDMENT

President Coolidge and Andrew Mellon advocate its adoption. There is no need to waste time in placing them where they rightfully belong. They are the spokesmen for and the leaders of the Republican Party, which undoubtedly is the party representing the moneyed interests in this country. The National City Bank, of New York, the Standard Oil bank; J. P. Morgan & Co.; Kuhn-Loeb Co., international bankers, the Shylock mortgage association, openly espouse the passage of this resolution. Mr. Mellon, Secretary of the Treasury, is

said to be the richest man in America. It is more than we can conceive that these interests and those representing them would voluntarily request the passage into law of legislation that would prevent them from escaping taxation which they so blandly insist this amendment would do.

The chief spokesman in support of the amendment was the gentleman from New York [Mr. MILLS], who, according to his own statement in the Congressional Directory of the last Congress, is a director in many large New York corporations and is a member of the firm representing the banking house of J. P. Morgan & Co. Not only is he the wealthiest Member of the House but he is reputed to be forty times a millionaire. Every Republican leader vigorously and vehemently supported Mr. MILLS in his effort to put this amendment into force. Every Democratic leader vigorously opposed it. Being a Democrat, this would be reason enough for my opposition to the resolution.

The same Republican crowd, the old guard of Republicanism, that wrote the high protective tariff into our laws, thereby wringing untold millions from the people of America, sponsored this legislation. This was the same Republican crowd that fought the Federal reserve banking system that deprives Wall Street staging a financial panic at will; it was the same Republican crowd that opposed the income tax law, which, if properly adjusted, should equalize the tax burdens in conformity with the ability to pay. The wolves of Wall Street through their agent, the Republican Party, again attempted to lure the people of America into the arms of the octopus. Once there, nothing could protect them from its merciless grasp.

EXISTING TAX-EXEMPT SECURITIES ARE NOT AFFECTED

The proposed amendment possesses no curative remedy for the evils that obtain at the present time, growing out of the amassing of large fortunes, evidenced by tax-exempt securities. There are those who do not understand the terminology of the proposed amendment and erroneously conclude that the amendment under consideration would put an end to the unjust discrimination in tax burdens.

However, this proposed amendment to the Constitution did not affect, and was not intended to affect, the tax-exempt securities now owned by the spokesmen for the measure and their masters. It would not reach the existing securities and their owners.

There can be no mistake about the accuracy of this statement. The amendment itself clearly sets forth that only "income derived from securities issued after the ratification of this article" should be affected. Hence the proposed amendment would not reach the evils which we all recognize to exist. Having been formulated by the representatives of the owners of such securities, it is not strange that it would not reach the existing evils. And every effort made to amend the resolution, to the end that this loophole could be closed, was withstood by the solid phalanx of the old guard. I supported every effort made to put teeth into the amendment and to protect the American people from such underhanded attack.

We all admit that there is discrimination in the tax burdens; but any illustration of the evils under the present system could still be used even though this constitutional amendment was submitted to and ratified by the States, as this amendment does not change the status now occupied by the existing tax-exempt securities.

IT WOULD NOT REDUCE CITY, COUNTY, OR STATE TAXES

There are those who think that if this amendment should be adopted there would be a reduction of city, county, and State taxes. Not only is this premise unfounded but, on the contrary, the city, county, and State taxes, in my judgment, would be increased.

Quoting from an editorial in the Lexington Herald, Lexington, Ky., which was referring to Secretary Mellon's advocacy of this amendment, we find a clear statement in support of our view:

> His plea for the taxation of income from tax-exempt securities of States and municipalities is something that must be submitted to the States in the form of a constitutional amendment; and even if Congress should vote to submit it, might fail of ratification by the States.
>
> It would increase the interest burden of the States and cities and be a shifting of taxes rather than a reduction.

This proposed legislation would give the Federal Government the right to tax bonds and securities issued by a city, county, State, or under Federal authority. The money realized therefrom would go into the Federal Treasury, and the city, county, and State would receive no part of it.

Under the present law the States, all of them, have the power to tax securities issued by a State, a municipality, or a county. The only power granted to the States under this law would be the power to tax Federal securities which were issued after the ratification of this amendment. But, according to the amendment itself, before my State—Kentucky—could tax such Federal securities it would be necessary for them to enact into law a State income tax measure. At this time there are only four States in this Union having income tax laws. Speaking for a people already overburdened with taxes, I respectfully submit that I can not support an amendment which in self-protection would necessitate the adding to the tax burden of my people. The cry of the times is to reduce taxes; and if the people of this Nation understood that further burdens in the form of a State income tax must necessarily follow in the wake of this amendment, they would unanimously oppose it. It will not be my purpose while a Member of Congress to vote for any measure in that body that will add to the tax load of my people.

IMMEDIATE INCREASE IN THE VALUATION OF THE OUTSTANDING SECURITIES

Sponsored as it is by the money kings of America, we have seen that the existing securities affected by this measure will remain tax-exempt. Of course tax-exempt securities would compete in the market with taxable securities. The value of the existing tax-exempt securities approximates $12,000,000,000. They are owned in the main by the ultrarich of the country; and should this amendment become law, there would be an immediate increase in value of the existing tax-exempt securities, between 10 per cent and 20 per cent. Thus overnight these money kings would receive a gift in the staggering sum of between $1,200,000,000 and $2,400,000,000. This gift would be made without the receipt of one cent in taxes, either city, county, State, or Federal. No wonder they so anxiously supported this proposition. Speaking for my people, I do not propose to bestow this munificent gift upon the money barons of our country.

THE INTEREST RATE UPON SECURITIES AFFECTED BY THE AMENDMENT WOULD BE INCREASED

It is an economic truth that the purchasers of the securities issuing subsequent to the ratification of this amendment must receive at least the rate which tax-exempt securities would bear plus the tax to be levied against said securities. Then, as now, the tax would be paid by the people residing in the city, county, or State of their issue. The interest rate upon all securities would be increased at least 1 per cent per annum, and this amount would necessarily be an added tax burden to the people.

To illustrate it in cold figures: Take a city or county that desires to issue bonds for the purpose of building a schoolhouse, a courthouse, waterworks, or to refund its debt. For example, an issue of $100,000 is desired. At present these bonds are tax exempt and can probably be sold on the market for a premium to yield the purchaser 5½ per cent per annum. The interest charge would be $5,500. If these securities were taxable, the rate would be at least 6½ per cent per annum and the annual interest would be $6,500. The taxpayers of your county would be compelled to pay this extra amount. If the difference in the interest was $1,000 per year and the bonds were to run for 30 years, there would be an extra $30,000 paid out because of this amendment.

Most probably, every one of these bonds would be purchased by some one living out of the county and the State—40 per cent of the municipal bonds are owned in New York City—in which event there would be no return in taxes, either to the county issuing the bonds or to the State in which it was located, that would offset the extra interest paid.

As a general proposition, there must be refunding bonds issued to retire bonds at maturity. If this law became effective, we would view the spectacle of retiring our city, county, State, and Federal bonds, which are tax exempt, with bonds the income of which is taxable. These last-named bonds must bear a higher rate of interest than the bonds to be retired. Untold millions would be collected from the people of America to pay this added interest upon these securities. This same condition applies to all securities now outstanding which will be refunded at maturity.

To bring this statement home to you, by way of illustration, let us assume that $10,000,000,000 of the tax exempts now outstanding must be refunded. Taxable securities are to be issued and sold to retire the nontaxable securities. It is agreed by all that the interest rate upon the taxable securities must yield at least 1 per cent per annum more than a similar tax-exempt security. Assuming, for the sake of illustration, that the average yield upon tax exempts is 5 per cent per annum we find $500,000,000 to be the annual yield.

Increase the interest yield the necessary 1 per cent to 6 per cent per annum and these securities will yield $600,000,000. In other words, the extra taxes to be paid upon these taxable securities are $160,000,000 per annum.

The people of the United States would be compelled to pay this extra burden. There are 48 States in the Union. If Kentucky paid one-forty-eighth of this added tax, her people would pay more than $2,000,000. There are 120 counties in Kentucky and the average increased tax per county would be more than $16,000 per year.

THE FARMER

The Washington Daily News, in an editorial in its issue of January 16, 1924, so fully expressed my apprehension that I must quote that editorial, which is as follows:

WHY SO HORRIFIED

For many days Representative OGDEN L. MILLS, millionaire representative of New York's financial aristocracy, has been telling a committee of the House all about the horrors of the tax-exempt securities. Mr. MILLS is no "voice in the desert crying alone." No, indeed. He is ably seconded by a multimillionaire Secretary of the Treasury, Andrew Mellon, by many of Mr. Mellon's friends and partners, by the Western Farm Mortgage Association, another multimillionaire concern; by the National City Bank, the Morgan interests, the Kuhn-Loeb interests, the Saturday Evening Post, the Wall Street Journal, and a host of other "tribunes of a down-trodden proletariat."

Why all this sudden and tender solicitude for the common people? Why this sudden hatred of the wealthy by the rich?

The spokesmen for the proposed amendment repeatedly stated that it would not affect the rate of interest upon the farm mortgages carried in the farm-loan banks throughout the country. Mr. Farmer, please keep in mind that the interests behind this bill fought to the bitter end the farm loan bank act and by court action delayed its operation for two years. The mortgage association, referred to in the above editorial, before the farm loan bank act charged the farmers as high as 15 per cent per annum for loans, even though secured by a mortgage upon their farms. The record vote in Congress found upon page 2141 of the CONGRESSIONAL RECORD destroys every vestige of truth in their statement that they sought benefit for the farmers of America, who yet remain the bulwark of our Government.

In a motion to recommit, the following amendment was offered:

*Provided*, That the provisions of this article shall not apply to securities issued under the authority of the Federal farm loan act.

It can be seen from the language of this amendment that the securities therein named would not be affected by the resolution. In other words, had this amendment carried it would save to the farmer 1 per cent per annum upon all farm loans obtained subsequent to the ratification of the amendment. I voted for this amendment, but the old guard was too strong, and it was defeated.

So if this amendment to the Constitution should have become the law of the land the interest rate upon every farm loan secured under the Federal act would have been increased at least 1 per cent per annum. This added interest rate must be earned with the sweat from your brow.

MISCELLANEOUS OBJECTIONS

There are many other valid objections from the viewpoint of the common people. It is a further encroachment by the Federal Government upon the rights of the States and the individuals comprising them.

Should the amendment be submitted and ratified, the spectacle of the Government taxing the evidences of its own obligations is viewed.

From the days of Alexander Hamilton, the first Secretary of the Treasury, this Government has followed the principle laid down by him that it is unsound for a government to tax its securities. In that early day he pointed out that in buying a tax-exempt bond the purchaser paid a tax by reducing the interest rate below what he would receive upon a taxable bond. In foregoing the higher rate, in giving up the chance of larger returns, he was paying a tax in advance.

With a tax levied upon governmental securities, the purchaser, because of the uncertainty of the tax to be paid in the future, would necessarily protect himself in demanding a much greater increase in yield above that which a tax-exempt security would yield, and because of that uncertainty millions of dollars per year would be collected from the people to pay this added rate of interest.

The high yield upon governmental securities results from the tremendous sum raised to wage our World War to a successful conclusion. This high rate of yield makes an attractive investment. In my recollection I can recall United States Government bonds—Panama issue—par value $100, yielding 2 per cent per annum, selling for $117. While it will be several years, if ever, before our Federal securities can be sold for such low rate, yet the certainty of the rate of yield, coupled with the soundness of the investment, will permit the saving of many hundred millions of dollars in the refunding of the national debt should the organic structure remain intact in this particular.

Another formidable objection to the amendment is contained in the fact that more than 75 per cent of the outstanding tax exempts are held and owned in the Eastern States. The tax exempts owned in Kentucky are of negligible quantity. Should an income tax law be passed in Kentucky—I would oppose such law at this time—the revenue received from tax-exempt securities in Kentucky would be nothing as compared to the extra burden placed upon our people by the personal income tax to be paid by them and numerous other tax burdens flowing therefrom. Our present indebtedness as a State approximates $6,000,000. To pay the increased interest rate upon this debt would require extra taxes of approximately $60,000 a year. Of this item the district which I have the honor to represent would pay approximately one-sixth of this added tax, or approximately $10,000 per year more money than under the present law.

CONCLUSION

I quote from the speech delivered by the gentleman from North Carolina [Mr. POU], who is the ranking Democratic member of the Committee on Rules. His service extends over a period of 21 years. His statement follows:

Mr. Speaker, there should be no misunderstanding relative to the constitutional amendment proposing to prohibit hereafter the issuance of tax-exempt bonds. The proposed amendment to the Constitution gives nobody a single dollar. It does, however, add to the burden of the people. It is a proposal to add new taxes to the already enormous burden which the people are forced to bear. * * * When men who own the $12,000,000,000 of tax-free bonds are clamoring for such an amendment to be adopted the rank and file of the people may well take warning. * * *

This legislation means the ruin of the credit of the agricultural States of the Union. The great commercial centers perhaps will receive enormous benefits. You gentlemen who contemplate voting for this measure who represent agricultural constituencies had better be careful and examine this amendment, because it is loaded; it is loaded with destruction for the agricultural States of this Union.

* * * * * * *

To my mind there is not one single logical and proper argument in favor of this legislation. It will, however, kill the credit of the States, the counties, the school districts, and the road districts. It will probably mean the ruin of our Federal farm-loan system. It will add greatly to the burden of the people of the agricultural States. It will enormously enhance the market value of the $12,000,000,000 of tax-free bonds already issued. It will place under the control of the Federal Government even the bond issues of the towns, the school districts, and the road districts as well.

Having listened to every word of debate upon this subject, having given careful consideration to all the arguments presented, and with no purpose other than to perform true service to my district and State, I do not hesitate to join the ranks of those who are actually striving for reduction in taxes.

In the experience of life we find that the bitterest pills are generally covered with the thickest coat of sugar. The most vicious bills ofttimes bear the most attractive titles. "All is not gold that glitters." Coated over with a sweet-sounding title, an examination of the measure under its surface will disclose a bitter pill for the people. Satisfied in my own mind to the exclusion of all doubt, I hesitate not to follow the teachings of Democracy in its effort to secure fair treatment for the rank and file of our people, rather than join the ranks of those who, wearing sheep's clothes, with soft, persuasive manner, would, if the proposed amendment became law, feed with the rapacity of wolves upon an unsuspecting public. In its present form the tax burden of my people would be increased. I do not intend that this be done with the aid of my vote.

LEGISLATION PASSED DURING THIS CONGRESS FOR THE BENEFIT OF EX-SERVICE MEN OF ALL WARS

Mr. JAMES. Mr. Speaker, there was more propaganda used against the adjusted compensation bill than against any bill introduced in the 10 years I have been in Congress.

POSSIBLE TO HAVE ADJUSTED COMPENSATION AND TAX REDUCTION

The chief argument used was that we could not have tax reduction and adjusted compensation, and that anyone who voted for the adjusted compensation bill was in reality voting against reduction in taxes.

This was denied by the majority of the Ways and Means Committee of the House and the Finance Committee of the Senate, the committees that had charge of the legislation on both bills.

Many of us claimed that those making the above charges would commence to "straddle" as soon as they found that the bonus or adjusted compensation bill was the law.

"FIGURES DO NOT LIE BUT LIARS CAN FIGURE"

We know now that "figures do not lie" but that "liars can figure." We find now—and it is admitted by most of the most ardent opponents of the adjusted compensation bill—that on July 1 next we will not only have money to take care of the adjusted compensation and the reduction in taxes but that we will have several million dollars left—probably a good deal more.

The Treasury Department gave out a statement to the effect that if the adjusted compensation bill went through that the price of Liberty bonds would fall; also that interest rates would go up and that stocks and bonds would drop in price, and that we would have to give up all idea of passing a tax reduction bill for at least another generation. In fact, they came close to predicting national bankruptcy if the bonus bill passed. The exact opposite in every particular is the real truth.

CHAIRMAN GREEN STATES THERE WILL BE A LARGE SURPLUS ON HAND

The tax reduction bill passed by Congress by a nearly unanimous vote gave $22,000,000 more reduction than under the plan proposed by the Treasury. Chairman GREEN, chairman of the Ways and Means Committee of the House, puts the surplus on hand on July 1 as high as $138,000,000, after making deductions for both the adjusted compensation bill and the tax reduction bill. Senator SMOOT, chairman of the Senate Finance Committee, and who has always opposed adjusted compensation, admits that there will be a surplus after all.

Those of us in Congress who voted to override the veto of President Coolidge knew the facts, but the public at large, who depend in a very large measure on the great city papers, did not have the same means of learning the truth as we had, and until very lately they believed everything the large city papers had to say. It is only at this date that they are learning that they were misled by the propaganda given out by the city press and others.

Many of the Members of Congress, especially from States like New York, Pennsylvania, all of the New England States, and Kansas, have been bitterly slandered by some of the large papers and by some of their people back home that did not know the truth. During and after the war promises and pledges were made to the ex-service men by the American people and their representatives, and yet five years after the war we find the great city press asking us to "plead poverty" to escape this very just obligation. In many of the above States the voters have been urged to defeat every man who voted for the bonus.

REPUBLICAN STATE CONVENTION OF MICHIGAN FAVORED THE BONUS

The Republican State convention of Michigan was one of the very few political conventions that took a stand for the bonus. At their late convention, held a few days after the adjusted compensation bill had passed, the convention by a unanimous vote passed a resolution commending the Michigan congressional delegation for voting for the bonus. While those of us who favored the bonus needed no mandate from our convention to vote for the adjusted compensation bill, it is pleasing to the ex-service men of Michigan to know that they were supported in their stand by the Republicans at home.

Some of the Members of Congress who are to have opposition because of their stand on the adjusted compensation seem to be worried a little as to the outcome of the fight. While we have no such fight in Michigan, I am positive that when the time comes the Members facing opposition will find that the ex-service men have not forgotten their friends.

The following editorial from the Stars and Stripes explains itself:

[The Stars and Stripes, Saturday, May 31, 1924]

THE LEGION SHOULD HELP

No sooner had the bonus bill been passed over President Coolidge's veto than opponents of the legislation all over the country opened war on the legislators who voted in favor of the measure.

In every section of the country a determined effort is being made to defeat the Congressmen and Senators who voted to override the veto. Practically all of the large newspapers are opposed to the legislation and will aid in the fight. Their cry is that these legislators deserted the President in time of need and voted to increase the tax burden of the people. From now until the election is over in November this cry will be kept up, and the men who stood by the bonus bill to the end will find considerable of a scrap on their hands.

In this fight will they have the support of the men for whom they passed the bonus? Will the American Legion, sponsor of the legislation, come to the front and aid its friends, or will it stand back, hiding behind the cloak of "policies not politics"?

This is a big question, and on its answer rests the influence the Legion is to wield in Congress in the future. If the Legion deserts its friends this time, it can hardly look for support in the future.

Many Congressmen and Senators voted for the bonus and to override the President's veto in the face of no little opposition. In almost every congressional district there is an organized minority opposed to this legislation, and that minority is working now to see that the Congressmen who went against its dictates do not return to Congress. Voting to override the veto of a President is no laughing matter to a Congressman or Senator belonging to the same party. On the contrary, such action requires considerable courage, and the legislator who takes that action is almost certain to find rough sledding when election time comes around.

It is likely that many of the Congressmen who voted against the veto will be beaten this fall if the ex-service men do not get out and work for their reelection. The American Legion particularly has a job on its hands to do all in its power to see that its friends are returned. Otherwise the Legion need not look for support in the future. Any Congressman who is opposed because of his vote on the bonus—and there will be many of them—should expect and should receive the assistance of the Legion in his district. It's all very well and good for the Legion to say that it's not in politics. Such phrases sound well when voiced by Fourth of July orators, but it's another thing to desert one's friends.

This the Legion should not do. Regardless of party affiliations, it should step out in the primaries and in the election and see that its friends are returned to Congress. To do less would display a marked lack of appreciation. It would be almost as bad as going over to the enemy.

[Applause.]

I believe the following letters addressed to me explain the attitude of the members of the American Legion everywhere:

THE AMERICAN LEGION,
NATIONAL LEGISLATIVE COMMITTEE,
*Washington, D. C., June 10, 1924.*

Hon. W. FRANK JAMES,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN: Now that Congress has adjourned I wish to take this opportunity, on behalf of the American Legion and the ex-service men and women of the World War, to thank you for the splendid manner in which you supported the legislative program in which we were vitally interested.

The present Congress enacted into law the adjusted compensation bill, which had been pending for more than four years; the Reed-Johnson bill, extending the benefits of the war risk insurance act to thousands of disabled veterans; and the Fernald-Langley bill, providing sufficient money to complete the hospital building program. These were, of course, all matters of major legislation.

We appreciate the fact that you cast your vote for the adjusted compensation bill when it was before the House; but more particularly do we appreciate the fact that you supported this legislation after it had been vetoed by the President, and in the name of the service men and women of America I wish to thank you for your undeviating adherence to the cause of the veteran. The great mass of the citizens of America desired you to take this action, and they now approve it. This has been clearly demonstrated in every instance where the people have voted upon the question.

The progress of human rights in America is the history of clashes of administrative authority with the forward-looking ideas of the chosen Representatives of the people. Ever since election of the House of Burgesses at Jamestown in 1619, when the right of taxation by consent of the people alone was established as a fundamental American principle, the representatives of the people have enlarged the scope of human rights only over the protests of administrative authority.

But in spite of the desires of those who would retard progress the representatives of the people have slowly but surely made additional gains for the rights of the constituents whom they represent and to whom they are responsible.

The unfairness in the methods employed by the opposition to this legislation made the task of Congress a difficult one. The avenues of publicity available to them were closed to the advocates of the measure and the editorial comment often misleading regarding questions of fact and the motives actuating the Congress. The members of the American Legion and the veterans of the World War, understanding these facts, appreciate more deeply the sincere manner in which you supported this legislation.

The Legion will never forget its friends.

Sincerely yours, JOHN THOMAS TAYLOR,
*National Legislative Committee.*

THE AMERICAN LEGION,
OFFICE OF THE NATIONAL COMMANDER,
*Indianapolis, Ind., September 30, 1922.*

The Hon. W. FRANK JAMES,
*Hancock, Mich.*

MY DEAR CONGRESSMAN JAMES: The service men and women are deeply grateful for the way you have stood by us, fought for us, and, in the face of a great and well-financed attack by what we can not help but feel to be sordid and selfish opposition, refused to desert your convictions for the right. Those whom you represent appreciate your high stand. The Nation is behind us all in this fight, and no one can continue to prevent the people's wishes from being carried out in a Republic.

We have only begun this battle. We are right, and right always prevails in America.

At our national convention next month the adjusted compensation legislation will be indorsed more strongly than ever. The American Legion is more unanimous and stronger in its conviction of the justice of this legislation than ever before. You will be interested to know that even in this year of financial depression and industrial troubles our membership has increased. Nearly half of the States of the Union have more members now that at the end of last year.

I am writing you that you may know that we are grateful for all your endeavors in our behalf. We shall not forget, and we shall win this fight.

Yours very sincerely, HANFORD MACNIDER.

WHY HARDING VETOED BONUS

The late President Harding would not have asked Congress to veto the Fordney-McCumber adjusted compensation bill in the last Congress if he had not been given to understand by the Treasury Department that on June 30, a year ago, there would be a deficit of $600,000,000. Believing as he did one can not blame him for taking the stand that he did. We all realize that it was extremely hard for him to appear before the Senate and ask for a veto when he had made the promise before the last presidential election that he favored the adjusted compensation bill. We can all understand how he felt when he was told later that instead of there being a deficit on July 1, 1923, there was a surplus of $370,000,000.

ADJUSTED COMPENSATION BILL IS BRIEF AND EASY TO UNDERSTAND

The bill passed by Congress is brief and easy to understand.

1. No one receives cash except under $50.

2. Will cost about $100,000,000 per year, and will be spread over 20 years. The General Staff figured that the war was costing us $44,000,000 per day. If this is correct, the total cost is less than two months of war.

3. Provides substantial insurance policies for living, and beneficiaries of those who died since discharge.

4. Partial history of adjusted compensation.

1919

Fifty-six bills were introduced in Congress.

1920

May 29: House of Representatives passed the "fivefold bill" by a vote of 289 to 92. Bill went to the Finance Committee of the Senate and was not reported out when we adjourned. In September of that year Senator Harding, the Republican candidate for President, declared he was in favor of the bill.

1921

June 30: The Senate Finance Committee reported out the above bill with a favorable report.

July 6: Treasury Department sent a letter to the Senate asking the bill be defeated.

July 12: President Harding, believing the figures given him by the Treasury, appeared before the Senate and asked that the bill be referred back to the committee. On the same day the bill was recommitted to the Finance Committee, where it died.

1922

March 23: House passed the bill by a vote of 333 to 70.

June 30: According to figures of the Treasury, instead of a deficit of $24,000,000 for 1922, as predicted by the Treasury on February 2, there was a balance on hand of $313,000,000.

August 31: Bill passed the Senate by a vote of 47 to 22.

September 19: President Harding vetoed the bill, stating that the Treasury Department claimed the deficit on June 30, 1923, would be $650,000,000.

September 20: The House of Representatives passed the bill over the veto of President Harding by a vote of 258 to 54.

September 20: Forty-four Senators voted to sustain the veto and 28 against, and the bill was dead.

1923

Figures of the Treasury showed that on June 30, 1923, there was a surplus of $310,000,000 instead of the deficit of $650,000,000 claimed by the Treasury Department when they desired President Harding to veto the bill.

1924

Adjusted compensation again before Congress and more propaganda used against it than any bill before Congress for many years.

March 18: Bill passes the House by a vote of 355 to 54.

April 23: Senate passes the bill by a vote of 67 to 17.

May 15: President Coolidge vetoes the bill.

May 16: By an overwhelming vote, 313 to 78, the House of Representatives overrides the veto.

May 19: Senate, by a vote of 59 to 26, repasses the bill over the veto, and "all is well."

LAFAYETTE, LINCOLN, GRANT, AND LEE ALL RECEIVED A BONUS

One hundred years ago, December, 1824, Congress presented a bonus to the immortal Lafayette.

On the 6th day of November, 1850, U. S. Grant, then a lieutenant, stationed in Wayne County, Mich., applied for a bonus.

On August 21, 1855, Abraham Lincoln applied for a bonus.

On February 20, 1854, Robert E. Lee applied for a bonus.

The following affidavits and statements explain themselves:

PRESENTATION OF BONUS TO GENERAL LAFAYETTE

[An act of Congress, December, 1824]

*Be it enacted*, That the sum of $200,000 be, and the same is hereby, granted to Major General Lafayette, in compensation for his important services and expenditures during the American Revolution, and that, for this purpose, a stock to that amount be issued in his favor, dated the 4th of July, 1824, bearing an annual interest of 6 per cent, payable quarter-yearly, and redeemable on the 31st of December, 1834.

SEC. 2. And be it further enacted, that one complete and entire township of land, be, and the same is hereby, granted to the said Major General Lafayette, and that the President of the United States be authorized to cause the said township to be located on any of the public lands which remain unsold, and that patents be issued to General Lafayette for the same.

MONDAY, *December 20, 1824.*

Here follows an address to General Lafayette by a committee of Congress, delivered January 1, 1825:

"General: We are a committee of the Senate and the House of Representatives, charged with the office of informing you of the passage of an act, a copy of which we now present. You will perceive from this act, sir, that the two Houses of Congress, aware of the large pecuniary as well as other sacrifices which your long and arduous devotion to the cause of freedom has cost you, have deemed it their privilege to reimburse a portion of them, as having been incurred in part on account of the United States.

"The principles that have marked your character will not permit you to oppose any objection to the discharge of so much of the national obligation to you as admits of it. We are directed to express to you the confidence, as well as the request of the two Houses, that you will, by an acquiescence with their wishes in this respect, add another to the many and signal proofs you have afforded of your esteem for a people whose esteem for you can never cease until they have ceased to prize the liberty they enjoy and emulate the virtues by which it was acquired. We have only to subjoin an expression of our gratification in being the authors of this communication, and of the distinguished personal respect with which we are,

"Your obedient servants,

"SAMUEL SMITH.
"ROBERT Y. HAYNE.
"B. BOULIGNY.
"WILLIAM S. ARCHER.
"S. VAN RENSSALER.
"PHILIP S. MARKLEY."

And here follows the reply of the Marquis de Lafayette on the same day, accepting the bonus:

"Gentlemen of the committee of both Houses of Congress, the immense and unexpected gift which, in addition to former and considerable bounties, it has pleased Congress to confer upon me, calls for the warmest acknowledgments of an old American soldier and adopted son of the United States, two titles dearer to my heart than all the treasures of the world.

"However proud I am of every sort of obligation received from the people of the United States and their representatives in Congress, the large extent of this benefaction might have created in my mind feelings of hesitation, not inconsistent, I hope, with those of the most grateful reverence. But the so very kind resolution of both Houses, delivered by you, gentlemen, in terms of equal kindness, precludes all other sentiments but those of the lively and profound gratitude of which, in respectfully accepting the munificent favor, I have the honor to beg you will be the organ.

"Permit me also, gentlemen, to join a tender of my affectionate personal thanks to the expression of the highest respect with which I have the honor to be,

"Your obedient servant, "LAFAYETTE.

"WASHINGTON, *January 1, 1825.*"

In the second place, it might be of moment to know how big men and outstanding Presidents have considered questions of this kind. Here is how Grant, Lee, and Lincoln viewed the proposition:

APPLICATION FOR BONUS

[By Gen. Ulysses S. Grant]

STATE OF MICHIGAN,
*County of Wayne, ss:*

On the 6th day of November, A. D. 1850, personally appeared before me, a justice of the peace within and for the county and State aforesaid, First Lieut. Ulysses S. Grant, aged 28 years, an officer of the Fourth Regiment United States Infantry, in the service of the United States who, being duly sworn, according to law, declares that he is the identical Ulysses S. Grant who was a second lieutenant and regimental quartermaster in the Fourth Regiment of United States Infantry, commanded by Col. William Whistler, in the war with Mexico declared to exist on the 13th day of May, A. D. 1846; that he graduated at West Point, in the State of New York, about the 30th day of June, A. D. 1843, and continued in actual service during the entire period of the war, as will be shown by the muster rolls of the field and staff of the Fourth Regiment of United States Infantry.

He makes this declaration for the purpose of obtaining the bounty lands to which he may be entitled under the "act granting bounty lands to certain officers and soldiers who have been engaged in the military service of the United States," passed September 28, 1850.

U. S. GRANT,
*First Lieutenant and Regimental Quartermaster, Fourth Infantry.*

---

STATE OF MICHIGAN,
*County of Wayne, ss:*

I, Silas A. Bagg, clerk of said county of Wayne, do hereby certify that George Clancy, whose name is subscribed to the affidavit of the annexed instrument and therein written, was, at the time of taking affidavit, a justice of the peace for said county, duly elected and qualified, and duly authorized to take the affidavit. And, further, that I am well acquainted with the handwriting of such justice and verily believe that the signature to the said jurat is genuine.

In testimony whereof I have hereunto set my hand and affixed the seal of said county at the city of Detroit this 6th day of November, A. D. 1850.

---

DETROIT, MICH., *November 6, 1850.*

SIR: Will you please forward me my land warrant on the inclosed certificate? I am, sir,

Very respectfully, your obedient servant,

U. S. GRANT,
*First Lieutenant and Regimental Quartermaster, Fourth Infantry.*

---

APPLICATION FOR BONUS

[By Abraham Lincoln]

TO JAS. L. EDWARDS,
*Commissioner of Pensions.*

STATE OF ILLINOIS,
*Sangamon County, ss:*

On this 21st day of August, A. D. 1855, personally appeared before me, a justice of the peace within and for the county and State aforesaid, Abraham Lincoln, aged 46 years, a resident of Sangamon County, in the State of Illinois, who, being duly sworn according to law, declares that he is the identical Abraham Lincoln who was captain of a company in the regiment of Illinois Mounted Volunteers commanded by Col. Samuel M. Thompson, in the war with the British Band of Sacs and other tribes of Indians on our northwestern frontier in A. D. 1832, known as the Black Hawk War. That he volunteered at the State and county aforesaid on or about the 21st day of April, 1832, for no definite time and continued in actual service in said war for about 40 days; that he has heretofore made application for bounty land under the act of September 28, 1850, and received a land warrant, No. 52076, for forty (40) acres, which he has since located and can not now return.

He makes this declaration for the purpose of obtaining the additional bounty land to which he may be entitled under the act approved the 3d day of March, 1855. He also declares that he has never applied for nor received, under this or any other act of Congress, any bounty land warrant except the one above mentioned.

ABRAHAM LINCOLN.

---

APPLICATION FOR BONUS

[By Gen. Robert E. Lee]

STATE OF NEW YORK,
*County of Orange:*

On the 20th day of February, A. D. 1854, personally appeared before me, a special judge within and for the county and State aforesaid, Robert E. Lee, aged 45 years, an officer of the United States Army, who, being duly sworn according to law, declares that he is the identical Robert E. Lee who was a captain in the Corps of Engineers of the Army of the United States in the late war with Mexico; that he was commissioned on or about the 7th day of July, A. D. 1838, and continued in actual service in said war until its close; that he still remains in the military service of the United States, as will appear by the records of the Engineering Department.

He makes this declaration for the purpose of obtaining the bounty land to which he may be entitled under the "act granting bounty land to certain officers and soldiers who have been engaged in the military service of the United States," passed September 28, 1850, and avers that he is not entitled to nor has he received bounty land under any other act of Congress.

R. E. LEE,
*Captain, Corps of Engineers.*

Every State that has voted on the matter of adjusted compensation, save one, has voted favorably. Oklahoma, for purely local reasons, defeated it.

The compensation votes in the States in which referenda were held, according to official figures furnished the American Legion Weekly up to November 23, 1923, by the secretaries of state, were:

| State | For | Against | Ratio for— |
|---|---|---|---|
| Illinois | 1,220,815 | 502,373 | 2.4-1 |
| Iowa | 383,335 | 195,898 | 1.9-1 |
| Kansas | 375,015 | 148,898 | 2.5-1 |
| Maine | 105,712 | 32,820 | 3.2-1 |
| Michigan | 471,150 | 185,092 | 2.5-1 |
| Missouri | 210,238 | 100,131 | 2.1-1 |
| Montana [1] | 67,500 | 62,100 | 1.1-1 |
| New Jersey | 534,532 | 165,555 | 3.2-1 |
| Ohio | 949,109 | 324,447 | 2.9-1 |
| Oregon | 88,219 | 37,866 | 2.3-1 |
| Rhode Island | 10,535 | 1,303 | 8.1-1 |
| South Dakota | 93,459 | 56,356 | 1.7-1 |
| Washington | 224,356 | 88,128 | 2.5-1 |
| Wisconsin | 165,762 | 57,324 | 2.7-1 |
| Total | 4,899,746 | 1,958,811 | 2.5-1 |

[1] The exact and official figures in Montana are not yet available

*Cash bonus paid by the States to their veterans of the World War*

| | |
|---|---|
| Illinois | $55,000,000 |
| Iowa | 22,000,000 |
| Kansas | 25,000,000 |
| Massachusetts | 22,275,000 |
| Maine | 3,211,397 |
| Michigan | 30,657,576 |
| Minnesota | 23,500,000 |
| Missouri | 15,000,000 |
| New Hampshire | 1,961,423 |
| New Jersey | 11,250,000 |
| New York | 45,000,000 |
| North Dakota | 11,000,000 |
| Ohio | 22,500,000 |
| Oregon | 20,000,000 |
| Rhode Island | 2,588,000 |
| South Dakota | 6,000,000 |
| Vermont | 1,500,000 |
| Washington | 13,500,000 |
| Wisconsin | 16,102,096 |
| Colorado | 8,000,000 |
| Montana | 4,500,000 |
| Pennsylvania | 35,000,000 |

The two great political parties in their last national conventions took the following stand with respect to the soldier boys:

DEMOCRATIC PARTY

We believe that no higher nor more valued privilege can be afforded to an American citizen than to become a freeholder in the soil of the United States, and to that end we pledge our party to the enactment of soldier settlements and home aid legislation which will afford to the men who fought for America the opportunity to become land and home owners under conditions affording genuine Government assistance unencumbered by needless difficulties of red tape or advance financial investment.

REPUBLICAN PARTY

We hold in imperishable remembrance the valor and the patriotism of the soldiers and sailors of America who fought in the Great War for human liberty, and we pledge ourselves to discharge to the fullest the obligations which a grateful Nation justly should fulfill in appreciation of the services rendered by its defenders on sea and on land.

In every instance where the American people have registered their will directly upon this question, they have voted overwhelmingly in favor of it. In 22 States the people have voted for State compensation, and the majorities have been as high as 8 to 1. All national polls taken on the question show the people favor it overwhelmingly.

This legislation has now passed the House of Representatives six times, and the Senate five times. The dates, with votes cast, are as follows:

HOUSE OF REPRESENTATIVES

May 29, 1920: 289 votes for, to 92 votes against.
March 23, 1922: 333 votes for, to 70 votes against.
September 14, 1922: Passed without record vote.
September 20, 1922: 258 votes for, to 54 votes against.
March 18, 1924: 355 votes for, to 54 votes against.
May 2, 1924: Passed without record vote.

SENATE

August 31, 1922: 47 votes for, to 22 votes against.
September 15, 1922: 36 votes for, to 17 votes against.
September 20, 1922: 44 votes for, to 28 votes against.
April 23, 1924: 67 votes for, to 17 votes against.
May 1, 1924: Passed without record vote.

In the fourth place, by way of contrast, it may be refreshing, though surprising to many, may be, to hear how foreign nations have acted toward their own World War heroes.

*Bonus paid by foreign countries to their veterans*

| Country | Base of bonus, maximum rate | Maximum possible | Probable average | Total cost |
|---|---|---|---|---|
| Great Britain | £5 plus 10s. per month's service in excess of one year; maximum 48 months. | £20 ($101.50) | | £78,831,556 ($275,910,446) to men and officers. |
| Canada | Pay and allowances they would have received if not demobilized, for from 1 to 6 months, depending on service. | $600 ($540) | | $164,000,000 ($147,600,000). |
| Australia | 1s. 6d. per day of service. | £117 ($409.50) | £83½ | £30,000,000 ($105,000,000); mostly paid in 5½ per cent bonds, maturing May 31, 1924. |
| New Zealand | Same as Australia | £117 ($409.50) | £58½ | £5,225,900 ($18,290,650) to May 20, 1920. |
| France | 250 francs plus 20 francs per month for service at front, between Aug. 2, 1914, and Nov. 11, 1918. | 1,270 francs ($95.25). | | 4,964,948,670 francs ($372,371,150); payable in monthly installments of 100 francs. |
| Belgium | 75 francs per month for services at front, Aug. 1, 1914, to Nov. 11, 1918, less family allowance. | 3,825 francs (less family allowance) ($287). | | 141,230,000 francs ($10,592,250); in budget for 1921. |
| Germany | | 65 marks ($0.97). | 65 marks | |

Czechoslovakia, no bonus; gratuity to those 20 per cent or more incapacitated and to widows and orphans.

NOTE.—At the time of the aforementioned payments to enlisted men of the World War, the currency of such countries was worth in United States money about as follows: Great Britain, $3.50; Canada, $0.90; Australia, $3.50; New Zealand, $3.59; France, $0.075; Belgium, $0.075; Germany, $0.015.

Foreign currency is converted in the above table into dollars at these rates.

Mr. Speaker, the war contractors demanded and received hundreds of millions of dollars in payment of work never done. The railroads were guaranteed against loss. The war profiteers have retained the millions they defrauded the Government out of during the war. These and others of their kind have received cash from the Treasury of the United States on every occasion attempted and under any old pretext.

Another bill of great interest to the veterans of all wars—especially the late war—was the Johnson-Reed bill providing for the reorganization of the Veterans' Bureau and the codifying of the laws, modifying the activities of the bureau, and taking care of the interests of the ex-service men.

HOSPITALIZATION OF THE VETERANS OF 1898

It is a splendid piece of legislation. One particular part, providing that ex-service men of 1898 can be admitted to the hospitals the same as the veterans of the late war, will be appreciated by all who are suffering from disease contracted in the Spanish-American War.

TIME WILL TELL THE ADJUSTED COMPENSATION BILL IS A GOOD BILL

I voted for the above bill and all other pieces of legislation for the benefit of the ex-service men.

I voted for the adjusted compensation bill every time it came before the House, including the veto of President Harding and the veto of President Coolidge. I believed in it when it was first introduced in 1919, and I never saw any reason to change my mind as to the righteousness of the cause. I am glad that after all the ups and downs—especially downs—it is now the law of the land. Time will tell that it was the wise thing to do, and that it will cost less than if it had not been done and other legislation was later advocated and passed.

THE WORLD WAR VETERANS' ACT OF 1924

Mr. LEAVITT. Mr. Speaker and gentlemen of the House, it is with a deep sense of gratification that I consider this bill, S. 2257, an act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau, and the administration of the war risk insurance act, and the vocational rehabilitation act.

I say this because the passage of this act is based on justice and reflects the sincere appreciation cherished by the American people for the services of those for whom the Great War is not over. The price of human progress is always sacrifice and service, but when that price is paid in the time of war it takes on its most terrible forms. It places its marks of suffering on the bodies and souls of men and women. Our common humanity calls on us to turn from war as the arbiter of events, but wars have come and out of their necessities have risen examples of devotion to country and ideals which inspire and light the way to true citizenship. Such a thought and such an issue call for a response by the country which they have served and saved which will in some small degree show that the Nation's heart beats true to a sacred obligation.

This measure will go far in the correction of certain abuses and injustices which have developed in the administration of veterans' relief. It liberalizes the provisions for hospital and medical treatment for the veterans of all wars. As one example, let me quote:

(10) That all hospital facilities under the control and jurisdiction of the bureau shall be available for every honorably discharged veteran of the Spanish-American War, the Philippine insurrection, the Boxer rebellion, or the World War suffering from neuropsychiatric or tubercular ailments and diseases, paralysis agitans, encephalitis lethargica, or amebic dysentery, or the loss of sight of both eyes regardless whether such ailments or diseases are due to military service or otherwise, including traveling expenses as granted to those receiving compensation and hospitalization under this act. The director is further authorized, so far as he shall find that existing Government facilities permit, to furnish hospitalization and necessary traveling expenses to veterans of any war, military occupation, or military expedition since 1897, not dishonorably discharged without regard to the nature or origin of their disabilities: *Provided*, That preference to admission to any Government hospital for hospitalization under the provisions of this subdivision shall be given to those veterans who are financially unable to pay for hospitalization and their necessary traveling expenses.

Much difficulty has been encountered in establishing service connection in cases of tuberculosis and neuropsychiatric disease, and also because patients discharged from hospitals with arrested cases of tuberculosis often brought their disease back into active form because they must at once go to work. Here are two provisions which will go far to meet these conditions:

An ex-service man who is shown to have or, if deceased, to have had, prior to January 1, 1925, neuropsychiatric disease, an active tuberculous disease, paralysis agitans, encephalitis lethargica, or amebic dysentery developing a 10 per cent degree of disability or more, in accordance with the provisions of subdivision (4) of section 202 of this act shall be presumed to have acquired his disability in such service between April 6, 1917, and July 2, 1921, or to have suffered an aggravation of a preexisting neuropsychiatric disease, tuberculosis, paralysis agitans, encephalitis lethargica, or amebic dysentery in such service between said dates, and said presumption shall be conclusive in cases of active tuberculous disease, but in all other cases said presumption shall be rebuttable by clear and convincing evidence; but nothing in this proviso shall be construed to prevent a claimant from receiving the benefits of compensation and medical care and treatment for a disability due to these diseases of more than 10 per cent degree (in accordance with the provisions of subdivision (4), section 202, of this act) on or subsequent to January 1, 1925, if the facts in the case substantiate his claim.

And—

That any ex-service man shown to have had a tubercular disease of compensable degree, and who has been hospitalized for a period of one year, and who in the judgment of the director has reached a condition of complete arrest of his disease, and who shall be discharged from further hospitalization, shall be rated as temporarily totally disabled, and such rating shall not be decreased within a period of six months.

Note that the presumption is conclusive in the case of active tuberculosis up to January 1, 1925, that it has a service connection. Also that at least six months of total compensation continues after discharge from a hospital with an arrested case of tuberculosis, to prevent worry and the necessity of work which may reawaken the malady.

Again, the provision for dependents is made comprehensive, for—

If death results from injury—

If the deceased leaves a widow or child, or if he leaves a mother or father either or both dependent upon him for support, the monthly compensation shall be the following amounts:

(a) If there is a widow but no child, $30.

(b) If there is a widow and one child, $40, with $6 for each additional child.

(c) If there is no widow but one child, $20.

(d) If there is no widow but two children, $30.

(e) If there is no widow but three children, $40, with $5 for each additional child.

(f) If there is a dependent mother (or dependent father), $20, or both, $30. The amount payable under this subdivision shall not exceed the difference between the total amount payable to the widow and children and the sum of $75. Such compensation shall be payable whether the dependency of the father or mother or both arises before or after the death of the person, but no compensation shall be payable if the dependency arises more than five years after the death of the person.

The work of vocational rehabilitation is carried on until June 30, 1926, by which time it is expected that the work will have been completed and the obligation of the Government in that direction discharged. But the hospitalization work will go on and the compensation will continue to be paid in every just instance, for it is the determined purpose of this great Nation to go forward without stint in repaying as far as it can its debt of honor and gratitude.

The further provisions of this measure would be of interest, but I can not cover them all in so brief a time. I have quoted enough to give reason for my gratification that this measure, the result of devoted study and labor by the Veterans' Committee, by the soldiers themselves, and their friends, is before us, and that I have had the privilege of giving it my support.

SOLDIERS' ADJUSTED COMPENSATION

Mr. VAILE. Mr. Speaker, for a Member of Congress to have disagreed on any point with the head of his own political party, with his own candidate for the Presidency, with a great conservative and at the same time constructive leader, seems to be a rather anomalous situation.

I believe that President Coolidge has amply earned the respect and confidence of the American people. I am as sure that he will be reelected as I am that he is entitled to reelection, and that is a conviction of absolute certainty.

But that does not mean that I have any regret for disagreeing with him on a particular point in which my humble judgment is that I am right and that he is mistaken. The particular point to which I refer is the "soldiers' bonus."

I voted to override the President's veto on this bill, and I would do exactly the same thing if it had to be done over again, for two reasons:

First. I believe in it.

Second. I was committed to it prior to my election.

Referring first briefly to the second point, in the Sixty-sixth Congress—the first of my own service—the House of Representatives passed a soldiers' adjusted compensation bill. It failed to pass the Senate. I voted for this measure in the House of Representatives. My vote, of course, was well known in my home district. I was reelected to the Sixty-seventh Congress by people who knew how I had voted and who knew that I would vote the same way again.

The Sixty-seventh Congress passed a soldiers' adjusted compensation bill. In accordance with my well-understood position, I voted for it. I was reelected to the Sixty-eighth Congress by people who were under no misapprehension as to how or why I had voted on this question.

The Sixty-seventh Congress had been elected in a presidential election year, and Warren G. Harding had been chosen as our standard bearer. In the platform upon which he was elected, with a Republican Congress, appeared the following language:

> We hold in imperishable remembrance the valor and patriotism of the soldiers and sailors of America who fought the Great War for human liberty and we pledge ourselves to discharge to the fullest the obligations which a grateful Nation justly should fulfill in appreciation of the services rendered by its defenders on sea and on land. Republicans are not ungrateful. Throughout their history they have shown their gratitude toward the Nation's defenders.

It should be stated, in fairness, that a substantially identical plank was contained in the Democratic platform of that year.

The Republican State platform of Colorado, which, under the statute I helped to frame as a candidate and which therefore became my own official and personal statement to my constituents, the statement upon which I sought and received my election, contained a similar declaration.

This plank was understood and was intended to be understood as a declaration of party policy in favor of soldiers' adjusted compensation just as soon as it could be enacted without serious detriment to the finances of the country.

Mr. Harding, in a speech at Cleveland, Ohio, a few days before his election, committed himself definitely to this extent in favor of the bonus.

Later, as President, addressing the United States Senate, on July 12, 1921, advising against the passage at that time of the then pending measure, because in his judgment it would create a deficit in the Treasury, he said:

> In a personal as well as in a public manner, which ought to be a plight of good faith, I have commended the policy of generous treatment of the Nation's defenders, not as a part of any contract, not as the payment of a debt which is owing, but as a mark of the Nation's gratitude.

For the expressed reason that he thought the "bonus bill" passed by the Sixty-seventh Congress would create a deficit President Harding vetoed it, using language which would clearly indicate that he was no more opposed to the principle then than he had been at the time of his preelection statement.

President Coolidge is in a quite different position. Not only had he never announced himself in favor of such a measure, but, on the contrary, in his first message to the present Sixty-eighth Congress he had stated baldly: "I am not in favor of a soldiers' bonus."

My constituents may prefer his position to mine; but they should, in fairness, credit me with equal consistency.

The final vote on soldiers' adjusted compensation came in the Sixty-eighth Congress at a time when, instead of being faced with a deficit, as had been feared by President Harding, we had just been asked by the President and the Secretary of the Treasury to distribute, in the form of a rebate of taxes, a surplus of some $329,000,000 which had accumulated through four years of the thrift of Republican Congresses—Congresses which, while receiving plenty of abuse for their alleged shortcomings, are seldom credited with the fact that have been reducing the principal of the national debt at the rate of approximately $2,000,000 a day since March, 1919.

According to the estimates of the Secretary of the Treasury himself, this fund of $329,000,000 would be enough to pay approximately one and one-half times the first year's cost of the proposed soldiers' bonus.

Furthermore, we receive annually on account of principal and interest of Great Britain's war debt to us, nearly twice the annual cost of the present bonus plan. Without the services of our soldiers Britain could never pay and we could never receive one cent of this money. It and much more, together with our national honor and possibly our dearly bought independence, would have been a total loss.

I agree that tax reduction is not only desirable but essential to the free development of industry. I regret that we have not had in the present Congress a majority of real Republicans to pass the plan submitted by Secretary Mellon, for which I voted throughout the contest. The compromise which the Republicans in Congress and the Republican President accepted must be regarded as a measure which was taken because it was the best we could get until we have a clear and bona fide Republican majority.

But if, notwithstanding the urgency of tax reduction, we have a clear way of paying the soldiers' adjusted compensation, then I say that if anybody at home expected me to vote against it at practically the very moment when we were asked to distribute a large surplus of accumulated revenue, if any of my constituents expected me to vote against it after I had been twice elected on the distinct understanding that I had voted and would vote for it—then, I say, such constituents have a very different idea of political consistency and political obligation from the idea which is entertained by their present Representative.

Let me suggest before leaving this branch of the subject that the bonus plan finally adopted is particularly free from some objections which have been urged against former plans. It merely gives to the soldier a paid-up life-insurance policy. For the thrifty this will be a godsend; for the improvident an anchor.

Second. Aside from my personal commitments which I, having undertaken, regard as binding, I believe in the principle of the soldiers' adjusted compensation. The temper of the American people, rightly or wrongly, will not endure a large, permanent Military Establishment. Whether we are wise in this or not, the fact is that we resent a large body of professional soldiers. This means that in time of national emergency we

have always relied and must always rely upon the citizen soldier, upon the man taken from the ranks of peaceful industry, to defend the country with his life. This being so, it has always seemed to me that it should be a matter of national policy to see that, so far as we are able to accomplish it, there should be no discrimination against the soldier and in favor of the man who was not taken for military service.

Now, what did we do in the World War? We took the youth from the store or the shop and paid him $30 per month. We took half of that away from him for allotments to his dependents. We charged half of the remainder against him for insurance. We put him under virtual duress to buy Liberty bonds with half of the remaining quarter, and we left him with about $3 a month, 10 cents a day, for spending money. His friend who was excepted from the draft because he was in "essential war industry" we paid as high as $20 a day.

Broadly speaking, and subject, of course, to many splendid exceptions, the soldier was the only member of the body politic who did not demand and receive higher prices than formerly for everything he did and everything he sold. Labor demanded more, claiming, with considerable justice, that living expenses were much higher. The merchant, the manufacturer, demanded more, claiming, also with considerable justice, that labor was much higher. And many individuals, with no justice at all, profiteered most heartlessly. Whether consciously selfish or not, we were all a part of the vicious circle of high prices caused by the war—all, that is, except the soldier.

Now, I do not think that the soldier got an "even break." I do not think he was treated with the fairness, not to say the generosity, which a Republic should display toward those whom it requires, for its protection, to hazard life and health and endure the hardships of war.

I do not expect that these views will be acceptable to all of my constituents. But they are views which I have a right to hold as an American Congressman and they are views which my constituents have known for at least four years that I do hold.

I submit for comparison two sample letters on this subject out of a great many received. One is from a young gentleman who occupies a very important place in my own community. He has recently erected a new office skyscraper, further devoting to useful enterprise the fortune left him by a millionaire grandfather. He had a very creditable record in the World War as captain, I believe, serving with the energy and the directness and the downrightness which would be expected of one who could write such a letter. He would be an asset to any community. I have no quarrel with his opposition to the "bonus." Many of my best friends—including my own brother, who, above the draft age, left a good position and came at his own expense from Alaska to the United States to enlist as a private in the Regulars—have the same opposition to this measure.

But I do hope that with the ripening years this particular correspondent may take a more tolerant view of those who disagree with him. I think he will find there are many such. This is his letter, copied verbatim, with the omission of his name and office address:

SIR: In common with the rest of the voters of this country, I have watched with considerable amusement and not a little despair the antics of that small group of hand-picked hysterical morons which we are pleased to call our "Representatives in Congress assembled." To the most casual and unbiased observer it must be apparent that our much-boasted democracy has degenerated into a government of the minority, by the nit-wits, and for the politicians. Certainly the passage of the so-called bonus bill over the President's veto and the presentation to the dear "peepul" of the mangled and disfigured remains of the Mellon tax bill form a fitting climax to the reign of hectic oratory and fanatical nonsense which have characterized the present Congress.

As for the bonus bill, it is certainly gratifying and flattering to know that, since our omniscient solons have neither the moral courage nor the mental ability to prosecute the criminals who robbed the country during the last war, we can pay additional taxes and suffer a further increase in the cost of living in order to "compensate" our soldiers and sailors for not being slackers. The most insulting feature of this compensation is the implication it carries with it: That since a man did not receive yegg's wages in a factory or shipyard during the war his risk of life and financial reward for not being a quitter are to be valued at a maximum of $1.25 a day. That compensation sounds more like an optimistic estimate of the true worth of your services as a "Representative."

Before you leave Washington I request you to perform just one act of real service to me: Present my regards to the newly created bonus bureau and pray them to apply my share of this compensation, which you have so generously provided for me, toward the founding of a compulsory course in written and spoken English, arithmetic, and elementary political science for all Congressmen.

It is, indeed, deplorable that the Congress of these United States should have become a refuge for mental incompetents, moral degenerates, and physical monstrosities—not to mention business failures and foreign illiterates. However, I can assure you that I shall take great pleasure in seeing to it that, beginning with the termination of the present Congress, you will have to earn your living.

May I in closing suggest that the most pleasant way for you to spend this summer and fall would be for you to take a nice, long trip abroad—the farther abroad the better? And may I ever remain,

Your most humble, most obedient servant,

——— ———.

There is also in my file a letter from one of the men who started with me in 1916 in our little National Guard service on the Mexican border. When he enlisted in June of that year he was 16 years old and 64 inches tall. He was continuously in the military service of the United States till long after the armistice, nearly three years. He was shot in the face, which was toward the enemy, in the second Battle of the Marne. In 1919 he came into my office to see me, a seasoned and tried and tested veteran at the age of 19. He asked me then if I could not help to hurry the passage of the bonus, because, he said, he had not been able to help his father any in the last three years, and his father, on a dry Colorado homestead, was very greatly in need of a little money.

Recently he wrote me:

DEAR LUTENANT—

Several of these boys still affectionately call me that—

Im glad you men in Congress have passed our bonus law and I am writeing to thank you. Of course I would of liked the money & I could use it but prehaps the insuranc policy will be better because Im maried now and I cant aford much insurance. Best wishes to you and hoping to see you when you get to Denver.

Yrs respectfuly.

——— ———.

Well, neither of these men was a quitter, as described in the captain's letter. I am determined that neither of them shall ever have cause to think that I am one.

The little wounded private could hardly provide insurance for his bride without Government assistance. The captain's bride will need no insurance, though during his lifetime and afterwards she may have difficulty in figuring her income taxes.

I appreciate both of these difficulties and sympathize with them, though I have not experienced the latter. I believe we shall be better off when we are able to further reduce taxes all around—for the rich no less than for the poor. Certainly in my four campaigns for Congress no one has yet accused me of demagogic clamor against wealth as such or against its fortunate possessors. I am convinced that the reduction of taxation is the way toward an industrial prosperity which will benefit all of us, whatever our lot or station. But some of the reduction can wait.

I can not help thinking that my "most humble, most obedient servant," the captain, zealous as he is for compulsory training in "elementary political science," has himself failed to appreciate two quite elementary principles of that subject. One is that a man who is elected to office is in honor bound to carry out his preelection pledges.

The other is that it takes humble people as well as wealthy and powerful people to make a Republic and to defend it.

## FIRST SESSION OF THE SIXTY-EIGHTH CONGRESS

Mr. VOIGT. Mr. Speaker, I desire to discuss some of the more important matters which came before the first session of the Sixty-eighth Congress, which comes to a close on Saturday, as well as other matters of public interest. This session, to some of us at least, has been unusually interesting on account of the political line-up in the House. To that element in the Republican Party which regards "regularity" as the highest virtue in a Representative of the people, the session was six months of irritation and agony. When the House met on December 3, 1923, it developed that the stand-pat Republicans and Democrats were about equally balanced, and that the Wisconsin delegation of progressives, together with about a dozen progressives from other States, held the balance of power. To start with, we used this balance of power to bring about a change in the rules of procedure of the House. For several days we cast our votes for Congressman HENRY ALLEN COOPER, of Wisconsin, for Speaker; the regulars voted for FREDERICK H. GILLETT, of Massachusetts, and the Democrats voted for their

leader, FINIS J. GARRETT, of Tennessee. Mr. GILLETT had been the Speaker in the prior Congress. Messrs. GILLETT and GARRETT received 196 or 197 votes each, Mr. COOPER 17, and a number scattered, but none received a majority. On the third day we forced an agreement that the rules of the prior Congress should be adopted for 30 days only, and that during the 30 days amendments to the rules could be offered and should be reported on by the Committee on Rules and that reasonable debate should be permitted thereon in the House. When this agreement was reached we voted for Mr. GILLETT for Speaker, and he was reelected. While Mr. GILLETT and I hold conflicting political views, I wish to say that I have the highest admiration for him as a presiding officer. As a Speaker he is patient, courteous, fair, able, and absolutely impartial. I have observed him closely and many times have admired his judicial conception of his trust. While in the chair he is the same to friend and foe.

It will be observed that we did not, as the price of our votes for Mr. GILLETT, demand specific amendments to the rules; if we had, we should have been guilty of foisting our will as a minority on the majority. All we demanded was a fair opportunity to bring before the House certain amendments we had in mind. For lack of support we were not able to do a complete job, but we got some amendments through which are of the highest value to the American people, and which make the House a more representative body. The public generally is not interested in rules, but let me just say that the rules constitute the machinery through which legislation is enacted, and he who can control the machinery can control the legislation. Nearly all of the rules of the House are contrived to prevent legislation, to give a clique of insiders power to stifle the wish of the majority. In the last Congress we witnessed the spectacle of a chairman of the Committee on Rules carrying proposed rules around in his pocket, refusing to bring them up, although desired by the majority of his committee and of the House, and there was no rule to compel him to do it. We have a rule now that makes that sort of performance impossible. Prior to this Congress we had no workable rule under which a committee which refused to act on a bill referred to it could be discharged, although such a rule exists in every other legislative body in this country. We forced the adoption of a rule that if a committee fails to report on a public bill or resolution in 30 days 150 Members of the House may sign a petition and thus force a vote in the House whether the House will consider the proposed legislation without a report from the committee. We also procured the adoption of a rule which permits amendments to tax bills, and which prevents the presentation of bills in such manner that Members will have to vote for or against them as they stand without opportunity for amendment. The adoption of these rules is a decided blow to the big business bloc in Congress. We hear much denunciation nowadays of various blocs in Congress, especially the farm bloc. Heretofore there has only been only one bloc, and that was the big business bloc, and those who do all the shouting against blocs usually mean that there should be only their one favorite bloc.

TAXATION

Mr. Speaker, early in the session a tremendous propaganda was launched at Members of Congress for the Mellon plan. Millions were spent to make it appear that there could be no prosperity in the country unless we enacted this plan into law. In this propaganda Secretary of the Treasury Mellon was hailed as the economic savior of the country; no one but he could draw a scientific tax law. Men seemed to forget that it is the duty of Congress to make laws, including the tax laws, and that it would have been cowardly for Congress to swallow, hook, sinker, and line, a prescription prepared by Mr. Mellon and handed over to us by President Coolidge. The Mellon plan, in a few words, was a plan to relieve the rich from taxation. The Wisconsin delegation and other progressives insisted on an equitable tax bill. We were in favor of tax reduction as much as others, but we were more interested in the question whose taxes are going to be reduced. We finally secured the adoption of a very fair tax bill, and if we had done nothing else in this session, we would have reason to be proud of our achievement. We fought for and obtained increased taxes on inheritances and gifts. On inheritances and gifts the law starts with a rate of 1 per cent on $50,000 and runs to 40 per cent on anything over $10,000,000. This is an excellent way to break up huge fortunes and prevent the ever-increasing concentration of wealth. It is really a benefit to children of the ultrarich, to whom untold millions in most cases prove to be a curse. When the law of 1924 is understood by the people it will be accepted as a great improvement over the Mellon plan. The new law reduces taxes for the year ending June 30, 1925, by $361,000,000 and will reduce taxes for the next year by over $400,000,000. It also reduces the taxes for 1923 by 25 per cent. In order to show the difference between the law of 1924 and the proposed Mellon plan, and also to show some of the other tax reductions, I insert the following tables:

*How income taxes are reduced by the revenue act of 1924*

[What the income-tax payer SAVES under the new law as compared with the Mellon plan. Compiled from statistics furnished by the Government Actuary, Treasury Department]

| Income (married man without dependents) first $5,000 considered as earned income | Total amount saved from act of 1921 | | Percentage of total saving from act of 1921 | |
|---|---|---|---|---|
| | By the act of 1924 | By the Mellon plan | By the act of 1924 | By the Mellon plan |
| $3,000 | $12.50 | $8.75 | 62.50 | 43.75 |
| $4,000 | 37.50 | 28.25 | 62.50 | 43.75 |
| $5,000 | 62.50 | 43.75 | 62.50 | 43.75 |
| $6,000 | 102.50 | 62.50 | 64.04 | 39.06 |
| $7,000 | 162.50 | 92.50 | 65.00 | 37.00 |
| $8,000 | 212.50 | 122.50 | 62.50 | 36.03 |
| $9,000 | 262.50 | 152.50 | 61.05 | 35.47 |
| $10,000 | 312.50 | 182.50 | 60.10 | 35.10 |
| $15,000 | 502.50 | 332.50 | 47.41 | 31.35 |
| $20,000 | 702.50 | 482.50 | 40.84 | 28.05 |
| $25,000 | 952.50 | 682.50 | 37.21 | 26.66 |
| $30,000 | 1,202.50 | 882.50 | 34.16 | 25.07 |
| $35,000 | 1,502.50 | 1,102.50 | 32.45 | 23.81 |
| $40,000 | 1,802.50 | 1,322.50 | 30.86 | 22.65 |
| $45,000 | 2,152.50 | 1,612.50 | 29.98 | 22.46 |
| $50,000 | 2,502.50 | 1,982.50 | 28.97 | 22.95 |
| $55,000 | 2,862.50 | 2,442.50 | 27.98 | 23.88 |
| $60,000 | 3,262.50 | 2,982.50 | 27.32 | 24.97 |
| $65,000 | 3,712.50 | 3,612.50 | 26.94 | 26.22 |

***What the revenue act of 1924 does in addition to reducing income taxes***

| Article: Repeals tax on— | Saved to tapayer |
|---|---|
| Telephone and telegraph messages | $34,000,000 |
| Beverages and constituent parts thereof | 10,000,000 |
| Admissions of 50 cents and under | 33,000,000 |
| Excise taxes: | |
| Auto trucks and bodies, chassis costing $1,000 and body $200 exempt from 3 per cent tax | 5,000,000 |
| Tires, tubes, parts, and accessories, tax reduced from 5 per cent to 2½ per cent | 20,000,000 |
| Smokers' articles, 10 per cent tax on humidors and smoking stands repealed | 1,000 |
| Candy, 3 per cent tax repealed | 13,000,000 |
| Slot device weighing machines, tax reduced from 10 per cent to 5 per cent | 30,000 |
| Knives, dirks, daggers, etc., tax is repealed | 140,000 |
| Liveries and livery boots and hats, 10 per cent tax repealed | |

| | Saved to taxpayer |
|---|---|
| Excise taxes—Continued: | |
| Hunting and shooting garments and riding habits, 10 per cent tax repealed | $180,000 |
| Yachts and motor boats and pleasure boats and canoes if sold for more than $100, 10 per cent tax repealed | 319,000 |
| Carpets and rugs (square yard tax); trunks, sold in excess of $35; valises, traveling bags, suitcases, etc., if sold in excess of $25; purses, pocketbooks, shopping or hand bags, sold in excess of $5; portable lighting fixtures, lamps, and lamp shades, sold in excess of $10; fans, sold in excess of $1; 5 per cent tax on all the foregoing repealed | 1,800,000 |
| Jewelry: 5 per cent tax does not apply on articles sold for $30 or less; on watches sold for $60 or less; on church goods, musical instruments, and silver-plated flat tableware, irrespective of price. (Eyeglasses and spectacles and surgical instruments are exempt) | 11,000,000 |
| Stamp taxes: | |
| Sales of produce on exchange, cut from 2 cents to 1 cent per $100 | 4,000,000 |
| Promissory notes, drafts, or checks, payable otherwise than at sight or demand, tax of 2 cents per $100 or fraction thereof repealed | 2,150,000 |
| Occupational taxes: | |
| Brokers exclusively negotiating sales of produce or merchandise, exempt from $50 tax | 400,000 |
| Theater seat tax, etc., repealed | 1,600,000 |
| Total reduction | 136,620,000 |

MISCELLANEOUS ITEMS

| Item: | Increase |
|---|---|
| While the bill reduces the tax on slot-weighing machines from 10 per cent to 5 per cent, it now applies the 5 per cent tax to all classes of coin-operated machines, which will increase the revenue from this source about | $150,000 |
| Playing cards: Rate increased from 8 cents to 10 cents per pack | $700,000 |
| Mah jongg, pung chow, and similar tile sets taxed at 10 per cent | 1,000,000 |
| Total increase | 1,850,000 |
| Total taxes eliminated | 136,620,000 |
| Total taxes added | 1,850,000 |
| Net total reduction | 134,770,000 |

ADDITIONAL EXEMPTIONS

Tax on pool tables and bowling alleys of $10 per table or alley does not apply if no charge is made for use of same.

Seat tax on automobiles for hire does not apply in respect of automobiles used exclusively for conveying school children to and from school.

ADJUSTED COMPENSATION

Mr. Speaker, the Secretary of the Treasury determined to put a tax bill through for the benefit of the millionaire class, and also determined to save them from taxes by opposing adjusted compensation for our ex-service men. I want to say here for myself that I was one of the first Members of the House, in 1919, to introduce a real adjusted compensation bill on the basis of $1 and $1.25 a day. My bill provided for cash and not insurance. The bill as passed is adjusted pay in name only; it is really an insurance measure, but we voted for it because it was either that or nothing for the ex-service men. President Coolidge fought the bill with all weapons at his command and vetoed the bill, but it was passed over his veto by both Houses. When President Harding vetoed the bonus bill in 1922 he was told by Mr. Mellon that the country was facing a deficit of $650,000,000, yet in that same fiscal year we paid off $613,000,000 of the Government debt and at the end of the year there was a balance in the Treasury of $370,000,000. The Treasury estimates were over a billion dollars out of the way for the year, and yet propagandists would have the public believe that Treasury officials are the only ones who can frame what they please to call a scientific tax measure.

I am a man of peace, but I am with the fellow who has to face the privations and dangers incident to war. I do not want any man to risk his health and life for $1 a day when the Government is well able to pay more. The profiteers robbed the Government and the people out of billions. When the boys went they said nothing was too good for them, and so forth, but when they were back they fought them for the pittance which they will now get in insurance by way of adjusted compensation.

The other day I received a letter from the Washington office of the American Legion—and the Legion has not always been friendly to me—which said in part:

> Now, that Congress has adjourned, I wish to take this opportunity on behalf of the American Legion and the ex-service men and women of the World War to thank you for the splendid manner in which you supported the legislative program in which we were vitally interested.

It should be mentioned here that the session of Congress just closed also passed the Reed-Johnson bill, extending the benefits of the war risk insurance act to thousands of disabled veterans, and also the Fernald-Langley bill providing additional money for hospitals. There are many deserving veterans who have been unable to get compensation for their disabilities by reason of technicalities, and the Reed-Johnson bill was intended by Congress to do justice to these men.

GERMAN RELIEF

Congressman FISH, from New York, himself a veteran of the World War, introduced a measure to provide $10,000,000 worth of foodstuffs for the starving women and children of Germany. General Allen, who was in command of the American troops on the Rhine, fought nobly for the passage of this measure. The bill passed the House, and every progressive Member voted for it. The passage of this bill would have gone a long way to restore a feeling of good will between this country and Germany, and it was in line with the action of our Government on former similar occasions. Only a couple of years ago we gave twenty millions to the starving Russians. The bill was defeated in the Senate.

FARM RELIEF LEGISLATION

Mr. Speaker, on May 29, 1924, I made an extended speech in the House on the so-called McNary-Haugen bill, in which I demonstrated that the bill was opposed to the interests of the farmers; that it was unworkable; that it was political camouflage for the farmer; that it could not pass the House. I opposed this bill from the very beginning as a member of the Agricultural Committee in the House because I was convinced it could never become a law and that we were only wasting our time when we should have been at work trying to do something substantial for the farmer. I can not take the time here to go into that bill, but shall be glad to send anyone a copy of my speech. The farmer's troubles can not be cured with a quack remedy like the McNary-Haugen bill. If we are going to do something real for the farmer we must go at the job by getting back to first principles. We must first find the cause of his troubles and be sure we have found the right causes, and then remove the causes. That is the only remedy of any permanent value I know for the farmer's desperate economic condition. The farmer was forcibly deflated in 1920 and 1921 by the moneyed powers of the country operating through the Federal reserve system. The Wilson administration was to blame, and the Harding administration was to blame. I am sure that one of the chief causes of the farmer's plight in the last four years has been the economic chaos in Europe. On February 14, 1923, I introduced a resolution in the House protesting against the invasion of the Ruhr Valley by France, asking the President to transmit to France the protest of this Government, calling on France to arrange to pay what she owes us, and asking the President to call a world conference for the purpose of considering the economic problems confronting the world. I got no action on this resolution and did not expect any. I was abused as pro-German. I stated in the resolution that before the war Germany was the second best customer of the United States, taking large proportions of our cotton, grain, packing-house products, and other articles; that the Ruhr invasion disturbed our commerce, causing damage to our farming population; and that we had a right to protect that commerce irrespective of the moral question involved in the invasion. I believe now, as I did then, that the Ruhr invasion cost the farmers of America several billion dollars. Big business in the United States profited by that invasion. For instance, the Krupp Steel Works were put out of business, and it is a fact that almost from the moment the Ruhr was invaded the profits of the United States Steel Trust began to mount by the millions. Our Government not only failed to protest against that invasion but impliedly led France to believe that we approved it. I consider the disorder in Europe as the chief cause of the farmer's troubles.

In addition to this the outrageous tariff and railroad rates hurt him. I was one of about 50 Members to sign a petition to discharge the Interstate Commerce Committee from the consideration of a bill to repeal section 15a of the Cummins-Esch law, but we could not get enough signatures to make the petition effective. Restricted immigration hurts the farmer because it cuts down his home market and compels him to pay wages for help which he can not afford. Notwithstanding this, I felt obliged to vote for the restrictive immigration laws, except the conference report on the law just passed, as hereinafter explained. The farmer, like the city man, is also the victim of innumerable trusts and price-fixing combinations whose existence would be impossible if our antitrust laws were properly enforced.

It is a tragedy that it has taken bone-headed statesmen in Europe and spineless statesmen in America five years to realize

just plain, everyday, fundamental economic truths. They are now finding out that you can not kill the cow and get the milk too—these wonderful statesmen. They are just finding out that you can not live without letting live, and that a country can not sell if it will not buy. The light seems to be breaking over in Europe, and when economic rehabilitation once gets a start there it will mean untold millions for the American farmer. Complete restoration will not come to Europe until the treaty of Versailles is rewritten to comply with the terms of the armistice.

IMMIGRATION

For several years we have had in force laws restricting immigration to the United States. These laws were based on a percentage of those of the various nationalities who were in the United States according to the census of 1910. The law recently passed takes the census of 1890. I have voted for these laws because I felt that we could not permit the millions from Europe and other parts of the world who wished to come to flood this country. At one time, after the war, we had several million men out of employment, and their condition would have been made worse if we had permitted untold thousands to come in here and compete with them for jobs. I voted recently for the so-called Johnson bill, which provides for a quota of 2 per cent according to the census of 1890; but when this bill got into the Senate the Senate inserted a new provision, as follows:

(b) The annual quota of any nationality for the fiscal year beginning July 1, 1927, and for each fiscal year thereafter, shall be a number which bears the same ratio to 150,000 as the number of inhabitants in continental United States in 1920 having that national origin (ascertained as hereinafter provided in this section) bears to the number of inhabitants in continental United States in 1920, but the minimum quota of any nationality shall be 100.

When this provision came back to the House in the form of the conference report I could not vote for it, and therefore voted against the report or what is equivalent to final action on the bill. Under the law the immigration quotas after July 1, 1927, will be determined by the Secretaries of State, Commerce, and Labor. They will have to decide the "national origin" of the entire population of the United States and make the quotas accordingly. I do not see how it can be done. Suppose an Irishman came here 100 years ago and married a woman of French descent, and their children and children's children married Englishmen, Norwegians, Germans, and so forth; of what nationality are their present descendants, for the purpose of determining immigration quotas? The Director of the Census stated that he would have to adopt arbitrary methods to establish the quotas. I am not willing to leave this question to officials; this matter should be regulated by Congress. Furthermore, I see no good reason for legislating on immigration now for all the years to come and limiting total immigration to 150,000 per year. In normal times I believe we can, with good advantage to ourselves, receive and assimilate more than that number per year. The proponents of this "national origin" scheme have produced some figures, and this is the way they claim it will work:

*Quotas*

| Nationality or country | Present law | 2 per cent of 1890 with minimum of 100 | National origins under the 150,000 limit proviso |
|---|---|---|---|
| Albania | 288 | 100 | 100 |
| Armenia | 230 | 100 | 100 |
| Austria | 7,342 | 990 | 1,840 |
| Belgium | 1,563 | 509 | 260 |
| Bulgaria | 302 | 100 | 100 |
| Czechoslovakia | 14,357 | 1,873 | 1,320 |
| Danzig | 301 | 223 | 100 |
| Denmark | 5,619 | 2,782 | 1,092 |
| Esthonia | 1,348 | 102 | 221 |
| Finland | 3,921 | 145 | 498 |
| Fiume | 71 | 100 | 100 |
| France | 5,729 | 3,878 | 2,763 |
| Germany | 67,607 | 50,129 | 22,018 |
| Great Britain and Ireland | 77,342 | 62,458 | 91,111 |
| Greece | 3,063 | 100 | 536 |
| Hungary | 5,747 | 488 | 1,259 |
| Iceland | 75 | 100 | 100 |
| Italy | 42,057 | 3,889 | 5,878 |
| Latvia | 1,540 | 117 | 253 |
| Lithuania | 2,622 | 302 | 444 |
| Luxemburg | 97 | 100 | 100 |
| Netherlands | 3,602 | 1,637 | 2,669 |
| Norway | 12,205 | 6,453 | 2,433 |
| Poland | 30,979 | 8,872 | 4,509 |
| Portugal | 2,465 | 474 | 275 |
| Rumania | 7,419 | 631 | 386 |
| Russia | 24,405 | 1,792 | 4,002 |

*Quotas*—Continued

| Nationality or country | Present law | 2 per cent of 1890 with minimum of 100 | National origins under the 150,000 limit proviso |
|---|---|---|---|
| Spain | 912 | 124 | 141 |
| Sweden | 20,042 | 9,561 | 3,707 |
| Switzerland | 3,752 | 2,081 | 781 |
| Yugoslavia | 6,426 | 735 | 602 |
| Other Europe | 86 | 125 | 100 |
| Palestine | 57 | 100 | 100 |
| Syria | 882 | 100 | 162 |
| Turkey | 2,654 | 100 | 119 |
| Other Asia | 92 | 100 | 100 |
| Africa | 104 | 100 | 100 |
| Egypt | 18 | 100 | 100 |
| Atlantic Islands | 121 | 100 | 134 |
| Australia | 279 | 120 | 100 |
| New Zealand | 80 | 100 | 100 |
| Japan | | | |
| Total | 357,801 | 161,990 | 150,001 |

It will be seen that under this scheme after 1927 Johnny Bull's quota is raised from 62,458 to 91,111. Germany is reduced from 50,129 to 22,018; Norway is reduced from 6,453 to 2,433; Sweden is reduced from 9,561 to 3,707; Italy and Greece are increased. Our immigration from northern Europe—the best we have had—is seriously cut and the gates are swung wide open for Johnny Bull. In addition to this the law does not restrict immigration from Canada. The consequence is that about three-fourths of our entire immigration after 1927 will be allotted to Great Britain; to her the door will always be open and to others it will be nearly closed. I think this legislation is a serious mistake. It is the greatest step we have yet taken to make the dream of Cecil Rhodes come true—"to reincorporate the United States into the British Empire." In addition to this the new law is a serious blow to seamen. About a million seamen per year from all parts of the world touch at our ports. Under the law impossible conditions can be imposed on these men before they are permitted to land temporarily. They will in many cases be kept prisoners on board their vessels, and will be unable to land and get jobs which may be more agreeable.

PROHIBITION

Mr. Speaker, since I have been in Congress I have consistently voted against prohibition. I voted against the eighteenth amendment and against the Volstead law. I feel the same about it now as I did then. My judgment is that prohibition can not be enforced. If we spent a billion a year, we could not begin to enforce it. Other countries have tried it and are repealing their prohibition laws. It is impossible to make people good by law, and we can not legislate away their appetites. From time immemorial men have had stimulating drinks, and always will have them. The amount of corruption incident to prohibition which has been uncovered in the investigations here in Washington in recent months is simply appalling. The bootleggers and higher grafters are the greatest friends of prohibition that we now have. Even Attorney General Daugherty said:

The liquor-smuggling business is the most gigantic criminal problem the United States has ever faced on the high seas. The amount of liquor smuggled into the United States annually can not be approximated.

Congressman KVALE, who succeeded Mr. Volstead in the House and who is a stricter prohibitionist than Mr. Volstead, admits that the nonenforcement of the eighteenth amendment is "breeding a Nation of hypocrites" and "is the greatest tragedy ever witnessed in civilization."

In 1919 the exports of Scotch whisky were 800,000 gallons, in 1922 they were 22,000,000 gallons, and in 1923 they were 25,000,000 gallons. General SHERWOOD says that in nine months in 1923, 3,000 barge loads of beer were shipped from Canada to Toledo, Ohio.

During the year ending June 30, 1923, 11,268,614 liquor prescriptions were issued by physicians in the United States. General SHERWOOD estimates that over 3,000 persons lost their lives from poison liquor during the past two years, and that the number killed in conflicts between prohibition agents and bootleggers was 1,210, making a total of 4,210. He says that this is more than were killed in the Revolutionary War, the Mexican War, and the Spanish-American War put together.

Murder, suicide, divorces, and arrests are on the increase.

Since prohibition the crime record of Minnesota shows an alarming increase, an 80 per cent increase in arrests for crime in general, 83 per cent increase in homicides, 56 per cent increase in drunkenness, and 625 increase in intoxicated autoists.

A recent editorial in the Detroit News states:

More than ten times as many persons are engaged in the liquor traffic in this country to-day than ever was the case before prohibition. Enticed by the enormous profits and the possibilities of sudden wealth, a large percentage of the youth of the land enter this outlaw trade and are being debauched physically and ruined morally.

In 1923 the police of Washington made 54,389 arrests, or 40 per cent more than in 1922, and that condition prevails almost over the entire country.

I am for temperance but not for prohibition. I want laws which are backed up by public sentiment and not such as are held in contempt and violated by the wholesale because they are not believed in by the majority of our citizens. At this session of Congress I introduced a bill for 2.75 beer, and about 60 other Members did the same. We had an extended hearing before the Judiciary Committee, but Congress adjourned before the committee reported. The demand for a light alcoholic beverage is getting stronger day by day, and in my judgment it is only a question of time when Congress will be compelled to grant the demands of the people. We can get rid of 90 per cent of the moonshine evil by giving the people a palatable beer.

RAILROAD LEGISLATION

We now have a Railroad Labor Board which is objectionable to the railroads, the employees, and the public. This board makes decisions, but the railroad companies have violated the decisions by the wholesale. The board has failed to render decisions in hundreds of cases, and many of these cases are several years old. It is very evident that our present law for the settlement of railroad labor disputes is inadequate. Under this law we had the greatest railroad strike in history. We ought to return to the plan which was used with good success in former years, as embodied in the Newlands and Erdman Acts. The Committee on Interstate and Foreign Commerce refused to report out the so-called Howell-Barkley bill, but under the new rules of the House, already referred to, over 150 Members, of which I was one, signed a discharge motion and the bill was considered in the House, but filibustering on the part of opponents prevented final action. It is expected to bring this bill up for passage in the next session. There was some anxiety expressed that this bill might be rushed through the House without consideration, but if it had come to a vote every Member would have had more than a month's time to acquaint himself with its provisions, and also had the opportunity to read the extended hearings on the bill before the Senate committee. It will be my ambition to contribute what little influence I have to the creation of a workable bill which will make for peace in the railroad labor world and which will be fair to all the interests concerned.

The ultimate solution of our railroad problem will be public ownership. We will have to follow England, France, Germany, Canada, and other countries in this respect. We should also as a Nation own our water powers and exercise control for the public welfare over coal, iron, oil, and timber resources.

READJUSTMENT OF POSTAL SALARIES

Mr. Speaker, our postal employees have long suffered an injustice in the matter of pay. I am for economy in government, but I do not want it at the price of injustice to any class of our people, and especially not our Government employees, who render faithful service with hand and brain. As a matter of fact, the salary of the postal employees in 1920 when measured in buying power was only about 65 per cent of the salary they were getting in 1913. They were given an increase in 1920, but when it was given it was on the understanding and with the expectation that the cost of living would rapidly decrease, and, judged by what the salary will buy, they are still underpaid compared to 1913. Many of our best postal employees have quit in order to go into other fields, which is a loss to the Government of valuable and trained help and in a way it is a loss to the employee, which should be prevented by doing these people justice. Not only has the pay of these employees failed to keep pace with the increased cost of living, but their work has heavily increased. The average mail carrier, for instance, does 50 per cent more work now than he did 10 years ago, and we all know how the work of the rural carriers has increased. These employees can not strike for higher pay, and therefore we should aim to do what is right and fair by them. Congress passed the recent bill for pay increases to these employees by a very large vote. Already there are rumors around the Capitol that the President will veto the bill. If he does, I feel certain it will be passed over his veto. I think it is better to pay these employees what they are entitled to; they have been underpaid for some years now, and I believe it better policy to save by cutting down on the hundreds of millions we are spending for war purposes.

The rural carriers up to now have had to furnish their own rigs or automobiles and pay for the upkeep out of their small salaries. Many of them have quit because it takes about a third of the salary to keep horses and automobiles, pay for feed, gasoline, and repairs. No private employer expects a man who needs a conveyance in his employment to do what Uncle Sam expects of these men, and it was a pleasure for me to vote for a modest equipment allowance for them which does not wholly cover the actual cost but which was a step in the right direction. Here again we must do justice before we can talk of economy.

Congress has voted to adjourn June 7, but I voted against the adjournment because I do not think we should go home before this matter, farm relief legislation, and other matters of great importance are disposed of.

TEAPOT DOME AND DEPARTMENT OF JUSTICE

The investigations which have been going on in Washington on these subjects reveal a rottenness in public life which is astounding. Due to the fact that the Navy was using oil for fuel in increasing quantities, President Taft in 1912 set aside oil lands in California—Nos. 1 and 2—to stand as a reserve for the Navy. Several years later President Wilson set aside reserve No. 3 in Wyoming, known as Teapot Dome. Shortly after Mr. Harding became President he signed an order transferring these reserves from the Navy to the Interior Department, of which Fall was Secretary. Fall leased reserves Nos. 1 and 3 to private companies. In the case of the Teapot Dome lease the Government gets about 1 barrel out of 16. Mr. Doheny stated that he expected to make a hundred million dollars out of the California lease. Doheny gave $75,000 to the Democratic campaign fund, and Sinclair gave the same amount to the Republican fund. In 1920, under Democratic rule, a law was passed which made the leases possible. These leases were made in secret. We know from the evidence before the Senate committee that Doheny "loaned" Fall $100,000 and that the money was brought in cash to Washington in a suitcase; also that he got a "loan" of $25,000 from Sinclair. Shortly after McAdoo retired from the Wilson Cabinet he was "retained" by the oil interests at $50,000 a year. It has been said this was for practicing "son-in-law" and not for practicing law. Congress has now declared that the leases were made in defiance of the settled policy of the Government, and that the reserves should be recovered, and that the leases were executed under conditions indicating fraud and corruption. The matter is now in the courts, and every friend of honest government hopes that the courts will see their way clear to cancel the leases. In the meantime Fall is still at large and has not been indicted.

The investigation of the Department of Justice showed that under Attorney General Daugherty there was no sincere effort to prosecute war grafters and profiteers; that recommendations for prosecutions made by the Federal Trade Commission were held up, sidetracked, or disregarded; that Daugherty's most intimate friend and go-between, Jesse Smith, collected hundreds of thousands of dollars as protection money from big whisky-ring men, bootleggers, exhibitors of prize-fight pictures, and law violators of every kind and description. Secretary of the Navy Denby, Fall, and Daugherty were compelled by force of public opinion to resign.

These investigations have been decried by the enemies of good government—big business and stand-pat politicians—but they are serving a very good purpose. They can uncover only a portion of the wrongdoing, but they serve to make it plain to the people that the demand of the hour is for men in public life who have courage and character, men who will stand for the rights of the mass of the people against graft and corruption.

Of late it has become fashionable for prominent men to belittle Congress. This is due to the fact that they can not boss Congress quite as much as heretofore. In my humble judgment, this first session of the Sixty-eighth Congress has shown more independence and more responsiveness to the rights of the people than any session I have attended since the spring of 1917. The progressive group in the House, although small in numbers, is entitled to claim credit for much of what was done. We not only pressed for the measures I have already discussed but we helped to put over the vote on the child-labor amendment; we brought about investigations of the Shipping Board and Air Service; progressives brought about the defeat

of the Muscle Shoals proposal to give away property and a water power worth hundreds of millions for a hundred years for a song.

The progressives can go back to the people who sent them to Washington with a consciousness of service well performed, and with the hope and prayer that they be sent back with reenforcements to carry on the fight for the people's rights against intrenched privilege, and so that the Government may be restored to the people.

SHOULD THE AMERICAN GOVERNMENT BUY FOREIGN-MADE GOODS

Mr. ROGERS of Massachusetts. Mr. Speaker, the newspapers of the United States have recently quite generally commented upon certain instances in which it was alleged the United States Government had purchased foreign-made goods of a character which could have been duplicated, although perhaps at a higher price, in the United States. Two of these transactions involved purchases of textiles. As everyone knows, the textile manufacturing industry in New England at the moment is at a low ebb. New England men and women, especially those dependent for a living on the textile industry, very naturally took an extremely keen and usually a critical view of the transactions which the newspapers described.

It has seemed to me important to ascertain from official sources the exact facts of the whole matter, as well as of certain other incidents related thereto.

KHAKI UNIFORMS FOR MARINES

Early in May a somewhat acrimonious discussion broke out with respect to the awarding of a contract by the Navy Department to a Manchester, England, concern for some 500,000 yards of cotton khaki cloth needed for Marine Corps uniforms. The implication in most of the news items and editorials which dealt with the matter was that the contract in question had only just been awarded and that the award had been made in the face of an extremely grave textile depression in New England.

On May 12 I wrote Secretary Wilbur, of the Navy Department, the following letter:

MAY 12, 1924.

Hon. CURTIS D. WILBUR,
*Secretary of the Navy, Washington, D. C.*

MY DEAR MR. SECRETARY: The New England newspapers have recently given much attention to the contract for uniforms of the United States Marines which was let to a Manchester, England, concern, which underbid the American competitors for the contract. Criticism of the award, which I believe dates back about a year, is general, both in Democratic and Republican newspapers.

I confess that I share the belief that irrespective of price American soldiers and sailors should not be clothed in foreign-made cloth. With the extreme textile depression which is now prevailing in New England, with much attendant unemployment, you can readily understand that the publication of this story at this time, even though relating to the transaction of a year ago, is having a most unfortunate effect.

A newspaper story published Friday in Massachusetts states that "it is understood that since then the Navy Department has made a rule not to make awards to other than domestic firms."

Is this last statement correct? If so, I think it will be most helpful if you will write me, for publication in New England, a statement of the policy of the Navy Department in the matter of awarding foreign contracts and any comment upon the past contract which may seem to you appropriate.

Sincerely yours, JOHN JACOB ROGERS.

Under date of May 15, Secretary Wilbur replied as follows:

THE SECRETARY OF THE NAVY,
*Washington, May 15, 1924.*

Hon. JOHN JACOB ROGERS,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN ROGERS: Replying to your letter of the 12th, I have to advise you that no contract has been made recently with a British concern in Manchester, England, or, for that matter, with any foreign concern, for cotton khaki cloth for the Marine Corps; furthermore, there is none in contemplation. An order was placed about a year ago, as you state, for some 500,000 yards of this cloth with a concern in Manchester, England. The contract for this material, which was approved by the department, was made in July, 1923.

In brief, the history of the situation is as follows: At the time this purchase was under contemplation American mills were fully occupied on production of staple goods. The department endeavored, by sending out specifications and invitations to bid to 55 manufacturers and dealers, by special letters to all concerns known to have fiber-dyeing apparatus, and by articles in trade papers, to obtain bids for this cloth. Bids were opened on April 9, 1923, and only one American manufacturer submitted a bid. This bid was submitted by the Amoskeag Manufacturing Co. at $0.642 per yard. This was approximately 100 per cent higher than the Marine Corps had previously paid for its khaki, even during war time, and was considered excessive. A quotation received from an English firm offered khaki suiting delivered in New York at $0.27 per yard. Adding the duty to this would bring this cost to only $0.37 per yard. The Amoskeag Manufacturing Co.'s bid, therefore, was approximately 80 per cent higher, and the Government stood to lose about $0.27 per yard if it was accepted; or, figuring it another way, the cost if purchased from the Amoskeag Manufacturing Co. would have been $321,000, whereas the cost purchased abroad, with duty, would amount to only about $185,000. However, no duty was paid, and the cost to the Marine Corps was therefore only $135,000.

Answering your inquiry as to the policy of the department, I have to advise you that the department naturally desires at all times to deal with American firms, and even at that time, with the wide differential in price, Secretary Denby did not authorize award to the foreign firm until he had consulted with Government experts and had been advised that no hardship could result therefrom to American manufacturers and workingmen, because of the fact, as I have said before, that the American textile mills were fully occupied on the production of staple goods.

I hope that the above information is satisfactory and what you require.

Sincerely yours, CURTIS D. WILBUR.

About the time I wrote Secretary Wilbur I had also written Maj. Gen. John A. Lejeune, commandant of the United States Marine Corps. On May 16 he wrote me the following letter:

HEADQUARTERS UNITED STATES MARINE CORPS,
*Washington, May 16, 1924.*

Hon. JOHN JACOB ROGERS,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN ROGERS: Replying to your letter of the 15th, I have to advise you that no contract has been made recently with a British concern in Manchester, England, or, for that matter, with any foreign concern for cotton khaki cloth for the Marine Corps; furthermore, there is none in contemplation. An order was placed about a year ago, as you state, for some 500,000 yards of this cloth with a concern in Manchester, England. The contract for this material, which was approved by the department, was made in July, 1923, and it is this contract that is now being discussed in the New England press.

In brief, the history of the situation is as follows: At the time this purchase was under contemplation American mills were fully occupied on production of staple goods. The Marine Corps endeavored, by sending out specifications and invitations to bid to 55 manufacturers and dealers, by special letters to all concerns known to have fiber-dyeing apparatus, and by articles in trade papers, to obtain bids for this cloth. Bids were opened on April 9, 1923, and only one American manufacturer submitted a bid. This bid was submitted by the Amoskeag Manufacturing Co. at $0.642 per yard. This was approximately 100 per cent higher than the Marine Corps had previously paid for its khaki, even during war time, and was considered excessive. A quotation received from an English firm offered khaki suiting delivered in New York at $0.27 per yard. The Government therefore stood to lose about $0.37 per yard if the bid of the Amoskeag Manufacturing Co. was accepted; or, figuring it another way, the cost of this material if purchased from the Amoskeag Manufacturing Co. would have been $321,000, whereas the cost purchased abroad was $135,000, no duty being paid. Had duty been included the cost would have been $185,000.

I hope that the above information is satisfactory and what you require.

Sincerely yours, JOHN A. LEJEUNE,
*Major General, Commandant.*

It should be noted that both letters call attention to the fact that the purchase was made about a year ago, at a time when American mills were fully occupied in the production of staple goods.

From the standpoint of business efficiency and economy Secretary Wilbur and General LeJeune unquestionably make out a strong case. Nevertheless the fact remains that the operatives at Manchester, N. H., where the Amoskeag Manufacturing Co. is located, had the pleasure of seeing Manchester, England, manufacture and furnish uniforms for our United States marines. I am not an Anglophobe, but I do not find it agreeable to contemplate the spectacle of American soldiers and sailors garbed in English-made fabrics.

As a side light on comparative costs of production in the manufacture of khaki cloth in Manchester, N. H., and Manchester, England, this instance is a classic. The English cloth could be imported to the United States, duty paid, at 37 cents a yard. Since the particular cloth was for the Marine Corps no duty was assessed. The price of the cloth, delivered in New York, was 27 cents per yard—about 42 per cent of the American bid. The low wage scale and cost of production in England

enabled the manufacturers to sell in the United States at a profit for 27 cents, whereas the American profit price was nearly two and one-half times as much. And what applies to cotton khaki applies to other British-made cotton cloth. This explains the competition from which we are now suffering at the hands of British textile manufacturers.

I feel very strongly that American soldiers should be clothed in American fabrics. Accordingly, upon receiving the quoted letters from Secretary Wilbur and General Lejeune, I wrote the former the following letter:

MAY 19, 1924.

The honorable SECRETARY OF THE NAVY,
*Washington, D. C.*

DEAR MR. SECRETARY: I beg to acknowledge with thanks receipt of your letter of the 15th instant relative to the cotton khaki cloth for Marine Corps uniforms.

You say that no further contract of this kind is "in contemplation." I feel very strongly that our Navy Department should not clothe our sailors and marines in foreign-made cloth. Would you not be able to announce that, barring unforeseen circumstances, you were opposed to the letting of such a contract in the future to any foreign concern?

Sincerely yours, JOHN JACOB ROGERS.

Up to the present time I have not received a reply thereto.

THE "LEVIATHAN" CONTRACT

Under date of May 28 last the Boston Post carried the following article:

[From Boston Post, May 28, 1924]

GAVE ENGLAND FAT CONTRACT ON "LEVIATHAN"

SHIPPING BOARD, DEMANDING PATRIOTIC AMERICANS USE AMERICAN SHIPS, SHOPS IN ENGLAND—BOUGHT ABROAD GOODS WHICH NEW ENGLAND MILLS COULD SUPPLY AND THEN REFUSES TO PAY DUTY

At a time when the United States Shipping Board is declaring that "patriotic Americans will travel on American ships only" and urging American shippers to patronize American ships the Shipping Board itself is revealed as refusing to take its own good advice.

An attempt by the officials of the Boston customhouse to collect $65,000 in duties from the Shipping Board shows that body prefers to deal with English firms rather than American manufacturers able to supply the same goods.

Some months ago the *Leviathan* needed a complete new outfit of bed sheets, blankets, towels, table linen, etc. American manufacturers and American jobbers have plenty of this material on hand.

BOUGHT ENTIRE SUPPLY IN ENGLAND

Nevertheless, the Shipping Board purchased the entire supply for the ship in England at a cost of several hundred thousand dollars and imported the goods through the port of Boston.

The shipment was so large that the duty amounted to $65,000. That charge was duly assessed against the Shipping Board, but because it was a Government agency the board was allowed to remove the goods on the promise to pay the duty later.

When no cash was forthcoming the Boston authorities made a demand on the Shipping Board. That body refused to pay the bill, saying their appropriation was exhausted.

It was then suggested that the customs department sue the Shipping Board for the $65,000. Finally, however, it was decided that this would be a useless move, as if the suit were successful the cash would come out of the United States Treasury anyway.

Therefore the Boston customs officials were directed to strike the bill from their books as "uncollectible."

TEXTILE INDUSTRY SLACK AT TIME

At the time when these goods were bought the textile industries of New England had run into a slack season. A contract of this kind—and every yard of the material furnished could have been obtained in New England—would have been a windfall to the New England mills and the cash would have been spent here.

Instead the English mills got the contract and the cash and also had the whole amount of duty due the Government waived.

And now the Shipping Board appeals to patriotic Americans to patronize American industry while they themselves do their shopping in England. The case of the *Leviathan* is only one instance where the Shipping Board spent their money in England rather than here. It may be that all their other ships were outfitted in the same manner.

I confess that I was disturbed at the facts set forth in this article. On May 30 I introduced a House resolution of inquiry, which I print herewith:

House Resolution 331

*Resolved*, That the chairman of the United States Shipping Board be requested to inform the House of Representatives:

(1) Whether, in connection with the renovation of the steamship *Leviathan*, purchases of certain supplies for said vessel were made in countries other than the United States.

(2) If the answer to paragraph (1) is in the affirmative, of what the purchases in question consisted; the prices therefor; the comparative prices at which similar commodities or articles could have been purchased in the United States; the total amount paid for foreign purchases; whether among the articles or commodities purchased sheets, table linen, towels, blankets, and other textile commodities were included; and if so, the value thereof; whether such purchases were made as a result of competitive bidding, and whether United States merchants or manufacturers were permitted to submit bids and did submit bids; what, if any, saving, with and without an allowance for customs duties, was effected by such purchases; and what amount of duty was assessed thereon, and at what port or ports.

(3) Whether, in connection with the renovation of any Shipping Board vessels other than the *Leviathan*, purchases of certain supplies for said vessels have been made in countries other than the United States.

(4) If the answer to paragraph (3) is in the affirmative, give the same details as those requested in paragraph (2).

I sent a copy of this resolution to Chairman O'Connor, of the Shipping Board.

Under date of June 5 I received the following reply from him:

UNITED STATES SHIPPING BOARD,
*Washington, June 5, 1924.*

Hon. JOHN JACOB ROGERS,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN ROGERS: I have your letter of May 31 inclosing copy of proposed resolution inquiring as to whether in connection with the renovation of the steamship *Leviathan* purchases of certain supplies for said vessel were made in countries other than the United States, and if so, in what the purchases consisted, prices therefor, etc.

In reply you are advised that the only articles involved in the $8,000,000 reconditioning of the steamship *Leviathan* which were purchased abroad were Irish linens, and these were purchased direct from the Irish Free State. It was found impossible to obtain the quantity and quality necessary to meet requirements in this country. The contract for furnishing these linens, however, was made to an American firm—Gimbel Bros.

Very truly yours, T. V. O'CONNOR, *Chairman.*

As the information contained in this letter was limited to the purchases for the *Leviathan*, I wrote a further letter to Chairman O'Connor asking for a reply to the third and fourth queries of the resolution.

Under date of June 13 I received a letter and memorandum from Mr. O'Connor, both of which I print herewith:

UNITED STATES SHIPPING BOARD,
*Washington, June 13, 1924.*

Hon. JOHN JACOB ROGERS,
*House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN: Referring to your letter of June 6 inclosing copy of resolution of Congress and asking for reply as to the third and fourth paragraphs thereof, I am sending herewith a statement on the subject prepared by the operating department of our Fleet Corporation, which I trust will give you the information you desire.

Very truly yours,

T. V. O'CONNOR, *Chairman.*

INFORMATION CALLED FOR IN PARAGRAPHS 3 AND 4 OF HOUSE RESOLUTION NO. 331, DATED MAY 30, 1924

Question (3). Whether, in connection with the renovation of any Shipping Board vessels other than the steamship *Leviathan*, purchases of certain supplies for said vessels have been made in countries other than the United States.

Only in connection with the renovation of the steamship *Republic*, which was completed in April, 1924, did we require bids to show the name and location of the manufacturer, and therefore it is known that one purchase was made (in the United States) of supplies manufactured in a country other than the United States.

Question (4). If the answer to paragraph (3) is in the affirmative, give the same details as those requested in paragraph (2).

(a) Of what the purchases in question consisted:

Napkins, doilies, tablecloths, and table tops—all considered as table linens.

(b) The prices therefor:

| | | | |
|---|---|---|---|
| 2,400 dozen No. 1 napkins, 24 by 24 inches | dozen | $7.76 |
| 333⅓ dozen No. 2 doilies, 13 by 13 inches | do | 2.36 |
| 154 each No. 3 tablecloths, 48 by 48 inches | each | 2.38 |
| 399 each No. 4 tablecloths, 48 by 70 inches | do | 3.48 |
| 41 each No. 5 tablecloths, 48 by 90 inches | do | 4.47 |
| 382 each No. 6 tablecloths, 60 by 60 inches | do | 3.75 |
| 17 each No. 7 tablecloths, 72 by 72 inches | do | 5.44 |
| 710 each No. 8 table tops, 36 by 36 inches | do | 1.37 |
| 1,905 each No. 9 table tops, 36 by 58 inches | do | 2.17 |
| 175 each No. 10 table tops, 36 by 78 inches | do | 2.90 |
| 1,545 each No. 11 table tops, 45 by 45 inches | do | 2.08 |

(c) The comparative prices at which similar commodities or articles could have been purchased in the United States:

As all bids were submitted by United States merchants, although on table linen to be manufactured in countries other than the United States, no data are available as to comparative prices.

(d) The total amount paid for foreign purchases:

The foregoing table linen cost $31,624.28 with a cash discount of 1 per cent for payment within 10 days, or $31,308.04 net.

(e) Whether among the articles of commodities purchased, sheets, table linen, towels, blankets, and other textile commodities were included?

Only table linens as detailed above were included.

(f) And if so, the value thereof?

The net cost of this table linen was $31,308.04.

(g) Whether such purchases were made as a result of competitive bidding, and whether United States merchants or manufacturers were permitted to submit bids and did submit bids?

This purchase was made as a result of competitive bidding, and United States merchants or manufacturers were permitted to submit bids, and in fact only United States merchants or manufacturers did submit bids. In all 16 bids were submitted by 10 United States merchants or manufacturers. Of these, one United States vendor submitted five bids on products the source of which was not indicated, although it is presumed that the linen would come from countries other than the United States, as one other offer by this vendor was for goods of Irish origin, and the vendor is an importer rather than a manufacturer. All other bids submitted were for linens to be manufactured by manufacturers located in Belfast, Ireland.

(h) What, if any, saving, with and without allowance for customs duty, was effected by such purchases?

As all bids received were for products to come from Belfast, Ireland, except those five which did not specify but which presumably offered goods to be of foreign origin, any saving as compared to probable cost of domestic linens is not available.

(i) And what amount of duty was assessed thereon and at what port or ports?

As these linens were purchased from Gimbel Bros., of New York City, and were delivered to us in New York City, they were cleared through New York customs; and while the duty was assessed against Gimbel Bros., we are given to understand that it was assessed at the rate of 40 per cent of the declared value.

The substance of the material thus furnished seems to be:

(1) As to the *Leviathan*, the only articles purchased abroad were certain Irish linens in a quantity and quality impossible to obtain of American manufacture. The contract for these, however, was made through an American firm.

(2) As to other Shipping Board vessels, the form of bidding does not in general require bids to show the name and location of the manufacturer. The steamship *Republic*, completed last April, is the only exception. For the *Republic* the only foreign-made goods were table linens, of a cost of about $31,000. These were purchased through an American firm.

THE WANAMAKER BLANKETS

Under date of May 8 last the New York Times carried a two-column display advertisement of the John Wanamaker stores. This advertisement read as follows:

[From the New York Times, Thursday, May 8, 1924]

The John Wanamaker Store News, formerly A. T. Stewart; store hours, 9 to 5.30; telephone, Stuyvesant 4700; Astor Place, at Ninth Street.

Extra sales people and selling space in the blanket sale for quick service.

America's greatest blanket sale opens to-day.

Here's the *Minnewaska* prize cargo: New woolen blankets from England's best mills, averaging 88 per cent wool; weighing 4½ to 5 pounds; size, about 60 by 90 inches; $3.75 each, or $3.50 in bale lots of 25 blankets for $87.50.

This is the best blanket news that has come to America since the memorable Wanamaker sale of Army blankets in 1919, when the public broke down a door in its eagerness to get into the store. To get the price so low it was necessary to buy more than a million blankets. But of these England kept the greater part for home and colonial consumption, only a limited quantity being allotted for American sale, of which this is the first public offering.

These are Oxford gray blankets in medium and darker shades, entirely different from the usual Army blankets. They are cheerful and fashionable in color, shading in the various grays now so much in favor. The fabric is like a heavy cloth, making it a blanket, a robe, a throw over all in one.

They were made for the British Government, but were never in camps, as they were manufactured since the armistice, some of them as recently as two years ago. To reduce unemployment England kept on making blankets after the war closed. Most of them are stamped lightly with the broad arrow—the British Government inspector's mark—showing that they have complied with the rigid specifications.

All the blankets are brand new—clean as a hound's tooth.

Everybody will want these blankets.

They are ideal for summer camps, summer homes, sleeping porches, summer hotels, house boats, yachts, boathouses, for automobile robes, for a throw down on the grass or beach for baby.

They are fine enough to use in any home, city or country.

They are without competition—price, quality, and usefulness considered. You couldn't get the same practical use out of a blanket costing less than $6 or $7. Yet these are $3.75.

Buy the blankets by the bale.

You then save 25 cents more on each blanket—a saving of $6.25 on the bale. All bales are uniform. You choose the sample, selecting medium or dark shades, and the blankets in the bale will be all alike—in color, weight, texture, percentage of wool.

No blanket less than 82 per cent wool.

The average is over 88 per cent wool, and that percentage is a splendid combination for warmth and wear. Not too heavy, but warm. And the cotton adds to the strength.

Order by wire, phone, or mail (phone orders call Stuyvesant 4700).

We expect to receive orders from all over America, once the good news gets around. Whether we can supply the demand remains to be seen. The *Minnewaska* and other steamers have brought 50,000 of the blankets. Other shipments will follow.

Sale opens to-day, Thursday, with four selling places: Motor entrance, new building; Astor Place subway entrance of downstairs store; rotunda, street floor, old building; and in the regular bedding store, first floor, old building.

New building open at 8 o'clock to-day for the convenience of those who can not get to the store later in the day.

To the merchants of America: We are prepared to offer similar blankets in wholesale lots. Wire or phone the merchandise bureau.

The blankets have a hundred uses.

While the sale in question in no way involved the United States Government as such, the transaction seemed of sufficient interest and importance to warrant an inquiry. A woolen concern in Massachusetts wrote me as follows:

The inclosed advertisement by John Wanamaker published in the New York Times of May 8, 1924, is forwarded to you as an illustration of conditions adversely affecting the New England textile industry at the present time. It gives its own story in sufficient detail, with the exception that it does not state that the goods offered are sold at retail at a price which can not be approached by any American mill even selling at a large loss. For comparison, these blankets, containing 88 per cent wool, are retailed, presumably at a profit to the importer, at a price approximately the same as the wholesale price of American-made blankets containing a mere suggestion of wool—about 7½ per cent. The quantity—500,000 blankets—is sufficient to prove a most disturbing factor in the local market and to create great uncertainty as to the possibility of liquidating existing stocks of goods at anything near cost, quite aside from a profit to the American manufacturer. The effect on production and continued employment of American textile workers can easily be inferred. This importation constitutes a palpable dump of surplus English goods, probably well below their cost abroad, and is the most unfair sort of competition.

Under date of May 23 I wrote Secretary Mellon the following letter:

MAY 23, 1924.

Hon. ANDREW W. MELLON,
*Secretary of the Treasury, Washington, D. C.*

DEAR MR. SECRETARY: As you are doubtless aware, there is extreme depression in the textile-manufacturing section of the country. In New England the depression in cotton manufacturing is especially serious.

A tariff resolution unanimously adopted at the semiannual meeting of the National Association of Cotton Manufacturers held in Boston, Mass., April 30 and May 1 last embodied the following assertions:

> "England's foreign trade has fallen off 40 per cent, as compared to pre-war period. In competing for the smaller volume of trade their manufacturers have cut their prices and, it is believed here, sold below cost, dumping their goods into this country in an effort to keep some of their people partially employed, even at a loss to themselves. English figures show that in the last three years the mills have lost $750,000,000 and are still losing at the rate of $5,000,000 a week."

Here is a direct allegation that English manufacturers are dumping their goods into the United States. If this can be established, it would seem to follow that section 201 of the antidumping act of 1921 would come into play. Will you kindly advise me what, if any, steps should be taken by the industry to put in motion the necessary machinery;

or whether, construing my letter as a request that you examine the question, you will be enabled to make "such investigation as he deems necessary" upon your own initiative.

Sincerely yours, JOHN JACOB ROGERS.

Later that day I sent him a copy of the Wanamaker advertisement and of the quoted letter relative thereto. I suggested in my letter that I thought he would agree with me that a strong argument for Executive action was presented by the showing. Under date of June 2 I was advised by the Treasury Department that the matter was being referred to the port of New York and that I would be advised further upon receipt of a report from the New York customs authorities.

Under date of June 13 I received the following letter and inclosure from Assistant Secretary Moss, of the Treasury Department:

TREASURY DEPARTMENT,
*Washington, June 13, 1924.*

Hon. JOHN J. ROGERS,
*House of Representatives, United States.*

MY DEAR MR. ROGERS: I refer to your letter of May 23 in regard to representations which have been made to you relative to injurious competition of English textiles, especially blankets which were the subject of a recent advertisement by John Wanamaker in the New York Times.

I am in receipt of a report from the appraiser of merchandise at New York, dated the 10th instant, and am inclosing a copy thereof for your information.

Very truly yours, McKENZIE MOSS,
*Assistant Secretary.*

—

JUNE 10, 1924.

The honorable the SECRETARY OF THE TREASURY.

SIR: Answering department reference (JDN 106085) June 2 of letter from Hon. JOHN JACOB ROGERS, House of Representatives, May 23, relative to the injurious competition of English textiles, especially of blankets, the subject of a recent advertisement by John Wanamaker in the New York Times, I have the honor to invite the attention of the department to a letter of this office dated June 5, 1924, reporting on this matter as follows:

> "The blankets referred to are British Army surplus stock bought at public auction held abroad and at the retail price of $3.75 are decidedly poor value.
>
> "This merchandise and previous merchandise of reclaimed Army stocks from France have been closely scrutinized, but investigation both here and abroad has not provided any reason to question the entered values.
>
> "The proper rate of duty is being assessed on these goods."

The antidumping act of 1921 applies only when the purchase price or the exporter's sales price is less than the foreign market value of the merchandise. Investigation abroad has proved that this is not the situation in regard to the importations referred to above.

Respectfully,

F. J. H. KRACKE, *Appraiser.*

If the allegation is correct that the blankets are "decidedly poor value" at $3.75, and if it is also demonstrable that the blanket purchase involved no element of "dumping" as defined by statute, it would appear that there is no remedy against the particular transaction under the antidumping act of 1921.

Underlying all of the incidents upon which I have commented must be the thought that American textile manufacturers and wage earners require for enduring prosperity tariff protection against low-priced foreign competitive goods. An examination of Department of Commerce statistics discloses that cotton cloth importations have multiplied about four and three-fourths times in 10 years in respect to quantity, and about five and one-half times in respect to value. Wool manufactures have multiplied about four times in the last decade.

Under date of May 12 I wrote the following letter to the chairman of the United States Tariff Commission:

MAY 12, 1924.

Hon. THOMAS O. MARVIN,
*Chairman United States Tariff Commission,*
*Washington, D. C.*

MY DEAR MR. CHAIRMAN: For the past year and more the whole country has been asked to sympathize, and has sympathized, with the plight of the western farmer. I am now asking the Tariff Commission to sympathize in a very practical way with the plight of the textile workers of New England.

I am sure I do not need to recite at length present textile conditions in New England. Both woolen and cotton mills are generally on about half time, some a little less, some a little more. Unemployment is general; inadequate employment, with consequently inadequate pay envelopes, is practically universal. There is no assurance of early improvement.

What is the cause? In an effort to answer this question I have had prepared by the Department of Commerce figures showing imports of the principal classes of textile manufactures for the calendar years 1913, 1919, 1921–1923. I will not weary you with a mass of statistics which are already doubtless accessible to you. But let me illustrate what these figures disclose. Imports of cotton cloth, including those not bleached, those bleached, those colored, printed, dyed, and woven figured, were as follows:

| Calendar year | Square yards | Value |
|---|---|---|
| 1913 | 46,563,568 | $8,922,214 |
| 1919 | 49,753,451 | 17,664,901 |
| 1921 | 106,308,379 | 29,428,210 |
| 1922 | 142,458,000 | 39,073,430 |
| 1923 | 219,010,307 | 47,188,033 |

From the foregoing it appears that cotton-cloth importations have multiplied about four and three-fourths times in a decade in respect to quantity and about five and one-half times in respect to value, and this in spite of the fact that the Fordney "protective" rates were in effect during the entire year 1923. The plain fact seems to be that the Republican protective law, in the textile world at least, does not carry truly protective rates. The foregoing figures conclusively dispose of the absurd assertions of the Democratic orators in the political campaign of 1922 that the Fordney rates were so high as to constitute a tariff wall. On the contrary, both cotton and wool import statistics established beyond cavil that the Fordney rates are wholly insufficient.

In terms of production it has been estimated that the total of 219,000 square yards of cotton piece goods imported in 1923, averaging 60 yards in length and 36 inches wide, would take the entire production of 36,500 looms a year. At 50 spindles to the loom, this would mean about 2,000,000 spindles, the equivalent in volume of the total output of all the mills at any one of our great textile cities of New England.

I will not go into wool statistics except to remind you that the total imports of wool manufactures have risen from $17,000,000 in 1913 and $19,000,000 in 1919 to about $69,000,000 in 1923—a fourfold increase. One of the most vivid illustrations of this difference in cost production in England and the United States was furnished last year in connection with the Navy Department contract for 400,000 yards of cotton khaki, out of which were to be made the uniforms of the United States marines. There were two bids which complied with specifications—the Amoskeag Co., of Manchester, N. H., of 64.2 cents, and the Spinner Co., of Manchester, England, of 39 cents. The Navy Department gave the contract to the English concern. The operatives at Manchester, N. H., had the pleasure of seeing Manchester, England, make the uniforms for the United States marines. I confess that to me it is not a pleasant spectacle when I contemplate the soldiers and sailors of the United States clothed in English-made fabrics. I am no Anglophobe, but the picture is to me not an agreeable one. However, this is not the point I wish to make here. I wish here to call to the attention of yourself and your commission the fact that the English concern underbid the largest American concern by 25 cents a yard. It is said, and I have no doubt said accurately, that England is shipping goods to the United States in the effort to keep her people employed even though the English mills are losing money. Their own figures are said to show that the English mills lost $759,000,000 in the last three years and are still losing at the rate of $25,000,000 a week.

It is, then, not strange that unemployment, short-time employment, pecuniary hardship, and unusual unrest are common, if not general, in New England to-day. What is the remedy? Obviously, to reduce the enormous flood of importations of textile manufactures. But how shall we reduce imports? Obviously, by increasing the duties thereon. Fortunately, the Fordney law gave power to the Executive to increase rates in the event that the Fordney rates proved inadequate to protect American industry.

I strongly urge that the appropriate machinery be set in motion under section 315 of the Fordney Act with a view to giving the textile industry added protection under the flexible clause of the Fordney law. As conditions are critical, I respectfully request that I be granted a hearing at the earliest possible moment and that the commission proceed as speedily as possible to afford relief.

We of New England are aware of the action of the commission in giving the benefit of the flexible clause because of wheat importations. We invoke the same remedy to alleviate the industrial distress from which we are now suffering.

Sincerely yours, JOHN JACOB ROGERS.

It is earnestly to be hoped that either by invoking the provisions of the antidumping law of 1921 or the flexible section of the tariff act of 1922 adequate protection shall be afforded the people of America. As I assert in my letter, the plain fact

seems to be that so far as textiles, at least, are concerned the Republican protective tariff law of 1922 does not carry sufficiently protective rates.

GERMAN RELIEF RESOLUTION

Mr. PORTER. Mr. Speaker, in any analysis of the deplorable conditions existing in Germany, and to a lesser degree in other European countries, we must not be unmindful of the fact that behind their present miseries is a background of centuries of racial, cultural, and religious antagonisms which we do not understand, but which influences every act of theirs.

Germany to-day is the broken link in the commercial life of the world, and in breaking she has strained other links almost to the breaking point.

Since the latter part of the year 1913, when the indications first pointed to war between the Central and Allied Powers, I have felt it part of my public duty to keep myself as well informed as possible regarding the social, political, and economic conditions in Germany. We have so many conflicting statements as to actual conditions in Germany that after the completion of my duties at Geneva, Switzerland, last October, I visited Germany for the sole purpose of checking up the voluminous reports on this subject which had from time to time come to my notice.

Our former colleague, Hon. Alanson B. Houghton, now ambassador to Germany, has devoted all of his splendid ability to a most intensive study of the German situation. I had the benefit of many conversations with him, the embassy staff, many of our consular officers, and through his introduction, with Chancellor Stressemann, of Germany, and others then in authority.

In Germany, as in many other European countries, the farmers live in small villages. The farms being very small farming is of the most intensive sort. The farms were in a high state of cultivation, and the livestock was mostly thoroughbred and well fed. Many houses have been constructed in the cities and villages since the war and others were in the course of building. It was rare indeed to see a house which had not been painted within the last two or three years. There was an air of prosperity, but, as in France, I noticed an almost complete absence of men of military age at work on the farms. The work was being done by men beyond middle life and by women and children. It was quite common to see a woman with several children working in the fields.

The railroads were in a most excellent condition; trains were on time, and the service was generally very good. The roadbed and rolling stock showed evidence of considerable work since the war, some of it being more ornamental than useful; in fact, Germany has built since the armistice more locomotives and freight cars than she needs. She has improved the terminals, tunnels, and bridges. It is the only railroad system in the world which is free of debt. The fall of the mark has enabled it to pay off its obligations as they became due.

With all this apparent prosperity laughter was unheard and the people seldom smiled. This mental depression was contagious and saddened all those who came in contact with it.

I spent several hours with Chancellor Stressemann and asked him about the apparent prosperity of the farmers, the highly improved condition of the factories, the large amount of building, and the efficiency of the railroads. He answered that at the close of the war Germany had 12,000,000 idle men, many of whom had served through the entire war and therefore lost the opportunity to learn a trade. It was imperative to provide work for them at once, and the improvements I saw were the result of that farsighted policy, which relieved Germany from adopting the dole system which had proved disastrous to Great Britain.

Edwin L. James, correspondent of the New York Times, gives the following as regards conditions in Germany:

First. Germany to-day represents the world's best-equipped and potentially most efficient industrial organization.

Second. Germany is to-day practically without a domestic debt, State or private, whereas the victor nations are heavily burdened with a domestic war debt.

Third. The Germans as a whole are paying less taxes than the English, French, or Americans.

Fourth. Germany, if she shouldered the total reparations bill, would have a smaller war debt than if she had won the war without indemnities.

Money as a medium of exchange was not necessary to the well-being of primitive man. True, the Indians used wampum, the ancient Swiss iron plates, and so forth, but they were only conveniences, they were not necessities. This is also largely true of the farmers of to-day, who, especially in remote sections, exchange their products, little, if any, money passing in the transactions.

Under modern conditions, however, in great industrial cities money as a medium of exchange is an absolute necessity. When the daily wage or salary fails to have purchasing power sufficient to buy food, clothing, and other necessities of life, hunger and cold follow, and revolution against the Government is inevitable.

The amount of marks outstanding, based on the pre-war value of the mark—about 22 cents—represents about 2,000 times the actual value of all the property in Germany. Last November the mark as a unit of value became utterly worthless, bringing about a state of affairs without parallel in history by causing a complete shifting of wealth from the creditor to the debtor class. The German courts held until quite recently that the mark was still legal tender, and every debtor paid off all his personal obligations, such as mortgages, notes, and bills payable which have fallen due during the last four or five years. Banks paid their depositors in the depreciated currency. The railroads, industrial establishments, and municipalities discharged their bonded indebtednesses in the same way. The German Government redeemed practically all of its bonds, amounting to 70,000,000,000 marks held by the German people, by payment with this worthless currency.

Many contend the officials of the German Government intentionally depreciated the value of the mark, hoping to escape in whole or in part the payment of reparations justly due the allied powers, others claimed it was not a willful act but a natural result of the war. The reparations agreed upon at Versailles were junior in lien to the Government bonds held by the German people. The fact that the German Government has paid off these bonds and thereby made the reparations a first lien on all the property in Germany in effect assuring their eventual payment is persuasive evidence that the destruction of the German currency was not a willful act.

The redemption of these bonds removed the principal argument of the German Government in support of its plea of poverty, as it leaves the property of Germany, estimated to be worth between $60,000,000,000 and $80,0000,000,000, subject to the payment only of reparations.

These unprecedented transactions have neither increased nor diminished the wealth of Germany, and the fact should not be overlooked that German property was not damaged during the war except a small portion in eastern Prussia.

To sum up, we have this most extraordinary situation: A great nation of industrious and frugal people, all of its industries intact, its Government and its people practically free from debt, except the reparations due the allied powers, with great industrial establishments enlarged, remodeled, and repaired since the war, with sufficient food, except cereals and edible fats, to supply its people with food, and great forests to furnish fuel for winter, a nation which has every element industrially, agriculturally, socially, and I might say financially, for the borrowing power of a nation free from debt is very large, to enable her to take her place again among the prosperous nations of the world, lies prostrate and helpless, with starvation stalking everywhere.

I have had the rare privilege of association with the nationals of many nations. I came to know them in their homes and in many other ways. I admire and esteem them all. The perplexing difficulties of the day are due to the rulers of these peoples and not the people themselves. I have long been of the opinion that whatever is left of white civilization is entirely due to the inherent integrity and patriotism of the masses of the people. Self-government has its faults, and they are many, but it has the paramount advantage over all other forms of government of being able to profit by its mistakes. The greater control a people have over their government the less likelihood of war; in fact, I know of only one instance in history where a Republic provoked a war. Therefore I do not wish anything I have said to reflect, even in the slightest degree, on the earnest and patriotic men and women of Germany who are honestly and sincerely trying to establish and maintain the Republic of Germany.

The monarchists of Germany, saturated with the divine-right idea, are the ones responsible; they brought on this world-wide catastrophe, with its enormous destruction of life and property, in the hope of forcing on the world their views of government. They have persistently, and I may say criminally, done everything within their power—and in this have been aided to some extent by the communists—to weaken and destroy the Republic of Germany in the hope that the German people in an agony

of despair will again return to the monarchy. They hold the balance of power in the Reichstag. The responsibility for the starvation in Germany rests entirely with this militaristic class. Many of them under the leadership of Stinnes and his associates have amassed enormous fortunes from the miseries of the German people. They have on deposit in foreign countries between one and one-half and two billions of dollars, 5 per cent of which would buy all the cereals and edible fats which their starving countrymen need. Surely they owe a higher duty to the German people than the American taxpayer, but the Government is too weak to compel them to disgorge. Their fixed policy is to starve the liberty lovers of Germany into subjection.

If it were not for these facts and my earnest desire to aid in the preservation of the Republic of Germany I would not vote for this resolution. We are under no obligation to help them, except that all fair minds must recognize that these starving women and children are not responsible for the conditions in Germany and are helpless to correct them. A republic in Germany will mean the peace of Europe; a monarchy in Germany under control of the junkers means another war the moment Germany has recovered from her losses of the last one.

In Germany many citizens lived on the income from their investments; all they have now is millions of marks which will not buy the necessities of life. They belong to a class who are more or less helpless when thrown on their own resources, and have sold their household goods, tapestries, paintings; in fact, everything of value for money with which to buy food and clothing; their condition is now one of abject misery, many of them being without food or clothing. This is especially true of the lawyers, physicians, clergymen, and scholars of Germany. Their salaries and the wages of workmen and clerks will not buy the necessities of life for their families. The farmers and trades people refuse the mark in payment of food and clothing, and the suffering among these citizens, especially among the children, is indescribable.

The testimony before the committee of Maj. Gen. Henry T. Allen, Dr. Wilbur K. Thomas, of the American Friends Service Committee, Prof. Ernest M. Patterson, University of Pennsylvania, and many others conclusively show that the reports from our diplomatic and consular officers as to the terrible conditions in Germany are fully justified by the facts that women and children are starving from undernourishment, which is followed by tuberculosis and other deadly maladies. Another fact which was not brought out in the hearings, but impresses me as one of very great importance is the danger of plague sweeping over northern Europe, which would destroy these weakened people by the hundreds of thousands.

It seems almost unbelievable that these frightful conditions should exist in a nation which is practically self-sustaining, a nation which is agriculturally and industrially as powerful and as well equipped as any other nation in the world, with an industrious and intelligent man power which, with her natural resources, made Germany before the war a powerful competitor in all the markets of the world. Yet these conditions do exist. Under the testimony the conclusion is inescapable. They exist as a direct result of the activities of the monarchists or militarists of Germany, who have been plotting and conniving to weaken and destroy the present Republic of Germany.

Only a small percentage of the great sums of money which they have on deposit in foreign countries would immediately relieve the suffering of their own people. They should not be permitted to accomplish their purpose. The misery and degradation of these helpless women and children came about through no fault of their own. They are the helpless and innocent victims of the war. They have no voice in the affairs of their government, nor had they any control as to the time and place of their birth. I am not willing to take the responsibility of saying by my vote that between three and four million of them shall be condemned to death by starvation by reason of the fact that the liberty lovers of Germany are endeavoring against tremendous obstacles created by the political and economic sabotage of the monarchists to establish a republic in that distracted country where every citizen, like in our own country, shall have a voice before Germany is again plunged into the horrors of war.

These are substantially the views expressed by President Wilson in his war message, with which I am in entire accord:

> We have no quarrel with the German people. We have no feeling toward them but one of sympathy and friendship. It was not upon their impulse that their Government acted in entering the war. It was not with their previous knowledge or approval. It was a war determined upon in the old, unhappy days when peoples were nowhere consulted by their rulers and wars were provoked and waged in the interest of dynasties or of little groups of ambitious men who were accustomed to use their fellow men as spies or set the course of intrigue to bring about some critical posture of affairs which will give them an opportunity to strike and make conquest. Such designs can be successfully worked out only under cover and where no one has the right to ask questions. Cunningly contrived plans of deception or aggression carried, it may be, from generation to generation, can be worked out and kept from the light only within the privacy of courts or behind the carefully guarded confidences of a narrow and privileged class. They are happily impossible where public opinion commands and insists upon full information concerning all the nation's affairs.

It is contended that the general welfare clause of the Constitution is not broad enough to permit the appropriation of this money for the relief of these women and children. It is a complete answer to this contention to say that Congress during the life of the Republic has passed 70 resolutions and bills granting relief to stricken peoples, of which 12 or more were for the relief of suffering abroad.

The force and effect of these repeated constructions of the Constitution by Congress is well stated in the case of Maynard v. Hill (125 U. S. Reports, p. 204):

> A long acquiescence in repeated acts of legislation on particular matters is evidence that those matters have been generally considered by the people as properly within legislative control. Such acts are not to be set aside or treated as invalid because upon a careful consideration of their character doubts may arise as to the competency of the legislature to pass them.

Also the case of Field v. Clark (143 U. S. Reports, p. 683):

> To what extent do precedents in legislation sustain the validity of the section under consideration, so far as it makes the suspension of certain provisions and the going into operation of other provisions of an act of Congress depend upon the action of the President based upon the occurrence of subsequent events or the ascertainment by him of certain facts to be made known by his proclamation? If we find that Congress has frequently, from the organization of the Government to the present time, conferred upon the President powers, with reference to trade and commerce, like those conferred by the third section of the act of October 1, 1890, that fact is entitled to great weight in determining the question before us.

### WHAT THE REPUBLICAN TARIFF COSTS THE TAXPAYERS

Mr. McCLINTIC. Mr. Speaker and gentlemen of the House, many of us here are deeply concerned over the fact that this Congress, after a session of six months, is adjourning without enacting any legislation for the relief of the hard-pressed farmers, who all over the land are laboring under very trying conditions. We have made strenuous efforts to induce the Congress to at least pass some helpful or palliative measure to relieve the situation until the aroused people, awake to the real underlying cause of their trouble, can force the permanent relief which can only come through a complete revision of the extortionate tariff rates which are sapping the earnings, the savings, and the very lifeblood of the people. Such a movement has already started, a nonpartisan effort backed by men of various political views, who agree on the economic importance of a sharp cut in the Fordney tariff rates, rates which represent the old standpat protectionism of Mark Hanna, but greatly exaggerated and fairly run mad in the excess of graft and gouge permitted. Among the forces getting under way should be mentioned the Fair Tariff League under the leadership of Mr. H. E. Miles, formerly of Madison, Wis., now having a research laboratory at 2 Rector Street, New York. Mr. Miles is a protection Republican whose sense of decency has revolted at sight of the profiteering going on under his very nose. He was for many years a manufacturer. Much of the moral and financial support he is receiving in his work comes from Republicans whose names appear on the literature of the League as officers thereof. Theirs is a patriotic effort to save the farmer and the general consumer from the vultures who are exploiting them. They take the position that this top-heavy tariff, piled far higher than can possibly be justified under any pretext of "protection to home industries" or "to equalize labor costs," is serving like the poisoned knife in that old story, in which the blade, poisoned on one side, in being used to divide the apple, gave health and refreshment to one while dealing out misery and destruction to the other.

All through the mass of material which will follow these introductory remarks one fact will stand out as a monument to the greed of the tariff barons—that while they raise prices and dividends freely they do not raise wages.

Mr. Miles, the head of the Fair Tariff League, has received the following letter from Mr. Gray Silver, the able representa-

tive of one of the largest and most important farmers' organizations in America:

AMERICAN FARM BUREAU FEDERATION,
*Washington, D. C., June 2, 1924.*

Mr. H. E. MILES,
*Chairman Fair Tariff League,*
*2 Rector St., New York, N. Y.*

DEAR MR. MILES: Permit me to congratulate you upon the good work you are doing in tariff studies. The American farmer knows he can no longer avoid a thorough study of the tariff and the application of the tariff.

It seems that about 90 per cent of our farm products are sold on an export or world-wide basis while their manufactured supplies are priced on the basis, in the main, of high protective duties, many of them so high as to be effective embargoes, although laid as tariff.

It is no longer a question with the farmer what his political tariff belief has or has not been in the past. The tariff is an economic problem vitally concerning our everyday welfare and of maintaining a relatively fair standard of living for agriculture along with other groups. In the main, we believe in tariffs when fairly laid. Therefore, it is necessary for the farmer to require that import duties be as low as may be consistent and that excessive duties that unduly raise prices of the farmers' purchases and unduly increase the profits of a few manufacturers shall be reduced.

For these and other reasons that I might mention, the tariff studies of the Fair Tariff League deserve, and I believe will receive, the proper consideration at the hands of American farmers regardless of their political belief, and simply because they afford a basis for independent judgment, coming as they do from a nonpartisan, independent group representative alike of farmers, labor, business men, women, and economists.

Very truly yours,

AMERICAN FARM BUREAU FEDERATION,
GRAY SILVER, *Washington Representative.*

Back in old Judea many centuries ago Jeremiah stood on the slope of a hill, in the shade of an ancient olive tree, and harangued a crowd gathered from about the countryside, and in his talk he chided them with being among those who, having eyes, yet saw not; and even unto this day that very human characteristic clings to the race. We are blind to our own interests; we do not see the simple basic facts which so deeply affect our pocketbooks, our every-day welfare, and even the outcome of our very lives.

I desire to lay before the lawmakers of this body and before the people who sent you here some of the facts lying at the very foundation of this crying question—the high cost of living. Interwoven with this question is the problem of the farmer who has to pay, under our existing "protective" system, fancy prices for all that he buys, but has to sell his surplus in what amounts to a free-trade market.

Before I proceed I desire to lay the ghost of the free trader. So far as this discussion goes, so far as Democratic platforms and policies go, there is no such thing as free trade. I do not believe there is a free trader in Congress; it is a number of years since I have laid eyes on one. Even Thomas Jefferson was not a free trader. There is, to be sure, an organization of free traders with headquarters somewhere in America. The entire membership is about 300. Almost all of the Democrats in America believe in a tariff to produce revenue to help run the expenses of the Government. It would be impossible to lay any sort of import duty on merchandise without that duty affording some measure of "protection" to the American manufacturer. If the duty is too low, large amounts of the foreign-made article will enter the country and the American manufacturer would naturally be forced to sell his wares at a lower price in order to compete with the imported goods. If the duty is too high, then it becomes prohibitive; no foreign goods enter, and the American manufacturer is "sitting pretty"—to such an extent that a combination among the American manufacturers of a given article is liable to make the consumer sweat. Under this latter condition, no revenue enters the Treasury to help the people pay governmental expenses.

At the present time the country is groaning under the burdens indirectly laid upon the backs of the people by the Fordney tariff law, the highest taxation law ever hung about the necks of a people who like to think of themselves as free but who are in reality being exploited day and night by the conscienceless crowd of captains of industry who put up the big campaign funds for a political party and get their returns in the shape of a tariff rate on the sort of articles they manufacture sufficiently high as to choke off competition. It is my purpose to-day to set forth the facts as tersely and plainly as possible, so that all may clearly see the underlying reason for the present high cost of living and sense the remedy therefor. I desire to show why everyone who sells to the farmer can get a good price and why the farmer himself can not. Right there lies the greatest danger that has ever faced the country in war or in peace. If agriculture is to be allowed to decay in this country, it is unnecessary for me to paint a word picture of the dread things which will keep pace with and dog at the heels of such a melancholy condition. One would perhaps think that self-interest would choke off the greedy pack now profiteering off of the luckless consumer; but no sign of compunction, moderation, or ordinary caution can serve to halt the feast. Millions are being piled upon millions, until the coffers of the Steel Trust, the Woolen Trust, the Lumber Trust, and thousands of manufacturing concerns are bursting with gains, while hundreds of thousands of farmers are going to the wall through the bankruptcy courts, abandoning their farms, or holding on "by their eyebrows," so to speak. And in the towns and cities men and women are wearing out their lead pencils trying to figure how to make buckle and strap meet. Children are being taken from school in order that they may add something to the family income to meet the unusual burden.

The country is rejoicing, after a long and hard fight, at a reduction of our income taxes to the tune of $400,000,000, but there is no agitation for a reduction of $3,000,000,000 which could be made in the cash expenditures of the people by a reasonable reduction of our tariff taxes. Even after such reduction we would still be paying heavy tribute and be living under one of the heaviest tariff burdens of any people in the world.

It seems to be the irony of fate that those northern farmers who have for many years, as a part of their political religion, voted the Republican ticket should now be among the keenest sufferers from the effects of the legislation which their party has always espoused, and which it has saddled on the people repeatedly. It seems strange, at first glance, that an economic question should be made a political issue, but it has greatly profited the campaign chest of the Republican Party to legislate for the benefit of the wealthy manufacturer, for if he can make ten millions more in a year, he can readily afford to give the party a million every four years. The farmers of Iowa, the most magnificent agricultural domain in the world, recently, in their unrest, chose a near-socialist to represent them in the Senate; perhaps they would have done better to send there a well-schooled professor of economics. Their trouble is really an economic one, administered to their coming destruction by a political organization which trades off tariff favors for campaign support. The people of Iowa are paying about $96,000,000 per year tribute to the tariff Moloch, while the benefits they receive from the tariff laws go exclusively to some pearl-button factories along the Mississippi and Des Moines Rivers and to some small underwear and overall factories. How long can the people of Iowa stand the gaff without finding out what is hurting them? What is true of Iowa is true in greater or less degree of all the States of the South, Middle West, Northwest, and far West.

Mr. Speaker, I desire to quote freely from the published matter issued by the Fair Tariff League. I am sure that all of the following material will be of great interest and benefit to the public mind—reawakening on this vital subject. Incidentally I desire to testify my appreciation of the cooperation of Mr. Gray Silver, Mr. H. E. Miles, of the Fair Tariff League, and Mr. Wallace Bassford, who was for years secretary to Speaker Clark and now one of the employees of the House, who has put in much valuable work on this compilation.

WHAT THE TARIFF DOES TO IOWA, MINNESOTA, NEBRASKA, KANSAS, COLORADO, WASHINGTON, OREGON, IDAHO, UTAH, AND TEXAS

These States are representative of the great central and western agricultural regions of America. In the story of one or another of them can be read the story of every central and western State.

They are typically agricultural. With them manufacturing is the handmaid of agriculture, devoted to the maintenance and extension of their present general facilities, to the improvement of their agriculture, and the marketing of their food products.

With their sister States of like sort they are the heart of the Nation. Except as they prosper there can be no permanent national prosperity.

They have suffered extremely since the war because of the disparity between the selling prices of their farm products, which have been substantially that of pre-war days, and the high prices of the manufactured products they buy, which are

50 per cent above pre-war. The farmer's dollar is a "73-cent dollar." To-day his dollar buys of other commodities only what he got for 73 cents before the war.

So great is the agricultural distress that about 1,250,000 farmers have left the farms for the cities in the last two or three years, and innumerable farmers and their banks have become bankrupt.

Farmers have been trying to raise their selling prices by all sorts of legislation, and in vain, because our farmers produce on an export or international basis and American laws are without price-lifting force in foreign countries.

It is time to see to what extent tariff favoritism is pure graft and exploitation, not at all due to honest protection of American labor and industry, in which principle almost all of us believe.

Congress has decided that the American Constitution will not permit of such seizure of consumer's funds, and their conversion by legal subtleties into the pockets of others, even the neediest of farmers, as was contemplated in the recent McNary-Haugen bill, which was not rejected by many of the farmers' real friends until this fact was accepted.

The time has come not to "level up" by special legislation but to "level down" to a basis of enduring prosperity in which alone American farmers can share and to take our place among the nations of the world as its strongest and richest leader and support, to our infinite social, intellectual, and pecuniary betterment.

It is time to realize that whatever virtue is in this principle of protection, like the moral code, depends not upon its statement, nor in blind belief, but in its application and use.

It is in this spirit that the following study is made:

When American farmers hear that the agricultural schedule adds, as estimated by the American Farm Bureau Federation, $125,000,000 to their incomes as a whole, they are likely to say, "That's where we come in." If imaginative, one of them may buy another automobile, a new dress for his wife, or forget about his past-due mortgages and get his first good night's sleep in a year.

The present purpose of this study is not to ascertain "where the farmer comes in" but "where he comes out" on the tariff, and among other things, to show who gets the above alleged $125,000,000, which we may carelessly suppose to be somewhat evenly distributed among our farmers. Also to show the $1,500,000,000 that farmers lose on the tariff above the requirements of honest protection, and who get this $1,500,000,000 from our farmers and another $2,000,000,000 from the other two-thirds of our population.

It is agreed by agricultural economists that 90 per cent of all American farm products are produced upon an export or free-trade basis.

The only considerable exceptions are wool, sugar beets and sugar cane, flaxseed, hard spring wheat in Minnesota, the Dakotas and Montana, and occasionally milk and butter. On other products the American farmers' price is usually less than if he produced in free-trade England, because he exports his surplus at the European prices less the cost of 4,000 miles of transportation, and his net export price is his domestic price. He can not sell part of his crop for export at one price and another part for home consumption at another price.

Railroads necessarily lay a heavy hand upon the products of these States, because of the long haul both on their exports and on their purchases. The unreasonable, if not dishonest, tariff on steel and other railway equipment, and the high wages for operation that must be paid because of our high cost of living, unnecessarily increases the railways' costs of operation $500,000,000. This is a burden upon these States which they should not be required to endure.

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO IOWA

[Census 1920]

| | |
|---|---|
| Population | 2,404,021 |
| Farmers | 984,800 |
| Woolgrowers | 30,455 |

*Agricultural schedule*

| Crops | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|
| Wool | $500,000 | $2,708,200 | $3,902,800 | $6,611,000 | $300,000,000 |
| Sugar beets | | 1,969,600 | 2,838,400 | 4,808,000 | 216,000,000 |
| Flaxseed | 22,000 | 295,500 | 425,500 | 721,000 | 30,000,000 |
| Lemons | | 98,300 | 142,000 | 240,300 | 10,000,000 |
| Tobacco | | 167,400 | 241,300 | 408,700 | 53,000,000 |
| Total | 621,000 | 5,239,000 | 7,550,000 | 12,789,000 | 609,000,000 |

| | |
|---|---|
| Farmers as consumers lose on agricultural schedule | $5,239,000 |
| A few farmers gain | 621,000 |
| Loss to farmers on agricultural schedule, net | 4,618,000 |
| The State as a whole loses on agricultural schedule, net | 12,168,000 |

Farmers lose on their agricultural schedule $8.50 to $1 of gain.

The State loses on agricultural schedule $20 to $1 of gain.

*Manufacturers' schedule*

[On the basis of one-half duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $4,924,000 | $4,967,000 | $9,891,000 | $375,000,000 |
| Light steel products | 7,386,000 | 10,644,000 | 18,030,000 | 750,000,000 |
| General store merchandise | 23,653,000 | 24,044,000 | 47,697,000 | 2,475,000,000 |
| Total | 35,963,000 | 39,655,000 | 75,618,000 | 3,600,000,000 |

| | |
|---|---|
| Loss to farmers (manufacturers' schedule) | $35,963,000 |
| Loss to State (manufacturers' schedule) | 75,618,000 |

Farmers lose, on all schedules, net $40,581,000, or $67 to $1 of gain.

The State loses, on all schedules, net $87,786,000, or $140 to $1 of gain.

With a population of 2,404,021, including 984,800 farmers, the State's only substantial gain—$590,000—goes to 30,455 woolgrowers, or 1 resident in 78, and 1 farmer in 32, and to 747 growers of flaxseed who get an average of $2.45 each in tariff benefits.

IS THE TARIFF ADDED TO PRICES?

Alexander Hamilton, the "father of protection," declared frankly that tariff duties "amount to a virtual bounty on domestic fabrics." Said Henry Clay, in 1833, the great protectionist of his time: "The duty upon an article forms a portion of its price." Said John Sherman, in 1869, another great protectionist: "As a general rule the duties upon imports operate as a tax upon the consumer."

Said Chairman McCumber, in pleading for the Fordney duty on wheat:

> We want higher prices. When our crop of hard northern spring wheat is short we add all the duty to our prices. When the crop is abundant we add half the duty.

Said the United States Tariff Commission:

> Whenever any article that is manufactured here is continuously imported in any considerable quantity, the tendency of the tariff is to make the price of the domestic product, as well as the imported article, equal to the foreign price plus the duty.

The question, Do manufacturers and others add the tariff to their prices? is answered by the question, Can they? If they can, they do. If they can not, they do not. Many can and do.

Manufacturers are like other men. A few years ago farmers got $2.50 per bushel for their wheat because they could. That they thought they ought to does not change the fact. Now, they get 85 cents at the farm, because they can not get more, although this is below the cost of production.

Manufacturers in many lines object seriously to the tariff, knowing it to be grossly overprotective and in the long run against every one's best interest. It is the few who, by price control or otherwise, have millions to make by excessive duties who fight for and get excessive rates, whether in manufacturing, wool, sugar, or what not.

The entire tariff on wool and sugar is added to prices, as shown elsewhere, although only one-half of the sugar tariff reaches American sugar growers. Also, in Western States, where most of our wool is grown, the duty goes not to farmers but to grazers of wild lands, who often, however, raise fodder for periods of storm in the North or drought in the South. Also the wool duty is not fully effective on particular qualities for brief periods when the market is temporarily overstocked on that quality.

American producers of heavy steel products add the entire tariff to their prices, and often freight also from Europe on competing imports. To estimate, as in the tables herewith, that only one-half the duty is added is to leave a large margin of full tariff charges to offset instances elsewhere where less than one-half the duty is added.

Tariff charges in chemicals, in lead, acetylene and welding gases, and other industries not included in these studies will offset possible overestimates in any articles here enumerated.

In light steel products it is estimated that only one-half of the tariff is added to prices. In some, like locomotives, automobiles, and foundry products, none of the tariff given to the particular industry is added. Domestic competition prevents.

In others, like aluminum, files, and certain hardware, from two-thirds to all of the tariff is added.

In all cases the cost to the manufacturers of highly finished steel products, like hardware and farm implements, of the bar steel and iron they use is increased about 40 per cent by the tariff, and that increase is passed on with additions for the cost of further manufacturing. This largely increases the price of every steel product to the consumer, adding, for instance, some $75,000,000 to the cost of farm implements at retail, although these implements are themselves on the free list. When, in addition to this steel charge, industries like cutlery, files, saws, and electrical machinery add all or a considerable part of the duty given the industry itself, and these additions are doubled at retail, the final tariff cost is great.

This pyramiding of the steel tariff corresponds to that in wool, noted elsewhere, whereby the wool duty is necessarily trebled to retail purchasers of wool clothing.

Conditions governing the item of general merchandise in the tables correspond to those in light steel products.

The estimated addition of one-half of the duty to prices allows much less than the tariff rates given in the so-called low tariff of 1913 on manufactured products. If any industry denies that it adds this one half, let it explain why it demanded the other half, and why so many manufacturers fought for the other half, often by misdirection and chicanery. Let them petition the President to reduce their present rates one-half, as he is authorized to do upon submission of facts. Such petitions would have more effect than loose and general denials.

As retail prices usually are double factory costs, owing to the many hands through which the merchandise passes to the consumer and the many additions of costs and profits, the tariff added by manufacturers is doubled in consumer's prices.

In other pamphlets the Fair Tariff League analyzes general merchandise as sold in our stores to the amount of $30,000,000,000 and $5,000,000,000 of steel and iron products, indicating how many industries add all or the greater part of their duties to their prices. Some have recently been indicted and some sent to jail for price fixing—for adding all they could to their prices. Some, like steel, aluminum, and plate glass, determine their domestic prices by adding to foreign prices the tariff and also freight to America on foreign products, and sometimes more for good measure.

GOVERNMENT REVENUE VERSUS PROFITEERING

An analysis of approximately $30,000,000,000 of retail merchandise shows that only 2.7 per cent, or $2.70 out of each $100 sold, is imported. The Government, therefore, collected duties on only $2.70 of imports, while domestic manufacturers, so far as their duties are effective, collect for their own uses on the other $97.30 out of each $100.

The Government collected in 1921, $153,360,000 on imports, while Congress made the present tariff with such utter carelessness as permits domestic manufacturers to add to their prices above the prices of foreign competitors $5,139,000,000 if only these manufacturers by price agreements, combinations, and trusts can make the public pay these higher prices. Under this new tariff more revenue is collected, but at far greater cost in general prices.

Of course, this congressional tariff provision of $5,139,000,000 is preposterous in amount. Many manufacturers making farm implements, clothing, automobiles, and other keenly competitive products can make little or no use of it, because competition will not let them. Many great aggregations do, however, add all or a great part of their tariffs to their prices.

And each dollar added to factory prices becomes $2, on the average, by the time it reaches the consumer through the successive hands of jobbers and other distributers.

AGRICULTURE

American farmers are so hurt by the present tariff, and so few of them get any worth-while advantage from it, that some may think that a close analysis of their tariff rates is unkind or inconsiderate. It is best, however, to determine as closely as may be what each tariff rate means both on farm and other products.

To the farmer the controlling tariff fact is that nine-tenths of American agricultural products are sold on an export or free-trade basis. This is the careful estimate of the Bureau of Farm Economics and other authorities.

Farmers can not sell part of a crop for export at one price and the remainder for home use at another price.

With nine-tenths of American crops depending for their prices upon competition with the people of all countries, including peasants, coolies, and peons, the tariff even on the other tenth means little to anyone except in rare instances.

If the few really protective agricultural rates meant much to farm profits generally, more farmers would grow the protected crops. The fact that they do not shows how little net value there is even in those rates. Some farmers in the best sugar-beet regions, for instance, will not grow sugar beets. And no wool tariff has materially increased production. We raise about the same number of sheep as 50 years ago, although consumption has increased manyfold.

The tariff benefits almost no farm products in substantial measure, except wool, sugar, hard spring wheat, flaxseed, and for a few years to come, lemons. Farmers must pay their proportion, about one-third, of the tariff charges of all farmers, manufacturers, and others who can add their tariff grants to their prices. That total now approximates $5,000,000,000 annually. It is necessary, therefore, that American farmers learn to what extent this burden of indirect taxation is either necessary or justifiable.

It is believed that fully $3,000,000,000 could be taken from this burden, to the general relief, and leave us adequately protected.

WHEAT

It is everywhere agreed that the price of American wheat is fixed in Liverpool, the central market, where the exports of all countries meet. An exception, however, is to be made respecting the premium grades of hard spring wheat, raised almost exclusively in the Dakotas, Minnesota, and Montana.

This extraquality hard spring wheat is needed for admixture with the softer wheat, which we grow in abundance. When these Northwestern States have bumper crops they get no advantage from the tariff. When they are short, enough must be brought in from Canada to make up the deficit, in which case these Northwestern States add from half to all of the tariff—until recently 30 cents per bushel—to their prices. Senator McCumber, of North Dakota, chairman of the Senate Finance Committee, made this clear in his plea for the tariff on wheat, claiming that on the average of the years these Northwestern States added about one-half of the tariff to their prices.

In its report to the President in March, 1924, the United States Tariff Commission says:

> Only in seasons of exceptional shortage has the (recent) 30 cent duty been added to prices.

In August, 1923, the price of hard winter wheat in Minneapolis was $1.15 per bushel, against 95 cents in Winnipeg—a clear case of 20 cents effective protection at that time, or two-thirds of the duty, continuing through the year 1923.

The recently established duty of 42 cents is lessening the millers' demand for this quality and causing the substitution of the best of the virtually nonprotected winter wheats, and therefore not more than 25 cents is likely to be added to northwestern prices by this 42-cent duty. No increase in price has occurred to this date—May, 1924.

Furthermore, much of this hard northern wheat is in grades 2 to 5 and gets less tariff benefit than No. 1.

In the four years July 1917–1921 the Northwest crop averaged 47 per cent No. 1 and 53 per cent Nos. 2 to 5. The 1923 crop was exceptionally bad.

As a liberal estimate we figure that Minnesota will gain about 25 cents more on her choicest grades and less on low grades per bushel from the recent tariff, or about $5,000,000 on a crop of 20,000,000 bushels, and less if her tendency of many years to lessen her wheat production continues.

Her acreage in this hard northern wheat in 1921 was 2,324,000 acres, yielding 21,639,000 bushels, or about 9 bushels per acre. In 1922 this acreage was 1,609,000 acres, yielding 21,489,000 bushels. In 1923 it was 1,417,000 acres, yielding 17,492,000 bushels, or about 12 bushels per acre.

As says the Tariff Commission—

> The difference between the Canadian and the American low-cost producers is comparatively narrow. The American low-cost producers require little protection.

The average yield in these Northwestern States for the four years 1920–1923 was only 11.2 bushels per acre. Growers who were far below this average will find even the present duty inadequate.

In passing it may be noted that Minnesota herself consumes one-half of her crop, including in that consumption her use of seed wheat.

As the annual production of this premium hard northern wheat in Montana, the Dakotas, and Minnesota is about 140,000,000 bushels, the tariff gain to these four States is about $35,000,000, which costs about 20 per cent more to consumers at retail, or $42,000,000, being about 40 cents per capita, of which farmers pay 30 per cent, or $12,000,000. This, provided the $42,000,000 is not further increased by the makers and distributers of bread.

CORN

The United States produces about 3,000,000,000 bushels of corn annually, or three times more than all the rest of the world. An average of 40,000,000 bushels was exported annually from 1911 to 1920 as corn and corn meal. In 1921 our corn exports amounted to about 180,000,000 bushels. In addition to this, about 200,000,000 bushels of corn were exported as pork and lard, a total of about 380,000,000 bushels.

Imports of corn in this period averaged about 5,300,000 bushels per year, or 1 bushel imported to 50 bushels exported and 600 bushels produced.

In 1918 imports were 1,992,161 bushels, in 1919 they rose to 11,212,000 bushels, and in 1910 to 7,784,482 bushels. At times during this period our excessive war prices obtained. These high prices and the fact that the greater part of the 1919 crop was so soft and moist as to be unmerchantable induced these larger imports.

In nine months of 1921 imports fell to 151,113 bushels. In the 10 months ending with March, 1924, imports were 145,031 against our crop of some 3,000,000,000 bushels.

Argentine corn is "flint corn" of the hard variety we feed to pigeons. It is extra dry and has less starch content than our corn. For these reasons, as we are told by those who imported 75 per cent of all corn imports in recent years, they do not want Argentine corn, although to-day it is considerably below our domestic price. When they do import it they export the products they make from it and get a rebate of the duty on this Argentine corn when they export the manufactured products.

The price of corn in the Argentine, where only we could feel competition, is usually well above the price in New York, duty paid. Argentine exports must meet our exports in Europe, thus giving her in her price the benefit of the cost of ocean carriage to us on our exports, or 13 cents a bushel.

Eighty per cent of our corn crop is fed on the farms, and the farmer gets his return from this corn in the price of his meat products. On only 1 bushel out of each 5 produced is the cash price of the corn of immediate consequence.

Our tariff on corn has a sentimental value which may rarely affect domestic prices by from 1 to 5 cents. It is too uncertain, however, to be calculated.

The company which has imported three-fourths of all the corn imported in 10 years says that Argentine corn "is flint corn, lacking in starch and relatively undesirable."

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO MINNESOTA

[Census 1920]

| | |
|---|---|
| Population | 2,387,125 |
| Farmers | 897,181 |
| Sugar growers | 426 |

*Agricultural schedule*

| Crops | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|
| Wool | $286,000 | $2,467,500 | $4,098,000 | $6,565,500 | $300,600,000 |
| Sugar beets | 5,000 | 1,795,000 | 2,980,000 | 4,775,000 | 216,000,000 |
| Wheat | 5,000,000 | 360,000 | 595,000 | 955,000 | 42,500,000 |
| Flaxseed | 1,022,000 | 269,000 | 447,000 | 716,000 | 30,000,000 |
| Lemons | | 89,000 | 149,000 | 238,000 | 10,000,000 |
| Tobacco | | 152,500 | 253,000 | 405,500 | 53,000,000 |
| Total | 6,313,000 | 5,133,000 | 8,522,000 | 13,655,000 | 651,500,000 |

| | |
|---|---|
| A few farmers gain | $6,313,000 |
| Farmers as consumers lose on agricultural schedule | 5,133,000 |
| Gain to farmers on agricultural schedules, net | 1,180,000 |
| The State as a whole loses on agricultural schedule, net | 7,342,000 |

Farmers gain on their agricultural schedule $1.20 to $1 of loss.

The State loses on agricultural schedule $2 to $1 of gain.

*Manufacturers' schedule*

[On the basis of one-half of duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $4,486,000 | $5,215,000 | $9,701,000 | $375,000,000 |
| Light steel products | 6,729,000 | 11,174,000 | 17,903,000 | 750,000,000 |
| General store merchandise | 21,532,000 | 35,759,000 | 57,291,000 | 2,475,000,000 |
| Total | 32,747,000 | 52,148,000 | 84,895,000 | 3,600,000,000 |

| | |
|---|---|
| Loss to farmers, manufacturers' schedule | $32,747,000 |
| Loss to State, manufacturers' schedule | 84,895,000 |

Farmers lose, on all schedules, net $31,567,000, or $15 to $1 of gain.

The State loses, on all schedules, net $92,250,000, or $14 to $1 of gain.

With a population of 2,387,125, including 897,181 farmers, the State's only substantial gain, $1,313,000, goes to 24,238 woolgrowers, or 1 resident in 98 and 1 farmer in 37, and to 426 sugar growers; also to 20,458 growers of flaxseed, who get an average of $50 each in tariff benefits, being 1 farmer in 437 and 1 resident in 116, and to wheat growers in large numbers an amount of gain.

WOOL

With all their protection for 50 years the number of sheep in the United States steadily declines, as compared with the population. We now import two-thirds of our requirements of wool. This because sheep are raised in quantities only on waste lands good for little else. Advancing civilization in all countries always drives sheep farther and farther back upon less and less valuable lands.

It is agreed everywhere that every cent of the tariff on wool is added to its price and goes to the grower. This because we import more than half our requirements, and the import price, duty paid, becomes the domestic price.

It is also agreed by the research bureau of the American Farm Bureau Federation, an organization of 1,000,000 or more farmers, the United States Tariff Commission, and other authorities that the present tariff on wool of 31 cents per scoured pound is equivalent to about 12.7 cents per grease pound, and nets American woolgrowers about $37,500,000. From this wool tariff 30,455 woolgrowers in Iowa get $599,000, or $20 each, while Iowa farmers as a whole lose four times more as wool users than a few of their number gain. Minnesota's few woolgrowers gain $12 each, or less than their loss in clothing their own families, while Minnesota farmers as a whole, as wool users, lose $2,181,500 net from the wool duty. In Nebraska 4,244 woolgrowers gain $148,200, or $35 each, while her 584,172 farmers as a whole lose $1,458,300 net. In Kansas 7,795 woolgrowers gain $175,026 from the wool tariff, or $22 each, while her 165,286 farmers lose net as consumers of wool $715,668, and the State as a whole loses $1,432,176.

In Colorado and Utah the situation is different, because woolgrowing is there a great industry.

Colorado sheep raisers on her wild lands gain $397,000 from the wool duty, most of this gain going to a few big flockmasters; also her farmers in the Greeley district and the Arkansas Valley fatten great numbers of lambs from the mountain ranges of New Mexico, Colorado, Wyoming, and Idaho, with a gain of another $307,000 from the duty on the wool of these lambs. This gives Colorado a total tariff benefit of about $614,000, with an offsetting loss to her people as consumers of wool of about $1,852,000.

Utah growers of sheep on wild and desert lands gain $1,027,000 from the wool duty, while her farmers here and there fatten a few old ewes and lambs for market upon which they gain at most $257,000 from the wool duty.

This leaves Utah about even on the wool tariff, a few of her people gaining from it all told $1,284,000, against which her people as a whole lose $1,235,500. A few big woolgrowers gain; the public pays.

THE COST OF THE WOOL TARIFF

The wool tariff costs American consumers $300,000,000 in their wool clothing and other purchases of woolens.

It is reasonable to allow for the cost of doing business and profits a mark-up to the wool buyer of 10 per cent, the spinner 15 per cent, the cloth manufacturer 17½ per cent, the clothing manufacturer 22½ per cent, and the retailer 33⅓ per cent—all these percentages based on selling prices.

The successive addition of these percentages multiplies the original duty of 31 cents a scoured pound by 3.06 times and makes it cost consumers about 95 cents in their clothing and other purchases.

CATCHING THE FARMER

Our annual consumption of wool as given in the Census of 1919 is shown in the following table, together with the rates of duty on virgin wool and on cheaper wool products and the total first cost of the duty.

*The cost of the wool duty*

| Article | Annual consumption [1] | Duty per pound | Amount of duty |
|---|---|---|---|
| | *Pounds* | *Cents* | |
| Wool, mohair, and animal hair | 292,117,556 | 31 | $90,556,442 |
| Rags | 46,453,109 | 4 | 2,787,187 |
| Recovered wool | 33,163,666 | 7 | 2,321,479 |
| Wool in the form of imported goods | 18,302,205 | 31 | 5,673,683 |
| Total | 390,036,566 | | 101,338,771 |

[1] Census of 1919.

This total multiplied by 3.06, which is the number of times that the duty pyramids as shown above, gives the total cost of the wool duty—$310,696,636.20.

The consumer pays $8 for each dollar of tariff benefit given woolgrowers.

There are various contingencies both ways to change this total slightly. It is safe, however, to accept of a final estimate of $300,000,000, or $2.75 for each man, woman, and child in the United States.

"The present wool duty of 31 cents per scoured pound begins with a very low ad valorem equivalent on very high-priced wool suited for very high-priced clothing. As the lower-priced wools are reached the duty rapidly rises until it soon passes beyond the purchasing power of the consumers and becomes an embargo of 100 to 200 per cent on the bulk of the wool suited for the clothing of people of moderate means. Then the adulteration of raw material becomes a necessity, cotton, inferior grades of wool waste, shoddy, and other substitutes take the place of the wool that the duty of 31 cents a scoured pound excludes from the country, the deterioration of cloth in wool clothing becomes the rule, and the people, for whose welfare tariff laws should be framed, pay a higher price for inferior clothing and suffer not only from the discomfort of inferior garments, but also from exposure to a climate in which the protection of wool is a necessity of life" (Carded Woolen Manufacturers' Association). A popular khaki wool shirt, for instance, is 85 per cent wool shoddy and 15 per cent cotton, with no virgin wool in it, yet it retails in New York, Denver, and elsewhere for $4.50.

A study of the imports of wool from September 15 to December 29, 1923, shows that the duty varied from 16½ cents a pound to $1.47. The average duty was 62.4 per cent, ranging from 21 per cent to 188 per cent. The highest rate was on the cheapest wool, used by the poor, and the lowest rate on the costliest wool, used by the rich.

That the present wool tariff averaging 68 per cent is very profitable to those who raise wool in large quantities is clear. How profitable is it to any State as a whole? Less than 1 per cent of our farmers raise sheep in commercial quantities, while everyone wears wool and pays the duty.

This question is not asked in the spirit of free trade. Americans are committed to protection. The only question is one of fair protection as against exploitation. It is widely held that the wool tariff might well be reduced by one-half. Certainly many manufacturing schedules should be so reduced. Can any State afford to get an unreasonable wool duty and in return give excessive duties to manufacturers? Or should the consumer everywhere and the substantial equities prevail?

East of the Mississippi, Ohio excepted, woolgrowing is incidental to farming. There flocks are small and are called "scavenger flocks" because they improve pasturage by cropping the weeds so closely that they do not seed. They clean out fence corners and consume the wastage from crops. They provide fresh meat for the family. They are grown for meat as much as for wool.

Ohio alone of the Eastern States raises wool as an important industry. She specializes in merino sheep, whose wool brings maximum prices. To Ohio the duty means much. In other eastern States farmers on the whole lose on the wool tariff much more than they gain.

A large percentage of the sheep on farms in the Corn Belt are lambs from the western ranges fattened and forwarded to the market after four or five months' feeding.

In the Mountain States, where woolgrowing is an important industry, most of the sheep are not on farms but on wild lands, with little or no cost for pasturage. The owners live in towns and intrust the flocks to herders, about two to a flock of 1,000 to 2,000 adult sheep, with an additional 80 per cent of lambs, that are not counted in the charge for pasturage, which, on Federal reserve lands, is 2½ cents per adult sheep per month, or from 8 to 10 cents per summer. Winter pasturage is on free desert lands, rich in wild grasses in spring, and with cured grasses that rise through the occasional winter snows and provide sufficient feed, except in times of heavy storms.

Sometimes in open winters no prepared food is needed on these ranges. A Washington sheep grazer estimates his winter feed cost at 90 cents per sheep. A Coloradoan says his cultivated feed during a storm costs $30 to $70 a day for 5,000 sheep. At $50 a day this is 1 cent per sheep per day.

In the Mountain States the few sheep on farms are mostly "gummers," toothless old ewes, unable longer to graze in tough wild lands, being fattened for market. Lambs usually go "fat as butter" directly from the ranges to the packing houses. In Colorado, however, as before stated, there are great numbers of lambs from the ranges on farms fattening for market. In these cases the farmers' tariff gain is only on the small increase in the fleece during the four to six months' fattening period.

In Wyoming and Utah 90 per cent of the sheep are thus raised on wild lands by grazers; in New Mexico and Arizona, over 95 per cent; in Washington, Oregon, and Idaho, 80 per cent. Many of these big flocks are said now to be owned wholly or in large part by eastern packing interest and other nonresidents.

In all the Mountain States about two-thirds of the range sheep are owned by one-third of the grazers, being the big flockmasters. Consequently most of the duty goes to relatively very few people.

The western wool situation is clearly shown by a study of "two typical agricultural counties" in Montana, Lewis and Clark County, in which Helena, the State capital, is situated, and Pondera, the second county north of Lewis and Clark.

The population of these two counties is 24,400. They contained, in 1921, 74,802 sheep, owned by 115 persons, including 9 corporations.

Of these 115 owners, 8 owned 48,379 sheep, or two-thirds of all the sheep. That is, two-thirds of the wool duty went to 7 per cent, or 8 of the sheep owners.

Including with these 8 the 10 next largest owners, 18 owners had a total of 66,099 sheep. That is, nine-tenths of all the sheep were owned by 18 persons, or 16 per cent of the sheep raisers, who therefore got nine-tenths of the wool duty. Eighteen men got the duty, and 24,400 residents in these counties paid a duty.

At the other end of the line we find 32 sheep owners, or 28 per cent of the 115, getting a total of $88 from the wool duty, or $2.75 each, on the basis of the present tariff.

And 77 small sheep owners, with a total of 1,485 sheep, got $1,425 from the tariff, or $18.50 each, which about offsets their loss on their woolen purchases.

Is there any doubt who gets the wool duties? Only the big western flockmasters press for them in Congress, supported usually by Ohio.

American farmers, as such, gain about $20,000,000 from the wool duty and lose as wool users $100,000,000. As a body they are not crying for it.

ANOMALOUS WOOL SITUATION IN 1924

The summer of 1924 presents an anomalous wool situation. The extreme depression in the woolen trades, due mostly to high costs of wools and consequent excessive prices of woolen goods, together with excessive importations of wool in 1922 and 1923, badly overstock the market, with considerable reexports of imported wools and domestic wools getting only 5 cents of benefit from the 31-cent wool tariff. This does not alter the fact that if and when American consumers replenish their wool requirements they must pay the tariff charges, as here estimated.

Even with this temporary ineffectiveness of the wool duty the prices of domestic wools were twice as high in January, 1924, as in January, 1915. Montana clothing wool, for instance, being 55 cents per pound in January, 1915, and $1.15 in 1924. Australian 64s advanced correspondingly. This rise in wool prices the world over shows large profits in wool raising, tariff or no tariff. It is due to an increased world consumption, to the increasing use of wool by the millions of people in China and Japan, where cotton has been heretofore almost the only clothing, and to the relative decrease in wool production.

Sheep are raised in large bands only on wild or semiarid lands, and the extension of agriculture into such lands anywhere is usually at the expense of woolgrowing. This makes a high wool tariff increasingly less desirable as world population increases and agriculture extends.

A reduction of one-half in the wool duty would hurt no one.

I come from an agricultural State. * * *

It seems to me that the Senator from North Dakota [Mr. McCUMBER] in his zeal to put such an immense tariff on these agricultural products—higher than we have ever had before, higher than there was any necessity for—has done so simply to oil the protection machine for the woolen schedule and some other schedules in the bill.—Senator KNUTE NELSON, of Minnesota, Republican (CONGRESSIONAL RECORD, August 11, 1922).

PRICE FIXING—EXAMPLE AND METHOD

Justice Day, of the Supreme Court, in his dissenting opinion of March 1, 1920, held that the United States Steel Corporation, "for many years after its formation had exerted its power to control and maintain prices by pools, associations, trade meetings, and dinners, and that in combination with its competitors it had an ability to fix prices and restrain the free flow of commerce upon a scale heretofore unapproached in the history of corporate organizations in this country."

It is the imperative duty of Congress, guardian of the public interest, to give no penny of duty not required upon definite proof.

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO KANSAS

[Census 1920]

| | |
|---|---|
| Population | 1,769,257 |
| Farmers | 691,690 |
| Woolgrowers | 7,795 |
| Sugar growers | 33 |

*Agricultural schedule*

| Crops | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|
| Wool | $175,000 | $1,902,000 | $2,963,500 | $4,865,500 | $300,000,000 |
| Sugar beets | 42,000 | 1,383,000 | 2,155,000 | 3,538,000 | 216,000,000 |
| Flaxseed | 23,000 | 208,000 | 323,500 | 531,500 | 30,000,000 |
| Lemons | | 70,000 | 106,000 | 176,000 | 10,000,000 |
| Tobacco | | 207,000 | 94,000 | 401,000 | 53,000,000 |
| Total | 240,000 | 3,770,000 | 5,642,000 | 9,412,000 | 609,000,000 |

| | |
|---|---|
| Farmers as consumers lose on agricultural schedule | $3,770,000 |
| A few farmers gain | 240,000 |
| Loss to farmers on agricultural schedule, net | 3,530,000 |

The State as a whole loses on agricultural schedule, net, $9,172,000.

Farmers lose on their agricultural schedule $16 to $1 of gain.

The State loses on agricultural schedule $39 to $1 of gain.

*Manufacturers' schedule*

[On the basis of one-half of duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $3,458,000 | $3,772,000 | $7,230,000 | $375,000,000 |
| Light steel products | 5,188,000 | 8,082,000 | 13,270,000 | 750,000,000 |
| General store merchandise | 16,600,000 | 25,300,000 | 41,900,000 | 2,475,000,000 |
| Total | 25,246,000 | 37,154,000 | 62,400,000 | 3,600,000,000 |

| | |
|---|---|
| Loss to farmers, manufacturers' schedule | $25,246,000 |
| Loss to State, manufacturers' schedule | 62,400,000 |

Farmers lose on all schedules, net, $28,776,000, or $118 to $1 of gain.

The State loses on all schedules, net, $71,572,000, or $300 to $1 of gain.

SUGAR

As in the case of wool, we import—from Cuba almost exclusively—much more sugar than we produce. Consequently every cent of the sugar duty is added to the price.

American beet-sugar growers, all told, get only $19,000,000 out of our sugar tariff that costs the public $216,000,000, and Louisiana cane growers get $5,000,000—an expensive process, spending $216,000,000 in order to get $24,000,000 to our sugar growers. Everyone approves of the $19,000,000 to the growers. With this they are prospering.

Of the remaining $195,000,000 Hawaii, Porto Rico, and the Philippines get $42,000,000, or nearly twice what American growers get; the Government gets $124,000,000 in taxes on Cuban imports, and a few sugar factories who put the tariff over get $24,000,000.

Are we not doing enough for our island possessions without sending them this $42,000,000 per year? Their sugar lands, their climate, labor, and other conditions virtually duplicate Cuba's. Cuba, like them, is one of our "wards." Why tax Cuba at the rate of $1.90 per 100 pounds on refined sugar, and at the same time make a present of $1.90, or $42,000,000, to the others? This $1.90 is in fact $2, because of 5 per cent addition by our refineries for handling charges on the $1.90.

Where, as in Hawaii, costs are much higher in certain sections than in Cuba, it is because lands not naturally adapted to sugar have been brought in by expensive irrigation projects, often to great profit.

The $24,000,000 given to a few sugar factories make their profits so big that one of their principal men is credibly reported as saying he is ashamed of his profits. He should be. He wanted a lower duty.

The Great Western Sugar Co., for instance, is a consolidation of other factories in 1905. It began with paid-in preferred stock of $15,000,000 and common stock of $10,544,000, all water. It is an overpowering influence in the beet-sugar situation and typical of its competitors.

For the seven years ending February 28, 1923, the Great Western Sugar Co.'s net earnings, after all charges and preferred dividends, averaged $12.01 on its common stock of $25 par value, or nearly 50 per cent per year. During much of this time sugar-beet growers were all but bankrupt.

The president of this company in a recent paid advertisement estimates that the net earnings for the present fiscal year, 1924, will exceed $16 per share on each $25 of common stock, or 64 per cent.

Says he:

Since organization in 1905 the company has disbursed as dividends on its common stock—

Once all water—

$36,308,177 in cash and $4,428,500 in common stock, and after paying such dividends has a surplus exceeding $30,000,000.

Does this leave any question who gets the sugar duty, the farmers or the factories?

Our sugar-beet growers lose money at their contract price of $5.50 per ton. When, however, the price of refined sugar at the factory exceeds 5½ cents per pound the farmers get an extra allowance on their beets equal to one-half of the increase above 5½ cents per pound for refined. These are the contract terms for the coming crop. (Heretofore profit sharing has begun with a 5-cent price for sugar and the growers have received only 46 per cent of the increase.)

Any possible benefit then to growers from the tariff begins with this 5½-cent price on refined sugar, and as they get only one-half of the 2-cent tariff increase in price they get 1 cent advantage up to a 7½-cent price at the factory, or 8½ cents at retail. This gives them the $24,000,000.

Tariff benefits end with this 7½-cent price. Increases above that price are due to crop shortage, manipulation, and so forth. So says the United States Tariff Commission and all authorities.

The Government seems not to need its $124,000,000 of sugar tax. Secretary Mellon is advising reductions in taxes. Nor is it wise to tax a necessary and wholesome food of the poor.

This 50 per cent of the duty, or 1 cent a pound to the factories costs consumers $108,000,000. It is this that should be saved. The factories will object. The public should insist, and also insist that future contracts shall continue to the growers their present 1 cent of tariff benefit and kill the factories' graft.

A big sugar-factory stockholder said in May, 1923, that under free trade his company could pay its present prices for beets and make 25 per cent profit on that part of its capital that is directly devoted to sugar making.

Another said recently that at present prices no duty is needed.

Eastern seaboard factories that refine imported raw sugar make a net profit of one-fourth cent per pound. The Great Western makes nearer 3 cents per pound, while its growers all but starve at the minimum contract price of $5.50 per ton. Their factory contract is so one-sided that under any tariff these growers often get better returns from the same soil on potatoes, corn, oats, alfalfa, or even wheat. Many will not plant beets.

Our refiners of domestic sugar have no right to protection. The labor cost, East or West, is almost nothing, about one-fifth of 1 cent per pound. Can you "protect" one-fifth of a cent of labor cost in a 7-cent selling price? Fuel, machinery, and other expenses are substantially the same West and East.

Leading farmers in sugar-growing States are members of the Fair Tariff League's Advisory Committee. They are agreed that the sugar tariff has been of little or no benefit to American farmers. They say that other nonprotected crops often pay better. One farmer says: "Take the duty off and then we will have to raise other crops on the sugar lands, which would be better for us in the long run."

Another farmer says: "Only 5 per cent of us raise sugar. Better keep this 5 per cent in the poorhouse than have this sugar tax of $216,000,000." Another farmer says, "I will not let my tenants raise beets; other crops pay better."

Their judgments are in part explained by the fact that the sugar tariff in the sum of $48,000,000 (in 1923) is poured directly into the treasuries of domestic sugar factories; that these factories take this huge amount as if their own, and drive as hard a bargain with the farmer-growers as they can, with no recognition of the factories' trusteeship of this fund which is intended for the growers only.

In every other instance, whatever tariff benefit is paid by the public on any domestic article is collected by its producer at the point of origin. The woolgrower adds the wool tariff to every pound that leaves the shearer. So of the hard-wheat growers, the makers of steel, glass, aluminum, textiles, and so forth. They get whatever they can and all that the public pays, except that the amount paid is increased later by middlemen's additions.

Only recently has the factories' sugar propaganda so befooled the public. McKinley, Dingley, Cannon, and Aldrich denounced any duty on sugar, Aldrich saying, "This unjustifiable, indefensible, and infamous sugar levy."

A 1-cent duty, properly placed, is probably a reasonable adjustment under present conditions.

Louisiana will cry out against tariff reduction. She wants protection against God's providence in the form of early frosts and floods.

Sugar-cane growing in Louisiana is a gamble, too like the Louisiana lottery, to be promoted by congressional levies. Fear of frosts causes the growers to harvest the cane at 8 months' growth as against 12 months in Cuba and our island possessions. Much of this immature crop will make molasses only, not sugar.

A tentative statement of the United States Tariff Commission of December 1, 1923, indicates that the Louisiana crop of 1921 cost less to produce than Cuba's, and, consequently, Louisiana would have prospered then under free trade. Also, that Louisiana's crop of 1922 cost 2.7 cents per pound of sugar more than Cuba's, and would have required this 2.7 cents of protection. Her 1923 crop would have required still greater protection. These are typical years. Let Louisiana gamble or not, as she likes. She can and does raise other crops on the same lands.

For constant and assured profits she must have at least 1 cent more protection than sugar-beet States need, costing the public an extra $108,000,000, of which Louisiana growers get about $2,500,000, and her sugar factories another $2,500,000, a total of $5,000,000, at a public expense of $108,000,000. Her sugar factories refine much imported raw sugar. They get no tariff advantage on that; why a $2,500,000 bonus to them for refining domestic sugar?

The Mountain and Pacific States charge 1 cent per pound more for their product than the Atlantic States, except for surplus shipments into eastern territory. This difference in price is because they take advantage in their sales prices of the "natural protection" of freight charges from the Eastern States and New Orleans into their territory. Their price is the New York price plus the freight. They overlook no chance to raise prices. When, as now, the tariff is 2 cents on refined sugar the effective protection in the Mountain and Pacific States is 3 cents, although they grow sugar beets cheaper than other States.

The sugar tariff costs Iowa $4,808,000 and Minnesota $4,775,000, with no offsetting benefit to either State.

Nebraska and Utah fare better. On the basis that one-half the tariff gain goes to farmers, the Nebraska growers of sugar beets gain $2,240,000, against which her consumers lose $2,597,000, so that she comes out about even.

Utah growers gain $2,200,000, against which her consumers lose only $899,000.

Colorado growers gain $3,660,000, against which her sugar consumers lose $1,879,000.

In our estimates we do not include the tariff gains of sugar factories. Their stockholders are mostly great eastern capitalists, although some large holdings are in Colorado and Utah. The reader is left to allocate these profits as he may.

The present sugar duty costs American consumers $216,000,000 annually, or about $2 per capita.

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO NEBRASKA

[Census 1919]

| | |
|---|---|
| Population | 1,296,372 |
| Farmers | 584,172 |
| Woolgrowers | 4,244 |
| Sugar-beet growers | 1,531 |

*Agricultural schedule*

| Crops | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|
| Wool | $148,200 | $1,606,500 | $1,959,000 | $3,565,000 | $300,000,000 |
| Sugar beets | [1] 2,240,000 | 1,168,000 | 1,428,000 | 2,597,000 | 216,000,000 |
| Flaxseed | 7,800 | 175,000 | 213,600 | 389,000 | 30,000,000 |
| Lemons | | 58,500 | 71,000 | 129,000 | 10,000,000 |
| Tobacco | | 99,000 | 121,400 | 220,000 | 53,000,000 |
| Total | 2,396,000 | 3,107,000 | 3,793,000 | 6,900,000 | 609,000,000 |

[1] On the basis of one-half the sugar duty going to sugar-beet growers.

| | |
|---|---|
| Farmers as consumers lose on agricultural schedule | $3,107,000 |
| A few farmers gain | 2,396,000 |
| Loss to farmers on agricultural schedule, net | 701,000 |

The State as a whole loses on agricultural schedule, net, $4,504,000.

Farmers lose on their schedule $1.30 to $1 of gain.

The State loses on agricultural schedule $3 to $1 of gain.

*Manufacturers' schedule*

[On the basis of one-half of duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $5,843,000 | $4,748,000 | $10,590,000 | $375,000,000 |
| Light steel products | 8,294,000 | 8,990,000 | 17,285,000 | 750,000,000 |
| General store merchandise | 23,366,000 | 28,488,000 | 51,855,000 | 2,475,000,000 |
| Totals | 37,503,000 | 42,226,000 | 79,730,000 | 3,600,000,000 |

| | |
|---|---|
| Loss to farmers, manufacturers' schedule | $37,503,000 |
| Loss to State, manufacturers' schedule | 79,730,000 |

Farmers lose, on all schedules, net, $38,214,000. They lose nearly $17 to $1 of gain.

The State loses, on all schedules, net, $84,200,000. It loses $35 to $1 of gain.

With a population of 1,296,372, including 584,172 farmers, the State's only tariff gain, $2,396,000, goes to 4,244 wool growers, being 1 resident in 305 and 1 farmer in 138; and to 1,531 sugar-beet growers, being 1 farmer in 380 and 1 resident in 847.

FARMERS LOSE ON THEIR OWN SCHEDULE

In the wool and sugar duties we begin to see the trouble with the farmers' tariff schedule. The American Farm Bureau Federation's careful estimates of January, 1923, show a tariff gain to wool growers of $45,800,000, but, as half of this goes to great western flockmasters who produce more than half of all the wool grown in the United States, and as these growers are not farmers, the gain to American farmers is not more than $20,000,000, against which they lose, as wool consumers, $100,000,000.

Likewise of the federation's $45,800,000 that goes to American sugar factories and farmers, only half, or $24,000,000, goes to the farmers, while our farmers, as a whole, lose upwards of $70,000,000.

Consequently the Farm Bureau Federation's estimate of $124,800,000 of total tariff benefits to American farmers is reduced by these corrections in wool and sugar duties to about $78,000,000, against which the Farm Bureau estimated that the farmers lose, as consumers of agricultural products, $94,900,000.

The Farm Bureau's study is deserving the highest praise for the most careful and able analysis up to that time, January, 1923. It did not, however, attempt to cover the pyramiding of prices in the processes of manufacture and distribution. Later studies warrant the statement that American farmers lose upward of $80,000,000 on their own tariff schedule and $1,000,000,000 on other schedules.

American farmers have been deceived by wool and sugar Senators, by wool grazers, and by sugar factory operators masquerading as farmers and filling their own pockets through tariff trades with eastern manufacturers.

ROBBERY UNDER THE FORMS OF LAW

To lay with one hand the power of the Government on the property of the citizen and with the other to bestow it upon favored individuals to aid private enterprise and build up private fortunes is none the less robbery because it is done under the forms of law and is called taxation.—Supreme Court of the United States. (Marshall case.)

FLAXSEED

This is grown in the United States only for the linseed oil that is extracted from the seed. The duty is 40 cents per bushel. Oil cake, the residue after the extraction of the oil, is on the free list. Oil crushers, however, are given a rebate on their oil cake when exported and made from imported seed. This reduces the 40 cents apparent duty on flaxseed to a maximum effective duty of 30 cents only.

In the first year of the operation of the Fordney-McCumber tariff carefully prepared weighted price averages show that the farmers in the Northwest received about 19 cents per bushel as a result of the tariff on 45 per cent of their flaxseed crop, and on their total crop they received an average of about 27 cents per bushel.

As substantially all domestic flaxseed is raised in the Dakotas, Minnesota, and Montana—their total production being 10,774,000 bushels in 1920 and 8,029,000 bushels in 1921, with only 323,000 bushels raised in all the other States combined—the flaxseed duty is of almost no consequence to farmers in other States, except as consumers. Everyone agrees that this duty should be continued.

As consumers, farmers pay about twice their maximum effective duty of 30 cents, or 62.7 cents per gallon on the clear

linseed oil consumed, this 62.7 cents being the effective duty of the oil crushers.

Only 10 per cent of linseed oil is consumed as such. The remaining 90 per cent is used in the manufacture of linoleum, paints and varnishes, and like products.

To consumers of these products the 62.7 cents duty on oil becomes upward of $1.25, the increase from 62.7 cents to $1.25 being the addition for costs and profits, conservatively figured, taken by the manufacturers, wholesalers, and retailers of these highly finished products. This means a cost of not less than $30,000,000 to the American consumers for the duty on flaxseed, or 30 cents per capita.

That the oil crushers add their duty to their prices is indicated by the recent decision of the United States Supreme Court—June 4, 1923—that they have been in an unlawful association for price regulation for some years.

There is only 3 cents of labor in crushing $1 worth of oil. The process is as simple as brewing tea. The $5,000,000 of tariff benefit given the oil crushers is unnecessary. It costs consumers $10,000,000.

RICE—A TARIFF LESSON FOR FARMERS AND OTHERS—HIGH WAGES ARE CHEAP WAGES IN FARM OR FACTORY

The present duty of 2 cents per pound on milled rice—rough rice, 1 cent—is one of the little jokes in which some politicians delight. It pleases the farmer; it costs the consumer nothing; it sweetens high rates on certain manufactured products that enormously enrich a few.

Before the Great War the United States was nominally a net importer of rice. Great changes have taken place since 1913. In the last three years our imports have gradually dwindled to almost nothing, while our exports have increased enormously, being, for the three years—1919–1921, inclusive—in excess of 20,000,000 bushels per annum, or about one-half of our total production.

Our average annual production for the five years—1909–1913—was about 24,000,000. For the five years—1918–1922, inclusive—it was about 42,500,000 bushels.

The effectiveness of American highly paid labor, when earnestly applied, well directed and supported, on the farm or in the factory, is illustrated in the following statement on rice by Mr. Gray Silver, of the American Farm Bureau Federation, at its annual convention at Chicago, December 13, 1922:

> I asked a great manufacturer what his pay roll meant, using his mechanical facilities in comparison with unaided man power. I wanted to estimate the productivity of the American farmer and his machinery in comparison with the hoe in Europe and the coolie in Asia, with whom the American farmer competes in the export markets of the world. After nearly a year's time, the manufacturer replied: "Our 10,200 men with their applied mechanics and power machinery do the work of almost 500,000 men working without machinery. Our wage earners are two hundred times cheaper than unaided man power."
>
> The competitive value of applied mechanics on the American farm was shown last year. Our production of rice has increased until last year we had a large exportable surplus. Our friend, Secretary Hoover, said to the representatives of his department in different parts of the world, "Find buyers for this surplus rice; we have 180,000 tons."
>
> And where do you suppose the market was found? In Iceland, in Japan and China—at our domestic price plus the cost of taking it there, proving that the 10-cent worker with the breechclout is more expensive than our labor-capitalist at $3 per day.

American farmers are manufacturers. They produce mostly by machinery. American energy, skill, and machinery, whether on the farm or in the factory, need less protection than some would have us believe who tell of the low wages of ill-conditioned foreign labor.

OATS AND OTHER CEREALS

The tariff affects the price of oats as much as it does corn.

Our crop is normally around 1,500,000,000 bushels, 70 per cent of which is consumed on the farm where produced.

Imports for 1897–1913, under a duty of 15 per cent, exceeded 1,000,000 bushels only in years of domestic crop shortage. In 1914 under a tariff of 6 cents per bushel, coinciding with a crop shortage of about 300,000,000 bushels less than the preceding year, about 22,000,000 were imported.

While approving of the oat tariff as of some benefit, it seems impossible to estimate any large and general cash return to farmers therefrom. Likewise concerning the minor cereals, kafir, and milo, barley, rye, and so forth.

CATTLE

The research department of the American Farm Bureau Federation, after thorough investigation declared that there is practically no benefit to any phase of the American cattle industry from the present tariff, and that it is a distinct injury to cattle feeders.

The United States Tariff Commission reported to Congress in 1922 that the only effect of the emergency tariff was to injure Canada.

In 1923, the American Farm Bureau Federation, the Pennsylvania Farm Bureau, Illinois Agricultural Association, and others appealed to the Tariff Commission for relief from this tariff.

Our tariff on cattle is a direct affront to Canada, that formerly exported some 200,000 head of range cattle annually.

Our northwestern farmers need these Canadian feeder cattle. The United States, as a whole, requires 4,500,000 feeders annually. Canadian feeder cattle should carry to Europe the corn and other feed of our Northwest. By the sudden imposition of our Fordney duties Canada was left without a market. Late in 1922 a traveler in the Canadian cattle country counted 300 cattle and horses, standing up, frozen to death, in a distance of 150 miles on one side of his train. How many more were lying down or were on the other side of the train, and in the far reaches beyond sight? This when beef was high in our cities and corn in the Northwest was selling at from 26 to 31 cents per bushel.

The just wrath of Canadians will not be overcome in many years. Their purchases from us were reduced by $400,000,000, in one year, not from anger only, but mostly because we would not accept, on fair terms, of such of their commodities as we could well use in payment for our goods.

A destructive phase of this tariff, intended to be protective, is seen in the recent diversion of Canada's surplus cattle from the United States to England.

It was estimated in the fall of 1923 that her total shipments to England for that year might reach 50,000 head, and that soon England will take all that Canada can spare—to our proportionate loss.

If we took all of Canada's exports they are too small in quantity to affect the value of our herds that number 68,000,000 heads.

We make a mockery of our boast that our unguarded Canadian boundary line is imaginary only. We fortified it with worse than guns, with a tariff of distress and ill will that gave us never a benefit.

Canada errs in attributing this action to the American people. She apparently thinks that our public rules in tariff matters. She does not realize that the Fordney law was enacted by a few overpowerful manufacturers, who betrayed the principle of protection, fooled the people, and disregarded the better judgment of many manufacturers who wanted lower duties on their own and other manufactures.

PORK AND LARD

As we are the world's largest exporter, the tariff does not affect their prices.

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO COLORADO

[Census 1919]

| | |
|---|---|
| Population | 939,629 |
| Farmers | 266,072 |
| Woolgrowers | 4,089 |
| Sugar-beet growers | 7,604 |

*Agricultural schedule*

| Crops | Tariff gain to a few grazers on wild lands | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|---|
| Wool | $307,000 | $307,000 | $732,000 | $1,852,000 | $2,558,000 | $200,000,000 |
| Sugar beets | | [1] 3,660,000 | 532,000 | 1,347,000 | 1,879,000 | 216,000,000 |
| Flaxseed | | | 333,000 | 842,000 | 1,175,000 | 30,000,000 |
| Lemons | | | 27,000 | 67,000 | 94,000 | 10,000,000 |
| Tobacco | | | 46,000 | 114,000 | 160,000 | 53,000,000 |
| Total | 307,000 | 3,967,000 | 1,669,000 | 4,222,000 | 5,891,000 | 509,000,000 |

[1] On basis of sugar-beet growers getting one-half the duty.

| | |
|---|---|
| A few farmers gain | $3,967,000 |
| Farmers as consumers lose on agricultural schedule | 1,669,000 |
| Gain to farmers on agricultural schedule, net | 2,298,000 |

**The State as a whole loses on agricultural schedule, net, $1,617,000.**
**Farmers gain on their agricultural schedule $2.50 to $1 of loss.**
**The State loses on agricultural schedule $1.40 to $1 of gain.**

*Manufacturers' schedule*

[On the basis of one-half duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $1,774,000 | $3,143,000 | $4,917,000 | $375,000,000 |
| Light steel products | 2,661,000 | 6,735,000 | 9,396,000 | 750,000,000 |
| General store merchandise | 8,515,000 | 21,552,000 | 30,067,000 | 2,475,000,000 |
| Total | 12,950,000 | 31,430,000 | 44,380,000 | 3,600,000,000 |

Loss to farmers, manufacturers' schedule ..... $12,950,200
Loss to State, manufacturers' schedule ..... 44,380,200

Farmers lose, on all schedules, net $9,934,000, or $2.50 to $1 of gain.

The State loses, on all schedules, net $45,997,000, or nearly $12 to $1 of gain.

With a population of 939,629, including 266,072 farmers, the State's only substantial gain, $4,274,000, goes to 4,088 woolgrowers or 1 resident in 230, including about 2,500 farmers, or 1 farmer in 106, and to 7,064 sugar growers, being 1 farmer in 38 and 1 resident in 134.

Gentlemen, Congress is becoming a bargain counter.—Senator Dolliver (Republican), Iowa, 1909.

DAIRY PRODUCTS

Representatives of the dairy interests are reported to have made a bad blunder. They asked for twice the duties they wanted. They expected opposition and an agreement that would lower their own tariff demands one-half and many other duties likewise, but the representatives of the manufacturers granted the dairymen's request substantially in full, except on casein, so quickly that the latter could not retract nor explain. The manufacturers know that duties on butter and milk mean nothing, except on Canadian imports produced just north of the border, while duties on manufactures means billions of dollars. Canadian dairymen, especially in Toronto, were almost mortally hurt. A few poor babies and other people in New England and New York State have less milk, cream, and butter. Others must pay a bit more. And Canada finds the richest Nation on earth and its 105,000,000 people, unintentionally, but apparently with willful premeditation, mean to its next best customer in the world.

In midwinter the butter duty increases the cost of storage butter and of fresh butter by shutting out New Zealand, where it is then springtime with large butter production. A modest duty is desirable, especially so long as offsetting manufacturing schedules are exorbitant.

INTERNATIONAL TRADE THE FOUNDATION

Our international trade is one of the very foundations of our standards of living; that our whole fabric of living and comfort are dependent upon the import of commodities which we do not and can not ourselves produce—tin, rubber, coffee, sugar, and a score of others; further, in the main, the amount of these commodities we can import will depend upon the volume we export. Moreover, we need a constant expansion of our export markets to give stability to our internal production by a wider range of customers.—Herbert Hoover, November 9, 1923.

LEMONS

Next to wheat, sugar, wool, and tobacco, lemons yield the largest single tariff profit to agriculture. They are taxed 2 cents per pound. Lemons are needed in the territory under consideration in the hot months. Still more are lemons needed by the poor in our great cities by the 350,000 dwellers in the "dark rooms" of New York City tenements, for instance, each room with two to five occupants, with no natural light and only such ventilation as one room can get from another through an opening 3 by 4 feet. Half the tax now in force might be justified. The present tax raises the prices and the incomes from certain lands in California and Florida and keeps the poor from this disease-fending comfort. Agricultural authorities say that our lemons can compete under a decidedly low tariff because our product is so superior in appearance, size, packing, and extract per lemon that only the poor will use the imported article at anywhere near the same price. Also the efficiency of our methods of cultivation, with improved farm machinery, makes our cost little more per dozen produced than the product of the poorer-paid, inefficient Mediterranean peasant with his hoe.

ORANGES

These and other citrus fruits are not affected by the tariff. We probably produce them, with the help of our machines, as cheaply as any nation per dozen and weight. Oranges are freely exported. Importations are negligible and of inferior quality.

WHO PAYS THE DUTY?

Senator LENROOT, June 20, 1922:

Upon an article like this—cotton gloves—used in every home in the land, we ought not to tax the American people more than 75 per cent.

He knows who pays the duty—the consumer—"only 75 per cent."

Said Senator McCumber regarding wheat:

We want higher prices. When the crop—hard spring wheat—is short we add all the duty. When crops are heavy we get half the duty.

He knows who pays—the consumer.

TOBACCO

The following statement of the research department of the American Farm Bureau Federation in its Weekly News Letter of January 11, 1923, is conservative:

The export and manufacturing types of tobacco, constituting the bulk of the crop, are not subject to tariff influences. Cigar leaf can be but slightly affected, because the import cigar tobaccos are of a different quality and not truly competitive. Connecticut wrappers are probably increased substantially in price by the $2.10 duty on Sumatra leaf, with which they come in competition. How much the increase may be there is no way of determining. As what is believed to be a reasonable guess, based on general considerations of rates of duty, production, and price quotations, the probable benefit to producers is placed at $10,000,000. As the duty on some 85,000,000 pounds of Cuban Sumatra and Turkish tobaccos imported annually is undoubtedly added to the selling price of cigars and cigarettes, the cost of tobacco duty is much higher than the gain to producers, amounting, on the basis of the duties assessed, to $53,000,000. Of this, 10 per cent is assigned to farmers as consumers of cigars and cigarettes.

THE AGRICULTURAL DISEASE

The ruinously low price of wheat is not a new agricultural disease. It is just one more acute symptom of the general trouble from which agriculture is suffering. The disease itself is the distorted relationship between prices of farm products and prices of other commodities. This is not a new diagnosis. It has been pointed out from time to time for the last two and one-half years.

The farmer could get along fairly well with present prices of what he has to sell if prices of what he must buy were down accordingly. But prices on other things remain high. That is what hurts.

When all is said and done, the fundamental fact remains to be dealt with. Agriculture and industry and commerce must be brought into more nearly normal relationship, and until this is done these acute agricultural troubles will develop one after another. (H. C. Wallace, Secretary of Agriculture, August, 1923.)

The present tariff lowers farm prices and raises all other prices.

The following calculations are based upon Government statistics and approved by competent and dependable authorities:

WHAT THE TARIFF DOES TO UTAH

[Census 1919]

| | |
|---|---|
| Population | 449,396 |
| Farmers | 140,249 |
| Woolgrowers | 5,436 |
| Sugar-beet growers | 8,398 |

*Agricultural schedule*

| Crops | Tariff gain to a few grazers on wild lands | Tariff gain to a few farmers | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|---|---|
| Wool | $1,027,000 | $257,000 | $385,500 | $850,000 | $1,235,500 | $300,000,000 |
| Sugar beets | | [1] 2,200,000 | 280,500 | 618,300 | 899,000 | 216,000,000 |
| Flaxseed | | | 175,200 | 386,400 | 561,500 | 30,000,000 |
| Lemons | | | 14,000 | 31,000 | 45,000 | 10,000,000 |
| Tobacco | | | 23,800 | 52,300 | 76,000 | 53,000,000 |
| Total | 1,027,000 | 2,457,000 | 879,000 | 1,938,000 | 2,817,000 | 609,000,000 |

[1] On basis of farmers getting one-half the duty.

A few farmers gain (wool and sugar only) ..... $2,457,000
Farmers as consumers lose on agricultural schedule ..... 879,000

Gain to farmers on agricultural schedule, net ..... 1,578,000

The State as a whole gains on agricultural schedules, net $667,000.

Farmers gain on their schedule, $2.80 to $1 of loss.

The State gains on agricultural schedule $1.25 to $1 of loss.

*Manufacturers' schedule*

[On the basis of one half of duties added to prices in certain industries]

| | Cost to farmers as consumers | Cost to nonfarming population | Cost to State | Cost to United States |
|---|---|---|---|---|
| Heavy steel products | $701,000 | $1,082,000 | $1,783,000 | $375,000,000 |
| Light steel products | 1,052,000 | 2,318,000 | 3,370,000 | 750,000,000 |
| General store merchandise | 3,366,000 | 7,420,000 | 10,786,000 | 2,475,000,000 |
| Total | 5,119,000 | 10,820,000 | 15,939,000 | 3,600,000,000 |

Loss to farmers, manufacturers' schedule ..... $5,119,000
Loss to State, manufacturers' schedule ..... 15,939,000

Farmers lose, on all schedules, net, $3,541,000. They lose $2.50 to $1 of gain.

The State loses, on all schedules, net, $15,272,000. It loses $5.50 to $1 of gain.

With a population of 449,396, including 140,249 farmers, the State's only tariff gain, $3,484,000, goes to 5,436 woolgrowers, being 1 resident in 83, including about 1,100 farmers, being 1 farmer in 127; and to 8,398 sugar-beet growers, being 1 farmer in 17 and 1 resident in 53.

THE TARIFF MAKES FARM IMPLEMENTS COST $100,000,000 TOO MUCH

On the basis of normal quantity production the present tariff makes farm implements cost farmers $100,000,000 too much and implement manufacturers $50,000,000 too much. American steel makers add the duty and the freight from Europe to domestic prices. They export $230,000,000 at 30 per cent less than domestic prices. Total export steel products, all kinds, $700,000,000.

To-day's prices (October 22, 1923) of American-made bar steel, which is a criterion for all steel prices, is $2.40 per hundred pounds. The export price of English bars is $1.61. The Belgian price, in dollars, is 3 per cent less. France is between England and Belgium, while in Germany, with her worthless currency, the bugaboo of the nations, the dollar price is 50 per cent higher than in England.

The American price, $2.40, is the English price plus the duty of 27 per cent, or 43½ cents, plus 20 cents freight to New York, plus 16 cents for good measure. (Note—December, 1923, United States bars, $2.50 per 100 pounds.)

While thus charging the last farthing that circumstances permit, our steel manufacturers are exporting at the rate of $230,000,000 annually, and the net profits of the greatest of them, the United States Steel Corporation, in 1923 were, in round figures, $180,000,000 net, subject to interest charges and dividends. Dividends were declared for the quarter year ending September, 1923, at the rate of $6 per share on its $508,000,000 of common stock, once all water and sold for $8 per share, now worth intrinsically $260 per share. The Wall Street Journal of November 2 says that 10 per cent annually, or $10 per share, "would have been entirely conservative and proper, as the earnings for the current year are at the rate of 15 per cent after paying preferred dividends." Some other companies were as profitable.

American wages, measured in dollars, are the highest ever, largely because the tariff is exorbitant and profiteering, instead of honestly protective. Wages must keep up with living costs, even if the latter are not honest.

These and similar excessive costs of materials and wages and of freights, which are high for the same reason—railroad equipment is figured on the above steel basis—makes the factory cost of farm implements at least 10 per cent above honest protection and likely 15 per cent. At 10 per cent excess cost the implement factories are obliged, if they live, to pass this excess cost on in the sum of $50,000,000 annually, further increased as the implements pass to the wholesaler, to the retailer, and on to the farmer to a total of $100,000,000.

Farmers can not pass this $100,000,000 on to their consumers, because 89 per cent of all American farm products are sold on a free-trade or export basis. They can not sell free trade and buy profiteering, so they are going without needed new implements.

Farmers constitute 29 per cent of our population and fully one-third of its purchasing power, for farmers, as users of machinery and other appliances, are far greater purchasers than average citizens. Also farmers pay 40 per cent of all railway charges—far more than average citizens.

This tariff victimization of America's fundamental industry, agriculture, and of nearly one-third of her population can not endure.

In 1922–23 farm-implement factories produced only 32 per cent of the normal number of implements. Twenty of them lost $50,000,000 in two years. They are on the free list. Protective rates would not help them. When they can not sell at present prices, they could not sell at higher "protected" prices. Exports are large, imports negligible. The remedy is in honest steel and other duties.

The cost of railway equipment and operation would be reduced $500,000,000 by reasonable adjustment of steel and other duties especially onerous to railroads, and by such wage adjustments as would reasonably adjust wages to the lower living costs consequent upon fair tariff corrections without lowering the present purchasing power of wages. The first step toward lower freight rates is this reduction in operating costs.

The situation of the farm-equipment manufacturers in respect to excessive costs due to the tariff is duplicated in almost all small manufacturing, and also in some of the greatest of our industries, like automobiles, furniture, and many building products. The fact that Mr. Ford makes his own steel may account in part for his own low prices. He does not have to pass on a huge steel graft to his trade.

Bad as is the condition of these intermediate manufacturers, a sudden and complete correction of tariff rates to a basis of honest protection would ruin many of them. They and their retailers are loaded with merchandise at these Congress-made and extortionate prices. They must unload at corresponding prices, and tariff adjustments when made must provide for this situation.

COMPETITION, THE "PROTECTOR" OF THE CONSUMER—WOMEN AND THE TARIFF

Industries that are on a strictly competitive basis, like clothing, shoes, and implements, have to sell close and sometimes without profit. Only the best-managed ones make good profits. Competition controls their selling prices, as it does in agriculture.

Competition is the "protector" of the consumer. By eliminating foreign competition by duties beyond the fair requirements of domestic production the tariff becomes, in fact, "the mother of trusts." It offers temptations for lawbreaking and price fixing beyond the resistance of many men.

Even Chairman McCumber, of the Finance Committee, United States Senate, CONGRESSIONAL RECORD, July 26, 1922, says:

> The only good reason for allowing products to come into this country to compete with our own is to hold down and prevent any extortionate charges being made by the producers in our own country. We want foreign competition to prevent combination.

It is strange for Congress to make price fixing criminal and also, in the present tariff, to make price fixing profitable beyond the dreams of our forefathers.

In the present tariff, for instance, Congress greatly increased the duty on the clay tiles used in farmers' drains and in buildings and sewers, also on cast-iron pipe, on the sanitary ware used in bathrooms, on linseed oil, and on window glass. The makers of all these were then under court indictment for "arbitrarily and excessively" raising their prices by price-fixing agreements. Some of these makers have been given jail sentences and heavy fines.

The United States Tariff Commission and other authorities declare these industries need no protection. They are the most efficient in the world.

Extreme protectionists stress the fact that imports have largely increased under the present tariff. They have, but mostly in raw and partly finished materials for use in our factories, while the goods that compete even remotely with domestic products have been largely excluded by the present tariff, leaving domestic makers of these products to make what prices they will, with only the rich, who do not mind the cost, to use imported articles.

For instance, a beautiful party gown covered with embroidered beadwork, costing $7.40 in France, retails here for $40 and upward; another, $16 in France and $95 here; another, $52.50 in France and $300 here, with no profiteering in any of these gowns except the doubling of prices by the tariff; a child's dress, about 90 cents in France and the price here doubled because it has 3 cents of machine lace on neck and sleeves; an embroidered ornament for women's hats, costing 65 cents in France and adding $5.50 to the retail price of a choice imported hat if put on the hat in France, thereby raising the duty from the hat rate of 55 or 90 per cent to the "ornament" rate of 90 per cent. The duty on the hat is increased $2 by this 65-cent ornament. Also choice cotton dress goods, 95 cents a yard in France and $3.50, retail, here. The choicest woolen dress goods, 50 inches wide, $1.15 at the French factory and $4 at retail here, and no profiteering on these dress goods except the tariff. Long kid gloves, duty $1.87 per pair; none made here; the duty intended chiefly to make our women wear what we do make here and they do not want.

All these things are noncompetitive in that the wearing apparel is handmade, while American things are machinemade. We do not want our women to stitch, stitch their lives away with hand needles, nor will they. We can not and will not make these things. We need them for variety and beauty. They are especially artistic in color, design, and workmanship. While we can not and will not compete with this handwork, our corresponding machinemade articles are sold the world over.

The cotton and woolen goods are likewise different, some made on hand looms that we will not use and others requiring more time and care than we give.

The duty on the cloth in women's "tweed" suits and coats, of which 30,000,000 are sold annually, adds from $4 to $5 each to retail prices, an addition of $120,000,000 to the clothing bills of American women.

These things typify French production. Likewise British, Italian, and other European products largely differ from ours in quality or design. We need low enough duties on strictly competitive articles to keep domestic prices within reach. On noncompetitive articles we need reasonable duties to enable foreign countries to buy and pay for greater quantities of our foodstuffs that are now selling below the cost of production. This means everything to our agricultural States.

It means much to their foreign customers. The countries who fought for us while fighting for themselves—France, Britain, Italy, and others—are undernourished and below par in efficiency. They want food, and from us. They can only pay by exchange of commodities. They virtually say, "We are hungry; won't you take these things from us on a reasonably protective basis and give us food in exchange? Won't you give us more of the wheat you are said to be feeding to hogs, for which we would pay good prices?" And our answer is, "We don't know you—not interested. The Chicago wheat pit handles our farm products."

Farmers can plan and hope, but they can not add a dollar of their tariff rates to their prices except on wool, sugar, flaxseed, and spring wheat, and on minor and relatively inconsequential commodities like lemons and odds and ends. It behooves them to give thought to export trade.

TWO GROUPS CRUCIFIED—FARMERS AND WOMEN

The present tariff crucifies two groups, farmers and women. Farmers by reducing the purchasing power of their products until "the farmer's dollar is a 68-cent dollar" and by severely restricting their foreign markets. Women by declaring everything they wear a luxury and taxing it as if its purchase were a sin. It would compel women to dress as severely as men, ignoring the requirement of all the ages that women adorn themselves with things of modest beauty for the joy of the world and as an outward token of their inner loveliness. It is brutal to tax their things from 60 to 90 per cent, leaving only the rich to use beautiful things from abroad of slight initial cost, and to make American retail prices sometimes five times the foreign costs.

AGRICULTURE AND FOREIGN TRADE—AMERICA ONE-THIRD FREE TRADE AND TWO-THIRDS PROFITEERING

The principal European importers of foodstuffs are Great Britain, Germany, France, and Italy.

Their consumption of human foodstuffs, wheat and rye, since the war has been only 80 per cent of their average consumption in the five years before the war, 1909–1913.

Their imports of both human and animal foodstuffs have been at prices below their own costs of production.

Their aggregate population is greater now than before the war. Even France, exclusive of her newly acquired provinces, Alsace and Lorraine, has a larger population than before the war, while the population of Italy in her pre-war area has increased from 35,000,000 in 1911 to about 39,000,000 now.

In some quarters the fact that the United States is exporting more cereals now than before the war is taken to indicate a prosperous condition of export trade. When, however, the condition of the importing countries is such that their consumption per capita is one-fourth less than before the war, and they purchase their imports at less than their own costs of production it is manifest that they are buying under great difficulties the least possible and only at bargain prices.

The consumption in these countries of animal foodstuffs, corn, oats, and hay, is about 40 per cent less than pre-war, showing that these countries are going without meat even more than without bread.

The consumption of human and animal foodstuffs combined is about 30 per cent less than before the war.

All this means undernourishment, sickness, and suffering, and low productive efficiency in Europe, where, if anywhere, we must dispose of our foodstuffs and the prices must be made that determine domestic prices also.

No one thing will completely mend this situation. The present tariff, however, aggravates it in an extreme degree, because it makes impossible a reasonably fair and considerate exchange of commodities between our own and other countries.

It is impossible for these countries to pay their war debts to the United States, and to buy our products also. Whether or not any consideration should be given to suggestions that all or part of these war debts should be forgiven, there should be no question, but we should so reasonably revise the present tariff as to help Europe to purchase and to pay for enough of our foodstuffs and other needed products to restore her physical and productive strength.

What it means to American farmers to produce and sell on virtually a free-trade basis, to buy their requirements from profiteering manufacturers, and to have their foreign market restricted is indicated in official reports that 47 per cent of all persons adjudged bankrupt in Idaho in 1922 were farmers, and that from 32 to 78 per cent of all formal bankrupts in Iowa, Nebraska, Kansas, Colorado, North Dakota, South Dakota, and Montana were farmers.

America can not endure one-third free-trade, the farmers and the other two-thirds profiteering under a tariff like the present. On that basis the profiteering two-thirds will consume, first, the other third and then themselves.

Our farmers get good enough prices for their crops, excepting wheat, as Secretary Wallace and all others say. The trouble is they can buy so little with the proceeds of their crops. As Senator CAPPER says, "The farmer's dollar is a 68-cent dollar. That is all it will buy of other men's goods. It is a terrible disadvantage."

Farmers are now diversifying their crops, except in the Dakotas, and doing all else they can, in the main. The tariff picks their pockets. That is the trouble.
